TITLE V—NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE NATO AUTHORIZATION

The Secretary of Defense requested $98,000,000 under this title for the U.S. contribution to the NATO common-funded Infrastructure Program in fiscal year 1986. The committee is very supportive of the NATO Infrastructure Program and believes that the majority of construction requirements for Europe should be funded by it. It is essential to the United States that NATO fund our high priority facility to meet our obligations to pay our share of this vital program. The Committee approved $38,000,000.

* * * * *

surplus occurred because of the strength of the dollar against foreign currencies. The committee believes that the present strength of the dollar will continue through 1985 and there will once again be surplus funds available in 1986. Therefore, the committee has reduced the Authorization of Appropriations to $38,000,000 for fiscal year 1986.

AUTHORIZATION OF APPROPRIATIONS AND ADMINISTRATIVE PROVISIONS

The authorization of appropriations and administrative provisions contained in title VI are designed to provide certain restrictions as well as relief in execution of the authorization contained in the act. With relatively few exceptions they are essentially the same as those recurring provisions contained in past military construction authorization acts.

AUTHORIZATION OF APPROPRIATIONS

Section 2601 through 2605 is language which appears in each annual military construction Act except the dollar amounts now include the amounts of authorizations contained in the titles of this Act. It authorizes the appropriation of funds to carry out the functions authorized by separate titles of the Act.

ACTIVITIES INCLUDED WITHIN AUTHORIZATIONS FOR MILITARY FAMILY HOUSING

Section 606 defines the activities included in Sections 601 through 604 for Military Family Housing. Construction and acquisition included amounts for minor construction, improvements to existing military family housing units and facilities, relocation of military family housing units under Section 2827 of 10, United States Code, and architectural and engineering services and construction design. Support includes amount for operating expenses, leasing expenses, maintenance of real property expenses, payments of principal and interest on mortgage debts incurred, and payments of mortgage insurance authorized under Section 222 of the National Housing Act (12 U.S.C. 1715m).

EXPIRATION OF AUTHORIZATIONS; EXTENSIONS OF CERTAIN PREVIOUS AUTHORIZATION

Section 2607 is similar to the repeal provision in last year's act and continues in affect their previously established policy of repealing military construction authorizations that have not been used within a specified period after enactment. This section also exempts the following projects from repeal:

Two Army fiscal year 1984 heating system projects at Stuttgart, Germany, for which contracts cannot be awarded before October 1985 because of additional time required to complete an economic analysis to determine if the heating systems are more cost effective than district heat connections. District heat connections would also require congressional notification of scope substitution.

An Army fiscal year 1984 range modernization project at Wildflecken, Germany, for which a contract cannot be awarded before October 1985 because of a redesign necessary to satisfy environmental concerns. The current estimate exceeds the programmed amount and will require a cost variation report and reprogramming request to Congress.

All of the following seven Army projects are being held in abeyance pending resolution of contracting procedures in Greece.

Three Army fiscal year 1984 projects at Argyroupolis, Greece, for which contracts cannot be awarded before October 1985.

Three Army fiscal year 1984 projects at Penivolaki, Greece, for which contracts cannot be awarded before October 1985.

An Army fiscal year 1984 physical fitness training center project at Elefsis, Greece, for which a contract cannot be awarded before October 1985.

A Navy fiscal year 1984 project at Naval Air Station, Brunswick, Maine, for which a contract cannot be awarded before October 1985.

A Navy fiscal year 1984 project at Naval Air Station, Cecil Field, Florida, for which a contract cannot be awarded before October 1985 because of a redesign requirement based on severe operational problems experienced with a similar design at Naval Air Station, Lemoore, California.

A Navy fiscal year 1984 land acquisition at Naval Weapons Station, Concord, California, which cannot be consummated before October 1985 due to unresolved environmental issues involving the closing of several country roads.

A Navy fiscal year 1984 generator plan project at Naval Communications Area Master Station Eastern Pacific, Honolulu, Hawaii, for which a contract cannot be awarded before October 1985 because of a pending court order not due to be issued before that time.

An Air Force fiscal year 1984 air freight terminal project at Elmendorf Air Force Base, Alaska, for which a contract cannot be awarded before October 1985, because a requirement to redesign and resite the structure could extend beyond that date.

ESTABLISHMENT OF CERTAIN AMOUNTS REQUIRED TO BE SPECIFIED BY LAW

Section 2608 continues the procedure of establishing certain thresholds for the forthcoming military construction program. The table below compares the amounts specified by law for fiscal year 1985 to those approved by the committee for fiscal year 1986:

	Fiscal year 1985	Fiscal year 1986
Maximum amount for unspecified minor construction	$1,000,000	$1,000,000
Amount for reporting A/E contracts	300,000	300,000
Maximum amount per unit for family housing improvement	30,000	30,000
Maximum annual rental for family housing in the United States, Puerto Rico, or Guam	6,000	10,000
A. Maximum annual rental for a family housing unit leased in a foreign country	16,800	16,800
B. Maximum number of family housing units that may be leased in foreign countries at any one time	30,000	32,000
Maximum rental per year for family housing facilities leased in a foreign country	250,000	250,000

EFFECTIVE DATE FOR PROJECT AUTHORIZATIONS

Section 2609 makes the provisions of titles I, II, III, IV, and V effective October 1, 1985.

GUARD AND RESERVE FORCES FACILITIES

[In thousands of dollars]

	Enacted fiscal year 1985	Requested fiscal year 1986	Committee approved
Army National Guard	$101,683	$102,100	$100,200
Major construction	(73,630)	(70,821)	(68,921)
Minor construction	(19,053)	(18,917)	(18,917)
Planning and design	(9,000)	(12,362)	(12,362)
Army Reserve	71,700	70,700	69,400

Minor construction	(5,550)	(5,800)	(5,800)
Planning and design	(8,500)	(9,605)	(9,605)
Naval and Marine Corps Reserve	62,000	51,800	50,800
Major construction	(55,705)	(46,060)	(45,060)
Minor construction	(2,895)	(1,540)	(1,540)
Planning and design	(3,400)	(4,200)	(4,200)
Air National Guard	121,200	137,200	127,555
Major construction	(105,300)	(119,600)	(109,955)
Minor construction	(7,900)	(8,000)	(8,000)
Planning and design	(8,000)	(9,600)	(9,600)
Air Force Reserve	67,800	66,800	65,500
Major construction	(60,900)	(58,400)	(57,100)
Minor construction	(2,250)	(3,400)	(3,400)
Planning and design	(4,650)	(5,000)	(5,000)
Total	424,383	428,600	413,455
Major construction	(353,185)	(350,176)	(325,031)
Minor construction	(37,648)	(37,657)	(37,657)
Planning and design	(33,550)	(40,767)	(40,767)

The authorization of appropriations requests for fiscal year 1986 total $428,600,000, including major construction, minor construction, and planning and design is suport of facilities for the Guard and Reserve Forces. The committee recog-

nizes the increasingly vital role of the Guard and Reserve Force in improving the readiness capability of the total military force.

The following summary represents the status of lump sum authorization provided continuously since the Guard and Reserve Forces facilities program reverted to this method of authorization in 1963:

RESERVE FORCES FACILITIES—ESTIMATED STATUS OF LUMP SUM AUTHORIZATION [1] AS OF MARCH 1, 1985

[In thousands of dollars]

	Army		Naval and Marine Corps Reserve	Air Force		Total
	National Guard	Reserve		National Guard	Reserve	
Lump sum authorization (cumulative fiscal years (1963–85)	743,330	512,957	417,715	557,490	316,747	2,948,239
Estimate of authorization to be committed through fiscal year 1985	730,023	608,849	413,347	835,534	316,747	2,904,500
Uncommitted balance	13,307	4,108	4,368	21,956	0	43,739
Added by present bill	100,200	69,400	50,800	127,555	65,500	413,455
Total available, fiscal year 1986	113,507	73,508	55,168	149,511	65,500	457,194
Estimated commitments in fiscal year 1986	100,200	69,083	51,020	126,355	65,500	412,158
Estimated residual authorization, end fiscal year 1986	13,307	4,425	4,148	23,156	0	45,036

[1] Figures include Planning and Design and minor construction for fiscal year 1984–86 in accordance with Public Law 97–214.

Army Reserve	69,400
Navy and Marine Corps Reserve	50,800
Air National Guard	127,555
Air Force Reserve	65,500

surplus occurred because of the strength of the dollar against foreign currencies. The committee believes that the present strength of the dollar will continue through 1985 and there will once again be surplus funds available in 1986. Therefore, the committee has reduced the Authorization of Appropriations to $38,000,000 for fiscal year 1986.

AUTHORIZATION OF APPROPRIATIONS AND ADMINISTRATIVE PROVISIONS

The authorization of appropriations and administrative provisions contained in title VI are designed to provide certain restrictions as well as relief in execution of the authorization contained in the act. With relatively few exceptions they are essentially the same as those recurring provisions contained in past military construction authorization acts.

AUTHORIZATION OF APPROPRIATIONS

Sections 601 through 605 is language which appears in each annual military construction Act except the dollar amounts now include the amounts of authorizations contained in the titles of this Act. It authorizes the appropriation of funds to carry out the functions authorized by separate titles of the Act.

TITLE I—ARMY

The Army request under title I of S. 537 amounted to $3,650,755,000. The committee, after careful review and consideration of the Army request, approves the following programs.

	Army request	Total authorization
Military construction:		
Inside the United States	$1,362,590,000	$1,106,950,000
Outside the United States	494,220,000	488,170,000
Design	136,100,000	144,300,000
Minor construction	31,000,000	31,000,000
Total military construction	2,023,910,000	1,770,420,000
Military family housing:		
Construction, improvements, and design	356,051,000	288,080,000
Support	1,270,794,000	1,271,094,000
Total family housing	1,626,845,000	1,559,174,000
Grand total, Army authorization	3,650,755,000	3,329,594,000
Less:		
Military construction reduction for prior year savings		−106,000,000
Military construction general reduction for favorable currency rates in Europe and the Pacific:		
Korea		−7,000,000
Europe		−23,000,000
Military construction reduction for Davis-Bacon Act exemption		−51,000,000
Family housing, Fort Ord, CA, trailer site construction, authorization only		−1,081,000
Grand total, Army authorization for appropriation		3,141,513,000

MILITARY CONSTRUCTION

The Army presented an authorization request for appropriations for the military construction, Army, program as follows:

MAJOR COMMAND SURVEY

[In thousands of dollars]

POLLUTION ABATEMENT

The committee approved $19,540,000 for two pollution abatement projects. The projects are listed with the appropriate command's projects.

ENERGY CONSERVATION INVESTMENT PROGRAM

The committee approved $28,090,000 for 21 energy conservation investment projects. The projects are listed with the appropriate command's projects.

Inside the United States

U.S. Army Forces Command

The U.S. Army Forces Command (FORSCOM) has command responsibility for the units, installations, and activities that are principally related to readiness and defense missions. It has command readiness responsibility for most of the deployable troop units in the Army and is responsibile for organizing, training, equipping, and insuring the combat readiness of assigned troop units.

The committee approved $546,440,000 for 97 projects at the following twenty locations:

Location and project	*Thousands*
Fort Bragg, NC:	
Anti-Armor Range	4,050
Sniper Training Range	1,200

MILITARY DISTRICT OF WASHINGTON

The commander of the Military District of Washington (MDW) commands the troop units in the immediate Washington, D.C. area and is responsible for the operation of the installations under his jurisdiction.

The committee approved $8,300,000 for one project at the following location:

Location and project	Thousands
Fort Myer, VA: Administration Facility	8,300

U.S. ARMY MATERIEL COMMAND

The U.S. Army Materiel Command (AMC) is responsible for integrated, systemized management of the Army's wholesale materiel activities. The wholesale activities responsibilities range from research through acquisition and distribution to disposal.

The committee approved $122,570,000 for 37 projects at the following twenty locations:

Location and project	Thousands
Aberdeen Proving Ground, MD:	
Dining Facilities Modernization	4,400
Lighting Modifications	270
Total	4,670
Anniston Army Depot, AL:	
Ammunition Container Loading Yard	750
Machine Shop	3,150
Facility Energy Improvements	360
Vehicle Repair Facility	4,700
Total	8,960
Corpus Christi Army Depot, TX: Helicopter Blade Facility	4,400
Detroit Arsenal, MI: Window Replacement	320
Dugway Proving Ground, UT:	
Munitions Processing for Assembly Facility	2,150
Ammunition Storage	1,350
Photo Optics Maintenance Facility	1,550
Operations Building	3,600
Total	8,650
Navajo Army Depot, AZ: Ammunition Container Loading Yard	240
Picatinny Arsenal, NJ: Insulate Steam Lines	1,000
Pine Bluff Arsenal, AR: Close Hazardous Waste	19,000
Pueblo Army Depot Activity, CO: Ammunition Container Loading Yard	200
Redriver Army Depot, TX: Ammunition Container Loading Yard	820
Redstone Arsenal, AL:	
Unaccompanied Enlisted Personnel Housing	13,600
Hangar Missile Test Facility	5,300
Target and Seeker Measurement Facility	2,250
Propulsion Aging Laboratory	3,100
Total	24,250
Rock Island Arsenal, IL: Modernize Manufacturing Facility—REARM	29,000
Sacramento Army Depot, CA: Optical Facility	4,550
Savanna Army Depot, IL: Ammunition Container Loading Yard	510
Seneca Army Depot, NY:	
Vapor Barrier Addition	590
Energy Monitoring and Control System	360
Ammunition Container Loading Yard	460
Total	1,410
Sierra Army Depot, CA: Unaccompanied Enlisted Personnel Housing	2,600
Tooele Army Depot, UT:	
Health Clinic	2,000
CAMDS Laboratory	3,200
Storm Windows	240
Ammunition Container Loading Yard	550
Insulate Dock Doors	600
Building Insulation	700
R&D Science & Technology Facility	4,200
Total	11,490
Umatilla Depot Activity, OR: Ammunition Container Loading Yard	260
Yuma Proving Ground, AZ: Wall Insulation	240

The committee did not authorize the following projects:

Location and project	
Army Materials and Mechanics Research Center, MA: Water Pollution Abatement	770
Fort Wingate, NM: Ammunition Container Loading Yard	490
Letterkenny Army Depot, PA: Ammunition Truck Loading and Blocking	[1]1,550
Lake City Army Ammunition Plant, MD: Industrial Wastewater Treatment	[2]19,000

Location and project	
New Cumberland Army Depot, PA: Eastern Distribution Center	[2] 88,000
Redstone Arsenal, AL: Child Care Center	[3] 1,500
Sierra Army Depot, CA: Ammunition Container Loading Yard.	[4] 370

All projects deferred without prejudice unless otherwise noted.

[1] Review scope and cost.

[2] Deferred for review of possible 3rd party financing.

[3] Deferred pending 3rd party financing test.

[4] Review requirement.

ARMY AMMUNITION PLANTS

Army ammunition plants are used to produce conventional ammunition in support of war reserve, consumption, and training requirements including support to the other Services and selected allies.

The committee approved $15,950,000 for 13 projects at the following eight locations:

Location and project	*Thousands*
Holston Army Ammunition Plant, TN:	
Fire Protection Sprinkler Systems	320
Backup Electric Power	1,350
Total	1,670
Indiana Army Ammunition Plant, IN: Convert Shiphouses to Explosive Storage	210
Iowa Army Ammunition Plant, IA: Storm Drainage Improvements—Yard L	810
Kansas Army Ammunition Plant, KS: Rehabilitate Raw Water Intake	570
Lake City Army Ammunition Plant, MD: Enclose Warehouse Loading Docks	930
Louisiana Army Ammunition Plant, LA:	
Replace Explosion Protection Barricade	370
Herbicide & Pesticide Building	270
Total	640
Newport Army Ammunition Plant, IN: Binary Component Production Facility	[1] 8,000

[1] Revised Army cost estimate.

Redford Army Ammunition Plant, VA:	
Replace Explosion Protection Barricades	2,000
Replace Air Compressor—Building 4333	390
Alter Building for Nitrocellulose Weighing	520
Total	2,910
Sunflower Army Ammunition Plant, KS: Guanidine Nitrate Ship-Out Facility	210

U.S. ARMY INTELLIGENCE AND SECURITY COMMAND

The U.S. Army Intelligence and Security Command (INSCOM) is responsible for performing intelligence functions in support of Army field commanders and in fulfillment and support of those national intelligence responsibilities assigned to the Army.

The committee did not authorize the following projects:

Location and project	*Thousands*
Vint Hill Farm Station, VA:	
Warehouse Addition	[1] 950
Equipment Testing and Evaluation Facility	[2] 5,900

[1] Review scope and cost.

[2] Deferred without prejudice.

U.S. ARMY INFORMATION SYSTEMS COMMAND

The U.S. Army Information Systems Command (USAISC) has world-wide responsibilities for engineering, installing, operating, and maintaining Army's information systems, the Army portion of the defense communications system, and for providing, operating, and maintaining the Army's communications-electronics facilities.

The committee approved $2,050,000 for one for one projects at the following location:

Location and project	*Thousands*
Fort Huachuca, AZ: Operations Building	2,050

The committee did not authorize the following projects:

Location and project	*Thousands*
Fort Huachuca, AZ: Automated Record Fire Range	730

U.S. MILITARY ACADEMY

The U.S. Military Academy is responsible for instructing and training the corps of cadets in academic studies which are designed to lead the members to becoming commissioned officers of the Regular Army.

The committee approved $31,000,000 for six projects at the following location:

Location and project	*Thousands*
U.S. Military Academy, NY:	
Chemistry Laboratory Modernization	1,400
General Instruction Building	7,300
Expand Academic Facility	5,300
Energy Monitoring System Expansion	5,900
Modified Record Fire Range	2,500
Boiler Conversion	8,600
Total	31,000

U.S. ARMY HEALTH SERVICES COMMAND

The U.S. Army Health Services Command (HSC) is responsible for providing Army health services to authorized recipients in the United States and its territories. It is the principal proponent and developer of concepts, doctrine, material requirements, and organizations for the health care system for the Army in field environments.

The committee approved $9,720,000 for three projects at the following three locations:

Location and project	*Thousands*
Fort Detrick, MD: Operations Building	7,600
Tripler Army Medical Center, HI: Alternate Electric Power Source	970
Walter Reed Army Medical Center, D.C.: Energy Monitoring and Control System	1,150

The committee did not authorize the following projects:

Location and project	*Thousands*
Fitzsimons Army Medical Center, CO: Physical Fitness Training Center	2,550

U.S. ARMY MILITARY TRAFFFIC MANAGEMENT COMMAND

The U.S. Army Military Traffic Management Command (MTMC) is the Department of Defense single manager for traffic managment, land transportation, and common user ocean terminals.

The committee approved $4,730,000 for four projects at the following three locations:

Location and project	*Thousands*
Bayonne Military Ocean Terminal, NJ:	
Boiler and Refrigeration Plant Automation	1,000
Insulation and Weatherstripping	2,200
Total	3,200
Oakland Army Base, CA: Rail Head Loading Ramps	330
Sunnypoint Military Ocean Terminal, NC: Road and Staging Area Paving	1.200

U.S. ARMY CORPS OF ENGINEERS COMMAND

The mission of the U.S. Army Corps of Engineers Command (USACE) is to exercise command and operational control of and provide support to assigned engineer divisions, districts, research and development organizations and designated field activities engaged in world-wide military construction and civil works programs.

The committee approved $11,000,000 for one project at the following location:

Location and Project	*Thousands*
Humphrey Engineering Center, VA: Topographic Laboratory	11,000

SPECIAL PROJECT

Authorization for a special project was requested. The committee approved $3,000,000 for one project at an unspecified location.

OUTSIDE THE UNITED STATES

U.S. Army, Japan

The U.S. Army, Japan (USARJ) maintains bases in Japan to provide supplies, maintenance, storage, procurement, transportation, engineering, medical and other essential services required to support USARJ operational plans with a capability for expansion when needed.

The committee approved $1,050,000 for one project at the following location:

Location and project	*Thousands*
Japan: Medical Supply Warehouse	1,050

EIGHTH U.S. ARMY

The Eighth U.S. Army provides administrative, medical, and logistical support for U.S. Army units assigned to Korea.

The committee approved $146,080,000 for 64 projects in Korea at the following locations:

Location and project	*Thousands*
Camp Carroll:	
Controlled Humidity Warehouses	19,500
Field Maintenance Addition and Paint Shop	1,800
Satellite Communications Terminal Building	2,600
Battalion Headquarters	1,950
Hardstand	1,000
Medical Supply Operations Building	980
Medical Maintenance and Optical Shop	1,150
Calibration Laboratory	1,600
Unaccompanied Personnel Housing	9,800
Total, Camp Carroll	40,380
Camp Casey:	
Dining Facility	1,350
Company Operations and Supply	350
Tactical Equipment Shop	950
Dental Clinic	2,350
Company Operations and Supply	370
Company Operations and Supply	360
Canvas/Tent Repair Facility	440

Location and project	Thousands
Warehouse	700
Unaccompanied Personnel Housing	3,600
Tactical Equipment Shop	2,450
Total, Camp Casey	12,920
Camp Castle: Unaccompanied Enlisted Personnel Housing	1,100
Camp Colbern: Unaccompanied Officer Housing	550
Camp Edwards:	
Company Operations and Supply	360
Tactical Equipment Shop	730
Total, Camp Edwards	1,090
Camp Gary Owen: Unaccompanied Officer Housing	580
Camp Giant: Unaccompanied Personnel Housing	1,050
Camp Greaves: Moving Target Simulator Building	420
Camp Hovey: Unaccompanied Personnel Housing	8,300
Camp Howze:	
Tactical Equipment Shop	800
Moving Target Simulator Building	430
Tactical Equipment Shop	750
Total, Camp Howze	1,980
Camp Humphreys:	
Flight Simulator Building	1,850
25 Meter Firing Range	700
Unaccompanied Officer Housing	3,700
Unaccompanied Enlisted Personnel Housing	2,450
Unaccompanied Enlisted Personnel Housing	2,900
Total, Camp Humphreys	11,600
Camp Kittyhawk: Unaccompanied Enlisted Personnel Housing	1,600
Camp Kyle:	
Warehouses	2,650
Tactical Equipment Shop	930
Total, Camp Kyle	3,580
Camp Liberty Bell: Dining Facility	800
Camp Market: Tactical Equipment Shop	710
Camp Page:	
Electrical Distribution System Upgrade	2,350
Fuel Storage and Dispensing Facility	4,250
Dispensary/Dental Clinic	1,500
Airfield Operations Facilities	2,100
Tactical Equipment Shop	1,050
Central Heating and Cooling Plant	4,550
Water and Sewer Upgrade	3,200
Aircraft Maintenance Hangar	7,200
Unaccompanied Personnel Housing	6,400
Total, Camp Page	32,650
Camp Pelham: Unaccompanied Enlisted Personnel Housing	2,400
Camp Red Cloud:	
Company Operations and Supply	330
Tactical Equipment Shop	1,400
Total, Camp Red Cloud	1,730
Camp Stanley:	
Dispensary	1,150
Unaccompanied Personnel Housing	4,350
Total, Camp Stanley	5,500
K-16 Army Airfield:	
Flight Simulator Building	1,700
Tactical Equipment Shop	840
Paintshop	900
Unaccompanied Enlisted Personnel Housing	610
Total, K-16 Army Airfield	4.050
Location 177: Multi-purpose Activity Center	740
Yongin: Unaccompanied Personnel Housing Complex	2,550
Yongson:	
Warehouse Addition	2,050
Chapel and Religious Education Facility	2,150
Barracks and Movement Control Center	2,150
Provost Marshal Command/Control Facility	1,450
Unaccompanied Enlisted Personnel Housing	2,000
Total, Yongson	9,800

The committee did not authorize the following projects:

Location and project	Thousands
Camp Carroll: Medical Supply Warehouse	[1] 4,500
Location 177: Power Upgrade	[1] 1,550

[1] Review scope and cost.

BALLISTICS MISSILE DEFENSE SYSTEMS COMMAND

The mission of the Ballistic Missile Defense Systems Command (BMDSC) is to coordinate and control all work and associated resources in testing and logistical support involved in developing effective ballistic missile defense systems.

The committee approved $14,600,000 for three projects at the following location:

Location and project	Thousands
Kwajalein:	
Shore Erosion Control	2,400
Aircraft Maintenance Hangar	7,100
Upgrade Airfield	5,100
Total	14,600

U.S. ARMY FORCES COMMAND

The U.S. Army Forces Command has command responsibility for the units, installations, and activities that are principally related to readiness and defense missions. It has command readiness responsibility for the bulk of the deployable troop units in the Army and is responsible for organizing, training, equipping, and insuring the combat readiness of assigned troop units.

The committee approved $7,680,000 for three projects at the following location:

Panama:	
Barracks Modernization	4,550
HVAC Systems Modifications	930
Unaccompanied Enlisted Personnel Housing	2,200
Total	7,680

U.S. ARMY, EUROPE

The U.S. Army, Europe, provides administrative, medical, and logistical support for the U.S. Army, Europe, and the Seventh Army.

The committee approved $318,760,000 for 92 projects at the following locations:

Location and project	Thousands
Amberg, Germany: Ammunition Storage	850
Ansbach, Germany:	
Tactical Site Facilities	690
Dispensary/Dental Clinic	1,900
Tactical Equipment Shop	9,400
Dining Facilities Modernization	2,400
Total, Ansbach	14,390
Bad Kreuznach, Germany: Child Care Center	1,100
Bad Toelz, Germany: Dispensary/Dental Clinic	1,850
Bamberg, Germany:	
Boiler Plant Automation	6,000
Hardstand and Equipment Storage	490
Total, Bamberg	6,490
Baumholder, Germany: Child Care Center	900
Darmstadt, Germany:	
Ammunition Storage Phase I	600

TITLE II—NAVY

The Navy requested authorization of $2,879,949,000. The Committee after careful review and consideration of the Navy request, approved the following programs:

	Navy request	Committee approved
Military construction:		
Inside the United States	1,752,130,000	1,437,635,000
Outside the United States	243,300,000	221,195,000
Architectural and engineering services and construction design	139,260,000	141,860,000
Unspecified minor	21,560,000	21,560,000
Access roads	2,960,000	2,960,000
General reduction for bid savings	0	−100,000,000
General reduction for civilian end strength		−5,346,000
Reduction for future appropriation for NSB, Kings Bay, GA, drydock		−85,600,000
General reduction for Davis-Bacon		−39,000,000
Reduction NS, New York, NY, dredging		−11,700,000
Total MILCON authorized for appropriation	2,159,210,000	1,583,564,000
Military family housing:		
Construction, improvements, and design	154,000,000	154,000,000
Support	584,739,000	585,839,000
Total family housing	738,739,000	739,839,000
Grand total, Navy	2,897,949,000	2,323,403,000

MAJOR COMMAND SUMMARY

[Dollars in thousands]

Major command	Navy request	Committee approved
Inside the United States:		
U.S. Marine Corps	391,490	234,230

POLLUTION ABATEMENT

The committee approved $21,630,000 for 10 pollution abatement projects. The projects are listed with the appropriate command's projects.

ENERGY CONSERVATION INVESTMENT PROGRAM

The committee approved $3,580,000 for 5 energy conservation projects. The projects are listed with the appropriate command's projects.

MILITARY CONSTRUCTION, INSIDE THE UNITED STATES

U.S. MARINE CORPS

The Marine Corps is responsible for providing air and ground forces for the seizure and defense of advanced naval bases and the conduct of land operations incident to the prosecution of the naval campaign.

The committee approved $234,230,000 for 67 projects at the following 16 locations:

[In thousands of dollars]

Location and project	*Cost*
MCLB, Barstow, CA: Radiographic facility	530
MCAS, Beaufort, SC:	
Aircraft parking apron	570
Ordnance handling pad	4,150
Fuel pier extension	685
Air combat training facility	1,080
Hazardous waste facility	420
Total	6,905
MCMWTC, Bridgeport, CA: Automotive maintenance shop	1,470
MCCD, Camp Elmore, Norfolk, VA:	
Combat vehicle maintenance facility	715
Fleet marine force support warehouse	3,280
Total	3,995
MCB, Camp Lejeune, NC:	
Vehicle mechanics training building	2,550
Combat vehicle maintenance shop	2,740
Light armored vehicle maintenance shop	4,850
Electronics and communications maintenance shop	3,280
Bachelor enlisted quarters	9,500
Sewcrage system improvements	1,220
Total	24,140
MCB, Camp Pendleton, CA:	
Communications and electronics maintenance and storage facility	1,470
Communication improvements	6,000
Special intelligence support facility	1,520
Battalion headquarters	3,300
Bachelor enlisted quarters	7,950
Oil spill prevention	1,470
Armory addition	365
Tactical vehicle maintenance facility	3,100
Total	25,175
MCAF, Camp Pendleton, CA:	
Armory	570
Maintenance hangar	11,000
Automotive maintenance shop	1,270
Group headquarters building	1,470
Total	14,310
MCAS, Cherry Point, NC:	
Vertical take-off and landing pads	4,600
Maintenance hangar modifications	3,190
Parachute and survival equipment shop addition	490
Operations, training and maintenance facilities	3,970
Aviation supply warehouse	5,100
Bachelor enlisted quarters	19,100
Total	36,450
MCAS, El Toro, CA:	
Tactical support van pads	2,250
Aircraft direct fueling facilities	4,460
Communications conduit	980
Aircrew water survival training facility	1,960
Electronics and communications maintenance facilities	1,470
Bachelor enlisted quarters	17,640
Loading and unloading ramps	345
Hazardous waste facility and oil spill prevention	1,270
Total	30,375
MCAS, Kaneohe Bay, HI:	
Maintenance hangar improvements	940
Heavy gun shop	4,900
Ground support equipment facilities	1,290
Aviation supply facilities	1,760
Medical warehouse	4,310
Electrical distribution system improvements	4,220
Total	17,420
MCAS, New River, NC:	
Aviation ready fuel storage	2,000
Ground support equipment facility	1,130
Helicopter maintenance hangar	7,650
Total	10,780
MCRD, Parris Island, SC:	
Clothing issue building	2,630
Recruit training building	980
Total	3,610
MCAS, Tustin, CA:	
Aircraft parking apron	4,450
Helicopter maintenance training building	2,250
Maintenance hangar	8,330
Helicopter engine maintenance shop	2,940
Total	17,970
MCAGCC, Twentynine Palms, CA:	
Battalion and battery headquarters	2,840
Brigade headquarters	2,880
Bachelor enlisted quarters	11,570
Total	17,290
MCDEV&EDCOM, Quantico, VA:	
Bachelor enlisted quarters	5,200
Sewerage system	1,860
Total	7,060
MCAS, Yuma, AZ:	
Attack aircraft training building	3,150
Operational trainer facility	2,550
Maintenance hangar	4,300
Engine test cell	3,570
Power check pads	1,130
Battalion headquarters	2,050
Total	16,750

The committee did not authorize the following projects:

Location of project	*Cost*
MCAS, Beaufort, SC: Child care center	[1] 900
MCB, Camp Pendleton, CA: Santa Margarita water project	[2] 148,000

Location of project	Cost
MCAS, Cherry Point, NC: Child care center	[1] 1,490
MCAGCC, Twentynine Palms, CA:	
Physical fitness center	[3] 5,380
Child care center	[1] 1,490

[1] Pending third party test.
[2] Scope not resolved.
[3] Budget constraints.

CHIEF OF NAVAL RESEARCH

The Chief of Naval Research is responsible for naval research related to the maintenance of future naval power and the preservation of the national security.

The committee approved $28,900,000 for one project at the following location:

Location, project, and cost:

NRL, Washington, DC, electronic warfare laboratory, $28,900,000.

OFFICE OF THE COMPTROLLER OF THE NAVY

The mission of the Office of the Comptroller of the Navy is to formulate principles and policies, and prescribes procedures and systems which will exercise effective control over the financial operations of the Department of the Navy through the application of sound accounting principles and progressive modernization of the programming, budgeting and financial management system development, financial analysis and auditing practices of the Department of the Navy.

The committee approved $2,940,000 for one project at the following location:

Location, project, and cost:

NFC, Cleveland, OH: Data processing center addition, $2,940,000.

CHIEF OF NAVAL OPERATIONS

The Chief of Naval Operations is responsible for certain central executive organizations, assigned shore activities, and the operating forces of the Navy.

The committee approved $30,090,000 for 8 projects at the following 8 locations:

[In thousands of dollars]

Location and project	Cost
NA, Annapolis, MD: Public works shops and storage	1,880
NAVSPACECOM, Dahlgren, VA: Command and control center	4,700
NARDAC, Jacksonville, FL: Data processing center	10,300
NSPSUFLDSTA, Lewisville, AR: Antenna modernization and land acquisition	675
NTISA, Mayport, FL: Tactical data system facility	470
NTISA, North Island, CA: Headquarters building	585
NARDAC, Norfolk, VA: Data processing center	10,880
NAVSPSURFLDSTA, San Diego, CA: Antenna modernization	600

The committee did not authorize the following projects:

[In thousands of dollars]

Location and project	Cost
NA, Annapolis, MD: Brigade activities center	[1] 21,600
NPGS, Monterey, CA: Ocean sciences academic building	[2] 13,000
INTELCENPAC, Pacific, Pearl Harbor, HI: Intelligence center addition	[3] 2,900
COMNAVDIST, Washington, DC: Administrative office modernization	[4] 6,300

[1] Reduce scope.
[2] Consider lesser cost alternative.
[3] Budget constraints.
[4] Not justified.

COMMANDER IN CHIEF, ATLANTIC FLEET

The Commander in Chief, Atlantic Fleet, is responsible for air, surface, submarine and fleet marine forces and supporting shore installations within the Atlantic region.

The committee approved $125,565,000 for 25 projects at the following 11 locations:

[Dollars in thousands]

Location and project:	Cost
NAS, Brunswick, ME:	
Patrol aircraft maintenance training building	$3,040
NAS, Cecil Field, FL:	
Air combat training range	26,250
Aircraft parking apron	2,800
Training range debriefing facility	785
Total	29,835
NS, Charleston, SC:	
Bachelor enlisted quarters	9,600
Storm sewer	360
Total	9,960
NAS, Jacksonville, FL:	
Anti-submarine warfare aircraft training buildings	5,800
Brig	6,470
Total	12,270
NAVPHIBSE, Little Creek, VA:	
Explosive ordnance disposal group complex	4,560
Bachelor enlisted quarters	7,740
Total	12,300
NS, Mayport, FL:	
Fleet training support facility	810
Fire and rescue station addition	210
Helicopter maintenance hangar	9,800
Total	10,820
NSB, New London, CT:	
Submarine magnetic silencing facility	365
NS, New York, NY:	
Site improvements	3,920
Land acquisition	2,940
Dredging	11,700
Total	18,560
NAS, Norfolk, VA:	
Mine countermeasures helicopter training building	1,130
Warning aircraft training building addition	815
Helicopter Maintenance hangar	7,160
Oil spill prevention	1,570
Total	10,675
NS, Norfolk, VA:	
Dredging	800
NAS, Oceana, VA:	
Maintenance hangar	11,000
Steam and condensate systems	840
Land acquisition	5,100
Total	16,940

The committee did not authorize the following projects:

[Dollars in thousands]

Location and project	Cost
NAVPHIBSE, Little Creek, VA:	
Combat swimmer training facility	$4,070 [1]
NS, Mayport, FL:	
Child care center	2,240 [2]
NF, Radio Island, NC:	
Equipment washdown facility and land acquisition	17,640 [3]

[1] Budget constraints.
[2] Pending third party test.
[3] Consider lesser cost alternatives.

COMMANDER IN CHIEF, PACIFIC FLEET

The Commander in Chief, Pacific Fleet is responsible for air, surface, submarine and fleet marine forces and supporting shore installations within the Pacific region.

The committee approved $137,170,000 for 27 projects at the following 17 locations:

[Dollars in thousands]

Location and project	Cost
NF, Adak, AK:	
Electric power plant	$2,650
NAS, Alameda, CA:	
Dredging	8,650
NSB, Bangor, WA:	
Bachelor enlisted quarters	5,200
PHIBTASKFORCE, Camp Pendleton, CA:	
Landing craft air cushion complex	9,020
NAVPHIBSE, Coronado, CA:	
Waterfront operations building	3,050
Amphibious forces training building	3,500
Sealift support maintenance facility	4,400
Bachelor enlisted quarters	5,200
Total	16,150
NS, Everett, WA:	
Land acquisition	17,640
NAS, Fallon, NV:	
Strike warfare training building	7,350
Aircraft parking apron	8,230
Range improvements	12,000
Control tower	2,350
Utility systems improvements	6,570
Total	36,500
NAS, Lemoore, CA:	
Helicopter escape trainer	2,300
NS, Long Beach, CA:	
Bachelor enlisted quarters	16,000
NAS, Miramar, CA:	
Hazardous waste facility	385
NAS, North Island, CA:	
Helicopter maintenance hangar	13,130
Ordnance facilities	5,463
Total	18,593
NSB, Pearl Harbor, HI:	
Bachelor enlisted quarters modernization	2,900
NS, San Diego, CA:	
Deperming pier	9,110
Degaussing building	980
Dredging	6,107
Total	16,197
NSB, San Diego, CA:	
Electrical distribution system improvements	14,120
NS, Seattle, WA:	
Brig	3,480
NS, Mare Island, Vallego, CA:	
Telephone lines	735
NAS, Whidbey Island, WA:	
Maintenance hangar improvements	2,650

The committee did not authorize the following projects:

[Dollars in thousands]

Location and project	Cost
NS, Long Beach, CA: Construction battalion unit complex	1,230 [2]
COMOCSYSPAC, Pearl Harbor, HI: Naval ocean processing facility addition	1,180 [1]
NS, San Diego, CA: Child care center	845 [3]

[1] Budget constraints.
[2] Not justified.
[3] Pending third party test.

CHIEF OF NAVAL EDUCATION AND TRAINING

The Chief of Naval Education and Training is responsible for the education and training of all naval personnel.

The committee approved $135,555,000 for 33 projects at the following 22 locations:

[Dollars in thousands]

Location and project	Cost
FMWTC, Charleston, SC: Mine warfare training facility	$1,180
NAVPHISCH, Coronado, CA: Landing craft air cushion training building	5,900
SWOSCOLCOMDET, Coronado, CA: Surface warfare officer training building	5,200
NAS, Corpus Christi, TX: Land acquisition	1,960
Electrical switching station	2,400
Total	4,360
FCTCLANT, Dam Neck, VA: Radarman training building	7,150
NAVEODSCOL, Eglin, FL: Explosive ordnance disposal training facilities	13,700
NAVCONSTRACEN, Gulfport, MS: Seabee training buildings	2,460
NAVPHIBSCOL, Little Creek, VA: Amphibious force training building improvements	420
NAS, Memphis, TN: Radar operational facility	835
Aviation mechanics training buildings	6,750
Air traffic controller training building	2,740
Naval legal service building	1,370
Brig	3,180
Total	14,875
NAS Meridian, MS: Road improvements	450
NAVSUBSCH, New London, CT: Submarine training building	13,300
NETC, Newport, RI: Bachelor officer quarters	8,700
Construction battalion unit complex	1,180
Fire fighting training facility	8,800
Facility energy improvements	1,570
Senior enlisted academy	3,430
Municipal sewer connection	4,600
Total	28,280
NTC, Orlando, FL: Barracks	9,400
NAS, Pensacola, FL: Facility energy improvements	225
NTTC, Pensacola, FL: Crypto training building	1,370
Bachelor enlisted quarters improvements	4,300
Total	5,670
NAVCONSTRAC, Port Hueneme, CA: Seabee training buildings	4,800
FASWTCPAC, San Diego, CA: Anti-submarine warfare training building	7,850
FCTCPAC, San Diego, CA: LAMPS MK III training building	305
FTC, San Diego, CA: Damage control training facility	4,750
NTC, San Diego, CA: Patternmaker training building	2,900
NTTC, San Francisco, CA: Underway replenishment training building	1,570
NAS, Whiting Field, FL: Pay and personnel support office	810

The committee did not authorize the following projects:

[Dollars in thousands]

Location and project	Cost
NAVPHISCH, Coronado, CA: Combat swimmer trainer facility	$3,430 [1]
FCTCLANT, Dam Neck, VA: Chapel and religious education building	2,490 [1]
NTC, Great Lakes, IL: Diesel engineman training facility addition	4,360 [1]
Barracks	10,600 [1]
Physical fitness center	5,780 [1]

[1] Budget constraints.

NAVAL MILITARY PERSONNEL COMMAND

The Naval Military Personnel Command is responsible for the procurement, distribution, administration and motivation of the military personnel of the regular and reserve components of the Navy; and for the management and administration of the Navy's civilian personnel; and for development of service wide programs for improvement of human resources management.

The committee approved $1,900,000 for a project at the following location:

[In thousands]

Location and project	Cost
NAVBAND, Washington, DC: Navy band training building modernization	1,900

NAVAL MEDICAL COMMAND

The Naval Medical Command is responsible for the health of Navy and Marine Corps personnel, their dependents, and other personnel.

The committee approved $67,760,000 for 7 projects at the following 7 locations:

[In thousands of dollars]

Location and project	Cost
NAVMEDCLIN, Annapolis, MD: Naval hospital	12,540
NH, Groton, CT: Hospital expansion	8,720
NH, Jacksonville, FL: Hospital addition	18,600
NH, Long Beach, CA: Medical clinic	6,300
NH, Oak Harbor, WA: Hospital addition	13,900
NH, Pensacola, FL: Medical and dental clinic	7,250
NH, San Diego, CA: Fire station	450

CHIEF OF NAVAL MATERIAL

The Naval Material Command is the single integated material support agency for the Navy. It is responsible for the development, procurement and support of total weapons systems, depot maintenance, supply management and facilities support.

The committee approved $625,810,000 for 68 projects at the following 31 locations:

[In thousands of dollars]

Location and project	Cost
Puget Sound NSY, Bremerton WA: Inactive submarine mooring	620
Underwater equipment laboratory addition	960
Electrical distribution system improvements and land acquisition	20,650
Waterfront security lighting	765
Municipal sewer connection	7,950
Total	30,945
NSC, Bremerton WA: POL storage facilities	1,520
NWS, Charleston, SC: Ammunition overhaul shop	3,230
POMFLANT, Charleston, SC: Fire protection water tank	1,620
NARF, Cherry Point, NC: Hazardous and flammable storage facility	1,720
NWC, China Lake, CA: Pay and personnel support office	785
Fixed point test facility	1,670
Ordnance research laboratory	6,866
Total	9,315
NWS, Earl NJ: Mine assembly facility	780
Weapons handling facility	2,940
Total	3,720
NCBC, Gulfport, MS: Seabee equipment maintenance facility	2,550
NOS, Indian Head, MD: Bachelor officer quarters modernization	1,570
NSC, Jacksonville, FL: Waterfront transit shed	285
Fuel truck loading facility	1,270
Total	1,555
NUSWES, Keyport, WA: Torpedo assembly building	660
Hazardous and flammable storehouse	1,780
Total	2,440
NSB, Kings Bay, GA: Communications antenna facilities	1,670
Tender mooring and lay berths	23,500
Dredging	23,380
Explosives handling wharf	39,010
Strategic weapons facility (Phase II)	91,360
Drydock	[1]125,000
Command and control systems shop	7,160
Controlled industrial facility	7,550
Hull shops	12,740
Refit warehouse	7,920
Strategic weapons magazines	13,700
Consolidated personnel support facility	3,230
Bachelor enlisted quarters and administrative facility	5,400
Community impact assistance	6,140
Utilities and site improvements	35,700
Total	404,060
NAEC, Lakehurst, NJ: Energy monitoring and control system	600

Location and project	Cost
Long Beach NSY, Long Beach, CA: Sonar rubber dome facility	7,160
NOS, Louisville, KY:	
Gun shop and land acquisition	4,210
Plating shop modernization	12,740
Total	16,950
NARF, Norfolk, VA:	
Heavy processes shops	11,170
Hazardous and flammable storage facility	1,910
Total	13,080
NSC, Norfolk, VA: Warehouse modernization	2,350
NARF, North Island, CA:	
Engineering laboratory	9,120
Heating, ventilation, air conditioning	345
Total	9,465
NSC, Oakland, CA:	
Dredging	6,570
Oil spill prevention	1,320
Total	7,890
Pearl Harbor NSY, Pearl Harbor, HI: Hazardous and flammable storage facility	1,860
NPWC, Pearl Harbor, HI: Electrical distribution system improvements	13,700
NPWC, Pensacola, FL: Electrical distribution system improvements	8,430
PMTC, Point Mugu, CA: Bachelor enlisted quarters	10,200
NCBC, Port Hueneme, CA:	
Seabee materiel transit facility	6,960
Seabee operations headquarters	5,880
Bachelor enlisted quarters	5,100
Cogeneration utility plant addition	3,630
Total	21,570
NSWSES, Port Hueneme, CA: Weapon systems engineering buildings	10,780
NESEC, Portsmouth, VA:	
Communications systems laboratory addition	825
Shipboard electronics support laboratory	880
Utilities improvements	1,550
Total	3,255
Norfolk NSY, Portsmouth, VA:	
Dockside work center addition	530
Bachelor officer quarters	5,600
Mess hall	560
Total	6,690
NSC, San Diego, CA:	
Fire protection system	1,760
Cold storage warehouse	5,340
Total	7,100
NAVELECSYSENGACT, St. Inigoes, MD:	
Command, control and communications laboratory	7,850
Utilities improvements	3,140
Combatant communications assembly and test facility	4,560
Total	15,550
Mare Island NSY, Vallejo, CA: Security lighting (Total)	815
NMINEWARENGACT, Yorktown, VA: Mine warfare systems laboratory (Total)	4,120

[1] To be incrementally funded. Authorization for appropriations, $40,000,000.

The committee did not authorize the following projects:

[In thousands of dollars]

Location and project	Cost
NARF, Alameda, CA:	
Paint and finishing hangar	[1] 24,200
Energy monitoring and control system	[1] 780
NWS, Charleston, SC: Gymnasium	[1] 840
NCBC, Port Hueneme, CA: Chapel and religious education building	[1] 2,080
NESEC, San Diego, CA: Fleet support center	[2] 27,450
NADC, Warminster, PA: Navigation equipment laboratory	[1] 4,220

[1] Budget constraints.
[2] Reconsider alternatives.

NAVAL OCEANOGRAPHY COMMAND

The Naval Oceanography Command is responsible for providing research and operational data of the environment to support the Navy and other services. Data includes mapping, charting and geodesy publications.

The committee approved $4,890,000 for 2 projects at the following 2 locations:

[Dollars in thousands]

Location and project	Cost
NAVOCEACMDFAC, Jacksonville, FL: Meteorological building addition	390
NAVWESTOCEANCEN, Pearl Harbor, HI: Meteorological building	4,500

NAVAL TELECOMMUNICATIONS COMMAND

The Naval Telecommunications Command is responsible for providing communications by satellite and radio for administrative functions and command and control of Navy ships.

The committee approved $785,000 for a project at the following location:

[Dollars in thousands]

Location and project	Cost
NRS, Sugar Grove, WV: Sewerage system	785

NAVAL SECURITY GROUP COMMAND

The Naval Security Group Command is responsible for signal intelligence, protection of U.S. Navy signals and other exploitable emissions, special communications systems, technical research and development for the creation of new systems and equipment and Navy-wide support of the Armed Forces Courier Service.

The committee approved $6,040,000 for 6 projects at the following 4 locations:

[Dollars in thousands]

Location and project	Cost
NSGA, Adak, AK: Security improvements	980
NSGA, Northwest, Chesapeake, VA: Strategic facilities and public works shop	835
Bachelor enlisted quarters modernization	550
Total	1,385
NSGA, Skaggs Island, CA: Computer suport warehouse	395
NSGA, Winter Harbor, ME:	
Public works shop	880
Ocean surveillance building addition	2,400
Total	3,280

MILITARY CONSTRUCTION, OUTSIDE THE UNITED STATES, UNITED STATES MARINE CORPS

For the Marine Corps outside the United States, the committee approved $7,015,000 for 5 projects at the following 3 locations:

[Dollars in thousands]

Location and project	Cost
MCAS, Iwakuni, JP:	
Operational trainer facility	645
Aviation armament shop	1,130
Total	1,775
MCAS Futenma, Okinawa, JP:	
Refueling vehicle shop	1,320
Ground support equipment shop addition	1,670
Total	2,990
MCB Camp Smedley D. Butler, Okinawa, JP: Heavy gun shop	2,250

COMMANDER IN CHIEF, ATLANTIC FLEET

For the Commander in Chief, Atlantic Fleet, outside the United States, the committee approved $69,100,000 for 10 projects at the following 6 locations:

[Dollars in thousands]

Location and project	Cost
NF Argentina, NF, CAN: Fire protection system	700
NF, Antigua, W.I.: Naval facility upgrade	2,410
NS, Guantanamo Bay, CU:	
Bachelor enlisted quarters—new and modernization	10,060
Communications facilities	2,750
Bachelor officer quarters	9,600
Total	22,410
NS, Keflavik, IC:	
Airfield improvements	20,510
Aircraft acoustical enclosure support facilities	1,270
Total	21,780
LANTFLTWPNTRFAC, Roosevelt Roads, PR:	
Underwater range operations center	4,100
Range operations center	3,000
Total	7,100
NS, Roosevelt Roads, PR: Bachelor quarters	14,700

COMMANDER IN CHIEF, PACIFIC FLEET

For the Commander in Chief, Pacific Fleet, outside the United States, the committee approved $100,710,000 for 17 projects at the following 9 locations:

[Dollars in thousands]

Location and project	Cost
NAS, Cubi Point, RP: Maintenance hangar	19,200

Location and project	Cost
NSF, Diego Garcia, IO:	
Lighted navigational aids	510
Antenna support facilities	1,320
Fleet support warehouse	2,500
Laundry building addition	3,280
Bachelor officer quarters	8,920
Total	16,530
NAF, Diego Garcia, IO:	
Fire station addition	980
Maintenance hangar	15,200
Weapons complex	6,270
Total	22,450
NM, Guam:	
Wharf utilities	6,570
Bachelor enlisted quarters and mess hall	4,700
Total	11,270
NSD, Guam: Cold storage warehouse addition	6,550
NS, Guam: Fleet hospital support facilities	10,200
NSRF, Guam: Sand storage silo	990
NM, Subic Bay, RP: Fire protection	250
NSRF, Subic Bay, RP:	
Shipfitting shops	4,070
Wharf electrical distribution system improvements	9,200
Total	13,270

COMMANDER IN CHIEF, U.S. NAVAL FORCES EUROPE

The Commander in Chief, Naval Forces Europe, is responsible for the Naval component of the unified U.S. European Command. The committee approved $22,795,000 for 7 projects at the following 5 locations:

[Dollars in thousands]

Location and project	Cost
NAVACTS, London, UK:	
Support building acquisition	785
Fleet hospital support facilities	6,850
Total	7,635
NSA, Naples, IT: Supply facilities	7,750
NS, Rota, SP: Fire alarm system	1,030
NAS, Sigonella, IT:	
Operations vehicle garage	2,250
Administrative and security facilities	3,680
Total	5,930
PERSUPACT, London, UK: Pay and personnel support office	450

CHIEF OF NAVAL MATERIAL

The Chief of Naval Material is the single integrated material support agency for the Navy. It is responsible for the development, procurement and support of total weapons systems, depot maintenance, supply management and facilities support.

The committee approved $5,480,000 for 2 projects at the following 2 locations:

[Dollars in thousands]

Location and project	Cost
NPWC, Guam: Steam system improvements	1,080
NPWC, Yokosuka, JP: Electrical distribution system improvements	4,400

NAVAL TELECOMMUNICATIONS COMMAND

For the Naval Telecommunications Command, outside the United States, the committee approved $11,415,000 for 4 projects at the following 3 locations:

[Dollars in thousands]

Location and project	Cost
NAVCAMSWESTPAC, Guam: Bachelor enlisted quarters modernization	8,330
NCS, Harold E. Holt, Exmouth, Australia: Exmouth, Australia:	
Small craft boathouse	390
Cooling systems conversion	2,300
Total	2,690
NCS, Rota, SP: Operational storage	395

The committee did not authorize the following projects:

[Dollars in thousands]

Location and project	Cost
NAVCAMSWESTPAC, Guam: Child care center addition	[1] 615
NCS, Yokosuka, JP: Fleet operational control center	[2] 21,490

[1] Pending third party test.
[2] Seek JFIP funding.

NAVAL SECURITY GROUP COMMAND

For the Naval Security Group Command, outside the United States, the committee approved $3,700,000 for a project at the following location:

[Dollars in thousands]

Location and project	Cost
NSGD, Diego Garcia, 10: Ocean surveillance building addition	3,700

VARIOUS LOCATIONS

The following projects are at various locations. The committee approved $166,380,000 for 3 projects:

[Dollars in thousands]

Location and project	Cost
Various: Access roads	2,960
Various: Unspecified minor	21,560
Various: Architectural and engineering services and construction design	141,860

HOST NATION INFRASTRUCTURE SUPPORT

Host Nation Infrastructure Support outside the United States will support NATO projects which the United States is host nation.

The committee approved $980,000 at various locations.

[Dollars in thousands]

Location and project	Cost
Various locations host nation infrastructure support	980

SUMMARY OF NAVY PROGRAM ACTION

A summary of actions taken on the request of the Navy is tabulated by project as follows:

[In thousands of dollars]

Location and project	Cost
Navy request	2,159,210
United States Marine Corps:	
MCAS, Beaufort, SC: Child Care Center	[1] −900
MCB, Camp Pendleton, CA: Santa Margarita Water Project	[2] −148,000
MCAS: Cherry Point, NC: Child Care Center.	[1] −1,490
MCAGCC, Twentynine Palms, CA:	
Physical Fitness Center	[3] −5,380
Child Care Center	[1] −1,490
Chief of Naval Operations:	
NA, Annapolis, MD: Brigade Activities Center	[4] −21,600
NPGS, Monterey, CA: Ocean Sciences Academic Building	[5] −13,000
INTELCENPAC, Pearl Harbor, HI: Intelligence Center Addition	[3] −2,900
COMNAVDIST, Washington DC: Administrative Office Modernization	[6] −6,300
Commander in Chief, Atlantic Fleet:	
NAVPHIBSE, Little Creek, VA: Combat Swimmer Training Facility	[3] −4,070
NS, Mayport, FL: Child Care Center	[1] −2,240
NF, Radio Island, NC: Equipment Washdown Facility and Land Acquisition	[5] −17,640
Commander in Chief, Pacific Fleet:	
NS, Long Beach, CA: Construction Battalion Unit Complex	[6] −1,230
COMOCSYSPAC, Pearl Harbor, HI: Naval Ocean Processing Facility Addition	[3] −1,180
NS, San Diego, CA: Child Care Center	[1] −845
Chief of Naval Education and Training:	
NAVPHISCH, Coronado, CA: Combat Swimmer Trainer Facility	[3] −3,430
FCTCLANT, Dam Neck, VA: Chapel and Religious Education Building	[3] −2,490
NTC, Great Lakes, IL:	
Diesel Engineman Training Facility Addition	[3] −4,360
Barracks	[3] −10,600
Physical Fitness Center	[3] −5,780
Chief of Naval Material:	
NARF, Alameda, CA: Paint & Finishing Hangar Energy monitoring control system	[3] −780
NWS, Charleston, SC: Gymnasium	[3] −840
NCBC, Port Hueneme, CA: Chapel and Religious Education Building	[3] −2,080
NESEC, San Diego, CA: Fleet Support Center	[7] −27,450
NADC, Warminster, PA: Navigation Equipment Laboratory	[3] −4,220
Naval Telecommunications Command:	
NAVCAMWESTPAC, Guam: Child Care Center	[1] −615
NCS Yokosuka, JP: Fleet Operational Control Center	[8] −21,490
General Reduction for bid savings	−100,000
Reduction for future appropriations for NSB Kings Bay, GA Drydock	−85,600
General Reduction for civilian end strength	−5,346
Architectural and engineering services and construction design	+2,600

Location and project	Cost
General Reduction for Davis-Bacon	−39,000
Reduction for NS New York, NY, Dredging	−11,700
Total military construction authorized for appropriation	1,583,564

[1] Pending third party test.
[2] Scope not resolved.
[3] Budget constraints.
[4] Reduce scope.
[5] Consider lesser cost alternatives.
[6] Not justified.
[7] Reconsider alternatives.
[8] Seek JFIP funding.

FAMILY HOUSING

The Navy's request for the Family Housing program and the committee's recommendations are as follows:

NAVY FAMILY HOUSING

[In thousands of dollars]

Request	Request	Committee change	Revised total
Construction of new family housing (1,227 units)	113,050	0	113,050
Post acquisition construction	40,950	0	40,950
Construction improvements	(34,020)	0	(34,020)

NAVY FAMILY HOUSING—Continued

[In thousands of dollars]

Request	Request	Committee change	Revised total
Planning	(6,930)	0	(6,930)
Total authorization for appropriation request, construction	154,000	0	154,000
Operations and maintenance:			
Operating Expenses:			
Management account	(42,155)	+1,100	(43,255)
Services account	(29,946)	0	(29,946)
Utilities account	(181,343)	0	(181,343)
Furnishing account	(13,636)	0	(13,636)
Miscellaneous account	(420)	0	(420)
Total operating expenses	267,500	+1,100	268,600
Total maintenance account	277,458	0	277,458
Leasing	22,479	0	22,479
Domestic	(3,545)	0	(3,545)
Foreign	(18,934)	0	(18,934)
Debt payment	17,302	0	17,302
Principal	(16,239)	0	(16,239)
Interest payment family housing	(822)	0	(822)
Servicemen's mortgage insurance premiums for existing coverage	(241)	0	(241)
Total authorization request O&M and debt payment	584,739	+1,100	585,839
Total authorization for appropriation request, construction, O&M and debt payment	738,739	+1,100	739,839

The Navy Family Housing Program authorization for appropriations request totaled $738,739,000. In addition, $11,429,000 will be applied to the program from anticipated reimbursements.

NEW CONSTRUCTION

The committee approved the construction or acquisition of 1,227 units of family housing in support of housing at the following locations:

[In thousands of dollars]

Location and project		Cost
NAS, Adak AK: 100 units	15,500	15,500
MCAS El Toro, CA: 282 units	29,800	29,800
PWC, San Diego, CA: 200 units	15,200	15,200
MCAGCC, Twentynine Palms, CA: 100 units	8,400	8,400
FTGP, Warner Springs, CA: 44 units	4,400	4,400
NWS, Earle, NJ: 200 units	15,400	15,400
ASO, Philadelphia, PA: 1 unit	170	170
PWC, Subic Bay, RP: 300 units	24,180	24,180
Total: 1,227 units	113,050	113,050

TITLE III—AIR FORCE

The Air Force requested authorization of $2,917,048,000. The committee, after careful review and consideration of the Air Force request, approved $2,624,041,000 for the following programs:

	Air Force request	Total authorization	Less amounts not authorized for appropriation	Total authorized for appropriation
Military Construction:				
Inside the United States	1,265,517,000	1,143,707,000	[1] −107,000,000	1,036,707,000
Outside the United States	511,497,000	481,100,000	[2] −32,000,000	449,100,000
Architectural and engineering services	144,096,000	144,096,000		144,096,000
Unspecified minor construction	22,000,000	22,000,000		22,000,000
Defense access roads	30,240,000	30,240,000		30,240,000
Total Military Construction authorization	1,973,350,000	1,821,143,000	−139,000,000	1,682,143,000
Military family housing:				
Construction	214,400,000	212,600,000		212,600,000
Support	729,298,000	729,298,000		729,298,000
Total Family Mousing authorization	943,698,000	941,898,000		941,898,000
Total Air Force authorization	2,917,048,000	2,763,041,000	−139,000,000	2,624,041,000

[1] Includes $39 million reduction because of Davis-Bacon rates and $68 million reduction for anticipated bid savings.
[2] General reduction of $32 million for anticipated bid savings.

MILITARY CONSTRUCTION, OVERVIEW

The Air Force's authorization request for the military construction program and the committee's recommendations are as follows:

MAJOR COMMAND SUMMARY

[In thousands of dollars]

Major command	Air Force request	Committee approved
Military construction:		
Inside the United States:		
Air Force Logistics Command	186,148	172,298
Air Force Systems Command	68,760	49,410
Air Force Reserve	500	0
Air National Guard	12,370	12,370
Air Training command	100,300	97,850
Air University	14,000	11,200
Alaskan Air Command	105,360	79,860
Military Airlift Command	167,540	150,380
Pacific Air Forces	5,530	3,330
Space Command	11,250	11,250
Special Project	55,000	55,000
Strategic Air Command	337,014	327,614
Tactical Air Command	191,435	162,835
U.S. Air Force Academy	10,310	10,310
General reduction for bid savings	0	−68,000
General reduction for Davis-Bacon	0	−39,000
Total, inside the United States	1,265,517	1,036,007

MAJOR COMMAND SUMMARY—Continued

[In thousands of dollars]

Major command	Air Force request	Committee approved
Outside the United States:		
Military Airlift Command	38,885	28,785
Pacific Air Forces	133,280	129,930
Space Command	38,450	38,450
Tactical Air Command	23,172	23,172
U. S. Air Forces in Europe	277,710	260,763
General reduction for bid savings	0	−32,000
Total, outside the United States	511,497	449,100
Support:		
Architectural and Engineering Services	144,096	144,096
Unspecified Minor Construction	22,000	22,000
Defense Access Roads	30,240	30,240
Total Support	196,336	196,336
Total Military Construction	1,973,350	1,682,143
Military Family Housing: Total Military Family Housing	943,698	941,898
Total, Air Force	2,917,048	2,624,041

FACILITY CATEGORY SUMMARY

[In thousands of dollars]

Facility category	Air Force request	Committee approved
Military construction:		
Operational	459,964	460,544
Training	108,940	91,440
Maintenance/production	355,809	352,053
Research, development, test & evaluation	67,250	56,350
Supply	157,290	157,290
Medical	26,470	26,470
Administrative	107,380	48,180
Personnel housing/community support	281,170	250,570
Personnel housing	(217,210)	(207,660)
Community support	(53,960)	(42,910)
Utilities	182,150	151,313
Water pollution abatement	2,800	2,800
Energy	27,792	27,792
Minor construction	22,000	22,000
Architectural and engineering services	144,096	144,096
Defense access roads	30,240	30,240
General reduction for bid savings	0	−100,000
General reduction for Davis-Bacon	0	−39,000
Subtotal military construction	1,973,350	1,682,143
Military family housing	943,698	941,898
Total, Air Force	2,917,048	2,624,041

POLLUTION ABATEMENT

The committee approved $2,800,000 for pollution abatement projects. The projects are listed with the appropriate command's projects.

ENERGY CONSERVATION INVESTMENT PROGRAM

The committee approved $27,722,000 for energy conservation investment projects. The projects are listed with the appropriate command's projects.

MILITARY CONSTRUCTION, INSIDE THE UNITED STATES AIR FORCE LOGISTICS COMMAND

The Air Force Logistics Command (AFLC) is responsible for providing an adequate and efficient system of procurement, production, surveillance, maintenance and supply for the United States Air Force and training specialized units for accomplishment of logistics functions in overseas areas and theaters.

The committee approved $172,298,000 for 30 projects at the following locations:

Location and project	*Thousands*
Hill Air Force Base, UT:	
Add to and alter aircraft corrosion control facility	13,400
Peacekeeper-transporter repair facility	8,300
Depot explosive storage complex.	2,600
Facility energy improvements	3,980
Total	28,280
Kelly Air Force Base, TX:	
Hydrant fueling system	4,600
Approach lighting	1,450
Integration support facility	9,299
Depot machine shop	11,500
Add to and alter jet engine test cell complex	6,500
Dental clinic	2,800
Emergency back-up power	2,500
Alter electrical distribution system	1,100
Total	39,749
McClellan Air Force Base, CA:	
Aircraft accessory maintenance complex	16,929
Sound suppressor support	700
Depot electronic warfare/communications facility	13,100
Medical & occupational health clinic	12,800
Total	43,529
Robins Air Force Base, GA:	
Fire protection-avionics facilities.	1,950
Large item storage facility	5,400
Total	7,350
Tinker Air Force Base, OK:	
Transient munitions facility/land acquisition	6,900
E-3A maintenance hangar	6,800
Alter aircraft corrosion control facility	4,650
Alter petroleum operations facilities storage complex	3,650
Alter unaccompanied enlisted personnel housing	3,100
Add to and alter heat plant	6,400
Total	31,500
Wright-Patterson Air Force Base, OH:	
Add to and alter precision measurement equipment lab	920
Entomology shop	770
Add to and alter high power research lab	1,950
Alter electrical distribution system	1,500
Add to and alter storm drainage system	3,950
Add to and alter science engineering & support complex	12,800
Total	21,890

The committee did not authorize the following projects:

Location and project	Thousands
Kelly Air Force Base, TX: Add to and alter visiting officer quarters	[1] 1,950
Tinker Air Force Base, OK: Add to and alter recreation center	[1] 1,600
McClellan Air Force Base, CA: Logistics Systems Operations Center	[1] 10,300

[1] Budget constraints.

AIR FORCE SYSTEMS COMMAND

The Air Force Systems Command (AFSC) is responsible for advancing aerospace technology adapting it to operational aerospace systems, and acquiring quantitatively superior aerospace systems and material needed to accomplish the Air Force mission.

The committee approved $49,410,000 for 10 projects at the following locations:

Location and project	Thousands
Brooks Air Force Base, TX:	
Vehicle maintenance shop	2,500
Total	2,500
Edwards Air Force Base, CA:	
Alter physical science lab	2,450
Add to and alter flight test mission control center	4,800
Total	7,250

The committee did not authorize the following projects:

Locataion and project	Thousands
Arnold Engineering Development Center, TN: Engineering Analysis facility	[1] 16,900
Hanscom Air Force Base, Mass., Library and education center	[2] 2,450

[1] Review for lower cost alternative.
[2] Budget Constraints.

AIR RESERVE FORCES

The mission of the Air Force Reserves is to develop, maintain and provide the Active Air Force with those operationally ready units and trained individuals needed to augment the active force in time of war or national emergency.

The committee did not authorize the following project:

Location and project	Thousands
Billy Mitchell Field, WI: Administrative facility	[1] 500

[1] Budget constraints.

AIR NATIONAL GUARD

The Air National guard is responsible for providing units with trained personnel and sufficient and suitable equipment, capable and ready for mobilization in time of war or national emergency to support the Air Force.

The committee approved $12,370,000 for two projects at the following location:

Location and project	Thousands
Buckley Air National Guard Base, CO:	
Security police operations facility	670
Aerospace data facility/utility distribution system	11,700
Total	12,370

AIR TRAINING COMMAND

The Air Training Command (ATC) is responsible for providing flying training leading to an aeronautical rating, aircrew training, basic and advanced technical training leading to an Air Force specialty, basic military training, mobile training, and other training as may be directed by the United States Air Force Chief of Staff.

The committee approved $97,350,000 for 21 projects at the following locations:

Location and project	Thousands
Chanute Air Force Base, IL:	
Add to and alter aircraft engine training facility	1,400
Medical war reserve material facility	330
Total	1,730
Goodfellow Air Force Base, TX:	
Operations intelligence training facility	13,500
Unaccompanied enlisted personnel housing	11,000
Dining hall	3,000
Total	27,500
Keesler Air Force Base, TX:	
Electronic assembly & checkout facility	2,100
Alter unaccompanied enlisted personnel housing	8,400
Total	10,500
Lackland Air Force Base, TX:	
Satellite communications ground terminal	2,950
Unaccompanied enlisted personnel housing	14,800
Dining hall	5,000
Total	22,750
Laughlin Air Force Base, TX: Water supply main/land acquisition	1,900
Total	1,900
Lowry Air Force Base, CO:	
Cold storage facility	3,350
Add to and alter academic classrooms	3,500
Total	6,850
Mather Air Force Base, CA:	
Central life support equipment facility	1,200
Accounting & finance facility	1,500
Total	2,700
Randolph Air Force Base, TX: Vehicle maintenance complex	3,200
Total	3,200
Reese Air Force Base, TX: Vehicle maintenance complex	3,250
Total	3,250
Sheppard Air Force Base, TX:	
Medical Training Facility	14,000
Medical logistics facility	2,150
Total	16,150
Vance Air Force Base, OK: Central life support equipment facility	660
Total	660
Williams Air Force Base, AZ: Add to and alter avionics shop	660
Total	660

The committee did not authorize the following projects:

Location and project	Thousands
Goodfellow Air Force Base, TX: Recreation center	[1] 2,450

[1] Budget Constraints.

AIR UNIVERSITY

The Air University (AU) is responsible for Air Force professional military education. It also provides support for the Civil Air Patrol (CAP) and the Air Force Data Systems Design Center.

The committee approved $11,200,000 for three projects at the following locations:

Location and project	Thousands
Gunter Air Force Station, AL: Add to computer facility	6,000
Total	6,000
Maxwell Air Force Base, AL:	
Alter electrical distribution system	3,300
Squadron officers school-leadership development complex	1,900
Total	3,200

The committee did not authorize the following project:

Location and project	Thousands
Maxwell Air Force Base, AL: Add to and alter historical research center	[1] 2,800

[1] Budget constraints.

ALASKAN AIR COMMAND

The Alaskan Air Command (AAC) is responsible for providing combat ready forces, defense weapons systems, aircraft control and warning element, and air defense forces within Alaska. It also is responsible for providing logistical support for the Strategic Air Command, the Military Airlift Command, the Command of the Alaskan Sea Frontier and the United States Army.

The committee approved $79,860,000 for 13 projects at the following locations:

Location and project	Thousands
Attu Research Site, AK: Seismic operations & data transmission facilities	910
Total	910
Eialson Air Force Base, AK:	
Maintenance hangar	6,000
Sound suppressor support	1,550
Refuel vehicle/petrol operations facility	2,200
Alter unaccompanied enlisted personnel housing	5,500
Fire protection—hangar	4,200
Total	19,450
Elmendorf Air Force Base, AK:	
Fire station	1,400
Alter unaccompanied enlisted personnel housing	3,600
Total	5,000
King Salmon Airport, AK:	
Add to and alter composite operations facilities	3,000
Fire station	5,600
Total	8,600
Shemya Air Force Base, AK:	
Liquid fuel pipeline system	8,800
Composite personnel housing & alert facility	9,600
Add to and alter central power plant	27,500
Total	45,900

The committee did not authorize the following projects:

Location and project	Thousands
Eielson Air Force Base, AK: Add to and alter central heat & power plant	[1] 25,500

[1] Insufficient review for third party financing.

MILITARY AIRLIFT COMMAND

The Military Airlift Command (MAC) is responsible for maintaining the military airlift system in a constant state of readiness. MAC supervises and operates the Air Weather Service, the Air Rescue and Recovery Service, Aeromedical Evacuation System and Military Airlift.

The committee approved $150,380,000 for 44 projects at the following locations:

Location and project	Thousands
Altus Air Force Base, OK:	
Vehicle maintenance shop	3,200
Weapons systems maintenance management facility	2,550
Unaccompanied enlisted personnel housing	3,800
Total	9,550
Andrews Air Force Base, MD:	
Alter communications facility	3,350
Alter unaccompanied enlisted personnel housing	4,550
Facility energy improvements	420
Fire protection various facilities	1,900
Total	10,220
Base 24—Classified Location, ZI:	
C-130—Support facilities	(6,170)
C-130—Add to parking apron.	1,500
C-130—Squadron operations	1,350
C-130—Corrosion control facility	1,300
C-130—Add to and alter avionic maintenance facilities	1,200
C-130—Organizational maintenance shop	820
Total	6,170
Bolling Air Force Base, DC: Facility energy improvements	250
Total	250
Charleston Air Force Base, SC:	
Petroleum operations facility	480
Aerial refueling part task training facility	1,140
Total	1,620
Dover Air Force Base, DE:	
Extend runway/land acquisition	13,800
Add to and alter aerial refueling part task training	1,050
Add to and alter flight simulator training facility	1,250
Ancillary explosive complex	2,300
Base supply and equipment shed	360
Base hazardous storage facility	430
Total	19,190
Eglin Auxiliary Field 9, FL: Alter dining hall	1,700
Total	1,700
Kirtland Air Force Base, NM:	
Dangerous cargo pad	1,900
Communications duct system	1,300
Munitions Storage Complex	47,000
Computer/vault facility	4,300
Alter unaccompanied enlisted personnel housing	5,000
Facility energy improvements	830
Total	60,330
McChord Air Force Base, WA:	
Add to and alter serial port facility	1,300
Add to and alter aerial refueling part task training facility	940
Total	2,240
McGuire Air Force Base, NJ:	
Aerial refueling part task training facility	1,050
Aircraft maintenance hangars	7,300
Alter unaccompanied enlisted personnel housing	6,200
Total	14,550
Norton Air Force Base, CA:	
Security police operations facility	1,900
Control tower	2,200
Facility energy improvements	470
Total	4,570
Pope Air Force Base, NC: Combat arms training and maintenance facility	440
Total	440
Scott Air Force Base, IL:	
Satellite communications ground terminal	4,270
Alter unaccompanied enlisted personnel housing	4,000
Administrative facility	550
Land easement	530
Total	9,350
Travis Air Force Base, CA:	
Add to and alter flight simulator training facility	2,000
Base hazardous storage facility	2,100
Weapons systems maintenance management & support facility	6,200
Total	10,300

The committee did not authorize the following projects:

Location and project	Thousands
Altus Air Force Base, OK:	
Base supply administrative facility	[1] 1,900
Recreation center	[1] 1,710
Bolling Air Force Base, DC: Office of Special Investigations (OSI) building	[1] 12,000
McGuire Air Force Base, NJ: Add to and alter gymnasium	[1] 1,550

[1] Budget constraints.

PACIFIC AIR FORCES

The Pacific Air Forces are responsible for offensive and defensive air operations, and for providing administrative and logistical support for Air Force units in the Pacific geographical area.

The committee approved $3,330,000 for two projects at the following locations:

Location and project	Thousands
Hickam Air Force Base, HI: Facility energy improvements	480
Total	480
Wheeler Air Force Base, HI: Various aircraft maintenance & support facilities	2,850
Total	2,850

The committee did not authorize the following projects:

Location and project	Thousands
Wheeler Air Force Base, HI: Gymnasium	[1] 2,200

[1] Budget constraints.

SPACE COMMAND

The Space Command is responsible for operational space assets and the strategic defense mission.

The committee approved $11,250,000 for four projects at the following locations:

Location and project	Thousands
Cape Cod Air Force Station, MA: Pave Paws-Electronmagnetic pulse protection	600
Total	600
Cavalier Air Force Station, ND: Power reliability enhancements	950
Total	950
Clear Air Force Station, AK: Satellite communications ground terminal	4,500
Total	4,500
Peterson Air Force Base, CO: Test, development & training center—phase II	5,200
Total	5,200

SPECIAL PROJECT

Authorization for a special project was requested.

The committee approved $55,000,000 for a special project at an unspecified locations:

Location and project	Thousands
Unspecified Location: Support facilities	55,000
Total	55,000

STRATEGIC AIR COMMAND

The Strategic Air Command (SAC) is responsible for the bomber, tanker and missile force required for conducting intensive and conclusive worldwide offensive operations.

The committee approved $327,614,000 for 82 projects at the following locations:

Location and project	Thousands
Barksdale Air Force Base, LA:	
Alter fuel systems maintenance dock	1,400
Total	1,400
Base 34-Classified Location, ZI:	
Air Launched Cruise Missile (ALCM) Support facilities—Phase I	(8,920)
ALCM—Integrated maintenance facility	7,200
ALCM—Missile roll/transfer & storage	1,400
ALCM—Site activation task force facility	320
Total	8,920
Beale Air Force Base, CA:	
TR-1—Physiological support division facility	550
TR-1—Aircraft shelter	3,300
Pave Paws—Electromagnetic pulse upgrade	950
Pave Paws—Boundary security system	1,050
Total	5,850
Belle Fourche, Air Force Station, SD: Strategic training range complex (Site 4) & land acquisition	4,080
Total	4,080
Carswell Air Force Base, TX:	
Willis-Cartwright school acquisition/renovation	1,000
Total	1,000
Castle Air Force Base, CA:	
Approach lighting & land acquisition	2,000
Engine inspection & repair shop	1,300
Total	3,300
Dyess Air Force Base, TX:	
B-1B—Beddown support facilities—Phase III	(16,000)
B-1B—Flight simulator training facility	5,600
B-1B—Central aircraft support system equipment & installation	4,350
B-1B—Add to and alter maintenance facilities	1,500
B-1B—Add to and alter field training facilities	1,300
B-1B—Munitions igloos	2,300
B-1B—Blast deflectors	95
Heating, ventilation and air conditioning	950
Total	16,950
Ellsworth Air Force Base, SD:	
B-1B—Beddown support facilities—Phase II	(62,464)
B-1B—Alter maintenance hangers	12,400
B-1B—Aircraft parking apron & taxiways	10,600
B-1B—Add to and alter alert parking area pavement	7,600
B-1B—Field maintenance facility	6,300
B-1B—Area security improvements	3,450
B-1B—Flight simulator training facility	3,400
B-1B—Central aircraft support system equipment & installation	3,000
B-1B—Helicopter/aircrew enhancement facilities	2,850
B-1B—Blast deflectors	2,850
B-1B—Alter utilities systems	990
B-1B—Add to and alter operations & maintenance facilities	710
B-1B—Alter engine inspection and repair facility	450
B-1B—Add to and alter organizational aircraft maint shop	270
B-1B—Alter integrated maintenance facilities	210
B-1B—Weapons preload facilities & rapid deployment system	7,384
Unaccompanied enlisted personnel housing	8,100
Peacekeeper—Add to and alter air launch control center facility	730
KC-135 Cockpit procedures trainer simulator facility	770
Total	72,064
F.E. Warren Air Force Base, WY:	
Peacekeeper—Launch facilities site work	6,200
Data processing facility	1,550
Alter unaccompanied enlisted personnel housing	4,900
Facility energy improvements	560
Peacekeeper—Land easements	2,100
Total	15,310
Grand Forks Air Force Base, ND:

TACTICAL AIR COMMAND

The Tactical Air Command (TAC) is responsible for tactical air operations and strategic defense of the United States.

The committee approved $162,835,000 for 65 projects at the following locations:

Location and project	Thousands
Bergstrom Air Force Base, TX:	
Commercial transportation facility	770
Total	770
Cannon Air Force Base, NM:	
Melrose Range—Land acquisition	12,500
Total	12,500
Davis-Monthan Air Force Base, AZ:	
Taxiway lighting	560
Ground launched cruise missile—field training facility	4,550
Medical war reserve material facility	620
Total	5,730
England Air Force Base, LA:	
Security police operations facility	1,200
Alter unaccompanied enlisted personnel housing	1,400
Total	2,600
George Air Force Base, CA:	
Fire station	3,400
Sound suppressor support	740
Add to and alter munitions facilities	1,100
Total	5,240
Holloman Air Force Base, NM:	
Vehicle maintenance shop	1,850
Base civil engineering maintenance shop	1,300
Add to and alter radar target scatter complex	13,700
Total	16,850
Homestead Air Force Base, FL:	
F-16 Beddown—Various support facilities	(3,495)
F-16—Alter fuel systems maintenance hangar	1,050
F-16—Add to and alter flight simulator facility	1,200
F-16—Add to and alter weapon/release system shop	510
F-16—Add to and alter aircraft generation squadron parts store	410
F-16—Add to and alter various maintenance facilities	325
Vehicle maintenance shop & operations facilities	900
Munitions facilities	970
Visiting officers quarters	1,650
Total	7,015
Langley Air Force Base, VA:	
Sound suppressor support	480
Unaccompanied enlisted personnel housing	8,200
Total	8,680
Luke Air Force Base, AZ:	
F-16—Beddown support facilities	(12,440)
F-16—Aircraft maintenance & training facility	3,650
F-16—Squardron operations facility	2,900
F-16—Fuel systems maintenance hangar	2,000
F-16—Wing headquarters facility	1,350
F-16—Add to and alter engine inspection & repair shop	1,750
F-16—Aircraft maintenance unit facility	790
Support equipment shop	2,050
Heating, ventilation and air conditioning	290
Total	14,780
MacDill Air Force Base, FL:	
Alter aircraft corrosion control facility	500
Alter unaccompanied enlisted personnel housing	4,000
Alter base roads	2,850
Total	7,350
Moody Air Force Base, GA:	
F-16 Beddown—Various support facilities	(10,600)
F-16—Avionics shop	3,200
F-16—Add to and alter operations/maintenance facilities	2,950
F-16—Flight simulator training facility	1,600
F-16—Add to and alter field training facility	1,600
F-16—Add to and alter engine inspection & repair shop	1,250
Aircraft maintenance unit facility	800
Sound suppressor support	980
Various munitions storage/operations facilities	6,900
Alter electric distribution system	4,750
Total	24,030
Mountain Home Air Force Base, ID:	
Over the Horizon-Backscatter radar operations/software support	12,400

Location and project	Thousands
Control tower	2,200
Total	14,600
Myrtle Beach Air Force Base, SC: Add to and alter support equipment shop	430
Total	430
Nellis Air Force Base, NV:	
Red Flag support facilities	2,800
Alter aircraft corrosion control facility	2,050
Sound suppressor support	610
Precision location strike system—software support facility	2,800
Unaccompanied enlisted personnel housing	9,600
Total	17,860
Seymour-Johnson Air Force Base, NC:	
KC-10 Blast deflectors & apron lighting	1,100
Heating, ventilation and air conditioning	1,220
Total	2,320
Shaw Air Force Base, SC:	
Add to and alter special operations facilities	2,000
Medical war reserve material facility	450
Add to and alter weapons system maintenance management facility	1,100
Consolidated support center	6,450
Wing headquarters	2,100
Heating, ventilation and air conditioning	360
Aircraft maintenance areas lighting	840
Total	13,300
Tyndall Air Forces Base, FL:	
Arm/disarm pad	980
Weapons evaluation/operations facility	2,650
Consolidated training facility	1,550
Aircraft combat maneuvering instrumentation facility	1,100
Unaccompanied enlisted personnel housing	2,500
Total	8,780

The committee did not authorize the following projects:

Location and project	Thousands
Davis-Monthan Air Force Base, AZ: Base civil engineer administrative facility	[1] 2,500
England Air Force Base, LA: Base civil engineer administrative facility	[1] 2,300
George Air Force Base, CA:	
Resource management facility	[1] 7,400
Visiting personnel quarters	[1] 7,600
MacDill Air Force Base, FL:	
Base contracting facility	[1] 1,300
Add to and alter headquarters, Readiness command	[1] 1,500
Nellis Air Force Base, NV: Consolidated support center	[1] 6,000

[1] Budget constraints.

UNITED STATES AIR FORCE ACADEMY

The United States Air Force Academy is responsible for educating and training young men and women to become officers in the U.S. Air Force.

The committee approved $10,310,000 for seven projects at the following location:

Location and project	Thousands
United States Air Force Academy, CO:	
Add to and alter aeronautics laboratory	3,400
Add to and alter prep school facilities	3,400
Add to and alter prep school fields	270
Add to and alter vehicle maintenance shop	900
Add to and alter computer center	440
Heating, ventilation and air conditioning	1,500
Recycle cooling water	400
Total	10,310

MILITARY CONSTRUCTION, OUTSIDE THE UNITED STATES

MILITARY AIRLIFT COMMAND

The Military Airlift Command (MAC) is responsible for maintaining the military airlift system in a constant state of readiness. MAC supervises and operates the Air Weather Service, the Air Resue and Recovery Service, Aeromedical Evacuation System, and Military Airlift.

The committee approved $28,785,000 for eight projects at the following locations:

Location and project	Thousands
Lajes Field, Portugal:	
Petroleum, oil, lubricants storage tanks	19,435
Refueling vehicle maintenance shop	1,250
Add to and alter cold storage	1,650
Add to and alter chapel	1,850
Child care center	1,100
Total	25,285
Rhein-Main AB, Germany:	
Flight simulator training facility	2,000
Cold storage facility	570
Religious education facility	930
Total	3,500

The committee did not authorize the following project:

Location and project	Thousands
Rhein-Main AB, Germany: Add to and alter air passenger terminal	[1] 10,100

[1] Budget constraints.

PACIFIC AIR FORCES

The Pacific Air Forces are responsible for offensive and defensive air operations, and for providing administrative and logistical support for Air Force units in the Pacific geographical area.

The committee approved $129,930,000 for 35 projects at the following locations:

Location and project	Thousands
Camp Zama, Japan: Add to and alter satellite communications ground terminal	1,500
Total	1,500
Clark Air Base, Republic of the Philippines:	
Consolidated support facilities—Phase II	4,400
Add to and alter maintenance management & operations facilities	1,750
Alter unaccompanied enlisted personnel housing	3,650
Emergency backup power	2,800
Add to and alter water distribution system	800
Security & safety improvements	1,650
Total	15,050
Diego Garcia Air Base, Indian Ocean: Munition storage facility—Phase II	5,300
Total	5,300
Kadena Air Base, Japan:	
Tactical control operations facility	2,950
Aircraft maintenance facilities—Phase I	12,600
Add to engine inspection and repair shop	5,400
Sound suppressor support	600
Jet fuel storage (JP-4)	6,100
Total	27,650
Kimhae Air Base, Korea: Medical continency complex	10,400
Total	10,400
Kunsan Air Base, Korea:	
Portomod facility support	300
Aircraft maintenance unit facility	1,950
Consolidated support facility	2,850
Add to and alter electrical distribution system—Phase I	3,900
Total	9,000
Kwang-Ju Air Base, Korea:	
Portomod facility support	260
Quick turn facility	9,000
Unaccompanied enlisted personnal housing	4,950
Unaccompanied officer personnel housing	650
Add to and alter water treatment storage/distribution system	1,450
Total	16,310
Misawa Air Base, Japan:	
Commando Port Support—Phase III. (CPIII)	(9,500)
CPIII—Concrete arch igloo magazine	2,850
CPIII—Jet fuel storage	4,500
CPIII—Aboveground storage magazine	2,150
Total	9,500
Osan Air Base, Korea:	
Portomod facility support	860
Aircraft shelters	6,800
Korean combat operations intelligence center allied support—Phase II	500
Squadron operations facilities	6,200
Munitions maintenance & storage facilities—Phase I	7,000
Alter unaccompanied officer personnel housing	3,150
Total	24,510
Sachon Air Base, Korea: Portomod facility support	310
Total	310
Yokota Air Base, Japan:	
Hydrant fueling system	8,500
Heating, ventilation and air conditioning	1,900

Location and project	Thousands
Total	10,400

The committee did not authorize the following projects:

Location and project	Thousands
Yokota Air Base; Japan: Base supply administrative facility[1]	3,350

[1] Seek JFIP Funding

SPACE COMMAND

The Space Command is responsible for operational space assets and the strategic defense mission.

The committee approved $38,450,000 for 10 projects at the following locations:

Location and project	Thousands
Fylingdales Ballistic Missile Early Warning System Site 3, United Kingdom: Satellite communications ground terminal	3,100
Total	3,100
Pirinclik Air Base, Turkey: Satellite communications ground terminal	2,600
Total	2,600
Site 5—Classified Location, Portugal:	
Spacetrack observation facility	12,400
Composite support facility	2,250
Total	14,650
Sandrestrom Air Base, Greenland:	
Consolidated port facility	2,550
Refueling vehicle heated storage facility	1,000
Laundry	2,200
Total	5,750
Thule Air Base, Greenland:	
Add to and alter ground terminal support facility	5,800
Cold storage facility	4,300
Alter unaccompanied enlisted personnel housing	2,250
Total	12,350

TACTICAL AIR COMMAND

The Tactical Air Command (TAC) is responsible for tactical air operations and strategic defense of the United States.

The committee approved $23,172,000 for two projects at the following location:

Location and project	Thousands
Howard Air Force Base, Panama Canal Zone:	
Add to aircraft apron	21,000
Facility energy improvements	2,172
Total	23,172

UNITED STATES AIR FORCES IN EUROPE

The U.S. Air Forces in Europe (USAFE) are responsible for offensive and defensive air operations in Europe and in other areas not included in either the NATO or U.S. Commander-in-Chief Europe area of responsibilities.

The committee approved $260,763,000 for 142 projects at the following locations:

Location and project	Thousands
Ahlhorn Air Base, Germany: Aircraft maintenance unit facility	350
Total	350
Alconbury Royal Air Force Base, United Kingdom:	
TR-1—Support Facilities	(10,700)
TR-1—Add to and alter squadron operations facility	1,050
TR-1—Chemical warfare protect-sensor maintenance facility	1,950
TR-1—Chemical warfare protect-avionic maintenance facility	2,200
TR-1—Unaccompanied enlisted personnel housing	5,600
Add to and alter fire station	1,600
Base operations	900
Flight simulator training facility	1,150
Sound suppressor support	400
Add to and alter warehouse	1,700
Facility energy improvements	2,650
Alter electrical distribution system	1,450
Add to water distribution system	360
Total	20,010
Ankara Air Station, Turkey: Transient lodging facility	950
Total	950
Aviano Air Base, Italy:	
Telecommunications facility	920
Visiting officer quarters	4,150
Total	5,070
Base 25—Classified Location, USAFE: Satellite communications ground terminal	4,500
Total	4,500
Base 29—Classified Location, Overseas:	
Precision location strike system (PLSS)—Support Facilities	(3,500)
PLSS—Unaccompanied enlisted personnel housing	2,400

EDS—Unaccompanied enlisted personnel housing	2,450
Add to and alter fire station	1,350
Telecommunications facility	750
Total	5,700

The committee did not authorize the following projects:

Location and project	Thousands
Greenham Common Royal Air Force Base, United Kingdom:	
GLCM—Auto Hobby shop	[1] 340
GLCM—Alter arts & crafts center	[1] 300
Mildenhall Royal Air Force Base, United Kingdom: Consolidated support center	[1] 4,150
Ramstein Air Base, Germany: Indoor swimming pool	[2] 2,800
Torrejon Air Base, Spain: Alter electrical substation	[4] 2,637
Woensdrecht Air Base, The Netherlands:	
Ground launched cruise missile (GLCM)-telecommunications center	[3] 400
Ground launched cruise missile (GLCM)-add to and alter communications equipment facility	[3] 720
Ground launched cruise missile (GLCM)-Fire station	[3] 1,100
Ground launched cruise missile (GLCM)-Tower support	[3] 300
Ground launched cruise missile (GLCM)-high frequency facility	[3] 1,500

[1] Budget constraints.
[2] Not justified.
[3] Contingent on favorable deployment by The Netherlands.
[4] Late award in fiscal year.

The committee reduced the following projects by the amount shown:

Location and project	Thousands
Woensdrecht Air Base, The Netherlands: Grown Launched Cruise Missile (GLCM)-Utilities/pavements/roads	[1] −2,700

[1] Contingent on favorable deployment by The Netherlands.

MILITARY CONSTRUCTION PROGRAM, SUPPORT ACTIVITIES

The support activities include resources for accomplishing design work on fiscal years 1986, 1987, 1988 and subsequent years' military construction projects, for unspecified minor construction and for accomplishing urgent requirements anticipated to arise during fiscal year 1986.

The committee approved $166,096,000 for the following elements of the support program:

Location and project	Thousands
Various locations, worldwide:	
Architectural and engineering services	144,096
Unspecified minor construction	22,000
Total	166,096

MILITARY CONSTRUCTION PROGRAM, DEFENSE ACCESS ROADS

The Air Force requested $30,240,000 for their portion of the Defense Access Roads account at the following installations:

Location and project	Thousands
Nellis Air Force Base, NE: Add to and alter base access roads	3,200
F.E. Warren Air Force Base, WY: Peacekeeper—Access road	27,040
Total	30,240

SUMMARY OF AIR FORCE CHANGES

A summary of the committee recommendations by project is as follows:

Location and project	Thousands
Military construction: Total Air Force authorization request	1,973,350
Committee reductions:	
Air Force Logistics Command:	
Kelly Air Force Base, TX: Add to and alter visiting officer quarters	−1,950
McClellan Air Force Base, CA: Logistics systems operations center	−10,300
Tinker Air Force Base, OK: Add to and Alter Recreation Center	−1,600
Air Force Systems Command:	
Arnold Engineering Development Center, TN: Engine Analysis Facility	−16,900
Manscom Air Force Base, MA: Library & Education Center	−2,450
Air Reserve Forces: Billy Mitchell Field, WI: Administration Facility	−500
Air Training Command: Goodfellow Air Force Base, TX: Recreation Center	−2,450
Air University: Maxwell Air Force Base, AL: Add to and Alter Historical Research Center	−2,800
Alaskan Air Command: Eielson Air Force Base, AK: Add to and Alter Central Heat & Power Plant	−25,500
Military Airlift Command:	
Altus Air Force Base, OK:	
Base supply administration facility	−1,900
Recreation Center	−1,710
Bolling Air Force Base, DC: Office of Special Investigations building	−12,000
McGuire Air Force Base, NJ: Add to and alter gymnasium	−1,550
Pacific Air Forces: Wheeler Air Force Base, HI: Gymnasium	−2,200
Strategic Air command:	
Beale Air Force Base, CA: Religious education facility	−1,100
Blytheville Air Force Base, AR: Aircraft general purpose maintenance facility	−3,750
Carswell Air Force Base, TX: chapel center	−2,150
McConnell Air Force Base, KS: B-1B support facilities	−71,490
Whiteman Air Force Base, MD: Add to and alter gymnasium	−2,400
Tactical Air Command:	
Davis Monthan Air Force Base, AZ: Base civil engineering administrative facility	−2,500
England Air Force Base, LA: Base civil engineering administrative facility	−2,300
George Air Force Base, CA:	
Resource management facility	−7,400
Visiting personnel quarters	−7,600
MacDill Air Force Base, FL:	
Add to and alter Readiness Command headquarters facility	−1,500
Base Contracting Facility	−1,300
Nellis Air Force Base, NV: Consolidated support center	−6,000
Military Airlift Command (Outside the U.S.)	
Rhain-Main Air Base, Germany: Add to and alter air passenger terminal	−10,100
Pacific Air Forces (Outside the U.S.): Yokota Air Base, Japan: Base supply administration facility	−3,350
United States Air Forces in Europe:	
Greenham Common Royal Air Force Base, United Kingdom:	
Ground launched cruise missile (GLCM)—alter arts/crafts shop	−340
Ground launched cruise missile (GLCM)—auto hobby shop	−340
Mildenhall Royal Air Force Base, United Kingdom: Consolidated Support Center	−4,150
Ramstein Air Base, Germany: Indoor swimming pool	−2,800
Torrejon Air Station, Germany: Alter electrical substation	−2,637

Location and project	Thousands
Woensdrecht Air Base, The Netherlands:	
Ground launched cruise missile (GLCM)—telecommunications center	−400
Ground launched cruise missile (GLCM)-133—add to and alter communications equipment facility	−720
Ground launched cruise missile (GLCM)—tire station	−1,100
Ground launched cruise missile (GLCM)—tower support	−300
Ground launched cruise missile (GLCM)—high frequency facility	−1,500
Ground launched cruise missile (GLCM)—utilities/pavements/roads	−2,700
Subtotal of project reductions	−223,697
General reduction for anticipated bid savings	−100,000
General reduction for Davis-Bacon	−39,000
Total reductions recommended	−362,697
Committee addition:	
Strategic Air Command: Unspecified Location, Conus: B-1B support facilities	−71,490
Total Military Construction... Authorization for Appropriations	1,682,143

NEW CONSTRUCTION

Family housing new construction is intended to reduce the housing deficit where the private community does not provide sufficient adequate housing to support the Air Force mission. The committee approved $146,300,000 for 7 projects (1,880 units) at the following locations:

Location	Project units	Cost (thousands)
Belle Fourche, Strategic Training Range, SD	50	$4,000
Florennes Air Base, Belgium	400	29,200
Hahn Air Base, Germany	440	33,000
Ramstein Air Base, Germany	400	30,000
Osan Air Base, Korea	Support [1]	1,200
Camp New Amsterdam, Netherlands	140	11,000
Clark Air Base, Philippines	450	37,900

[1] Family Housing Office and Warehouse

The committee did not authorize the following project:

Location	Project units	Cost (thousands)
Fort MacArthur, CA	Land	1,800 [1]

[1] Land exchange without cost.

POST ACQUISITION CONSTRUCTION

The committee approved $61,300,000 for 86 projects at various locations, including $19,939,000 for energy conservation investment improvements and nine projects where the per unit cost for improvement and repair exceeds the statutory limitation ($30,000 times the area cost factor).

ARCHITECT AND ENGINEER SERVICES

The committee approved $5,000,000 for planning and design work on fiscal year 1986 and future year military family housing construction projects, both new and post acquisition.

OPERATION AND MAINTENANCE

The committee approved $665,880,000 for family housing operation and maintenance. Reimbursements are anticipated to be $15,000,000.

LEASING

The committee approved $45,402,000 for foreign leases and $2,711,000 for domestic leases.

DEBT PAYMENT

The committee approved $15,305,000 for principal and interest payments on mortgaged Capehart and Wherry housing units and Servicemen's Mortgage Insurance premiums.

Summary of family housing actions

	Thousands
Authorization request	$943,698
Fort McArthur, CA: Land acquisition	−1,800
Total reductions	−1,800
Total Authorization for Appropriations	941,898

DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AND MILITARY APPLICATIONS OF NUCLEAR ENERGY AUTHORIZATION

Purpose of This Title

Division C provides authority for appropriations to the Secretary of Energy for the operating expenses, capital equipment, and construction costs related to the National Defense Programs of the Department of Energy.

In the report to accompany S. 1029, the committee described the various program elements of the request for Defense Programs and the basis for committee action, which reduced the request of $7,958,710,000 by $203,100,000. With the exception of additional reductions that were made for budgetary purposes only, this report also applies to the new action, which was necessitated by the revised budget levels for the overall defense function.

The authorizations recommended at the revised budget level for fiscal year 1986 are shown in the table below:

SUMMARY OF CHANGES—FISCAL YEAR 1986 DEPARTMENT OF ENERGY PROGRAMS

[In millions of dollars]

Program	Fiscal year 1986 request	Authorization recommended	Change
Total, Operating Expenses	6,187.022	6,062.022	−125.0

Mr. GOLDWATER. Most of Senate Report 99-41 continues to be applicable to this bill, and I would invite the attention of the Senators to that report.

Mr. President, I bring this bill to the Senate floor with mixed emotions. On one hand, it is a great privilege to be able to report this bill as the chairman of the Armed Services Committee. It has been a singular honor for me to serve with such distinguished members as those who make up our committee. Senator NUNN, our ranking member, has done an exceptional job sharing the committee's leadership responsibilities. I am indebted to him for his wise counsel, sincere friendship, and the bipartisan spirit in which he has helped guide the committee. I would also like to recognize the very important contributions made by each of our subcommittee chairmen and ranking members: Senator THURMOND and Senator BINGAMAN on Military Construction, Senator WARNER and Senator HART on Strategic and Theater Nuclear Forces, Senator HUMPHREY and Senator DIXON on Preparedness, Senator COHEN and Senator EXON on Sea Power and Force Projection, Senator WILSON and Senator GLENN on Manpower and Personnel, and Senator QUAYLE and Senator LEVIN on Defense Acquisition Policy. Mr. President, to these Senators and all the members and staff of the Armed Services Committee, I extend my sincere appreciation for their dedication and hard work in producing this bill. I am immensely proud of their achievements.

On the other hand, it is not a pleasant task to bring to the floor a defense bill that contains no real growth. I am concerned that the current state of world affairs makes such a spending level imprudent. Nevertheless, we have complied with the will of the Senate—as expressed by a narrow majority—and today I report a bill that provides only an inflationary increase over last year's defense spending level.

This bill is in conformance with the Senate passed budget resolution that provides approximately $302.5 billion in new budget authority for the fiscal year 1986 defense program. It represents a reduction of almost $20 billion from the President's request.

Mr. President, we have made every effort to minimize the impact of a zero growth budget on our defense programs. And to a very real extent we have succeeded—largely as a result of the administration's success in controlling the rate of inflation and in implementing management reforms. These efforts have yielded savings of $4 billion which have been applied in our bill to reduce fiscal year 1986 funding requirements.

But this success should not disguise the fact that there are still several very serious implications in the reductions mandated by this bill. For example, the bill reduces the administration's request for 48 MX missiles by more than one-half, and it reduces funding for the President's Strategic Defense Initiative [SDI] by $750 million. These actions were based strictly on budgetary constraints, however I fear they are likely to weaken the U.S. negotiating position in Geneva. This bill also deletes $4.3 billion from the request for tactical programs, $3.4 billion from strategic programs, $3.3 billion from Seapower and Force Projection programs, $3.5 billion from the preparedness account, $1.5 billion from the military construction account, and denies $2.5 billion in funds requested for manpower and personnel initiatives.

Perhaps of even greater significance, this bill represents a further retrenchment on the part of Congress in its support of the President's defense program. Each year, these congressional reductions lead to stretched out programs that in turn produce higher unit cost and a slower modernization pace. It is just one more example of congressionally mandated waste.

Despite these adverse consequences, the bill I report today will have one positive effect—it will help reduce the deficit. In fact, defense cuts account for a full one-third of the proposed 3-year deficit reduction package. But I remind my colleagues that is not what defense budgets are for. Defense budgets are intended to address external threats to our national security—not domestic economic concerns. Somehow it seems a little inconsistent to me: over the past 20 years the growth in

domestic spending has outpaced defense increases by a ratio of nearly 7 to 1, but when it comes time to reduce the deficit, we require defense to bear one-third of the reductions.

Perhaps those who favor zero real growth in defense believe the world is a safer place today than it was a few years ago. I do not.

Today, as we begin to debate the details of a "zero growth" defense budget, the massive Soviet military buildup continues, despite its economic consequences to that country. The savage war in Afghanistan goes on and on. Those who were eager to forget the Soviet ruthlessness in shooting down an unarmed airliner were shocked back to reality by the cold-blooded killing of Major Nicholson in Germany. And any hope that the new political leadership in Moscow would be less belligerent than their predecessors was dashed by the Politburo's swift reversal of the military agreement renouncing such use of force. Soviet arms shipments to Nicaragua continue, destabilizing the region with such advanced weapons as the heavily armed Hind helicopter. And the Soviets go on treating arms control agreements with indifference, violating them whenever it serves their objectives.

And how, you may ask, how has the Congress responded to these developments? Well, I will tell you: by cutting the defense budget and offering amendments requiring the President to certify that he is dealing in good faith with the Soviets.

I do not know how naive this Congress can be. I do not believe the American people believe for 1 minute in what we are doing relative to foreign relations in this country.

Mr. President, it is my hope that we will be able to complete floor action on this bill within a matter of just a few days. I recognize there are issues in this bill that will inspire vigorous debate—and rightfully so. The modernization of our chemical deterrent, for example, has been a politically unpopular issue—though it may be the single most important initiative in the entire bill. No other program is more likely to reduce the risk of a nuclear exchange in the event of war. In debating that issue, I hope we will be able to put aside partisan differences here on the floor just as we did in reaching our committee vote of 15 to 3 in favor of modernizing our chemical deterrent. I also expect debate over a number of arms control amendments. Some of these amendments will seek to impose unilateral restrictions on U.S. programs, while others will attempt to hold our Nation to a higher standard of compliance with arms control agreements than that observed by the Soviets. I am told, for example, that Senators BUMPERS and LEAHY intend to offer an amendment compelling our continued compliance with the provisions of SALT II in the face of clear Soviet violations of that and other agreements.

Our proposal on base closures will undoubtedly be controversial as will the so-called Gramm package which attempts to curtail much of the congressionally imposed waste in the defense budget. Those who wish to register the sincerity of their commitment to reduce waste in the defense budget will have that opportunity when the Gramm package comes to a vote. Finally, I hope we can limit the number of procurement reform proposals and reach agreement on the amendment developed by Senators QUAYLE and LEVIN which, in my opinion, does a very thorough job of addressing the legitimate concerns regarding the Pentagon's current procurement procedures.

STRATEGIC AND THEATER NUCLEAR FORCES

The committee reviewed the administration's request for strategic offensive forces, strategic defensive forces, strategic command, control, communications and warning, space systems, the chemical deterrent program, and theater nuclear forces. The request for these activities totaled almost $39 billion. In addition, the committee reviewed the Department of Energy's $7.96 billion request for national security programs, and the Federal Emergency Management Agency's $119 million request for civil defense purposes. Altogether, these programs accounted for $47 billion. Funding associated with the modernization of U.S. strategic forces peaked in fiscal year 1985, and is now expected to decline as a percentage of the total defense budget.

The committee reduced the administration's request for the procurement of Peacekeeper (MX) missiles by $981 million. This provides for the procurement of 21 missiles, a reduction of 27 missiles from the number requested by the administration, and is the same number authorized in each of the 2 previous years. The committee action provides funding for the hardware required to deploy 50 missiles, and full funding required for the deployment of 40 missiles. The remaining 13 missiles authorized are for testing purposes. These actions should not be viewed as a "cap" on deployment, an action the committee believes could undermine U.S. negotiating efforts.

The committee continues to support the President's Strategic Defense Initiative as a high priority research program. In view of budgetary constraints, the committee recommends an authorization of $2.97 billion, a reduction of $750 million from the administration's request. The committee leaves the allocation of this reduction to the discretion of the program manager.

The committee authorized $5.46 billion for the procurement of 48 B-1B bombers, and $367.4 million for associated research and development. This marks the final funding request for the B-1B. I might add for the record that despite skepticism expressed by some of my colleagues several years ago about the prospects of, first, remaining within the program cost; second, remaining on schedule and, third, whether there would be a 101st B-1, the B-1 is under cost, ahead of schedule, and there is no funding in the administration's request for the 101st bomber. Unfortunately, I doubt that my friends will be willing to admit they were wrong. Perhaps they will however, temper their skepticism.

Concern was also expressed over the current rationale for the two bomber program and the committee directed the Department of Defense to provide an update analysis to address future U.S. bomber force requirements.

The committee authorized full funding for the Advanced Technology Bomber [ATB] and the Advanced Cruise Missile [ACM] programs in fiscal year 1986. The actual figures are classified.

The committee approved $1.45 billion for the procurement of one Trident ballistic missile submarine, and $42.2 million for associated research and development. This marks a reduction of $100 million from the request for procurement in anticipation of contract savings. The administration's request of $2.16 billion for research and development, and $582 million for advanced procurement of the Trident II (D-5) missile system was fully authorized.

A total of $83 million was provided for the procurement of three miniature homing vehicle [MHV] antisatellite [ASAT] systems, and $202.9 million was approved for associated research and development. In view of the negotiations underway in Geneva, the committee believes it would be ill advised to impose any unilateral limitations of the development of a U.S. ASAT capability.

The committee authorized a total of $1.27 billion for the U.S. chemical deterrent program, which includes $163 million associated with initial production of modern binary munitions. The committee's action in support of this program is based on several key judgments. First, the current U.S. stockpile of chemical weapons is not adequate to deter chemical attacks on U.S. and allied troops. Second, defensive measures alone are not adequate to address the chemical warfare threat. And, finally, the Soviets will have little incentive, absent and modernization of our chemical deterrent capability, to respond more favorably to the U.S. proposal before the Committee on Dis-

armament in Geneva to ban chemical weapons.

In view of budgetary constraints, the committee authorized $7.64 billion for the Department of Energy national security programs, a reduction of $321.0 million from the administration's request.

The committee approved in full the administration's request for $119.1 million for civil defense purposes in fiscal year 1986. This is well below the level approved by the Congress last year, and the committee expects to be kept advised of the administration's reassessment of the Nation's civil defense needs.

TACTICAL WARFARE

The committee continues to place high priority on achieving efficient production rates for our tactical warfare systems. Despite reductions of $4.3 billion from the administration's request for these programs, the committee's recommendations will continue the essential modernization of our conventional forces. In recognition of the serious shortfalls in our munitions inventory, particularly of the so called "smart munitions," the committee made a special effort to preserve production rates in this area. Such programs as the Army's Patriot, Hellfire, TOW and Stinger missiles, and the Navy's Sidewinder, Sparrow, Phoenix, Harpoon, and HARM missiles, and the Air Force's Sparrow, Sidewinder, and Maverick missiles were all recommended for authorization at the levels requested by the administration. The Air Force's AMRAAM [Advanced Medium Range Air-to-Air Missile], which has encountered schedule delays and cost increases, was not recommended for full funding. A reduction of $166.5 million from the administration's request for $366.5 million was recommended.

The committee also attempted to maintain efficient production levels for aircraft and major land warfare systems. These recommendations include the procurement of 144 AH-64 helicopters, 78 UH-60 Blackhawk helicopters, 18 EH-60A helicopters for the Army, 840 M-1 tanks and 716 Bradley fighting vehicles. The committee also approved the requested procurement levels for the Navy's A-6E, EA-6B, and F/A-18 aircraft but reduced the administration's request by $45.0 million for the AV-8B aircraft, and recommended a reduction of $100.0 million from the administration's request for the F-14. The committee recommended approval of the administration's request for 180 F-16 aircraft and 48 F-15 aircraft while making minor funding reductions in these programs of $30.0 million and $52.0 million respectively.

The committee also recommended approval of funding for development of the JVX tilt-rotor aircraft, now designated the V-22 Osprey, but recommended reductions in the LHX (the Army's proposed family of light helicopters) program, and the Air Force's advanced tactical fighter [ATF]. The committee also directed that the Army's Aquila remotely piloted vehicle [RPV] program be restructured at a funding level one half of that requested by the administration.

The committee recommended no funds be provided for the Army's field artillery ammunition support vehicle [FAASV], the Army's robotic obstacle breaching assault tank [ROBAT], Navy UC-12B aircraft, Navy T-34C trainer aircraft, Marine M-198 Howitzers, Air Force HH-60 Nighthawk helicopters, and Air Force low level laser guided bomb (LLLGB) Kits.

SEAPOWER AND FORCE PROJECTION

In the seapower and force projection area, the committee approved $23.9 billion, a reduction of $3.3 billion from the administration's request. In shaping the seapower and force projection budget, the committee emphasized the need to continue to build high priority ships and aircraft, improve readiness and sustainability, support ongoing multiyear contracts, encourage competition and efficient production rates, and support key R&D programs.

The committee approved $9.9 billion to procure 21 new ships and convert five others in the 1986 Navy shipbuilding account. Among the new ships authorized were four attack submarines, three Aegis cruisers, six mine warfare ships, and one LHD-1 Wasp class amphibious assault ship.

In the airlift area, the committee authorized continued procurement of the C-5B Galaxy airlifter and the KC-10A advanced cargo/tanker for the Air Force. Both aircraft are under multiyear contracts. Additionally, the committee authorized $383.7 million, a reduction of $70.0 million from the request, for continued development of the new C-17 airlift aircraft.

The committee also approved funding for 24 LAMPS Mark-III antisubmarine helicopters, nine P-3C Orion ASW patrol aircraft, and 10 MH-53E minesweeping helicopters.

As an economy measure, the committee denied funding for six LAMPS Mark I helicopters, an action which will close this production line 1 year earlier than planned.

PREPAREDNESS

With regard to preparedness issues, the committee recommended $83.5 billion, approximately $3.5 billion less than requested by the administration. The committee's priorities in considering program funding were to preserve positive trends in readiness; support deliveries of modernization equipment, reduce maintenance backlogs; improve force sustainability; improve individual and unit readiness measures; and improve stocks of ammunition for units, training and war reserves. Requested increases in flying hours for all services were approved as were increases in Army battalion training days and Navy steaming days. Requests for ammunition were approved except for those of the 9mm handgun and DIVAD (Division Air Defense gun). The funds for procurement of the 9mm handgun itself were also deleted. Most of the funding reductions were offset by accumulated and predicted savings resulting from lower inflation, favorable foreign exchange rates, and lower costs of stock fund items.

MANPOWER AND PERSONNEL

In the area of manpower and personnel, the committee recommended a reduction of 10,730 active duty personnel from the administration's request. This decision was a result of the substantial, congressionally-mandated defense budget reductions, coupled with a desire to permit increased manning in combat units (rather than increases in support forces). The committee agreed to increase the average strengths of the Selected Reserve by 30,171 which amounts to approximately 70 percent of the administration's request. A Defense Department civilian end-strength of approximately 1.1 million personnel was approved. This figure represents a freeze on civilian manning levels.

In addition, the committee agreed to provisions which could lead to a substantial restructuring of the military compensation system. These provisions include a 10-percent reduction in the funding level for military retirement along with approval of several hundred million dollars for special incentive pays and increased permanent change of station allowances. As part of this package—which involves reducing the share of military compensation dollars to be utilized for military retirement to provide more compensation to personnel during their active careers—the committee approved an across-the-board pay raise of 3 percent for all military personnel, effective October 1, 1985. The total costs of the increased pay and allowances provided by the committee's actions approximate $2.4 billion above the levels presently authorized. The committee further directed that the Secretary of Defense submit proposed legislation to the Congress, not later than September 1, 1985, which, if enacted, would alter the military retirement structure in such a manner that the costs of the system could be met under the reduced funding authorized by the committee. The committee specifically directed that this legislation not apply to any person on active duty or already retired when and if such legislation is enacted.

MILITARY CONSTRUCTION

The committee authorized $8.8 billion for military construction, $1.5 billion less than requested by the administration. As in the committee's previ-

ous action, $36 million was approved for the Navy to initiate land acquisition and construction to homeport a battleship group at Staten Island, NY, and a carrier battle group at Everett, WA. However, these funds may not be used until the Navy justifies to the Congress the military necessity and cost effectiveness of homeporting at these locations. Due to budget constraints, the committee deferred funds requested by the Army to begin stationing the 10th Mountain Division at Fort Drum, NY.

As I have said before, we continue to throw away billions of dollars annually on bases that should be closed. When the Pentagon has tried to close any of these nonessential bases, the politicians have stopped them cold. It is time to stop this useless waste of tax dollars. The committee has recommended legislation that will allow the Secretary of Defense to close any nonessential bases. To permit these base closures, "up front" funding will be required. This bill would authorize $1 billion for this purpose.

In concluding my remarks, I would like to remind my colleagues that in these times of uncertain budgets, one price remains unchanged: The price of liberty is still eternal vigilance. And it remains our greatest responsibility under the Constitution to provide whatever is necessary to keep that vigil. May we all bear that in mind as we debate the issues of this defense budget.

Mr. STENNIS addressed the Chair.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. STENNIS. Mr. President, I ask for recognition. I shall not detain the Senate but a short time. I am filling in for the time being for the Senator from Georgia, Mr. NUNN, who is the ranking Democratic member of this important committee, who had to be away today on other official business.

First, Mr. President, without trying to emphasize the situation, I want to both thank and commend the Senator from Arizona, Mr. GOLDWATER, for the very fine job that he has done in getting this bill ready for presentation, and for the handling of it in the hearings, in the first write-up—and then the second time which was finished last night. He not only knows the subject but, he has the will to do. He stirs around at it all the time, and everybody that is tied in with him has to stir or get out of the way—but he stirs in a very proper and mannerly way. There is no way to estimate the value of the Senator, especially in a subject in this field.

It illustrates, too, Mr. President, the strength of the Senate is in its committees, more particularly the ones that concentrate on worthwhile subject matters representing problems of our Nation—master them to a degree, share their knowledge in and energy with their fellow members, and then present on the committee and do whatever is necessary there in making adjustments in a bill, the tone of the bill, the substance of the report, and then coming here to the floor in open session where everyone, the press, and everyone else can be heard, giving their views and countering the views that may disagree with them.

That is the Senate at its best. That is where the real work is done, particularly when supported by competent staff members. That is exactly what this committee has—a highly capably, competent, experienced and dedicated staff.

Mr. President, my remarks will be brief. I will be very brief every time that I have anything to say today and I look forward to hearing the debate, too.

Mr. President, we are just beginning debate on this major Department of Defense authorization bill. This bill contains the authorization for everything in our defense establishment. It includes authority for star wars research and for soup in the mess hall kitchens. It just covers the waterfront. That shows how the authorization process has grown since it began in 1958 with a simple authorization for Navy ships.

This is a strong bill and I would urge my colleagues to vote for it. There is plenty of money authorized in this bill to continue a strong and solid military program and continue to increase our military strength. The figures have grown so large—this bill authorizes directly $231.9 billion. That figure compares with the $51.9 billion authorized the last year that I was chairman of the Senate Armed Services Committee, when the bill did not cover as many items as now.

Mr. President, it is almost beyond realization when we think about that as late as 1957, I think it was, we did not have to meet authorization requirements. Authorization legislation did not necessarily have to come before the Senate Armed Services Committee. The Appropriations Committee decided how many ships we needed, and decided how many men we needed in the services, and made virtually all decisions, within the military field although there was some very important work done by this committee. I point this out as showing the magnitude, the growth, and the importance to the people, and to our Nation of the work of this committee and others that carry the load of these responsibilities.

There are always reductions made by Congress in the budget request and this year is not different. This bill makes a modest reduction in the request—about 6.8 percent. No major ships, aircraft, or tanks are just cut out of the program. There are some slowdowns, such as in MX and star wars research; and there are some increases, such as in military personnel. But on balance, we must provide enough money for a strong defense and this bill does that.

The funds authorized in this bill come on top of a vast amount of money provided for defense in the past few years. For the first time in history, the appropriations for the previous 4 years for national defense have exceeded $1 trillion. Those appropriations totaled $1,022.2 billion in just 4 years. That is enough money to provide the safety we need, but I doubt that our economy can stand just piling more and more billions on top of those large figures.

In fact, I have no doubt about that, and think that we have to manage better and make the funds that are reasonably available to the job, not only in the military department but others.

If we are not careful, at some point, we will undermine our economic and financial system. We already have a staggering trade deficit and the banks in two States already have been threatened with collapse. We must turn our attention to getting more out of the defense dollar because we cannot keep on piling the dollars up indefinitely.

Mr. President, I say that as one who has been through the Great Depression, the big depression of the 1930's, when, really, our system was endangered by the narrow margin of safety upon which we were then operating. Our responsibility now is tremendously greater. We are doing a better job, but there is a limit. The $600 hammers and the improper contractor bills have got to stop, but we must not just cover up the tip of the iceberg.

Those things can be corrected, Mr. President, but I urge everyone, do not judge the Department of Defense by incidents of that kind, because I do not think they are typical. Any place they exist, if they are not stirred up and picked up and put out and remedy given that is lasting, some individuals ought to have to pay that penalty. We have laws, we have the will that can make those individuals pay the penalty and not take it out on the service, particularly a service that goes to protect us every day and every night from bodily harm and the possible destruction of our very existence. We must get at producing more defense for the dollars so that the people will know that we have more ships, more tanks, and more aircraft for the money that we spend.

Mr. President, I hope we can get this bill moving today and on Monday of next week. It is an important step in providing for our national security. It is an important way for the Senate and the Congress to carry out its responsibilities and it is an important

product of the Senate committee system.

Mr. President, I conclude my remarks and, at the same time, I look forward to this debate, although I have heard these facts, many of them, myself.

The PRESIDING OFFICER (Mr. EVANS). The Senator from Arizona.

Mr. GOLDWATER. Mr. President, the Senator from Mississippi was very generous in his remarks concerning me. I thank him. I remind the Senator, my close friend, and my colleagues that if I have any ability in this field at all, I learned it all from him. I thank him.

I yield the floor, Mr. President.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, I wish to associate myself with the remarks of the distinguished chairman of the Senate Armed Services Committee [Mr. GOLDWATER]. I also commend him for the great job he has done on this bill. Senator GOLDWATER is a major general in the Air Force Reserve; he has had long experience in military matters. He is truly one of the experts in this country on matters of defense.

I also commend the able Senator from Mississippi [Mr. STENNIS], who was chairman of this committee for many years, for the great work he has done in military matters in helping keep our country prepared. I associate myself with his remarks.

Mr. President, the committee made every effort possible to limit the impact that zero real growth would have on necessary defense modernization programs. We were largely successful in doing this for fiscal year 1986. Our prospect for the future, however, are not very encouraging if Congress continues to severely limit or curtail growth in defense spending. Perhaps the most positive aspect of the reductions made by the Armed Services Committee is the contribution they make toward reducing the deficit.

Mr. President, the committee recommends a reduction of nearly $20 billion from the President's initial fiscal year 1986 budget request. These reductions are not without impact. We authorized only 21 Peacekeeper missiles and reduced the strategic defense initiative by $750 million. Both of these reductions undoubtedly will impair our negotiating capability with the Soviets in Geneva. The committee approved only 60 percent of the end strength increases requested by the Department of Defense. This will slow our needed force expansions and prevent us from capitalizing on the present favorable recruiting environment.

One of the most important provisions in this bill is the authorization for production of binary chemical munitions. There was very strong bipartisan support in the committee for this measure, and I strongly urge all of my colleagues to support the committee recommendation concerning binary weapons.

Another significant provision of this bill is the modification of the Davis-Bacon Act insofar as it applies to military construction projects. I have long been an advocate of repeal of this costly legislation. Each year, we spend hundreds of millions of taxpayer dollars needlessly because of the Davis-Bacon Act. The requirement to pay so-called prevailing labor wage rates for Government construction projects has proven too costly. I commend my distinguished colleague from Texas [Mr. GRAMM] for his fine efforts and eloquent advocacy of revision of this costly and unnecessary legislation.

Mr. President, each year, the Senate Armed Services Committee adds a small amount of money to the defense budget to procure additional equipment for our Guard and Reserve forces. This year, Senator STENNIS and I offered an amendment to add $300 million for this purpose. Of this sum, $150 million will buy eight C-130's for the Air National Guard and $150 million will buy unspecified support equipment for the Guard and Reserve. I thank Senator STENNIS for his work in recognizing the importance of the Guard and Reserve.

As chairman of the Military Construction Subcommittee of the Senate Armed Services Committee, I want to briefly discuss the committee's recommendation on division B of S. 1160, which pertains to military construction. This year the committee forced to make major reductions in the military construction budget. The request was for $10.3 billion for new authority. Reductions of $1.5 billion, about 15 percent, are recommended by the committee. This year the Congress is faced with the difficult task of reconciling the need for military construction and family housing with the need to reduce the Nation's unacceptable high budget deficit. Such a reduction was not without significant consequences. Funding for many important community facilities was deferred. For the most part, funds for operations and maintenance and training facilities, as well as troop and family housing, were fully supported. The request to the Congress contained nearly 1,700 different projects, at 700 military installations, within the United States and overseas. One-quarter of the initial fiscal year request is for operations and maintenance and the rest, $7.8 billion, was requested for new construction, including $500 million for planning and design. Construction in the United States accounts for 73 percent, with 18 percent for bases in Europe and 9 percent in other overseas areas.

The committee has recommended authorization of $36 million for the Navy, to initiate land acquisition and construction to homeport a battleship group at Staten Island, NY, and a carrier battle group at Everett, WA. I want to especially thank Senator D'AMATO from the State of New York, and Senators GORTON and EVANS from the State of Washington, for so forcefully bringing to the committee's attention key strategic factors bearing on this important deployment. Senator MOYNIHAN also expressed a deep interest in the New York project. While any such basing decision is costly, the Secretary of the Navy has assured us that the appropriated cost of facilities at Everett, WA, will not exceed $272 million, and those at Staten Island, NY, will not exceed $188 million.

Other details of the committee action are in the committee's report and explanatory statement, and I do not intend to discuss the committee's action in any detail. I invite my colleagues attention to the report and would be pleased to respond to any questions Members might have.

I want to take this opportunity to acknowledge the efforts of Senator BINGAMAN, who served with me as the ranking minority member on the subcommittee. It has been a real pleasure to work on this Bill with Senator BINGAMAN. He has worked hard with me to develop a sensible military construction program within the severe fiscal constraints with which we had to deal. His dedication to this formidable task is very much appreciated. Let me also acknowledge the efforts of staff members Russ Milnes, Ken Johnson, Alan Chvotkin, and Ed McGaffigan, who handled the staff work on this bill, as well as special recognition to Marie Dickinson who provided staff support.

I also wish to thank James McGovern, chief counsel of the committee, for the support that he gave to the Subcommittee, as well as Alan Yuspeh, the committee's general counsel, for his invaluable assistance.

Mr. President, I am disturbed that we were not able to bring out the recommendation of the President, which was a 5.9-percent increase plus inflation. I am disturbed we were not able to bring out a 3-percent increase plus inflation. I am disturbed that we had to bring out a zero-plus-inflation increase in this bill. I feel that it is not the bill the country needs, but it is the best bill under the circumstances that we were able to bring out considering the high deficit of the Nation and the intense necessity for reducing that deficit.

As consideration of this bill goes along, I shall bring out other facts and figures showing how the Soviet Union has made tremendous progress in their

defenses while we have not kept abreast with them. The people of this Nation must realize that the Soviet Union has not abandoned its goal of world aggression; they still desire to control not only the Communist world, but the free world. But the way that they can be stopped is with a strong defense program. The freedom and the liberty which the people of this country enjoy is the greatest privilege under our Constitution. No nation has enjoyed as much freedom, as much opportunity, as much hope, and as high a standard of living as the people in the United States. We cannot afford to jeopardize our freedom and our liberty and all of the provisions under our form of government that have made this Nation so great. We must keep strong not only economically and militarily but spiritually, too. And we must remember the goal of the Soviets and never forget that it is a necessity, whether we like it or not, to keep this country strong from a military standpoint.

Mr. WARNER. Mr. President, I join in expressing appreciation to the distinguished chairman [Mr. GOLDWATER] and to the ranking minority member [Mr. NUNN], absent today, although very ably represented by our former chairman, the distinguished Senator from Mississippi.

In the opening statement by our chairman, Mr. GOLDWATER, he pays his respect to the subcommittee chairmen, of which I am privileged to be one, and I express appreciation for that acknowledgement, not only on behalf of myself but the other subcommittee chairman because, beginning with Senator Tower, we were given a considerable measure of responsibility and that same tradition has been kept intact by our distinguished chairman today. As such, we work as a team, in a bipartisan spirit, that spirit being fostered by the distinguished former chairman and Mr. NUNN, in reaching decisions on these issues so critical to the present and the future survival of this Nation.

Mr. President, at a later point in the consideration of this bill I will address by way of opening statement, presumably with my distinguished colleague from Colorado [Mr. HART], the matters relating to the strategic area. It is quite likely that many of our colleagues will have a specific interest with respect to those subjects. The chairman, Mr. GOLDWATER, in his statement today has a very complete and comprehensive review of the major actions taken by the subcommittee and eventually accepted by the committee as a whole.

Mr. President, I close by again thanking my distinguished senior colleagues, including Mr. THURMOND—I have the privilege of serving on his subcommittee also—for their guidance and leadership. I think we have provided to the Senate a very fine proposal in this bill. It is my hope the Senate will accept it and that we will meet the deadline of the chairman and majority leader by having the matter concluded before the recess next week.

I thank the Chair.

Mr. GOLDWATER. I thank my friend from Virginia not only for his statement but for the fine work he has done through the years of his assignments on the committee.

AMENDMENT NO. 147

(Purpose: To provide improved procurement procedures for the Department of Defense).

Mr. GOLDWATER. Mr. President, I send to the desk a committee amendment and ask for its immediate consideration.

I also ask unanimous consent that there be a separate printing of the committee amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arizona [Mr. GOLDWATER] proposes an amendment numbered 147.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

AMENDMENT No. 147

After title V of division A of the bill, insert the following new title:

TITLE VI—PROCUREMENT POLICY REFORM AND OTHER PROCUREMENT MATTERS

SHORT TITLE

SEC. 601. This title may be cited as the "Defense Procurement Improvement Act of 1985".

CONGRESSIONAL FINDINGS AND POLICY

SEC. 602. The Congress finds that the process by which the Department of Defense acquires weapon systems and other defense equipment can be improved—

(1) by promoting continuous competition throughout the period of time in which a weapon system or other defense equipment is acquired, when such competition is cost effective, would not result in unacceptable delay, and is otherwise in the national security interest of the United States;

(2) by requiring the Secretary of Defense to make thorough estimates of what it should cost to manufacture a particular weapon system or other defense equipment;

(3) by ensuring that the military and civilian personnel of the Department of Defense who have substantial responsibility for the acquisition of weapon systems and other defense equipment are highly qualified for the duties they perform;

(4) by ensuring that the career path for military officers who have specialized in the acquisition of weapon systems or other defense equipment offers sufficient opportunity for advancement and promotion;

(5) by providing mandatory training for personnel responsible for enforcing quality assurance in contractor facilities;

(6) by promoting increased disclosure of the activities of employees of defense contractors who are former employees of the Department of Defense and who were involved with the procurement of defense services and equipment while employed by the Department of Defense;

(7) by preventing conflicts of interest by employees of the Department of Defense involved in the negotiation and administration of Government contracts;

(8) by continuing procurement technical assistance through outreach programs; and

(9) by shifting the burden of proof in certain matters in the resolution of Government contract disputes.

COMPETITION IN MAJOR WEAPON SYSTEM AND EQUIPMENT ACQUISITION PROGRAMS

SEC. 603. (a)(1) Chapter 137 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 2324. Planning for competition in major weapon system and equipment acquisition programs

"(a) In this section:

"(1) 'Full scale development', when used with respect to a weapon system or other defense equipment, means all detail design of the weapon system or other defense equipment necessary for the production of that system or equipment to begin.

"(2) 'Major defense acquisition program' has the same meaning as provided in section 139a(a)(1) of this title.

"(3) 'Acquisition plan' means the type of plan referred to in section 7.104 of the Federal Acquisition Regulation as in effect on April 1, 1985.

"(4) 'Acquisition', when used with respect to a weapon system or other defense equipment, means the complete process associated with the development and procurement of the weapon system and other defense equipment, including identification of military requirements, research, and testing.

"(5) 'System integration' means the development and administration, normally by a prime contractor, of the process of manufacturing a completed weapon system or other defense equipment for delivery to the United States, including the installation of all subsystems and components.

"(b)(1) Before completion of the full scale development of a weapon system or other defense equipment under a major defense acquisition program, the Secretary of Defense shall prepare an acquisition plan for such program.

"(2) The acquisition plan shall provide for the use of competitive procedures when required by section 2304 of this title.

"(c) The acquisition plan prepared pursuant to subsection (b)(1) shall require the establishment and maintenance of two or more production sources for system integration and for major subsystems to be purchased by the United States under the major defense acquisition program when the establishment and maintenance of two or more production sources—

"(1) would increase competition and would likely result in reduced overall costs for such program;

"(2) would not result in unacceptable delays in fulfilling the needs of the Department of Defense; and

"(3) is otherwise in the national security interest of the United States.

"(d) The Secretary shall submit to the Committees on Armed Services of the Senate and House of Representatives the acquisition plan prepared pursuant to subsection (b)(1) for a major defense acquisition program as soon as the plan is com-

plete, but in no event later than the time that an initial budget request for production of the program is made to the Congress.

"(e) If an acquisition plan prepared pursuant to subsection (b)(1) does not require the establishment and maintenance of two or more production sources, the Secretary shall include in the plan a statement of the reasons, including any cost estimates or other background material, which form the basis for the Secretary's conclusion that the establishment and maintenance of two or more production sources is not required.

"(f) Nothing in this section is intended to modify or abrogate the provisions of section 2304 of this title.".

(2) The table of sections at the beginning of such chapter is amended by inserting at the end thereof the following new item:

"2324. Planning for competition in major weapon system and equipment acquisition programs.".

(b) The amendments made by subsection (a) shall apply only to major defense acquisition programs for which funds for initial production are requested by the Secretary of Defense for fiscal year 1987 or any subsequent fiscal year.

COST ESTIMATES FOR MAJOR DEFENSE ACQUISITION PROGRAMS

SEC. 604. (a)(1) Chapter 141 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 2406. Cost estimates for major defense acquisition programs

"(a) In this section:

"(1) 'Competitive procedures' has the same meaning as provided in section 2302(2) of this title.

"(2) 'Major defense acquisition program' has the same meaning as provided in section 139a(a)(1) of this title.

"(3) 'Should-cost analysis' means the type of analysis referred to in section 15.810 of the Federal Acquisition Regulation as in effect on April 1, 1985.

"(4) 'System integration' has the same meaning as provided in section 2324(a)(5) of this title.

"(b)(1) During the first four years of production under a major defense acquisition program, the Secretary of Defense shall perform a should-cost analysis of the system integration and of each major subsystem to be purchased directly by the United States for each such program.

"(2) The should-cost analysis of a major defense acquisition program required by paragraph (1) shall be conducted with respect to a contractor only when the contractor has received a contract award under the program under other than competitive procedures during the first four years of production of the program.

"(c) The Secretary of Defense shall authorize the Secretaries of the military departments, on a nondelegable basis, to waive the requirement of subsection (b) and shall establish criteria for the exercise of the authority. The Secretary of Defense shall submit to the Committees on Armed Services of the Senate and House of Representatives the criteria established under the first sentence. A grant of authority and the criteria established in connection with that authority may not take effect for a period of 60 calendar days after the day on which the criteria is received by the committees.

"(d) The Secretary of a military department shall promptly report to the Committees on Armed Services of the Senate and House of Representatives any waiver made by the Secretary under subsection (d).

"(e) If practicable, the preparation of the should-cost analysis in connection with any major defense acquisition program should be performed by employees of the Department of Defense.

"(f) The Secretary of Defense shall report annually to the Committees on Armed Services of the Senate and House of Representatives the cost of performing should-cost analyses for major defense acquisition programs and the savings believed to have been achieved in such programs from the analyses.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"2406. Cost estimates for major defense acquisition programs.".

(b) The amendments made by subsection (a) shall apply only to major defense acquisition programs for which funds for initial production are appropriated for fiscal year 1986 or for any subsequent fiscal year.

MANAGEMENT OF DEPARTMENT OF DEFENSE PROCUREMENT PERSONNEL

SEC. 605. (a) Part II of subtitle A of title 10, United States Code, is amended by adding at the end thereof the following new chapter:

"CHAPTER 85—PROCUREMENT MANAGEMENT PERSONNEL

"Sec.
"1621. Definitions.
"1622. Education, training, and experience requirements for program managers.
"1623. Education, training, and experience requirements for certain assignments.
"1624. Training program for quality assurance personnel.

"§ 1621. Definitions

"In this chapter:

"(1) 'Major defense acquisition program' shall have the same meaning as provided in section 139a(a)(1) of this title.

"(2) 'Program manager' means an individual assigned by a military department to have overall responsibility for acquisitions under a major defense acquisition program.

"§ 1622. Education, training, and experience requirements for program managers

"(a) The Secretary of each military department shall prescribe regulations, subject to the approval of the Secretary of Defense, establishing minimum requirements of education, training, and prior experience for program managers of major defense acquisition programs.

"(b) Regulations prescribed under subsection (a) shall require, at a minimum, that to be assigned to duty as a program manager a person must—

"(1) have attended the program management course at the Defense Systems Management College or a comparable program management course at another institution; and

"(2) have had eight years of total experience in the acquisition, support, and maintenance of weapon systems, at least four years of which was spent on assignments in the Army Materiel Command, Naval Materiel Command, Air Force Systems Command, or Air Force Logistics Command, or any successor organization of any such command.

"(c) Periods of time spent in postgraduate education in a technical or management field and attending the course referred to in subsection (b)(1) may be counted toward satisfying the eight-year requirement prescribed in subsection (b)(2).

"(d) In assigning any person to duty as a program manager, the Secretary concerned may waive the requirements prescribed in subsection (b) in individual cases. The authority to waive the requirements may not be delegated.

"§ 1623. Education, training, and experience requirements for certain assignments

"(a) The Secretary of each military department concerned shall prescribe regulations, subject to the approval of the Secretary of Defense, establishing minimum requirements of education, training, and prior experience for officers of that department assigned to duty in the Army Materiel Command, Naval Materiel Command, Air Force Systems Command, or Air Force Logistics Command, or any successor organization of any such command, who hold the grade of brigadier general or commodore, or any higher grade.

"(b) Regulations prescribed under subsection (a) shall require, at a minimum, that in order for an officer of a military department to serve in the grade of brigadier general or commodore, or a higher grade, while assigned to duty in the Army Materiel Command, Naval Materiel Command, Air Force Systems Command, or Air Force Logistics Command, or any successor organization of any such command, the officer must meet the requirements of section 1622(b) of this title.

"(c) The Secretary concerned may waive the requirements for assignment to duty described in subsection (a). The authority to waive such requirements may not be delegated.

"§ 1624. Training program for quality assurance personnel

"The Secretary of Defense shall develop a formal introductory training program of not less than four weeks in duration for all personnel of the Department of Defense who are responsible for assuring quality in contractor facilities. A person assigned to perform quality assurance duties in the Department of Defense shall attend such program during the first six months of the assignment.".

(b) The table of chapters at the beginning of subtitle A of title 10, United States Code, and at the beginning of part II of such subtitle are each amended by inserting after the item relating to chapter 83 the following new item:

"85. Procurement Management Personnel ..... 1621".

IMPROVED REPORTING AND DISCLOSURE FOR FORMER EMPLOYEES OF THE DEPARTMENT OF DEFENSE; PREVENTION OF CONFLICTS OF INTEREST

SEC. 606. (a) Section 2397(a)(1) of title 10, United States Code, is amended—

(1) by striking out "by negotiation"; and

(2) by striking out "$10,000" and inserting in lieu thereof "$25,000".

(b) Section 2397(b)(2) of such title is amended to read as follows:

"(2)(A) If a person to whom this subsection applies (i) was employed by, or served as a consultant or otherwise to, a defense contractor at any time during a year at an annual pay rate of at least $25,000 and the defense contractor was awarded contracts by the Department of Defense during the preceding year that totaled at least $10,000,000, and (ii) within the 2-year period ending on the day before the person began the employment or consulting relationship, the person served on active duty or performed civilian service for the Department,

the person shall file a report with the Secretary of Defense in such manner and form as the Secretary may prescribe. The person shall file the report not later than 90 days after the date on which the person began the employment or consulting relationship.

"(B) The person shall file an additional report each time, during the 2-year period beginning on the date the active duty or civilian service with the Department terminated, that the person's job with the defense contractor significantly changes or the person commences an employment or consulting relationship with another defense contractor under the conditions described in the first sentence. A person required to file an additional report under this subparagraph shall file the report within 30 days after the date of the change or the date the employment or consulting relationship commences, as the case may be.".

(c) Section 2397(b)(3) of title 10, United States Code, is amended—

(1) by striking out clause (D) and inserting in lieu thereof the following:

"(D) A description of the duties and work performed by the person for the defense contractor, and a description of any similar duties or work performed for which the person had at least partial responsibility as a civilian official or employee of the Department of Defense or a member of the armed forces during the 2-year period referred to in paragraph (2)(A)(ii).";

(2) in clause (F)—

(A) by striking out "brief"; and

(B) by striking out "3-year period before that duty or service ended" and inserting in lieu thereof "2-year period referred to in paragraph (2)(A)(ii) and a description of the type of work performed and the extent to which such work was performed by the person for the defense contractor that has employed the person or has retained the person as a consultant"; and

(3) by adding at the end thereof the following new clause:

"(I) A statement describing any disqualification action taken by the person during the 2-year period referred to in paragraph (2)(A)(ii) with respect to any personal and substantial involvement in a matter concerning the defense contractor.".

(d)(1) Section 2397(c)(1) of such title is amended—

(A) by striking out "fiscal" each place it appears; and

(B) in clause (B)—

(i) by striking out "3-year" and inserting in lieu thereof "2-year"; and

(ii) by striking out "$15,000" and inserting in lieu thereof "$25,000".

(2) Section 2397(c)(2) of such title is amended—

(A) by striking out clause (C) and inserting in lieu thereof the following:

"(C) A description of the duties and work performed by the person with the Department and a description of any similar duties or work for which the person had at least partial responsibility as an employee or consultant of the defense contractor during the 2-year period referred to in paragraph (1)(B).''; and

(B) by striking out clause (F) and inserting in lieu thereof the following:

"(F) A description of the duties and work performed by the person for the defense contractor and a description of the type of work and the extent to which such work was performed by the person in connection with contracts of the defense contractor with the Department during the 2-year period referred to in paragraph (1)(B).".

(e) Subsection (f) of section 2397 of such title is amended to read as follows:

"(f)(1) A person who fails to comply with the filing requirements of this section shall be liable to the United States for an administrative penalty in the amount of $10,000, or in such lesser amount as may be determined by the Secretary of Defense, considering all the relevant circumstances.

"(2) The Secretary shall determine whether a person has failed to file a report required by this section and shall determine the amount of the penalty under paragraph (1). The Secretary shall make the determinations on the record after opportunity for an agency hearing as provided in subchapter II of chapter 5 of title 5, United States Code. The determinations of the Secretary shall be subject to judicial review under chapter 7 of such title.".

REQUIREMENTS RELATING TO PRIVATE EMPLOYMENT CONTACTS BETWEEN CERTAIN DEPARTMENT OF DEFENSE PROCUREMENT OFFICIALS AND DEFENSE CONTRACTORS

SEC. 607. (a)(1) Chapter 141 of title 10, United States Code, is amended by inserting after section 2397 the following new section:

"§ 2397a. Requirements relating to private employment contacts between certain Department of Defense procurement officials and defense contractors

"(a) In this section:

"(1) 'Contract' has the same meaning as provided in section 2397(a)(1) of this title.

"(2) 'Covered defense official', means any individual who is serving—

"(A) as a civilian officer or employee of the Department of Defense in a position for which the rate of pay is equal to or greater than the minimum rate of pay payable for grade GS-11 under the General Schedule; or

"(B) on active duty in the armed forces in a pay grade of O-4 or higher.

"(3) 'Defense contractor' has the same meaning as provided in section 2397(a)(2) of this title.

"(4) 'Designated agency ethics official' has the same meaning as the term 'designated agency official' in section 209(10) of the Ethics in Government Act of 1978 (92 Stat. 1850; 5 U.S.C. App.).

"(5) 'Employment' means a relationship under which an individual furnishes services in return for any payment or other compensation paid directly or indirectly to the individual for the services.

"(6) 'Procurement function' includes, with respect to a contract, any function relating to—

"(A) the negotiation, award, administration, or approval of the contract;

"(B) the selection of a contractor;

"(C) the approval of changes in the contract;

"(D) quality assurance, operation and developmental testing, the approval of payment, or auditing under the contract; or

"(E) the management of the procurement program.

"(b)(1) If a covered defense official who has participated personally and substantially in the performance of a procurement function in connection with a contract awarded by the Department of Defense contacts, or is contacted by, the defense contractor to whom the contract was awarded regarding future employment opportunities for the official with the defense contractor, the official shall, except as provided in paragraph (2)—

"(A) promptly report the contact to the official's supervisor and to the designated agency ethics official (or his designee) of the agency in which the covered defense official is employed; and

"(B) for any period for which future employment opportunities for the covered defense official have not been rejected by either the covered defense official or the defense contractor, disqualify himself from all participation in the performance of procurement functions relating to contracts of the defense contractor.

"(2) A covered defense official is not required to report the first contact with a defense contractor under paragraph (1)(A) or to disqualify himself under paragraph (1)(B) if the defense official terminates the contact immediately. However, if an additional contact of the same or a similar nature is made by or with the defense contractor, the covered defense official shall, as provided in paragraph (1), report the contact and all contacts of the same or a similar nature made by or with the defense contractor during the 90-day period ending on the date the additional contact is made.

"(c) A report required by subsection (b)(1) shall include—

"(1) the date of each contact covered by the report; and

"(2) a brief description of the substance of the contact.

"(d)(1)(A) If the Secretary of Defense determines under paragraph (2) that a person has failed promptly to make a report required by subsection (b)(1)(A) or (b)(2) or has failed to disqualify himself in any case in which he is required to do so under subsection (b)(1)(B)—

"(i) the person may not accept or continue employment with the defense contractor during the 2-year period beginning on the date of the contact; and

"(ii) the Secretary may impose on the person an administrative penalty in the amount of $10,000, or in such lesser amount as may be prescribed by the Secretary, taking into consideration all the circumstances.

"(B) An individual who accepts or continues employment prohibited by subparagraph (A)(i) shall be liable to the United States for an administrative penalty as provided in subparagraph (A)(ii). Such penalty may be in addition to any penalty previously imposed on the individual under subparagraph (A)(ii) for failure promptly to make a report relating to the defense contractor by whom the individual is employed as required by subsection (b)(1)(A) or (b)(2).

"(C) The Secretary of Defense may take action against an individual under this paragraph before, on, or after the date on which the individual's employment with the Government is terminated.

"(2)(A) The Secretary of Defense shall—

"(i) determine whether an individual has failed promptly to make a report required by subsection (b)(1)(A) or (b)(2) or has failed to disqualify himself in any case in which he is required to do so under subsection (b)(1)(B) and shall determine whether to impose a penalty under paragraph (1)(A)(ii) and the amount thereof; and

"(ii) determine whether an individual is liable to the United States for an administrative penalty under paragraph (1)(B) and the amount thereof.

There shall be a rebuttable presumption in favor of a covered defense official that failure to report a contact with a defense contractor or failure to disqualify himself from participation in the performance of certain procurement functions is not a violation of subsection (b)(1)(A) or (b)(2) or subsection

(b)(1)(B), as the case may be, if the defense official has received an opinion in writing from the designated agency ethics official under subsection (e) stating that a report or disqualification by the official was not necessary.

"(B) Determinations of the Secretary under subparagraph (A) shall be made on the record after opportunity for an agency hearing as provided in subchapter II of chapter 5 of title 5. The determinations of the Secretary shall be subject to judicial review under chapter 7 of such title.

"(e) If a designated agency ethics official or his designee receives a report required by subsection (b) or a request for advice from a covered defense official relating to a contact described in such subsection, the designated agency ethics official or his designee may issue a written opinion regarding the necessity of a covered defense official to file a report or disqualify himself from participation in certain procurement functions, as the case may be.

"(f) A covered defense official should request the advice of his supervisor and the appropriate designated agency ethics official or his designee on matters to which this section applies.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 2397 the following new item:

"2397a. Requirements relating to private employment contacts between certain Department of Defense procurement officials and defense contractors.".

(b) The amendments made by subsection (a) shall take effect with respect to contacts (referred to in section 2397a of title 10, United States Code, as added by subsection (a) of this section) made on or after the date of enactment of this Act.

AUTHORIZATION OF FUNDS TO CARRY OUT PROCUREMENT TECHNICAL ASSISTANCE COOPERATIVE AGREEMENT PROGRAM

SEC. 608. (a) There are authorized to be appropriated $3,000,000 for each of the fiscal years 1986 and 1987 to be available for the purpose of furnishing assistance to carry out procurement technical assistance programs pursuant to cooperative agreements under chapter 142 of title 10, United States Code.

(b) There are authorized to be appropriated for fiscal years 1986 and 1987 such additional sums as are necessary to defray the expenses of administering the provisions of such chapter during such fiscal years, including the expenses related to the employment of any additional personnel necessary to administer such positions.

BURDEN OF PROOF IN GOVERNMENT CONTRACT DISPUTE RESOLUTION

SEC. 609. In any proceeding before the Armed Services Board of Contract Appeals, the United States Claims Court, or any other Federal court in which the reasonableness of general or administrative costs for which a defense contractor seeks reimbursement from the Department of Defense are in issue, the burden of proof shall be upon such contractor to establish that such costs are reasonable.

TECHNICAL AMENDMENTS

SEC. 610. (a) Sections 2321 through 2331 of chapter 138 of title 10, United States Code, are redesignated as sections 2331 through 2341, respectively.

(b) Sections 2331 and 2332 of such chapter, as redesignated by subsection (a), are each amended by striking out "2323" and inserting in lieu thereof "2333".

(c) Section 2333 of such chapter, as redesignated by subsection (a), is amended by striking out "2321" and "2322" each place they appear and inserting in lieu thereof "2331" and "2332", respectively.

(d) The items relating to sections 2321 through 2331 in the table of sections at the beginning of such chapter are redesignated to reflect the redesignations made by subsection (a).

EFFECTIVE DATES

SEC. 611. (a) Section 1623 of title 10, United States Code (as added by section 605(a) this title), shall take effect on July 1, 1990.

(b) Section 1624 of title 10, United States Code (as added by section 605(a) of this title), shall take effect on January 1, 1987.

(c) The regulations prescribed under subsection (a) of section 1622 of title 10, United States Code (as added by section 605(a) of this title) shall provide that—

(1) the requirement described in subsection (b)(1) of such section 1622 shall take effect July 1, 1987; and

(2) the requirement described in subsection (b)(2) of such section shall take effect July 1, 1989.

Mr. GOLDWATER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GOLDWATER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. COHEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HECHT). Without objection, it is so ordered.

Mr. COHEN. Mr. President, I rise in support of the National Defense Authorization Act for fiscal year 1986. As the chairman of the Seapower and Force Projection Subcommittee, I want to explain briefly how we went about preparing our portion of this bill, based on the President's request.

Our subcommittee reviewed procurement and research and development programs totaling $27.2 billion. Seapower and force projection funds include Navy ships and antisubmarine aircraft, as well as Air Force airlift aircraft.

The subcommittee approved $23.9 billion for Seapower and Force Projection programs, a reduction of $3.3 billion from the administration's request. In making these reductions, we were guided by the following priorities.

First, we were anxious to continue to build urgently needed ships and aircraft. For reasons I will discuss in a moment, I am pleased to report we were largely able to achieve this goal.

Our second priority was to continue to improve near-term readiness and sustainability. That is a matter which has bipartisan support. Democratic Members, as well as Republican Members, have long supported increasing our readiness and sustainability. Within our account, missiles, torpedoes, gun ammunition, and spare parts all contribute to this goal.

Third, we wanted to support ongoing multiyear contracts, and approve new ones where they show convincing potential for real savings.

As a related goal, we also wanted to encourage competition and support efficient production rates wherever feasible. This priority led us, for example, to cancel one aircraft production line, rather than to continue to produce at a very low and inefficient rate.

If I might diverge for just a moment, there has been a lot of discussion about $4 billion in defense savings that were revealed to the Armed Services Committee in the last few days. I would like to make just a couple of points regarding those savings.

No. 1, no one is complaining about the fact that we are saving money. This is something we have mandated the Defense Department to do. We want them to become better and more efficient in producing savings for the American taxpayer. For that reason, we have mandated certain types of programs.

The Competition in Contracting Act, which passed last year, has produced more competition and is thereby increasing savings. Many may recall that we also engaged in multiyear funding. In the shipbuilding program for aircraft carriers, for example, we actually projected saving some $700 to $800 million by procuring two aircraft carriers rather than one at a time. Those savings have been realized.

So no one is complaining about the fact that we saved money. But, there is some complaint—and I believe legitimate complaint—about the procedure that was used to reveal those savings to the committee. In my judgment, the committee should be apprised on a monthly, at least a quarterly basis, of the kind of savings that are being realized as a result of the various programs implemented by this administration. We should not be caught, after our initial markup has run its course, with the Defense Department saying:

By the way, we have saved an additional $4 billion which you were not aware of when you went through your initial markup.

So my complaint is with the procedure, not with the savings.

I might point out that because we projected inflation at about 4.8 percent this year, while it turned out to be almost a full percentage point lower, we got a windfall of about $1.2 billion. That is a remarkable change from the situation we had just 4 or 5 years ago under a prior administration.

Under the Carter administration, many of us—Republicans and Demo-

crats alike—complained loudly and consistently:

You are underestimating the cost of this weapons program. You are projecting inflation at 7 percent when we know it is much higher. As a matter of fact, it is running at 13 percent. So why are you coming in here submitting this particular budget request projecting the cost of this weapons system at a 7 percent inflation rate?

And they would have to come back in at the end of the year and say:

Sorry, we underestimated it. Now we have to have a supplemental appropriation and we need more money.

So that is something that is behind us and for that we ought to be thankful.

We have a very different problem now that we have inflation under control. We overestimated inflation, and I think prudently so, last year, when we said that we expected it would be 4.8 percent. Fine. then it came in at 3.8, and so much the better.

My complaint again is with the notification procedure that was used. I applaud the savings, but deplore the way they were announced. It gives the appearance of setting aside a little kitty over here, a slush fund, which left the committee that authorizes the funds unaware until the Budget Committee brought its resolution to the floor and, reduced the 3-percent real growth increase to zero.

So I think there is a good cause for complaint about the procedures used. I believe, as Senator GOLDWATER has indicated, we want those procedures changed.

Mr. GOLDWATER. Will the Senator yield?

Mr. COHEN. I yield to the Senator from Arizona.

Mr. GOLDWATER. Mr. President, I am glad the Senator has discussed this. I think it is the proper place to do it.

The Senator will remember that during the markup, when this matter was discussed, I said we would form a committee. I am happy to tell my friend we have informed the members of the committee that it will be a committee of the whole. Under the new rules, we cannot form another subcommittee. So we will meet as a committee of the whole and bring the Pentagon over, the auditors, and everybody concerned.

I believe I can promise my friend that this will not happen again. I was just as exercised about it as he was at the late reporting. But I think it indicates the great amount of progress that has been made over there when we can effect those savings.

I thank my friend from Maine for making these statements.

Mr. COHEN. Mr. President, I thank the Senator.

Before I highlight some of the success that we have had, I want to call my colleagues attention to one shining exception to all the bad news we've been hearing lately about defense costs—and that is the Navy's shipbuilding program. While the overall Defense Department's budget request increased by $36 billion this year, the Navy shipbuilding request actually decreased $172 million or 5 percent in real terms. Moreover, more than $870 million in savings were available from prior year savings in shipbuilding. As I mentioned, the savings resulted from keen competition within the shipbuilding industry, improved shipyard productivity, the elimination of costly changes during construction, and reduced inflation. Believing that these savings should accrue to those who earned them, the committee applied them fully to this year's shipbuilding request. Consequently, we were able to authorize 21 of the 23 new ships requested.

As for specific programs, among the new ships authorized were four nuclear powered attack submarines, three *Aegis* class cruisers, six mine warfare ships, two fleet oilers, and another of the LHD-1 *Wasp* class amphibious assault ships.

Readiness and sustainability received special emphasis, and I am pleased to report that we made no reductions in ammunition requests. Once again, many people in this Chamber last year and the year before kept complaining:

We are cutting down readiness and sustainability. We need more ammunition. Don't send those ships out there unless you have sufficient ammunition to give them a sustained war-fighting capability.

Well, we have done that. We made no reductions in ammunition requests. In fact, we authorized funding for more than 1,400 surface-to-air missiles and over 600 antisubmarine torpedoes.

In the airlift area, the committee authorized continued procurement of the C-5B Galaxy airlifter and the KC-10 airlift.

For Navy aircraft, the committee approved funding for 24 LAMPS Mark-111 anitsubmarine helicopters, 9 P-3C ORION ASW patrol aircraft, and 14 C/MH-53 helicopters, including 10 of the minesweeping version.

The committee denied funding for six LAMPS Mark 1 helicopters, an aircraft which was being produced at an inefficient and costly rate. This action will also close this production line 1 year earlier than planned.

I believe the Seapower and Force Projection portion of this bill is a balanced, affordable package which is consistent with congressional priorities.

Mr. President, I urge my colleagues support during the deliberations on this matter.

Once again, I take this opportunity to pay tribute to our chairman, who was able to, I believe, produce a balanced and responsible defense package. There is a lot of criticism directed to this defense budget, some of it justified, perhaps, by contractors who have been, frankly, ripping off the public.

It has been going on for too long. I am happy to hear the chairman of the Armed Services Committee say he is not going to tolerate it any longer, that if he had his choice, he would suspend all contracts with those individuals who have in fact exploited the very needs of this country, and we cannot afford to have people taking advantage of our national security requirements. We have people who have overcharged, have submitted improper charges, and who have billed us for absurd personal and private expenses. Then they expect the American people to support a strong national defense.

There is no doubt we have to have a very strong, vigorous, dynamic military to defend this country. Consequently, when contractors engage in fraud, we ought to be as strict as we possibly can in prosecuting them. When they are guilty, we should put them in jail, if it takes that kind of example.

The chairman may be aware that I have once again introduced a measure dealing with a civil approach to contractors who submit improper charges so we do not have to go through the Justice Department on every case involving those claims under $100,000. This would allow us to focus on civil fraud penalties as well as criminal penalties for those who are cheating the American taxpayer and compromising our national security.

Mr. GOLDWATER. Will the Senator yield?

Mr. COHEN. I yield.

Mr. GOLDWATER. I am glad the Senator brought this up. I brought it up in my opening statement. I am just fed up with the very, very small percentage of our contractors who have stolen, cheated, and lied. I called my staff together the other day and suggested that we cancel the contracts of one of them. I will not mention the name here. I have done that before. It turns out that they make 50 percent of our jet engines. We are in dire need of those.

The Senator realizes that in addition to his fine amendment that we have other amendments that apply themselves to this problem. One in particular lists every conceivable type of thing that a corporation or company cannot engage in irregardless of what the Internal Revenue might allow. I think this is long, long overdue. I do not think we can get tough enough on these people. Any company that takes advantage of our defense frankly I do not think ought to be in business.

Mr. COHEN. I thank the chairman for his comments. I might point out that part of the reason that we are in

this predicament is that there has not been enough competition in the defense industry. We have had too many contractors who have a lock on defense contracts. They have a monopoly and when they get a monopoly, the same thing takes place that we have seen in other industries. The price goes up, we cannot turn elsewhere to get the product, and there is virtually no control over how much the monopolist can extract from the taxpayers in the name of national security.

During this administration, we have seen more competition than ever before in defense procurement. This has been especially true in the Navy. Secretary Lehman has been an outstanding, vigorous advocate of more competition. As a result, we have saved substantial money in the shipbuilding account. We need more of that across the defense spectrum.

As the chairman has pointed out, he would like to cancel the contracts of those who defraud the procurement system. The problem is that without alternative suppliers, you may cancel one-half of our productive capacity. You cannot cancel half of this country's capacity to produce jet engines at a time when threats to our interest continue to expand around the world. This is not an easy black or white issue.

I want to commend the chairman once again for, No. 1, insisting that the Pentagon keep us apprised of savings that have been achieved. With that information, the authorizing committee can then decide whether or not we want to apply those savings to existing programs, or cut the budget, reduce the deficit, or apply the savings in some other way.

But if we are ignorant of those savings and let that account grow until the Pentagon wants to reveal it to the Appropriations Committee, then it seems to me that does a great disservice to the authorizing committee, to this Congress, and all concerned.

So I am delighted to hear the chairman intends to implement this new program which will require the committee be informed on a regular and timely basis.

Mr. WARNER. Will the Senator yield?

Mr. COHEN. I yield.

Mr. WARNER. Mr. President, I fear that there could be a misimpression created here. I would like to ask the chairman and our distinguished colleague from Maine if they would join me in another minute on this subject. I was interviewed by the press, and just moments ago. There were certain adjectives used which led me to believe that we could, in this colloquy and other statements, give the impression that the Secretary of Defense and his deputies willfully, intentionally, maybe even maliciously, withheld this information. And I, for one, after an examination of the record, after working on the matter with the chairman and others in your office, and in the committee hearing came away with the impression there was no willful or intentional withholding of this information.

During the analysis by our committee on Wednesday, I brought forth the historical perspective of this problem; namely, that last year there was $3.6 billion in funds which the auditors in the Department of Defense determined were available and, indeed, as Mr. Cohen has pointed out, they were absorbed in the process of review by the Appropriations Committee. That is the way it has been done in years previous. However, the year prior, in the fiscal year 1983, the chairman of the Armed Services Committee, Mr. TOWER, on his initiative—and I presume with what he regarded as a timely fashion—determined the availability of in excess of $2 billion. We all remember that day when he announced to the full committee in session that it was his intention to apply those funds to the B–1 bomber program. I cannot recall the vote but the committee did accept his recommendation, and the funds were so applied. Therefore, those two historical precedents confirmed this Senators's opinion that there has been a practice knowledgeable by staffs of our committee, and the majority and the minority in their work almost on a daily basis with the individuals in the Department of Defense. I wholeheartedly endorse the chairman's recommendation that our committee review, together with Senator COHEN's recommendations, how we might improve this practice in the future.

I would not want this dialog today, and in the previous 2 days, to be concluded on a note that there is in this Senator's mind any belief that there was, should I say, a malice aforethought on the part of the Secretary of Defense or any of his deputies.

Mr. GOLDWATER. If the Senator will yield on that point, I do not believe that the chairman has at any time indicated that this was maliciously done.

Mr. WARNER. I am not suggesting that.

Mr. GOLDWATER. I was upset because this happened time and time and time again. I can go back in my memory to 1947 or 1948 when it happened. All I was criticizing the Secretary for was not giving us a progress report as we go along month by month, or quarter by quarter, as to what he is accumulating over there in the savings created by an overestimation of inflation that turned out that it produced $4 billion. I am very happy with it. The Senator knows that we applied that $4 billion to programs that we had to cut out. So it has been put to good use.

I join with my friend from Maine in wanting to see a repetition of this prevented. We can work out a way without any trouble in my opinion that will bring the attention of the committee to the existing situation in this fund.

Mr. WARNER. Mr. President, if the chairman will yield, I concur in his observations. I wholly support his recommendations. Presumably, the committee as a whole will perfect the procedure. I just wanted to make certain that I did not impute the remarks to the chairman nor to Senator COHEN nor anybody else, but they do exist and I felt that, in fairness to the Secretary and the members of the Department of Defense, we should make certain in this colloquy that none of us is making such an accusation.

I had the privilege of serving in the Department of Defense for over 5 years. I am fully familiar with the accounting procedures and how these matters are handled. Indeed, this system was followed in the period from 1969 to 1974, when I was there.

Senator COHEN. I think, very fairly brought out the historical perspective that in years past, there were deficits which required supplemental appropriations. That is the manner in which they were handled at that time.

I think we have reached a very satisfactory conclusion of this episode of the past few days. I just wanted to make a modest contribution to the record of my views.

The chairman has, I think, joined in my observation that there was no willfulness on the part of the Secretary.

I thank the Chair. I thank the distinguished Senator from Maine.

Mr. COHEN. Mr. President, just a few comments. I join in what Senator GOLDWATER has said, that neither he nor I have imputed any malice to the Secretary or his deputy. I would not have stood on this floor last year and the year before asking for two aircraft carriers unless they were going to produce the results they produced.

John Lehman said, "Give me two aircraft carriers and I will save you $800 million." He has done exactly that. I commend the Defense Department and the Navy for what they have done. We passed the Defense Department Contracting Act in 1984. It has accomplished some beneficial savings, in my view. We want to encourage them to do more. I could go on in this fashion.

The difficulty we have, is that the credibility of our defense needs is being unnecessarily compromised and undermined by a procedure which allows us to get on the floor and say, we need no less than x amount of money in order to fund programs critical to our defense. Then when those funds aren't all available, we're back a few days later, saying, we can achieve

what we wanted with less because we have all these surprise savings we just discovered.

All I want is for the Department to advise us of savings on a monthly, bimonthly, or weekly basis, whatever is feasible, so we can stay accurately informed.

We are not casting criticism on our friends, Cap Weinberger or his deputy, but we think a better procedure has to be implemented or we run the risk of coming to the floor and with very little credibility.

Frankly, I think that the need to maintain a strong national defense, not on a yearly basis but on a consistent basis, is among the most serious issues in this country. Last year one of our colleagues offered an amendment which chastised our European friends for not sustaining a long-term defense plan at 3-percent real growth. Here we are a year later, going to zero or less, based on what the House is about to do. What I am urging is a sustained, long-term defense program, but we need credibility to come to the Congress and the country and get support for that sort of commitment. I am delighted.

The chairman has indicated we are going to develop a better reporting procedure that will help us maintain that credibility and thereby strengthen our defenses.

Mr. WARNER. If the Senator will yield, I thank the Senator from Maine for his observations. I agree with him. Procedures should be improved.

I just remember back several years ago when Chairman TOWER, at the opportune time—he knew it was there—produced it. I think we all learn from experience and here is a clear example.

I share the view of the Senator from Maine that the credibility of the Department of Defense, indeed the credibility of this defense community working with the Department and all the defense budget, is brought under suspicion by virtue of the circumstantial case that can be made by the timing of the revelation of these funds.

I thank my friends and my colleagues from Arizona and Maine for indulging me in these comments.

Mr. COHEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. GOLDWATER. Mr. President, I ask unanimous consent that there be a period of routine morning business not to extend beyond 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE HOUSE

At 11:38 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 128. Joint resolution designating the month of October 1985 as "National High-Tech Month."

MEASURES REFERRED

The following joint resolution was read the first and second times by unanimous consent, and referred as indicated:

H.J. Res. 128. Joint resolution designating the month of October 1985 as "National High-Tech Month"; to the Committee on the Judiciary.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1142. A communication from the Deputy Assistant Secretary of Defense (Military Personnel and Force Management), transmitting, pursuant to law, a report on retired or former military officers major/lieutenant commanders or above, former civilian employees whose salary was equal to or above the minimum GS-13 level, and former employee of or consultant to a defense contractor who during the last fiscal year was employed by DOD at a salary equal to or above the minimum GS-13 level; to the Committee on Armed Services.

EC-1143. A communication from the Secretary of the Senate, transmitting, pursuant to law, a full and complete statement of the receipts and expenditures of the Senate, showing in detail the items of expense under proper appropriations, the aggregate thereof, and exhibiting the exact condition of all public moneys received, paid out, and remaining in the possession of the Secretary from October 1, 1984, through March 31, 1985; ordered to lie on the table.

FOREIGN CURRENCY REPORTS

In accordance with the appropriate provisions of law, the Secretary of the Senate herewith submits the following report(s) of standing committees of the Senate, certain joint committees of the Congress, delegations and groups, and select and special committees of the Senate, relating to expenses incurred in the performance of authorized foreign travel:

CONSOLIDATED REPORT OF EXPENDITURE OF FOREIGN CURRENCIES AND APPROPRIATED FUNDS FOR FOREIGN TRAVEL BY MEMBERS AND EMPLOYEES OF THE U.S. SENATE UNDER AUTHORITY OF SEC. 22, P.L. 95-384—22 U.S.C. 1754(b), COMMITTEE ON APPROPRIATIONS, FOR TRAVEL FROM JAN. 1 TO MAR. 31, 1985

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 168. Resolution waiving section 303(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1160.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. PROXMIRE (for himself and Mr. PRYOR):

S. 1164. A bill to amend title 10, United States Code, to limit the employment of former Department of Defense procurement personnel by defense contractors, and for other purposes; to the Committee on Armed Services.

S. 1165. A bill to limit the employment of former Federal Government procurement personnel by certain contractors, and for other purposes; to the Committee on Governmental Affairs.

By Mr. EVANS (for himself and Mr. LUGAR):

S. 1166. A bill to facilitate the adjudication of certain claims of U.S. nationals against Iran, to authorize the recovery of costs incurred by the United States in connection with the arbitration of claims of U.S. nationals against Iran, and for other purposes; to the Committee on Foreign Relations.

By Mr. GARN (for himself and Mr. PROXMIRE) (by request):

S. 1167. A bill to protect the Federal Savings and Loan Insurance Corporation; to the Committee on Banking, Housing, and Urban Affairs.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. SIMPSON (for Mr. DOLE (for himself, Mr. ANDREWS, Mr. BOSCHWITZ, Mr. BURDICK, Mr. COCHRAN, Mr. COHEN, Mr. D'AMATO, Mr. EAGLETON, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mr. HUMPHREY, Mr. JOHNSTON, Mrs. KASSEBAUM, Mr. KASTEN, Mr. KENNEDY, Mr. LEAHY, Mr. LUGAR, Mr. MCCLURE, Mr. MOYNIHAN, Mr. NUNN, Mr. PRYOR, Mr. STAFFORD, Mr. STENNIS, Mr. WILSON, and Mr. ZORINSKY)):

S. Res. 169. Resolution recognizing the centennial anniversary of the Holstein-Friesian Association of America; ordered held at the desk.

By Mr. SIMPSON (for Mr. DOLE):

S. Res. 170. Resolution appointing Kenneth U. Benjamin as Deputy Senate Legal Counsel; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PROXMIRE (for himself and Mr. PRYOR):

S. 1164. A bill to amend title 10, United States Code, to limit the employment of former Department of Defense procurement personnel by defense contractors, and for other purposes; to the Committee on Armed Services.

S. 1165. A bill to limit the employment of former Federal Government procurement personnel by certain contractors, and for other purposes; to the Committee on Governmental Affairs.

(The remarks of Mr. PROXMIRE and Mr. PRYOR, and the text of the legislation, appear earlier in today's RECORD.)

By Mr. EVANS (for himself and Mr. LUGAR):

S. 1166. A bill to facilitate the adjudication of certain claims of U.S. nationals against Iran, to authorize the recovery of costs incurred by the United States in connection with the arbitration of claims of U.S. nationals against Iran, and for other purposes; to the Committee on Foreign Relations.

IRAN CLAIMS SETTLEMENT ACT

Mr. EVANS. Mr. President, together with the distinguished chairman of the Committee on Foreign Relations, Mr. LUGAR, I am introducing legislation to promote the prompt and efficient processing of claims made by U.S. citizens and corporations against the Government of Iran. These claims are now pending before the Iran-United States Claims Tribunal in The Hague. Our bill, the Iran Claims Settlement Act of 1985, would achieve these ends in three ways. One, it would give the Foreign Claims Settlement Commission the authority to adjudicate certain claims of U.S. nationals against Iran should those claims be resolved by an en bloc settlement between the two governments. Two, it would permit the State Department and U.S. claimants to share among themselves pleadings and other documents that relate to proceedings before the Tribunal. And three, it would provide specific statutory authority for the collection of a fee from claimants to offset the expenses incurred by the U.S. Government in providing a forum for the arbitration of their claims and maintaining a source of funds for payment of awards to successful claimants.

The need for this legislation stems from the settlement of the hostage crisis with Iran in 1981. In addition to providing for the release of American hostages held in Iran, the settlement, known as the Algiers accords, established a method for resolving several categories of claims, including hundreds of commercial and financial claims of U.S. nationals against the Government of Iran. These claims arose from losses suffered both by individuals and corporations. Corporations had their assets expropriated and their commerical contracts breached. There are also hundreds of claims by Americans who were forced to leave their jobs and abandon their personal property as a result of the turmoil in revolutionary Iran.

The Algiers accords of January 19, 1981, established an international arbitration tribunal to hear claims such as these. Awards are paid from a $1 billion fund which the Iranian Government is obligated to replenish under specified circumstances. The Algiers accords also provide that the U.S. Government is to facilitate the processing of claims. For claims of less than $250,000, the U.S. Government, acting

through the Legal Adviser's Office in the Department of State, actually presents the claims to the Tribunal. For larger claims, the Department acts as a clearinghouse for information, prepares briefs on common issues of fact and law, provides advice to claimants' counsel on the Tribunal's procedures, and distributes pleadings to claimants.

With respect to claims for less than $250,000, for which the U.S. Government acts as agent at the Tribunal, it is the State Department's hope that Iran will agree to negotiate a lump sum settlement of these claims, so that they can be withdrawn from the Tribunal. If the Department is successful in obtaining Iran's agreement, it will then face the difficult and time-consuming task of making awards to the almost 3,000 individuals and corporations who have filed small claims.

Our bill would reduce the costs and delays associated with this adjudicatory process. It would give the Foreign Claims Settlement Commission the authority to hear the claims and make awards to small claimants from the settlement fund. The Commission is an expert body with vast experience in processing foreign claims. It has developed expedited procedures for processing claims of U.S. nationals against foreign governments.

Our bill would also permit the Department of State to provide claimants a greater range of information about the overall status of claims without jeopardizing the confidentiality accorded to claimants' pleadings under the Tribunal's rules of procedure. At present, the Department is unable to share with claimants documents related to the proceedings. The reason is that were the Department to provide these documents to a claimant, they would have to be made available to any person who requested them under the provisions of the Freedom of Information Act. This general availability would, in turn, violate the confidentiality provisions in the Tribunal's rules. As a result, cooperation between claimants and the Department is hindered and requires complicated arrangements. In order to allow the sharing of materials with private claimants, our bill provides a limited exception to the Freedom of Information Act for "records pertaining to the arbitration of claims before the Iran-United States Claims Tribunal."

Finally, our bill provides unequivocal statutory authority for the collection of a fee from each successful claimant to offset some of the costs the U.S. Government has incurred in maintaining the Tribunal and Security Account, in processing claims, and in assisting claimants. At present, the Department of State contributes more than $2 million annually as the U.S. Government's portion of the Tribunal's expenses. In addition, the Department provides a variety of services to claimants. For small claimants, it prepares all pleadings and presents each case to the Tribunal. For large claimants, it advises on precedent and procedure and coordinates arbitration strategy. Other Departments incur expenses as well. The Treasury Department, for example, is required to pay $900,000 annually to the N.V. Settlement Bank, a Netherlands bank which is managing the Security Account.

The question of whether claimants should bear a portion of these costs has been controversial. There are those who believe that a fee is not justified. They point out that no fee is imposed on litigants in Federal courts. Furthermore, but for the Algiers accords, many of these claims would have been resolved in litigation in Federal court, quite possibly on terms more favorable than those that will result from the Tribunal's awards. Those who object to a fee also note there are a number of purely intergovernmental claims pending before the Tribunal and that much of the expense the U.S. Government is incurring will inure to its benefit.

On the other hand, the administration believes that the imposition of a fee is proper. The vast majority of the Tribunal's caseload is composed of private claims by U.S. nationals against Iran; the Security Account is maintained to assure the prompt and effective payment, in full, of awards in favor of successful claimants; and, the Department of State provides substantial and valuable representational and advisory services to private claimants. The costs associated with these services should be borne by the beneficiaries, administration officials contend, and not by the taxpayer.

We agree with the administration's logic. In our view, a portion of the costs the U.S. Government is incurring should be defrayed by the claimants. The remainder, which reflects costs the Government would bear in any event to prosecute its own claims, should be paid by the Government.

Where we disagree with the administration is over the amount of the fee and its structure. The administration has proposed that a flat 2 percent be deducted from each award made by the Tribunal in favor of a U.S. claimant and paid from the Security Account. Our bill would impose a fee of 1½ percent of the first $5 million awarded and 1 percent on any amount over $5 million. The lower percentage is fairer to smaller claimants and the reduction for larger awards reflects the fact that at a certain point the Government's costs do not increase with the size of the claim. This schedule of fees would be made effective as of June 7, 1982.

Enactment of our legislation would solve two collateral issues raised by the matter of the fee. Since 1982, the administration has been collecting a 2-percent fee under a directive license issued pursuant to the authority of the Independent Offices Appropriations Act. The validity of that action has been challenged in the U.S. Claims Court. The chief judge of that court recently indicated his intent to enter a decision adverse to the United States. As a result, without our legislation, the entire amount collected to date would be subject to refund by decisions of that court.

Our legislation would ensure that the bulk of the amounts recovered to date, over $6 million, would remain in the Treasury. Further, it would guarantee that an additional $12 to $20 million in revenues, which the Department of State estimates would be collected under our bill, would go into the Treasury to offset the deficit.

Our bill strikes a balance between the interest of the individual and those of the general taxpayer. It provides advantages to both. We believe it deserves the support of all Senators.

Mr. President, I ask unanimous consent that the text of the Iran Claims Settlement Act of 1985 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1166

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That this Act may be cited as the "Iran Claims Settlement Act".

RECEIPT AND DETERMINATION OF CERTAIN CLAIMS

SEC. 2. (a) The Foreign Claims Settlement Commission of the United States is authorized to receive and determine, in accordance with the provisions of title I of the International Claims Settlement Act of 1949, the validity and amounts of claims by nationals of the United States against Iran which are settled en bloc by the United States. In deciding such claims, the Commission shall apply, in the following order, the terms of any settlement agreement, the relevant provisions of the Declarations of the Government of the Democratic and Popular Republic of Algeria of January 19, 1981, giving consideration to interpretations thereof by the Iran-United States Claims Tribunal, and applicable principles of international law, justice, and equity.

(b) The Commission shall certify to the Secretary of the Treasury any awards determined pursuant to subsection (a) of this section in accordance with section 5 of title I of the International Claims Settlement Act of 1949. Such awards shall be paid in accordance with sections 7 and 8 of that title, except that–

(1) the Secretary of the Treasury is authorized to make payments pursuant to paragraphs (1) and (2) of section 8(c) in the amount of $10,000 or the principal amount of the award, whichever is less; and

(2) the Secretary of the Treasury is authorized to deduct pursuant to section 7(b) an amount calculated in accordance with section 3(a), instead of 5 per centum, of payments made pursuant to section 8(c).

DEDUCTIONS FROM ARBITRAL AWARDS

SEC. 3. (a) Except as provided in section 4, whenever the Federal Reserve Bank of New York shall receive an amount from the Security Account established pursuant to the Declarations of the Democratic and Popular Republic of Algeria of January 19, 1981, in satisfaction of an award rendered by the Iran-United States Claim Tribunal in favor of a United States claimant, the Federal Reserve Bank of New York shall deduct from the amount so received, for the aggregate amount awarded under each enumerated claim before the tribunal, an amount equal to one and one-half percent up to and including a total awarded of $5,000,000 and one percent thereafter, as reimbursement to the United States for expenses incurred in connection with the arbitration of claims of United States Tribunal and the maintenance of the Security Account.

(b) Amounts deducted by the Federal Reserve Bank of New York pursuant to subsection (a) shall be deposited into the Treasury of the United States to the credit of miscellaneous receipts.

(c) Nothing in this section shall be construed to affect the payment to United States claimants of amounts received by the Federal Reserve Bank of New York in respect of awards by the Iran-United States Claims Tribunal, after deduction of the amounts calculated in accordance with subsection (a).

(d) This section shall be effective as of June 7, 1982.

EN BLOC SETTLEMENT

SEC. 4. The deduction by the Federal Reserve Bank of New York provided for in section 3(a) of this Act shall not apply in the case of a sum received by the Bank pursuant to an en bloc settlement of any category of claims of United States nationals against Iran when such sum is to be used for payments in satisfaction of awards certified by the Foreign Claims Settlement Commission pursuant to section 2(b) of this Act.

REIMBURSEMENT TO THE FEDERAL RESERVE BANK OF NEW YORK

SEC. 5. The Secretary of the Treasury is authorized to reimburse the Federal Reserve Bank of New York for expenses incurred by the bank in the performance of fiscal agency agreements relating to the settlement or arbitration of claims pursuant to the Declarations of the Democratic and Popular Republic of Algeria of January 19, 1981.

CONFIDENTIALITY OF RECORDS

SEC. 6. Notwithstanding the provisions of the Freedom of Information Act, section 552 of title 5, United States Code, records pertaining to the arbitration of claims before the Iran-United States Claims Tribunal shall be prohibited from disclosure to the general public except that—

(1) rules, awards, and other decisions of the Tribunal and claims and responsive pleadings filed at the Tribunal by the United States on its behalf shall be made available to the public unless the Secretary of State or his designee determines that public disclosure would be prejudicial to the interests of the United States or United States claimants in proceedings before the Tribunal, or that public disclosure would be contrary to the rules of the Tribunal; and

(2) the Secretary of State or his designee may determine on a case-by-case basis to make such information available when in his judgment the interests of justice requires.

ADDITIONAL COSPONSORS

S. 15

At the request of Mr. MOYNIHAN, the name of the Senator from Louisiana [Mr. LONG] was added as a cosponsor of S. 15, a bill to authorize the Secretary of Health and Human Services to make grants to States for the purpose of increasing the ability of States to provide drug abuse prevention, education, treatment, and rehabilitation, and for other purposes, to authorize the Attorney General to make grants to States for the purpose of increasing the level of State and local enforcement of State laws relating to production, illegal possession, and transfer of controlled substances.

S. 505

At the request of Mr. DURENBERGER, the names of the Senator from Tennessee [Mr. GORE], the Senator from New Jersey [Mr. BRADLEY], and the Senator from Delaware [Mr. ROTH] were added as cosponsors of S. 505, a bill entitled the "Maternal and Child Health Preventive Care Amendments of 1985."

S. 1060

At the request of Mr. D'AMATO, the name of the Senator from Montana [Mr. MELCHER] was added as a cosponsor of S. 1060, a bill to amend title II of the Social Security Act to protect the benefit levels of individuals becoming eligible for benefits in or after 1979 by eliminating the disparity (resulting from changes made in 1977 in the benefit computation formula) between those levels and the benefit levels of persons who become eligible for benefits before 1979.

S. 1153

At the request of Mr. D'AMATO, the name of the Senator from Kansas [Mr. DOLE] was added as a cosponsor of S. 1153, a bill to provide for the distribution within the United States of the U.S. Information Agency film entitled "Hal David: Expressing a Feeling."

SENATE JOINT RESOLUTION 98

At the request of Mr. D'AMATO, the name of the Senator from Georgia [Mr. MATTINGLY] was added as a cosponsor of Senate Joint Resolution 98, a joint resolution condemning the passage of Resolution 3379, in the U.N. General Assembly on November 10, 1975, and urging the U.S. Ambassador and U.S. delegation to take all appropriate actions necessary to erase this shameful resolution from the record of the United Nations.

SENATE JOINT RESOLUTION 115

At the request of Mr. LEAHY, the names of the Senator from Connecticut [Mr. DODD] and the Senator from Rhode Island [Mr. CHAFEE] were added as cosponsors of Senate Resolution 115, a joint resolution to designate 1985 as the "Oil Heat Centennial Year."

SENATE RESOLUTION 148

At the request for Mr. HELMS, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of Senate Resolution 148, a resolution commemorating the 50th anniversary of the Rural Electrification Administration.

At the request of Mr. ZORINSKY, the names of the Senator from Michigan [Mr. LEVIN], and the Senator from Montana [Mr. MELCHER] were added as cosponsors of Senate Resolution 148, supra.

SENATE RESOLUTION 169—RECOGNIZING THE CENTENNIAL ANNIVERSARY OF THE HOLSTEIN-FRIESIAN ASSOCIATION OF AMERICA

Mr. SIMPSON (for Mr. DOLE, for himself, Mr. ANDREWS, Mr. BOSCHWITZ, Mr. BURDICK, Mr. COCHRAN, Mr. COHEN, Mr. D'AMATO, Mr. EAGLETON, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mr. HUMPHREY, Mr. JOHNSTON, Mrs. KASSEBAUM, Mr. KASTEN, Mr. KENNEDY, Mr. LEAHY, Mr. LUGAR, Mr. MCCLURE, Mr. MOYNIHAN, Mr. NUNN, Mr. PRYOR, Mr. STAFFORD, Mr. STENNIS, Mr. WILSON, and Mr. ZORINSKY) submitted the following resolution; which, by unanimous consent, was ordered held at the desk until the close of business on Monday, May 20, 1985:

S. RES. 169

Whereas the Holstein-Friesian Association of America is a premier dairy cattle breed organization in the world;

Whereas the Holstein-Friesian Association of America, a nonprofit membership organization of more than forty-four thousand breeders of purebred, registered Holstein dairy cattle, was organized on May 25, 1885, and this year celebrates its one hundredth anniversary;

Whereas the Holstein breed of dairy cattle produces more than 90 percent of the Nation's milk supply;

Whereas such Association maintains the only official, complete genetic data bank and lineage record for all purebred, registered Holstein dairy cattle in the United States;

Whereas such Association through its many programs and services to the dairy industry has provided and continues to provide an environment, incentives and genetic data for the continued improvement of the Holstein breed;

Whereas United States Holsteins are recognized worldwide as the superior strain of Holstein breeding stock; and

Whereas the genetic pool of the Holstein breed in the United States has become the primary source of genetic material for the development and improvement of dairy cattle throughout the world: Now, therefore, be it

Resolved. That it is the sense of the Senate that on the occasion of the centennial anniversary of the Holstein-Friesian Association of America—

(1) recognition and commendation be extended the Holstein-Friesian Association of America for its most noteworthy contribu-

tion to the great American agricultural revolution;

(2) special commendation be extended for such Association's contribution to the genetic advancement and efficiency of the national dairy herd; and

(3) the Holstein-Friesian Association of America be complimented specifically on the advancement of the Holstein breed of dairy cattle in the United States and the contribution being made through its genetic pool of purebred, registered animals to the advancement of the Holstein breed worldwide.

Mr. DOLE. Mr. President, it is my pleasure today to introduce a sense of the Senate resolution recognizing the Centennial Anniversary of the Holstein-Friesian Association of America and to be joined as original cosponsors by my distinguished colleagues, Senators ANDREWS, BOSCHWITZ, BURDICK, COCHRAN, COHEN, D'AMATO, EAGLETON, HEFLIN, HELMS, HOLLINGS, HUMPHREY, JOHNSTON, KASSEBAUM, KASTEN, KENNEDY, LEAHY, LUGAR, MCCLURE, MOYNIHAN, NUNN, PRYOR, STAFFORD, STENNIS, WILSON, and ZORINSKY.

ASSOCIATION PURPOSE

Mr. President, the Holstein-Friesian Association of America has grown from a beginning membership of 284 at the time of its incorporation in 1885 to over 44,000 breeders of purebred, registered Holstein dairy cattle making it one of the premier dairy cattle breed organizations in the world.

As expressed in its original charter, the purpose of the association was to "improve the breed of Holstein-Friesian cattle; ascertaining, preserving and disseminating all useful information and facts as to their pedigrees and desirable qualities, and the distinguishing characteristics of the best specimens, and preparing, publishing, and supplying all necessary volumes of the Holstein-Friesian herd book; and, generally, for promoting and securing the best interests of the importers, breeders and owners of Holstein cattle, and thereby the public generally."

Mr. President, this has been a worthy and admirable aim of the Holstein Friesian Association of America. The association can be proud of its role in developing the quality of the Holstein dairy cattle breed throughout the United States and the world. U.S. Holsteins account for upwards of 90 percent of the Nation's milk supply as well as being a primary source of genetic material used for development and improvement of dairy cattle throughout the world.

Mr. President, it is indeed appropriate to recognize the 100th anniversary of the Holstein-Friesian Association of America and compliment them for their efforts in developing the Holstein dairy breed with its important role in providing a nutritious, wholesome and abundant supply of dairy products to our Nation's consumers.

SENATE RESOLUTION 170—APPOINTING KENNETH U. BENJAMIN AS DEPUTY SENATE LEGAL COUNSEL

Mr. SIMPSON (for Mr. DOLE) submitted the following resolution; which was considered and agreed to:

S. RES. 170

Resolved, That the appointment of Kenneth U. Benjamin to be Deputy Senate Legal Counsel made by the President pro tempore of the Senate on May 15, 1985, shall become effective on May 15, 1985, and the term of service of the appointee shall expire at the end of the 100th Congress.

AMENDMENTS SUBMITTED

NATIONAL DEFENSE AUTHORIZATION ACT, FISCAL YEAR 1986

GOLDWATER AMENDMENT NO. 147

Mr. GOLDWATER, on behalf of the Committee on Armed Services, proposed an amendment to the bill (S. 1160) to authorize appropriations for the military functions of the Department of Defense and prescribe personnel levels for the Department of Defense for fiscal year 1986, to authorize certain construction at military installations for such fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for other purposes; as follows:

AMENDMENT NO. 147

After title V of division A of the bill, insert the following new title:

TITLE VI—PROCUREMENT POLICY REFORM AND OTHER PROCUREMENT MATTERS

SHORT TITLE

SEC. 601. This title may be cited as the "Defense Procurement Improvement Act of 1985".

CONGRESSIONAL FINDINGS AND POLICY

SEC. 602. The Congress finds that the process by which the Department of Defense acquires weapon systems and other defense equipment can be improved—

(1) by promoting continuous competition throughout the period of time in which a weapon system or other defense equipment is acquired, when such competition is cost effective, would not result in unacceptable delay, and is otherwise in the national security interest of the United States;

(2) by requiring the Secretary of Defense to make thorough estimates of what it should cost to manufacture a particular weapon system or other defense equipment;

(3) by ensuring that the military and civilian personnel of the Department of Defense who have substantial responsibility for the acquisition of weapon systems and other defense equipment are highly qualified for the duties they perform;

(4) by ensuring that the career path for military officers who have specialized in the acquisition of weapon systems or other defense equipment offers sufficient opportunity for advancement and promotion;

(5) by providing mandatory training for personnel responsible for enforcing quality assurance in contractor facilities;

(6) by promoting increased disclosure of the activities of employees of defense contractors who are former employees of the Department of Defense and who were involved with the procurement of defense services and equipment while employed by the Department of Defense;

(7) by preventing conflicts of interest by employees of the Department of Defense involved in the negotiation and administration of Government contracts;

(8) by continuing procurement technical assistance through outreach programs; and

(9) by shifting the burden of proof in certain matters in the resolution of Government contract disputes.

COMPETITION IN MAJOR WEAPON SYSTEM AND EQUIPMENT ACQUISITION PROGRAMS

SEC. 603. (a)(1) Chapter 137 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 2324. Planning for competition in major weapon system and equipment acquisition programs

"(a) In this section:

"(1) 'Full scale development', when used with respect to a weapon system or other defense equipment, means all detail design of the weapon system or other defense equipment necessary for the production of that system or equipment to begin.

"(2) 'Major defense acquisition program' has the same meaning as provided in section 139a(a)(1) of this title.

"(3) 'Acquisition plan' means the type of plan referred to in section 7.104 of the Federal Acquisition Regulation as in effect on April 1, 1985.

"(4) 'Acquisition', when used with respect to a weapon system or other defense equipment, means the complete process associated with the development and procurement of the weapon system and other defense equipment, including identification of military requirements, research, and testing.

"(5) 'System integration' means the development and administration, normally by a prime contractor, of the process of manufacturing a completed weapon system or other defense equipment for delivery to the United States, including the installation of all subsystems and components.

"(b)(1) Before completion of the full scale development of a weapon system or other defense equipment under a major defense acquisition program, the Secretary of Defense shall prepare an acquisition plan for such program.

"(2) The acquisition plan shall provide for the use of competitive procedures when required by section 2304 of this title.

"(c) The acquisition plan prepared pursuant to subsection (b)(1) shall require the establishment and maintenance of two or more production sources for system integration and for major subsystems to be purchased by the United States under the major defense acquisition program when the establishment and maintenance of two or more production sources—

"(1) would increase competition and would likely result in reduced overall costs for such program;

"(2) would not result in unacceptable delays in fulfilling the needs of the Department of Defense; and

"(3) is otherwise in the national security interest of the United States.

"(d) The Secretary shall submit to the Committees on Armed Services of the Senate and House of Representatives the acquisition plan prepared pursuant to subsection (b)(1) for a major defense acquisition program as soon as the plan is complete, but in no event later than the time that an inital budget request for production of the program is made to the Congress.

"(e) If an acquisition plan prepared pursuant to subsection (b)(1) does not require the establishment and maintenance of two or more production sources, the Secretary shall include in the plan a statement of the reasons, including any cost estimates or other background material, which form the basis for the Secretary's conclusion that the establishment and maintenance of two or more production sources is not required.

"(f) Nothing in this section is intended to modify or abrogate the provisions of section 2304 of this title.".

(2) The table of sections at the beginning of such chapter is amended by inserting at the end thereof the following new item:

"2324. Planning for competition in major weapon system and equipment acquisition programs.".

(b) The amendments made by subsection (a) shall apply only to major defense acquisition programs for which funds for initial production are requested by the Secretary of Defense for fiscal year 1987 or any subsequent fiscal year.

COST ESTIMATES FOR MAJOR DEFENSE ACQUISITION PROGRAMS

SEC. 604. (a)(1) Chapter 141 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 2406. Cost estimates for major defense acquisition programs

"(a) In this section:

"(1) 'Competitive procedures' has the same meaning as provided in section 2302(2) of this title.

"(2) 'Major defense acquisition program' has the same meaning as provided in section 139a(a)(1) of this title.

"(3) 'Should-cost analysis' means the type of analysis referred to in section 15.810 of the Federal Acquisition Regulation as in effect on April 1, 1985.

"(4) 'System integration' has the same meaning as provided in section 2324(a)(5) of this title.

"(b)(1) During the first four years of production under a major defense acquisition program, the Secretary of Defense shall perform a should-cost analysis of the system integration and of each major subsystem to be purchased directly by the United States for each such program.

"(2) The should-cost analysis of a major defense acquisition program required by paragraph (1) shall be conducted with respect to a contractor only when the contractor has received a contract award under the program under other than competitive procedures during the first four years of production of the program.

"(c) The Secretary of Defense shall authorize the Secretaries of the military departments, on a nondelegable basis, to waive the requirement of subsection (b) and shall establish criteria for the exercise of the authority. The Secretary of Defense shall submit to the Committees on Armed Services of the Senate and House of Representatives the criteria established under the first sentence. A grant of authority and the criteria established in connection with that authority may not take effect for a period of 60 calendar days after the day on which the criteria is received by the committees.

"(d) The Secretary of a military department shall promptly report to the Committees on Armed Services of the Senate and House of Representatives any waiver made by the Secretary under subsection (d).

"(e) If practicable, the preparation of the should-cost analysis in connection with any major defense acquisition program should be performed by employees of the Department of Defense.

"(f) The Secretary of Defense shall report annually to the Committees on Armed Services of the Senate and House of Representatives the cost of performing should-cost analyses for major defense acquisition programs and the savings believed to have been achieved in such programs from the analyses.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"2406. Cost estimates for major defense acquisition programs.".

(b) The amendments made by subsection (a) shall apply only to major defense acquisition programs for which funds for initial production are appropriated for fiscal year 1986 or for any subsequent fiscal year.

MANAGEMENT OF DEPARTMENT OF DEFENSE PROCUREMENT PERSONNEL

SEC. 605. (a) Part II of of subtitle A of title 10, United States Code, is amended by adding at the end thereof the following new chapter:

"CHAPTER 85—PROCUREMENT MANAGEMENT PERSONNEL

"Sec.
"1621. Definitions.
"1622. Education, training, and experience requirements for program managers.
"1623. Education, training, and experience requirements for certain assignments.
"1624. Training program for quality assurance personnel.

"§ 1621. Definitions

"In this chapter:

"(1) 'Major defense acquisition program' shall have the same meaning as provided in section 139a(a)(1) of this title.

"(2) 'Program manager' means an individual assigned by a military department to have overall responsibility for acquisitions under a major defense acquisition program.

"§ 1622. Education, training, and experience requirements for program managers

"(a) The Secretary of each military department shall prescribe regulations, subject to the approval of the Secretary of Defense, establishing minimum requirements of education, training, and prior experience for program managers of major defense acquisition programs.

"(b) Regulations prescribed under subsection (a) shall require, at a minimum, that to be assigned to duty as a program manager a person must—

"(1) have attended the program management course at the Defense Systems Management College or a comparable program management course at another institution; and

"(2) have had eight years of total experience in the acquisition, support, and maintenance of weapon systems, at least four years of which was spent on assignments in the Army Materiel Command, Naval Materiel Command, Air Force Systems Command, or Air Force Logistics Command, or any successor organization of any such command.

"(c) Periods of time spent in postgraduate education in a technical or management field and attending the course referred to in subsection (b)(1) may be counted toward satisfying the eight-year requirement prescribed in subsection (b)(2).

"(d) In assigning any person to duty as a program manager, the Secretary concerned may waive the requirements prescribed in subsection (b) in individual cases. The authority to waive the requirements may not be delegated.

"§ 1623. Education, training, and experience requirements for certain assignments

"(a) The Secretary of each military department concerned shall prescribe regulations, subject to the approval of the Secretary of Defense, establishing minimum requirements of education, training, and prior experience for officers of that department assigned to duty in the Army Materiel Command, Naval Materiel Command, Air Force Systems Command, or Air Force Logistics Command, or any successor organization of any such command, who hold the grade of brigadier general or commodore, or any higher grade.

"(b) Regulations prescribed under subsection (a) shall require, at a minimum, that in order for an officer of a military department to serve in the grade of brigadier general or commodore, or a higher grade, while assigned to duty in the Army Materiel Command, Naval Materiel Command, Air Force Systems Command, or Air Force Logistics Command, or any successor organization of any such command, the officer must meet the requirements of section 1622(b) of this title.

"(c) The Secretary concerned may waive the requirements for assignment to duty described in subsection (a). The authority to waive such requirements may not be delegated.

"§ 1624. Training program for quality assurance personnel

"The Secretary of Defense shall develop a formal introductory training program of not less than four weeks in duration for all personnel of the Department of Defense who are responsible for assuring quality in contractor facilities. A person assigned to perform quality assurance duties in the Department of Defense shall attend such program during the first six months of the assignment.".

(b) The table of chapters at the beginning of subtitle A of title 10, United States Code, and at the beginning of part II of such subtitle are each amended by inserting after the item relating to chapter 83 the following new item:

"85. Procurement Management Personnel ..... 1621".

IMPROVED REPORTING AND DISCLOSURE FOR FORMER EMPLOYEES OF THE DEPARTMENT OF DEFENSE; PREVENTION OF CONFLICTS OF INTEREST

SEC. 606. (a) Section 2397(a)(1) of title 10, United States Code, is amended—

(1) by striking out "by negotiation"; and

(2) by striking out "$10,000" and inserting in lieu thereof "$25,000".

(b) Section 2397(b)(2) of such title is amended to read as follows:

"(2)(A) If a person to whom this subsection applies (i) was employed by, or served as a consultant or otherwise to, a defense contractor at any time during a year at an annual pay rate of at least $25,000 and the defense contractor was awarded contracts by the Department of Defense during the preceding year that totaled at least $10,000,000, and (ii) within the 2-year period

ending on the day before the person began the employment or consulting relationship, the person served on active duty or performed civilian service for the Department, the person shall file a report with the Secretary of Defense in such manner and form as the Secretary may prescribe. The person shall file the report not later than 90 days after the date on which the person began the employment or consulting relationship.

"(B) The person shall file an additional report each time, during the 2-year period beginning on the date the active duty or civilian service with the Department terminated, that the person's job with the defense contractor significantly changes or the person commences an employment or consulting relationship with another defense contractor under the conditions described in the first sentence. A person required to file an additional report under this subparagraph shall file the report within 30 days after the date of the change or the date the employment or consulting relationship commences, as the case may be.".

(c) Section 2397(b)(3) of title 10, United States Code, is amended—

(1) by striking out clause (D) and inserting in lieu thereof the following:

"(D) A description of the duties and work performed by the person for the defense contractor, and a description of any similar duties or work performed for which the person had at least partial responsibility as a civilian official or employee of the Department of Defense or a member of the armed forces during the 2-year period referred to in paragraph (2)(A)(ii).";

(2) in clause (F)—

(A) by striking out "brief"; and

(B) by striking out "3-year period before that duty or service ended" and inserting in lieu thereof "2-year period referred to in paragraph (2)(A)(ii) and a description of the type of work performed and the extent to which such work was performed by the person for the defense contractor that has employed the person or has retained the person as a consultant"; and

(3) by adding at the end thereof the following new clause:

"(I) A statement describing any disqualification action taken by the person during the 2-year period referred to in paragraph (2)(A)(ii) with respect to any personal and substantial involvement in a matter concerning the defense contractor.".

(d)(1) Section 2397(c)(1) of such title is amended—

(A) by striking out "fiscal" each place it appears; and

(B) in clause (B)—

(i) by striking out "3-year" and inserting in lieu thereof "2-year"; and

(ii) by striking out "$15,000" and inserting in lieu thereof "$25,000".

(2) Section 2397(c)(2) of such title is amended—

(A) by striking out clause (C) and inserting in lieu thereof the following:

"(C) A description of the duties and work performed by the person with the Department and a description of any similar duties or work for which the person had at least partial responsibility as an employee or consultant of the defense contractor during the 2-year period referred to in paragraph (1)(B)."; and

(B) by striking out clause (F) and inserting in lieu thereof the following:

"(F) A description of the duties and work performed by the person for the defense contractor and a description of the type of work and the extent to which such work was performed by the person in connection with contracts of the defense contractor with the Department during the 2-year period referred to in paragraph (1)(B).".

(e) Subsection (f) of section 2397 of such title is amended to read as follows:

"(f)(1) A person who fails to comply with the filing requirements of this section shall be liable to the United States for an administrative penalty in the amount of $10,000, or in such lesser amount as may be determined by the Secretary of Defense, considering all the relevant circumstances.

"(2) The Secretary shall determine whether a person has failed to file a report required by this section and shall determine the amount of the penalty under paragraph (1). The Secretary shall make the determinations on the record after opportunity for an agency hearing as provided in subchapter II of chapter 5 of title 5, United States Code. The determinations of the Secretary shall be subject to judicial review under chapter 7 of such title.".

REQUIREMENTS RELATING TO PRIVATE EMPLOYMENT CONTACTS BETWEEN CERTAIN DEPARTMENT OF DEFENSE PROCUREMENT OFFICIALS AND DEFENSE CONTRACTORS

SEC. 607. (a)(1) Chapter 141 of title 10, United States Code, is amended by inserting after section 2397 the following new section:

"§ 2397a. Requirements relating to private employment contacts between certain Department of Defense procurement officials and defense contractors

"(a) In this section:

"(1) 'Contract' has the same meaning as provided in section 2397(a)(1) of this title.

"(2) 'Covered defense official', means any individual who is serving—

"(A) as a civilian officer or employee of the Department of Defense in a position for which the rate of pay is equal to or greater than the minimum rate of pay payable for grade GS-11 under the General Schedule; or

"(B) on active duty in the armed forces in a pay grade of O-4 or higher.

"(3) 'Defense contractor' has the same meaning as provided in section 2397(a)(2) of this title.

"(4) 'Designated agency ethics official' has the same meaning as the term 'designated agency official' in section 209(10) of the Ethics in Government Act of 1978 (92 Stat. 1850; 5 U.S.C. App.).

"(5) 'Employment' means a relationship under which an individual furnishes services in return for any payment or other compensation paid directly or indirectly to the individual for the services.

"(6) 'Procurement function' includes, with respect to a contract, any function relating to—

"(A) the negotiation, award, administration, or approval of the contract;

"(B) the selection of a contractor;

"(C) the approval of changes in the contract;

"(D) quality assurance, operation and developmental testing, the approval of payment, or auditing under the contract; or

"(E) the management of the procurement program.

"(b)(1) If a covered defense official who has participated personally and substantially in the performance of a procurement function in connection with a contract awarded by the Department of Defense contacts, or is contacted by, the defense contractor to whom the contract was awarded regarding future employment opportunities for the official with the defense contractor, the official shall, except as provided in paragraph (2)—

"(A) promptly report the contact to the official's supervisor and to the designated agency ethics official (or his designee) of the agency in which the covered defense official is employed; and

"(B) for any period for which future employment opportunities for the covered defense official have not been rejected by either the covered defense official or the defense contractor, disqualify himself from all participation in the performance of procurement functions relating to contracts of the defense contractor.

"(2) A covered defense official is not required to report the first contact with a defense contractor under paragraph (1)(A) or to disqualify himself under paragraph (1)(B) if the defense official terminates the contact immediately. However, if an additional contact of the same or a similar nature is made by or with the defense contractor, the covered defense official shall, as provided in paragraph (1), report the contact and all contacts of the same or a similar nature made by or with the defense contractor during the 90-day period ending on the date the additional contact is made.

"(c) A report required by subsection (b)(1) shall include—

"(1) the date of each contact covered by the report; and

"(2) a brief description of the substance of the contact.

"(d)(1)(A) If the Secretary of Defense determines under paragraph (2) that a person has failed promptly to make a report required by subsection (b)(1)(A) or (b)(2) or has failed to disqualify himself in any case in which he is required to do so under subsection (b)(1)(B)—

"(i) the person may not accept or continue employment with the defense contractor during the 2-year period beginning on the date of the contact; and

"(ii) the Secretary may impose on the person an administrative penalty in the amount of $10,000, or in such lesser amount as may be prescribed by the Secretary, taking into consideration all the circumstances.

"(B) An individual who accepts or continues employment prohibited by subparagraph (A)(i) shall be liable to the United States for an administrative penalty as provided in subparagraph (A)(ii). Such penalty may be in addition to any penalty previously imposed on the individual under subparagraph (A)(ii) for failure promptly to make a report relating to the defense contractor by whom the individual is employed as required by subsection (b)(1)(A) or (b)(2).

"(C) The Secretary of Defense may take action against an individual under this paragraph before, on, or after the date on which the individual's employment with the Government is terminated.

"(2)(A) The Secretary of Defense shall—

"(i) determine whether an individual has failed promptly to make a report required by subsection (b)(1)(A) or (b)(2) or has failed to disqualify himself in any case in which he is required to do so under subsection (b)(1)(B) and shall determine whether to impose a penalty under paragraph (1)(A)(ii) and the amount thereof; and

"(ii) determine whether an individual is liable to the United States for an administrative penalty under paragraph (1)(B) and the amount thereof.

There shall be a rebuttable presumption in favor of a covered defense official that failure to report a contact with a defense contractor or failure to disqualify himself from

participation in the performance of certain procurement functions is not a violation of subsection (b)(1)(A) or (b)(2) or subsection (b)(1)(B), as the case may be, if the defense official has received an opinion in writing from the designated agency ethics official under subsection (e) stating that a report or disqualification by the official was not necessary.

"(B) Determinations of the Secretary under subparagraph (A) shall be made on the record after opportunity for an agency hearing as provided in subchapter II of chapter 5 of title 5. The determinations of the Secretary shall be subject to judicial review under chapter 7 of such title.

"(e) If a designated agency ethics official or his designee receives a report required by subsection (b) or a request for advice from a covered defense official relating to a contact described in such subsection, the designated agency ethics official or his designee may issue a written opinion regarding the necessity of a covered defense official to file a report or disqualify himself from participation in certain procurement functions, as the case may be.

"(f) A covered defense official should request the advice of his supervisor and the appropriate designated agency ethics official or his designee on matters to which this section applies.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 2397 the following new item:

"2397a. Requirements relating to private employment contacts between certain Department of Defense procurement officials and defense contractors.".

(b) The amendments made by subsection (a) shall take effect with respect to contacts (referred to in section 2397a of title 10, United States Code, as added by subsection (a) of this section) made on or after the date of enactment of this Act.

AUTHORIZATION OF FUNDS TO CARRY OUT PROCUREMENT TECHNICAL ASSISTANCE COOPERATIVE AGREEMENT PROGRAM

SEC. 608. (a) There are authorized to be appropriated $3,000,000 for each of the fiscal years 1986 and 1987 to be available for the purpose of furnishing assistance to carry out procurement technical assistance programs pursuant to cooperative agreements under chapter 142 of title 10, United States Code.

(b) There are authorized to be appropriated for fiscal years 1986 and 1987 such additional sums as are necessary to defray the expenses of administering the provisions of such chapter during such fiscal years, including the expenses related to the employment of any additional personnel necessary to administer such positions.

BURDEN OF PROOF IN GOVERNMENT CONTRACT DISPUTE RESOLUTION

SEC. 609. In any proceeding before the Armed Services Board of Contract Appeals, the United States Claims Court, or any other Federal court in which the reasonableness of general or administrative costs for which a defense contractor seeks reimbursement from the Department of Defense are in issue, the burden of proof shall be upon such contractor to establish that such costs are reasonable.

TECHNICAL AMENDMENTS

SEC. 610. (a) Sections 2321 through 2331 of chapter 138 of title 10, United States Code, are redesignated as sections 2331 through 2341, respectively.

(b) Sections 2331 and 2332 of such chapter, as redesignated by subsection (a), are each amended by striking out "2323" and inserting in lieu thereof "2333".

(c) Section 2333 of such chapter, as redesignated by subsection (a), is amended by striking out "2321" and "2322" each place they appear and inserting in lieu thereof "2331" and "2332", respectively.

(d) The items relating to sections 2321 through 2331 in the table of sections at the beginning of such chapter are redesignated to reflect the redesignations made by subsection (a).

EFFECTIVE DATES

SEC. 611. (a) Section 1623 of title 10, United States Code (as added by section 605(a) this title), shall take effect on July 1, 1990.

(b) Section 1624 of title 10, United States Code (as added by section 605(a) of this title), shall take effect on January 1, 1987.

(c) The regulations prescribed under subsection (a) of section 1622 of title 10, United States Code (as added by section 605(a) of this title) shall provide that—

(1) the requirement described in subsection (b)(1) of such section 1622 shall take effect July 1, 1987; and

(2) the requirement described in subsection (b)(2) of such section shall take effect July 1, 1989.

NOTICES OF HEARINGS

COMMITTEE ON RULES AND ADMINISTRATION

(Mr. DOLE submitted the following notice for Mr. MATHIAS:)

● Mr. MATHIAS. Mr. President, I wish to announce that the Committee on Rules and Administration will meet on Monday, May 20, 1985, in SR-301, to continue receiving testimony from a panel of scholars on issues involved in line-item veto legislation (S. 43) currently pending before the committee.

This panel consists of Dr. Louis Fisher of the Congressional Research Service, and Dr. Allen Schick and Dr. Norman Ornstein of the American Enterprise Institute.

For further information concerning this hearing, please contact Tony Harvey of the Rules Committee staff on 224-0291.●

ADDITIONAL STATEMENTS COST CONTAINMENT IN HEALTH CARE

● Mr. DURENBERGER. Mr. President, this Congress has heard me, over and over, claim that consumer choice and competitive health care plans are the key to cost containment in the health care industry.

Giving patients information about price and quality and allowing them to make their own choices leads to improved quality as well as reduced health care costs. I ask, Mr. President, that the following article be printed in the RECORD in support of my claims. The article, "Patients' Choice Can Save Health-Insurance Provider Millions" was written by Gordy Slovut and appeared in the Minneapolis Star and Tribune.

The article describes how patient choice in the type and location of service delivery is saving money and increasing quality. Patients will often choose home care services, if offered as an option to a more costly hospital stay. And the use of home care has the potential for saving competitive health plans and other payers of service, millions of dollars. As Gordy's article points out, in just 2½ years, the Park Nicollet Health Plan saved over $2 million through their home health initiatives.

The key to Park Nicollet's success lies in the incentives of prepaid competitive health care plans. Providers are placed at financial risk for the services provided. Plans are encouraged to appropriately substitute the lower cost service for an expensive hospital stay. And most people would choose to stay in their own home and receive the care they need if given the option.

Medicare, too, is realizing the benefits of choice and competition. With the passage of TEFRA and the final publication of regulations this year, Medicare beneficiaries now have the option to purchase their health care coverage from competitive medical plans. I expect that these providers will start saving Medicare dollars through their initiatives in home health and other cost saving service alternatives that increase consumer choice while enhancing the quality of health care in this country.

The article follows:

PATIENTS' CHOICES CAN SAVE HEALTH-INSURANCE PROVIDERS MILLIONS

(By Gordon Slovut)

Kevin Sullivan broke his neck while swimming off Fort Lauderdale beach in Florida last spring.

He spent six weeks in Jackson Memorial Hospital, Miami, connected most of the time to a ventilator, and doctors told him the injury had paralyzed most of his body.

"Then they said I could go home—by an ambulance, for $7,000," the 14-year-old from Wayzata said. "Or they said I could wait a week and go home on an airliner."

The cost didn't bother him. MedCenters Health Plan, his health maintenance organization (HMO), would pay the cost, but Sullivan figured he'd be "more comfortable" by commercial air.

That decision is one example of the kind of patient decisions that can mean substantial savings for MedCenters, a nonprofit corporation that presumably passes on part of the savings by holding down the cost of its monthly premiums and thereby remaining competitive, in its monthly rates, with other HMOs and health insurance companies.

Patients like Sullivan can save an HMO like MedCenters, their insurance companies—or themselves if they pay their own way—millions of dollars when they make the less-expensive choice, such as whether to fly by ambulance or commercial airliner or, more commonly, whether to be treated at home rather than in a hospital.

MedCenters, an affiliate of Park Nicollet Medical Center, encourages people to take the less-expensive option by providing extensive services away from hospitals and clinics. In Sullivan's case, they sent nurse

Susan Wallenfelt, a patient care coordinator, to Miami to accompany him home.

"The procedure was worked out by Kevin's doctors in Miami and our rehabilitation specialists at Park Nicollet," Wallenfelt said.

Sullivan, his mother and Wallenfelt rode back in the first-class section of an airliner.

MedCenters' main cost was for first-class tickets, round-trip for Wallenfelt and one-way for Sullivan and his mother.

"It was a nice trip back," Sullivan said. "The nurse sat behind me, taking my blood pressure and things. My mom sat beside me. I was a little dizzy because I had been flat on my back for nearly six weeks, but I was pleased."

The outcome also pleased officials of MedCenters, which competes for clients with other HMOs, preferred provider organizations (PPOs), Blue Cross-Blue Shield and private insurance companies.

"We are trying to position ourselves as the quality alternative," said Dr. Loren Vorlicky, MedCenters' medical director.

MedCenters and Park Nicollet established their elaborate home care system after researchers learned in 1981 that many patients thought they were spending too much time in hospitals.

That opened the way for MedCenters to save money. If the plan could treat people at home, it could mean happier patients and lower hospital bills.

Bonnie Roeder, director of home health care for Park Nicollet, said that during the first 2½ years, the home bilirubin program, in which lights are used to help clear jaundice in newborns, saved $68,000; the home psoriasis program saved $320,000; the newborn family care program saved $804,000, and the low-back-pain program saved $812,000.

"Most people are just more comfortable at home than they are in the hospital," Vorlicky said.

The savings accrue to whomever is paying the health care bills—to MedCenters for its patients, to Blue Cross-Blue Shield or private insurance companies whose patients use Park Nicollet, or to the relatively small number of individuals who pay their own bills.

In the case of new mothers, the home care system is used as an incentive to reduce hospital stays. It is offered to mothers who agree to be discharged from the hospital within 48 hours of delivery.

Roeder said the newborn program saves MedCenters, the insurer of the individual who pays his or her own bills $319 per mother and child—the $480 per day in hospital care for mother and infant, minus $161 for the program.

She said the bilirubin program makes it possible for parents to take slightly jaundiced newborns home instead of leaving them in the hospital until their bilirubin blood levels drop to normal. The saving is about $490; the 2½-day hospital cost of $690 minus the average home care cost of $200.

Jason Grimm was born about two weeks ago, healthy and normal but slightly jaundiced—not very unusual for newborns.

He and his mother, Laurie, were home in Minneapolis two days after his arrival because of the bilirubin program.

Bonny Skovbroten, a home care nurse, set up the portable bilirubin light system in the Grimm home, showed Laurie Grimm how to patch Jason's eyes during the periods he would be exposed to the light, and taught her how to make sure he was not overexposed.

On Skovbroten's third visit, Jason's jaundice had cleared and she took the light system with her.

"If it weren't for the home bili-light system, Jason probably would have had to stay in the hospital two to four days longer," she said.

The borne low-back-pain program is for patients who have to be in traction 24 hours a day. The saving averages $4,573 per patient; the $5,452 it would cost for 12 days in the hospital minus the average cost of $852 for home care.

The psoriasis program has an average patient saving of $8,650—$8,450 for three weeks of hospital care minus $800 for home care.

Roeder said the basic economic fact that makes home care so desirable is that "It costs $71 a day to have a nurse visit a patient, and more than $400 a day to have the patient in the hospital."

Group Health Plan, Inc., the metropolitan area's oldest and largest HMO, has a smaller home care services staff consisting of 15 home health care nurses, according to John Ostund, manager of the plan's continuing care department.

He said Group Health provides physical, occupational and speech therapy and home health aides on a contract basis and refers patients to other agencies for services such as hospice care and cancer in children.

Group Health, like MedCenters, has found that home health care is popular with patients, he said.

"People like to get out of the hospital as soon as possible, and they prefer getting rehabilitation and other therapy at home," Oslund said.●

CORRESPONDENCE BETWEEN THE AMERICAN HELLENIC EDUCATIONAL PROGRESSIVE ASSOCIATION AND TURKISH OFFICIALS

● Mr. DODD. Mr. President, Cleo Zambetis, the supreme president of the American Hellenic Educational Progressive Association, has brought to my attention an exchange of letters between AHEPA and the Turkish Ambassador to the United States, Mr. Sukru Elekdag.

During Turkish Prime Minister Ozal's recent visit to the United States, Representatives of AHEPA met with him to discuss matters of great concern to United States-Turkish relations, including Turkish policy toward Cyprus and Greece. At the conclusion of that meeting, the AHEPA representatives left with him a letter setting forth specific concerns.

Following that meeting, the AHEPA representatives sent a thank-you note to Prime Minister Ozal, expressing their appreciation for the meeting and for bilateral negotiations between Greece and Turkey, and urging the Turkish Government to encourage the Turkish separatists on Cyprus to resume bilateral talks.

In mid-April, Mr. Zambetis received a response from Ambassador Elekdag, returning the original letter from AHEPA to Prime Minister Ozal. The Ambassador's letter does not encourage optimism for future dialog about the tensions and problems in the eastern Mediterranean.

There can be no doubt, Mr. President, that the best way—the only way—to resolve tensions between Greece and Turkey and to restore the unity of Cyprus is through dialog and mutual respect among all sides. U.S. policy toward the region must be aimed at fostering such dialog and mutual respect. In that regard, I urge my colleagues to read this correspondence for the light it sheds on the Turkish attitude toward the situation.

I ask that this correspondence be printed in the RECORD.

The correspondence follows:

ORDER OF AHEPA,
SUPREME LODGE HEADQUARTERS,
Washington, DC, May 9, 1985.

Hon. CHRISTOPHER J. DODD,
324 Senate Hart Office Building,
Washington, DC.

DEAR SENATOR DODD: During the recent visit of Turkish Prime Minister Turgut Ozal to the United States, I had the opportunity to meet with him and personally convey some of our community's concerns about Turkish policy. At the conclusion of our meeting, we presented him with a letter detailing the concerns of the AHEPA.

Following our meeting, we issued a statement about the meeting, expressing our satisfaction with the friendly and responsive manner in which the meeting was held. In spite of the reservations expressed by many members of our community—whose sentiments regarding Turkish policy towards Cyprus and Greece you are well-acquainted with—we publicly supported the concept of dialogue to aid in the peaceful resolution of conflicts in the region.

On April 17, our letter to Prime Minister Ozal was returned to the AHEPA offices by courier with a curt letter from Ambassador Sukru Elekdag. I am deeply disappointed and extremely distressed that the Turkish government has seen fit to respond in this manner. Not only is this incompatible with the Turkish Prime Minister's expressed desire to conduct a dialogue on these issues, but it also demonstrates a lack of desire to even acknowledge the expression of concerns held by a significant number of Americans.

Please find enclosed copies of the above correspondence, which I feel will be of particular interest to you.

Sincerely,

CLEO N. ZAMBETIS,
Supreme President.

ORDER OF AHEPA,
SUPREME LODGE HEADQUARTERS,
Washington, DC, March 30, 1985.

Prime Minister TURGUT OZAL,
The Waldorf-Astoria Towers,
New York, NY.

DEAR MR. PRIME MINISTER: On behalf of the supreme Lodge and the members of the Order of AHEPA, I would like to express our deep gratitude and appreciation for the opportunity to meet with you. I hope this meeting will be of mutual benefit as it provides us with an opportunity to exchange views and hopefully gain a greater understanding of each other's concerns.

As Americans of Hellenic descent, we are naturally concerned with the tension in the Eastern Mediterranean. While I would like to underline the fact that we hold no

enmity or antipathy for the Turkish people, it would be disingenuous for me to pretend that we share your Government's perspective of these problems. I fervently hope that the historic conflict between Greeks and Turks, however, will soon become a closed chapter in their history.

All members of the Eastern Orthodox Church are extremely concerned with the problems relating to the Ecumenical Partriarchate in Istanbul. His Holiness Demetrios I, Archibishop of Constantinople and Ecumenical Patriarch, is the symbolic leader of our Church and his importance to our faith is analogous to that of the Pope to Roman Catholics.

We have been extremely concerned by the closure of the Theological School of Halki fourteen years ago, the leading theological school of our Church whose roots extend to the 11th century. We are also deeply worried about the difficulties regarding building repairs to the Ecumenical Partiarchate.

The solution to these problems rests in the hands of your Government, and I humbly request that they be considered. I am confident that active measures by your Government to alleviate these problems would be appreciated not only by the members of our community, but also by the people of Greece and all members of the Eastern Orthodox Church. We are prepared to work with your government on these problems in any capacity which you feel will be helpful.

I am certain that you are aware of our concern over the lack of progress towards a peaceful and lasting settlement on Cyprus. Our position and efforts in this area are an expression of our continued frustration at the lack of flexibility that we perceive in the attitude and policies of the Turkish Cypriots and your Government.

The Order of AHEPA has consistently urged our government to use its influence on all parties to ensure that they participate in good faith in the United Nations negotiations process. Despite the breakdown in the meeting between President Spyros Kyprianou and Turkish Cypriot leader Rauf Denktas last January, we were heartened by the U.N. Secretary General's comments that the two sides have never been closer.

I believe that it is very important to maintain the momentum generated by this meeting, and urge your government to use its influence with the Turkish Cypriots and join in the efforts for a prompt resumption of the negotiations process.

I believe that a public commitment by your government to begin a systematic withdrawal of its troops on Cyprus in excess of those permitted under the existing treaties, or for the replacement of these troops by an expanded U.N. force—parallel to progress in the negotiations—would immeasurably enhance the prospects for the resumption of direct negotiations and for their successful conclusion.

I am aware of your nation's concern for the safety of the Turkish Cypriot community, yet I believe that the days of intercommunal strife and violence—which were provoked by small groups of extremists—are in the Cypriot peoples' past.

The spirit of friendship, unity, and understanding that characterized the Union of Cypriot Journalists New Year's Ball, which was attended by a Turkish Cypriot delegation headed by Raif Denktas, is, I believe, an encouraging sign of the desire of all Cypriots to reunite into one country.

We feel that this trend must be encouraged, and thus proposed that the United States establish a special Cyprus fund of up to $250 million to be used for confidence-building measures that would foster intercommunal cooperation and understanding. Under our proposal, monies would be made available for projects approved by representatives of both communities and that would benefit all Cypriots.

We are also deeply concerned with the status of relations between Greece and Turkey. In my view, the continued deterioration in their bilateral relations do not auger well for the region.

These bilateral conflicts emerged in the early 1970s, despite the common misperception that they are age-old quarrels. The issues disputed today were for decades governed by understandings dating back to the days of friendship and cooperation established by Eleftherios Venizelos and Mustafa Kemal Ataturk.

I am confident that the Greek and Turkish peoples strongly support a return to an era of peace and goodwill between the two countries. I hope that statements and actions that would lead to a further deterioration of the situation will be restrained.

We feel that maintaining the balance of power in the Aegean is necessary to prevent conflicts from erupting into a confrontation. This view is also echoed in the United States Congress, which has identified a 7:10 ratio in military assistance to Greece and Turkey as the means of preserving this balance.

Furthermore, as Americans we are particularly concerned about the lack of cohesion on NATO's southeastern flank and the urgent need for a resolution of issues that would increase the Alliance's defensive capability in the region. Preventing Soviet naval access to the Mediterranean Sea during a crisis is an important Alliance objective in the area and NATO's deterrent capability would be enhanced by the inclusion of the Greek island of Limnos in its military command structure.

Finally, I would like to express our sincere sympathy to your Government and your people concerning the terrorist attacks perpetrated against Turkish diplomatic officials.

We fervently look forward to the day when Turks, Greeks, and Cypriots will live together in a sea of peace. We stand ready to assist in this process.

Sincerely,

CLEO N. ZAMBETIS,
Supreme President.

ORDER OF AHEPA,
SUPREME LODGE HEADQUARTERS,
Washington, DC, April 8, 1985.

His Excellency TURGUT OZAL,
Embassy of the Republic of Turkey,
Washington, DC.

DEAR MR. PRIME MINISTER: On behalf of the members of the Order of AHEPA, I would like to thank you for the opportunity to meet with you on March 30 and exchange views on issues of mutual concern.

I hope that the outstanding issues between Greece and Turkey can soon be resolved and that the next few months will also see some tangible progress toward a peaceful and lasting settlement on Cyprus. I sincerely believe that this is in the best interests, and will be to the benefit of, the people of Greece, Turkey, and Cyprus.

I would like to reiterate that we support the concept of bilateral negotiations between Greece and Turkey. I continue to believe, however, that your initiative for direct talks would be furthered by your Government's active encouragement of the Turkish Cypriot leadership to resume the intercommunal negotiations. Such a clear gesture by your Government would demonstrate its willingness to negotiate in good faith.

Please convey my regards to Mr. Halefoglou and our thanks to Ambassador Elekdag and his staff for their assistance in arranging this meeting.

Sincerely,

CLEO N. ZAMBETIS,
Supreme President.

TURKISH EMBASSY,
Washington, DC, April 16, 1985.

Mr. CLEO ZAMBETIS,
Supreme President, AHEPA
Washington, DC.

DEAR MR. ZAMBETIS, it is a pleasure for me to refer to your meeting with Prime Minister Turgut Ozal, which took place upon your request in New York at the Prime Minister's hotel suite on March 30th.

I am sure you will join me in recalling that the meeting atmosphere was very cordial and warm. When Prime Minister Ozal stressed the need for a dialogue between Turkey and Greece and the necessity of establishing friendly and cooperative relations between the two countries, both you and your colleagues stated that you were profoundly impressed by the conciliatory and constructive approach of the Prime Minister. It is also my recollection that you expressed your readiness to spare no efforts to contribute to reconciliation between the Greek and Turkish nations.

By the time the meeting ended, it was my distinct impression that both sides felt the meeting had been useful and heartwarming undertaking. At least this is what we thought of it.

However, right after you left, it was brought to our attention that you had left a previously composed letter addressed to Prime Minister Ozal. The content of this letter is of a nature which is not in consonance with the harmony that prevailed during the meeting. Therefore, I feel bound to return it to you.

In this context, I also would like to bring to your attention two points which I deem important.

First, progress toward a just and viable solution of the Cyprus problem requires that both communities in Cyprus be encouraged by their motherlands, Greece and Turkey, to reconcile their differences. As the recent peace efforts undertaken by the U.N. Secretary General Perez de Cuellar have demonstrated, Turkey did the utmost to that end. Unfortunately, the same cannot be said of the current Greek Government which hindered the efforts of the U.N. Secretary General, and undermined the negotiations by creating tensions in Greek-Turkish relations.

In the second place, it has to be conceded that, tension between Turkey and Greece, which are regarded as motherlands by the two peoples of Cyprus, will inevitably affect these peoples on the Island. If Turkey and Greece demonstrate their will and determination to solve the differences between them through peaceful negotiations, the two Cypriot communities will be better motivated to solve their problems and live in peace.

I would like to further inform you however, that, your second letter dated April 8, 1985, addressed to Prime Minister Ozal and

sent to our Embassy, has been forwarded to its high destination.

Sincerely,

DR. SÜKRÜ ELEKDAĞ,
Ambassador of the Turkish Republic.●

NATIONAL FREE PAPERS WEEK

● Mr. D'AMATO. Mr. President, I rise today to join my friend and colleague, Senator GRASSLEY, as a cosponsor of Senate Joint Resolution 73, which designates the week of September 15–21, 1985, as "National Independent Free Papers Week." Independent free circulation papers represent a superlative tradition in America's free enterprise system: they fill a need and provide choice in the media marketplace.

Free circulation papers fill the gap in cities and towns that do not receive full coverage by larger, paid papers. In all cases, whether free newspapers, shopping guides, or pennysavers, free circulation papers offer a choice to local businesses and serve a need that otherwise would not be met—providing the media support that keeps small towns, cities, and neighborhoods prospering.

Some of the earliest free papers appeared in the 1920's; even more appeared in the 1930's as a direct response to the special needs arising from the Great Depression. After World War II, these papers began to flourish. More and more businesses wanted to reach every home in the community and free circulation papers were the answer. As a result, it is estimated that there now are over 2,000 free circulation papers in the United States.

National Independent Free Papers Week will coincide with the 5th anniversary of the Independent Free Papers of America organization. IFPA has a membership of over 200 free papers representing 41 States. In my own State of New York, there are 20 member papers benefiting local businesses and their communities.

I urge my colleagues to join in this salute to free papers.●

NATIONAL GARDEN WEEK

● Mr. ABDNOR. Mr. President, I am pleased to join my colleague, Senator HATFIELD, in recognizing the gardeners of America.

Gardening is an important activity that affects many aspects of our environment and our people. Our environment is improved through the flowers, fruits, and vegetables, and our people are enriched through the nutrition and the skill that homegrown foods provide.

In addition to the asethetic value gardens provide, they add to the individual initiative, independence, and respect for the land. Gardening challenges us to learn from the land. Among the challenges are production and care for our natural resources.

Even more importantly, gardening supersedes all ages. Young and old alike can work together at a common goal. This sharing can be beneficial, not only to the land, but to a greater understanding between people.

Mr. President, I believe that all Americans can gain a greater understanding and respect for America's farmers through their own gardening experiences.

I urge my colleagues, Mr. President, to join in recognizing the great efforts of all gardeners through the passage of Senate Joint Resolution 136, authorizing the President to issue a proclamation designating the week of April 13, 1986, as National Garden Week.●

THE POOR, THE STARVING, AND EXPORTING U.S. FOOD

Mr. MELCHER. Mr. President, in contrast with U.S. grain export competitors who have concern that an export bonus or payment-in-kind U.S. grain sales to other countries would be unfair, all of our competitors must admit that world distribution of food for many of the impoverished has been inadequate and that humanitarian aid has been inadequate. There is a great disparity between those of us who have more than enough to eat and have more concern about over-indulgence in excessive calories that cause body fat as compared to those impoverished people who are poor, thin and malnourished.

The gauge to justify the food domestic programs that we operate and in the Public Law 480 and section 416 foreign food programs that we operate should be based on a reasonable standard. That is a simple one: Are there hungry and malnourished people who need the surplus foods which we have in abundance in the United States?

There are still plenty of hungry people here at home as demonstrated by the Physicians Task Force on Hunger report issued a few weeks ago. Abroad there are the starving in Africa and widespread impoverishment in the developing countries. People on limited diets and particularly growing children, pregnant and nursing mothers are permanently harmed if they are malnourished. People of all ages including the young and particularly the elderly are more prone to illness and infectious diseases if malnourished. The result of using our domestic food programs for our own poor and Public Law 480 and section 416 for the hungry abroad is to allow the proper nourishment for physical and mental development for the kids, alertness and effectiveness for their working people and protect against disease for all ages. The two commodities in constant surplus in the United States are wheat and dairy products and at present rice, soybeans, sorghum, corn, honey, and barley supplies are in excess of domestic market needs.

Private voluntary organizations and cooperatives have had successful innovative experience in promoting agriculture development through the sales of food aid commodities. The most efficient and the most accountable of these programs are through the nonprofit private voluntary organizations that at no cost to the taxpayer are dedicated to the honest and equitable distribution of American food aid and who have successful experience in agricultural development in the scores of countries in which they operate. CARE, Catholic Relief Services, Cooperative League of the USA, Church World Council Lutheran World Relief, Adventist Development and Relief Agency, and World Vision are some of those most successful.

For those countries who receive American food aid, it is essential that agricultural development go in tandem with the food aid. Because the needs are greater now than in the past, just as we expand and liberalize Public Law 480 and section 416 programs, we must also utilize food aid to promote the expansion of the agricultural development efforts.

These organizations go about their work with dedication year in and year out with no press staff or public relations consultants so that there is only limited public awareness of the magnitude of their work. They operate only with the meager donations but provide billions of dollars of food aid for the hungry and promote agricultural development programs. Just as more food is necessary for the hungry, so, too, are more agriculture development programs.

Export PIK or bonus commodity exports when used by the Department of Agriculture will be both selective and controversial and not targeted to food deficit countries. Secretary of Agriculture Block has stated that he will be selective in using it to attract customers away from U.S. grain competitors who are subsidizing their exports and that is where the controversy will arise. So it will be a program to be used only as a limited tool to equalize trade. Export PIK is not contrived to aid the hungry, which is an ongoing, continuous daily program in poor food deficit countries.

To meet the existing or near term emergency situation in those food poor countries, food aid is immediately needed both for consumption as well as long term agricultural development. The nonprofit private voluntary organizations are oriented both for the humanitarian and agricultural development tasks. They already distribute more American food aid per year—up to over $1 billion per year, twice as much as the export bonus program.

In the short term, reducing surplus commodities will help the U.S. economy by first of all stabilizing the sagging commodity prices and therefore start some price improvement for U.S. farmers, extremely hard pressed from very low net income. For the long term, U.S. food aid has demonstrated that it develops markets. This is particularly true for dairy and wheat products.

The administration has been stalling Public Law 480 and section 416 shipments of U.S. commodities. While various Departments of the executive branch continue to reject PVO and cooperative sales proposals and debate continues in Congress as to whether U.S. PVO's and cooperatives should be allowed—and under what conditions—to sell food aid commodities, many of those same PVO's and cooperatives are making innovative developmental and humanitarian uses of food aid from other donor countries. Despite the urgency of the situation for both the hungry and U.S. farmers, there has been more than the usual amount of bureaucratic bungling in processing the applications for U.S. food aid from impoverished countries. Congress is seeking to legislate expansion of Public Law 480 and section 416 with firm directions for redtape cutting to the State and Agriculture Department bureaucracies.

It cannot come too soon and it is essential to balance out the fears of abuses that may be generated by the export bonus or PIK Program just announced by Secretary Block.

ORDER OF PROCEDURE

Mr. SIMPSON. Mr. President, after conferring with the Democratic leader, and let me apologize to him—I was in the House of Representatives' area and Senator DOLE was called away, and I know that Senator BYRD waited here patiently for us and I certainly hope we did not discommode his schedule. I made the course over here in seven-league boots to arrive here. I do hope that did not discommode you, sir.

Mr. BYRD. Mr. President, if the distinguished assistant Republican leader will yield, he owes me no apology. From time to time I keep the leaders on the other side waiting because I may be meeting with constituents or whatever. We always try to accommodate one another. I am not disturbed about it.

Mr. SIMPSON. I thank the Democratic leader.

THE CALENDAR

Mr. SIMPSON. Mr. President, I inquire of the minority leader if he is in position to consider any or all of the following items: Calendar Nos. 118, 119, 136, and 137.

Mr. BYRD. Mr. President, those items have been cleared on this side, and we are ready to proceed.

Mr. SIMPSON. I thank the minority leader.

APPOINTMENT OF CITIZEN REGENT OF THE BOARD OF REGENTS OF THE SMITHSONIAN INSTITUTION

The joint resolution (S.J. Res. 81) to provide for the appointment of Barnabas McHenry as a citizen regent of the Board of Regents of the Smithsonian Institution was considered.

Mr. PELL. Mr. President, I wish to record my enthusiastic support for the appointment of Barnabas McHenry as a citizen regent of the Smithsonian Institution.

Mr. McHenry brings to the task an exceptionally rich background that includes a broad range of cultural activity. Of particular relevance is his active participation in the affairs of the Metropolitan Museum of Art in New York, where he serves on the visiting committees on Egyptian art and on 20th Century art; his service as vice chairman of the Presidential Task Force on Arts and Humanities and as a member of the Commission for Cultural Affairs of the city of New York, to name but a few.

A lawyer by training and a graduate of Princeton University, Mr. McHenry is to my mind an admirable choice for membership on the Smithsonian's Board of Regents. His breadth of vision and depth of experience will surely add new perspectives and insights to the deliberations of the Board. I support the approval of Senate Joint Resolution 81 which provides for his appointment, and urge its prompt adoption by the Senate.

Mr. President, I ask unanimous consent that Mr. McHenry's biographical résumé be printed in the RECORD at this point.

There being no objection, the résumé was ordered to be printed in the RECORD, as follows:

BARNABAS MCHENRY

McHenry, Barnabas, publishing company executive, lawyer; born at Harrisburg, Pa., on October 30, 1929; son of William Cecil and Louise (Perkins) McHenry. Married Marie Bannon Jones, December 13, 1952; children: Thomas J. P.; W. H. Davis; John W. H. A.B., Princeton University, 1952; LL.B., Columbia University, 1957. Bar: New York, 1957. Associate at the firm of Lord, Day, & Lord, New York City, 1957-62; general counsel for The Reader's Digest Association, Inc., New York City, 1962-, also director; director, Palaceside Building Corporation, Tokyo. Member, visiting committee on Egyptian art, visiting committee on 20th century art, Metropolitan Museum of Art; member, boards of directors for the Presbyterian Hospital; Boscobel Restoration, Inc., Garrison, New York; High Winds Fund, Inc.; L.A.W. Fund, Inc.; DeWitt Wallace Fund, Inc.; Lakeview Fund, Inc.; Vivian Beaumont Theater; Center for Hudson River Valley; National Corporation Fund for Dance, Inc.; Children's Art Carnival; Reader's Digest Fund for the Blind; Reader's Digest Association, Inc.; trustee, Supreme Court Historical Society; Metropolitan Opera Association; Metropolitan Museum of Art; member, I Tatti Council; Commission for Cultural Affairs of the City of New York; Temporary State Commission on Restoration of the Capitol; trustee, New York Zoological Society; Central Park Conservancy; vice-chairman, Presidential Task Force on the Arts and Humanities; member, boards of directors, Hudson River Foundation for Science and Environmental Research; School of American Ballet. Served with the Army of the United States, 1952-54. Member, American and New York State bar associations; Association of the Bar of the City of New York; American Conservation Association (director); Academie des Beaux-Arts'; Institute de France (correspondent). Clubs: Century, Sky, Racquet and Tennis (N.Y.C.) Home: 164 East 72nd Street, New York, New York 10021. Office: 34th Floor, 200 Park Avenue, New York, New York 10166.

The bill was considered, ordered to be engrossed for a third reading, read the third time and passed; as follows:

S.J. RES. 81

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the vacancy in the Board of Regents of the Smithsonian Institution, of the class other than Members of Congress, caused by the death of William A.M. Burden of New York on October 10, 1984, be filled by the appointment of Barnabas McHenry of New York for the statutory term of six years.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COMMITTEE TO STUDY AND MAKE RECOMMENDATIONS WITH RESPECT TO A TWO-YEAR BUDGET PROCESS

The resolution (S. Res. 159) to establish a select committee to study and make recommendations with respect to a 2-year budget process, was considered, and agreed to; as follows:

S. RES. 159

Resolved, That (a) there is established, for the duration of the first session of the 99th Congress, a select committee of the Senate to be known as the Select Committee on the Two-Year Budget (hereafter in this resolution referred to as the "select committee"). The select committee shall be composed of twelve members of the Senate, six from the majority party and six from the minority party, to be appointed by the President of the Senate upon the reommendation of the majority leader and the minority leader.

(b) Of the twelve members—

(1) two members shall be from the Committee on the Budget;

(2) two members shall be from the Committee on Rules and Administration;

(3) two members shall be from the Committee on Governmental Affairs;

(4) two members shall be from the Committee on Appropriations; and

(5) four members shall be from the Senate at large.

(c) The select committee shall select a chairman from among its majority members and a cochairman from among its minority members.

SEC. 2. (a) A majority of the members of the select committee shall constitute a quorum for the transaction of business, except tht the select committee may fix a lesser number as a quorum for the purpose of taking sworn testimony.

(b) Vacancies in the membership of the select committee shall not affect the authority of the remaining members to execute the functions of the committee, and shall be filled in the same manner as original appointments are made.

(c) The select committee shall adopt rules of procedure not inconsistent with the rules of the Senate governing standing committees of the Senate.

(d) Service of a Senator as a member or as chairman of the select committee shall not be taken into account for the purposes of paragraph 4 of rule XXV of the Standing Rules of the Senate.

SEC. 3. (a) It shall be the duty of the select committee to—

(1) study and review legislative proposals to improve the operation of the congressional budget process, including proposals for the two-year budget; and

(2) recommend specific legislation to improve the operation and enforcement of the congressional budget process, including such componens of two-year budgeting which the select committee finds to be desirable and feasible.

In carrying out clause (1) of this subsection, the select committee shall pay particular attention to the need to free the time of senators from unnecessary repetitive operations, to encourage oversight of enacted legislation by committees, to provide stable funding expectations to State and local governments, and to maintain accurate budgetary estimates and assessments of national needs and priorities.

(b) The select committee shall report and make recommendations to the Senate within 180 days after the adoption of this resolution.

SEC. 4. (a) For the purposes of this resolution, the select committee is authorized (1) to employ personnel, (2) to make expenditures from the contingent fund of the Senate, (3) to hold hearings, and (4) to sit and act at any time or place.

(b) With the consent of the chairman and ranking minority members of any other committee of the Senate, the select committee may utilize the facilities and the services of the staff of such other committee of the Senate, or any subcommittee thereof, whenever the chairman and the cochairman of the select committee determines that such action is necessary and appropriate.

SEC. 5. Expenses of the select committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the select committee, except that vouchers shall not be required (1) for the disbursement of salaries of employees of the select committee who are paid at an annual rate, or, (2) for the payment of long-distance telephone calls. Total expenditures for the select committee shall not exceed $300,000.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FUTURE PROBLEM SOLVING PROGRAM WEEK

The joint resolution (S.J. Res. 131) to designate the week of June 2, 1985, through June 8, 1985, as "Future Problem Solving Program Week," was considered, ordered to be engrossed for a third reading, read the third time and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 131

Whereas we are concerned about our Nation's youth and their interest in the future problems of our country and finding creative approaches to solve those problems; and

Whereas the Future Problem Solving Program, an educational program which combines problems of the future with a multiple tiple step creative problem solving process, has been created and organized in all fifty States of the Union; and

Whereas the program which began as a local program in a Georgia high school, now involves over one hundred thousand elementary and secondary school students nationwide, over eight thousand school districts, and several foreign countries; and

Whereas the Future Problem Solving Program, in addition to teaching problem solving skills, assists students in developing skills in the areas of creative thinking, critical and analytical thinking, communication, research, future studies, and group interrelations; and

Whereas students representing all regions of the United States of America, selected on the basis of the outstanding performance in earlier problem solving competitions, will be assembling to participate in the Future Problem Solving Bowl on June 2, 1985, through June 5, 1985: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of June 2, 1985, through June 8, 1985, is designated as the "Future Problem Solving Program Week", and the President is authorized and requested to issue a proclamation calling upon all Government agencies and the people of the United States to observe the week with appropriate programs, ceremonies, and activities.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the joint resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECOGNITION TO THE ACHIEVEMENTS OF JOHN JAMES AUDUBON

The resolution (S. Res. 144) to give special recognition to the achievements of John James Audubon, was considered, and agreed to.

The preamble was agreed to.

The resolution and the preamble, are as follows:

S. RES. 144

Whereas April 26th marks the two-hundredth anniversary of the birth of John James Audubon;

Whereas John James Audubon remains one of the best known and beloved American wildlife artists;

Whereas John James Audubon, as the first artist to portray birds as living, breathing beings and dramatic and dynamic components of a larger environment, made millions of people aware not only of birds but of the wonder and beauty of nature; and

Whereas the work of John James Audubon has inspired and encouraged the conservation of the wildlife resources of the world: Now, therefore, be it

Resolved, That the Senate of the United States gives special recognition to the achievements of John James Audubon and the work he has inspired.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the joint resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE SESSION

Mr. SIMPSON. Mr. President, after discussion with the minority leader, I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar under the following items: Calendar No. 118 and Calendar No. 119.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wyoming?

Mr. BYRD. Mr. President, reserving the right to object, and I shall not object, I wanted to discuss with these gentlemen some of the problems of the coal industry and other matters, and those conversations have taken place. I think all holds that were on them have been removed. Therefore, I withdraw any reservations.

There being no objection, the Senate proceeded to the consideration of executive business.

Mr. SIMPSON. I thank the minority leader.

DEPARTMENT OF ENERGY

The legislative clerk read the nomination of Helmut A. Merklein, of the District of Columbia, to be Administrator of the Energy Information Administration.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Theodore J. Garrish, of Virginia, to be an Assistant Secretary of Energy.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, on April 26, 1985, the Committee on Energy and Natural Resources held a hearing on the nominations of Joseph F. Salgado to be under Secretary of the Department of Energy, J. Michael Farrell to be General Counsel for the Department of Energy, Theodore J. Garrish to be Assistant Secretary for Congressional, Intergovernmental and Public Affairs, and Helmut A. Merklien to be Administrator of the Energy Information Administration.

On May 1, 1985, the Committee on Energy and Natural Resources ordered favorably reported the 4 nominations by a vote of 17-0.

Joseph F. Salgado has been nominated to be Under Secretary of the Department of Energy. He is currently serving as transition coordinator at the Department of Energy for Secretary Herrington. Mr. Salgado previously served as an Associate Director in the White House Presidential Personnel Office, and as an Associate Commissioner for Enforcement at the Department of Justice. He also served as a senior trial attorney and deputy district attorney for Alameda County, CA.

The Under Secretary is one of the principal officers in the Department of Energy. He carries out duties delegated by the Secretary, and he has the primary responsibility for energy conservation, in accordance with an express requirement of the Department of Energy Organization Act. Mr. Salgado's views on his energy conservation responsibilities were described in his statement before the Committee. He stated:

I believe the Department of Energy has an important role to play in facilitating energy conservation. DOE's research and development programs are essential to providing energy efficient technology options to the market. The results of these programs must be effectively and promptly transferred to the marketplace. In addition, the Department must continue to work cooperatively and effectively with state and local interests in connection with the energy assistance programs mandated by the Congress.

J. Michael Farrell is the President's nominee for General Counsel of the Department of Energy. Mr. Farrell has a professional background that includes several positions in the Federal Government as well as 14 years in private law practice. He has served in the State Department as Legislative Coordinator for the Caribbean Basin Initiative, and in the White House as Deputy Director of the Presidential Personnel Office and as Assistant Counsel in the Office of Counsel to the President.

Theodore J. Garrish has been nominated to be Assistant Secretary for Congressional, Intergovernmental and Public Affairs. Currently, he is Acting Assistant Secretary for that office. Most recently, Mr. Garrish has served as General Counsel at the Department of Energy. Prior to that he was Special Assistant to the Secretary of Energy. He has served at the Department of the Interior in several positions, and he has also worked at the U.S. Consumer Product Safety Commission, the U.S. Office of Consumer Affairs, the White House, the Federal Trade Commission, and the Department of Justice.

As Assistant Secretary, Mr. Garrish would be responsible for developing, managing and coordinating relations between the Department of Energy and Congress, the news media, State and local governmental officials, other Federal agencies, and consumer citizen organizations.

In his testimony before the committee, Mr. Garrish stated that as Assistant Secretary he will work diligently to answer congressional requests in the most prompt and efficient manner possible. He also intends to place particular emphasis on helping committees and individual members to obtain the information needed to draft legislation, providing the necessary department witnesses, and assisting in the drafting of appropriate provisions during the committee process.

Helmut A. Merklein has been nominated as Administrator of the Energy Information Administration. He received a recess appointment on December 31, 1984. Prior to that appointment, he served as Assistant Secretary for International Affairs and Energy Emergencies at DOE.

Dr. Merklein is a former engineer, economist, and educator who holds an MBA degree and a Ph.D. in economics. He has served as dean of the graduate school of management at the University of Dallas, and as a full professor in the department of petroleum engineering at Texas A&M University. Dr. Merklein has also worked for an international energy consulting firm and for a large U.S. oil company as a petroleum engineer.

In his statement before the committee, Dr. Merklein emphasized his commitment to maintaining the independence of the EIA. He stated:

While EIA is an integral part of the Department of Energy, the Congress created it with a considerable measure of autonomy. The EIA is respected by most energy decisionmakers for its intellectual integrity in producing unbiased energy information. I am fully aware of the Congressional mandate for independence and objectivity, and I intend to uphold that mandate.

Mr. President, each of the four nominees has fully complied with the committee's rules requiring submittal of a financial disclosure report and a detailed information statement. On behalf of the Committee on Energy and Natural Resources, I am pleased that the Senate has confirmed these Presidential nominations.

LEGISLATIVE SESSION

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPOINTMENT OF KENNETH U. BENJAMIN AS DEPUTY SENATE LEGAL COUNSEL

Mr. SIMPSON. Mr. President, on behalf of Senator DOLE, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 170) appointing Kenneth U. Benjamin as Deputy Senate Legal Counsel.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. SIMPSON. Mr. President, I move the adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 170) was agreed to, as follows:

Resolved, That the appointment of Kenneth U. Benjamin to be Deputy Senate Legal Counsel made by the President pro tempore of the Senate on May 15, 1985, shall become effective on May 15, 1985, and the term of service of the appointee shall expire at the end of the 100th Congress.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR MONDAY, MAY 20, 1985

ORDER FOR RECESS UNTIL 10 A.M.

Mr. SIMPSON. Mr. President, after conferring with the minority leader, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 a.m. on Monday, May 20.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF CERTAIN SENATORS

Mr. SIMPSON. Mr. President, I further ask unanimous consent that following the recognition of the two leaders under the standing order there be special orders in favor of the following Senators for not to exceed 15 minutes each: Senators PRESSLER and PROXMIRE.

The PRESIDING OFFICER (Mr. COCHRAN). Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. SIMPSON. Mr. President, I also ask unanimous consent that following the special orders just identified there be a period for the transaction of routine morning business not to extend beyond the hour of 11 a.m. with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. SIMPSON. Mr. President, following morning business, the Senate will resume consideration of S. 1160, the Department of Defense authorization bill, and for the information of all Senators, it is the intention of the majority leader to convene the Senate for the remainder of next week at 9 a.m. or earlier, depending upon the number of special orders.

Therefore, rollcall votes can be expected prior to the hour of 12 noon each day next week starting on Tuesday, May 21.

Mr. President, I inquire of the minority leader if he has any further business to transact.

Mr. BYRD. Mr. President, I thank the distinguished Republican whip. I have nothing on this side.

RECESS UNTIL 10 A.M., MONDAY, MAY 20, 1985

Mr. SIMPSON. Mr. President, in accordance with the previous order, I move that the Senate stand in recess until 10 a.m. on Monday, May 20, 1985.

The motion was agreed to; and, at 3:06 p.m., the Senate recessed until Monday, May 20, 1985, at 10 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 17, 1985:

DEPARTMENT OF ENERGY

Helmut A. Merklein, of the District of Columbia, to be Administrator of the Energy Information Administration.

Theodore J. Garrish, of Virginia, to be an Assistant Secretary of Energy (Congressional, Intergovernmental and Public Affairs).

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Monday, May 20, 1985*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Give unto us, O God, the spirit of understanding. We acknowledge that we know so many facts, yet such little wisdom, so much information, and so little discernment. May we be enlightened, O God, by a profound vision of Your world where we see all creation as Your gift to us and Your bountiful love as Your daily blessing. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill and joint resolutions of the following titles in which the concurrence of the House is requested:

S. 1023. An act to extend authorizations for appropriations for the Disaster Relief Act of 1974, and for other purposes;

S.J. Res. 32. Joint resolution to authorize and request the President to designate September 21, 1986, as "Ethnic American Day";

S.J. Res. 40. Joint resolution to designate the month of October 1985 as "National Down Syndrome Month";

S.J. Res. 57. Joint resolution to designate the week of October 20, 1985, through October 26, 1985, as "Lupus Awareness Week"; and

S.J. Res. 108. Joint resolution authorizing the Secretary of Defense to provide to the Soviet Union, on a reimbursable basis, equipment and services necessary for an improved United States/Soviet Direct Communication Link for crisis control.

The message also announced that pursuant to the provisions of sections 1928a–1928d of title 22, United States Code, as amended, the Vice President appoints Mr. GORE as a member of the Senate delegation to the North Atlantic Assembly Spring Meeting to be held in Stuttgart, Germany, May 17–20, 1985.

The message also announced that pursuant to the provisions of sections 276d–276g of title 22, United States Code, as amended, the Vice President appoints Mr. BAUCUS and Mr. HEFLIN as members of the Senate delegation to the Canada-United States Interparliamentary Group during the first session of the 99th Congress, to be held in Niagara-on-the-Lake, Ontario, Canada, on May 17–20, 1985.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, DC,
May 17, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: Pursuant to the permission granted in Clause 5, Rule III of the Rules of the U.S. House of Representatives, the Clerk received at 10:00 a.m., on Friday, May 17, 1985, the following message from the Secretary of the Senate: that the Senate agrees to the conference report to the Bill H.R. 1869.

With kind regards, I am,
Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken on Tuesday, May 21, 1985.

PERMANENT AUTHORITY FOR FLEXIBLE AND COMPRESSED WORK SCHEDULES

Mr. ACKERMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1534) to convert the temporary authority to allow Federal employees to work on a flexible or compressed schedule under title 5, United States Code, into permanent authority.

The Clerk read as follows:

H.R. 1534

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5 of the Federal Employees Flexible and Compressed Work Schedules Act of 1982 (Public Law 97-221; 96 Stat. 234) is repealed.

The SPEAKER. Pursuant to the rule, a second is not required on this motion.

The gentleman from New York [Mr. ACKERMAN] will be recognized for 20 minutes and the gentleman from Georgia [Mr. SWINDALL] will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York [Mr. ACKERMAN].

GENERAL LEAVE

Mr. ACKERMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the H.R. 1534, the bill presently under consideration.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ACKERMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in 1978, Congress originally authorized the Alternative Work Schedules [AWS] Program for 3 years. And in 1982, Congress reauthorized the program for another 3 years. This program is now due to expire on July 23 of this year.

H.R. 1534—which would make permanent the AWS Program—comes to the floor today with the bipartisan sponsorhip of 69 Members, and the unanimous approval of the House Committee on Post Office and Civil Service. In addition, on March 28, the Office of Personnel Management—speaking for the administration—testified that "* * * alternative work schedules have earned a permanent place in the management of the Federal work force." Mr. Speaker, H.R. 1534 would achieve this purpose.

Alternative work schedules include flexitime, which permits employees to stagger their work hours, and compressed schedules which allow employees to work 4-day workweeks. These options provide civil servants with a two-pronged approach to manage their leisure and employment time. It is extremely important for working parents to be able to arrange daycare for their children, and it is important to all employees to integrate their workday with other commitments, such as medical appointments. The alternative schedules that are utilized by employees are negotiated with management.

Earlier this year, the House Post Office and Civil Service Subcommittee on Human Resources held 2 days of hearings on AWS. The witnesses who testified before the subcommittee unanimously proclaimed that AWS should become a permanent fixture of the Federal civil service. Witnesses included representatives of employee organizations, management groups, and Members of Congress. The subcommit-

tee also received the results of the Office of Personnel Management Study of Alternative Work Schedules, and the initial findings of the General Accounting Office's inquiry into AWS. Both of these studies were conducted during the later part of 1984, and both concluded that AWS was beneficial to the Federal civil service, and the Federal agencies, as well as to the public.

AWS has a proven track record. It has decreased absenteeism, increased worker productivity, improved employee morale, expanded agency contact with the public, and bettered the effectiveness of Federal agencies—all at absolutely no cost to the American taxpayer.

Mr. Speaker, the Office of Personnel Management study, and the General Accounting Office study, as well as the study conducted by the Subcommittee on Human Resources have confirmed the immense benefits attributed to AWS. And these investigations have conclusively indicated that AWS has had no adverse impact on the mission of Federal agencies.

Mr. Speaker, H.R. 1534 provides that the current temporary authority to implement alternatives to the traditional work schedule be made permanent. The 6-year experiment of AWS has been a stunning success. I do not believe that permanent authorization of the Federal Employees Flexible and Compressed Work Schedules Act should be delayed any longer.

Mr. Speaker, I strongly urge my colleagues to suspend the rules and pass H.R. 1534.

Mr. SWINDALL. Mr. Speaker, I ask unanimous consent that my time be vacated, and that the gentleman from Indiana [Mr. BURTON] be given the 20 minutes allotted to me.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. BURTON of Indiana. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I see this alternative work schedule bill as one which helps the Government, and helps Federal workers. I serve on the Human Resources Subcommittee which studied H.R. 1534. For the last 6 years alternative work schedules have been in the testing or temporary phase. There are now some 300,000 Federal workers in almost every agency who have alternative work schedules. This should be a permanent program.

The advantages are better employee morale, more personal freedom, fewer persons traveling during rush hour, longer office hours for service to the public, fewer conflicts with personal or family matters, more flexibility in scheduling for managers, and use as a benefit to attract and retain employees.

There are some disadvantages which are outweighed by the advantages. One disadvantage which still concerns me is the cost from allowing some employees on compressed work schedules to take off more time on holidays than other workers. I estimate that the lost productivity amounts to a cost of about $26 million. Also, there is the question of whether it is fair to treat workers differently by giving some more time off on holidays.

I have not offered an amendment to correct this situation because I am in the minority party. I know that my views are not held by a majority of the Members of the committee. It is truly unfortunate that the majority party does not feel an urgent need to cut spending, and make Government more efficient when we get opportunities like this.

When can we start working together to address the deficit problem? We are swiftly heading down a rapids toward a waterfall. Some of the people in our boat still think that we can go on as we have in the past and never come to that time of crisis. Unless the decisions made in this Congress, both large and small, recognize the deficit problem then we are part of the problem, not part of the solution.

I pointed out a way to make Government more efficient, and still preserve the benefits of this bill. In the future all our legislation should ring out unnecessary costs, and give the taxpayers the most value for their tax dollars. This bill could have been improved. Until Members of Congress show an honest concern in all legislation to cut costs, we are heading for disaster.

□ 1210

Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia [Mr. WOLF].

Mr. WOLF. Mr. Speaker, I rise today in support of the bill to permanently extend the Alternative Work Schedules [AWS] Program. As one of the original sponsors of the flexitime experiment extension in 1982 and as one of the original sponsors of this legislation, I would like to commend the Post Office and Civil Service Committee for its work and the distinguished gentleman, Mr. ACKERMAN, for moving this legislation through committee.

The AWS Program, also known as flexitime, allows Federal employees to utilize a variety of schedules that vary from the traditional 40-hour, 5-day workweek. For example, workers may use a compressed schedule of 4, 10-hour days or a schedule which allows them to begin work earlier in the morning and leave earlier. This is particularly beneficial for employees with school-aged children.

Because I represent one of the largest constitutencies of Federal employees in the country and because one of the largest AWS experimental programs is located in my congressional district, I am keenly aware of the very real benefits this program offers and of the strong support the program enjoys among Federal workers.

The AWS Program has been beneficial to both Federal employees and to the Federal Government. A March 1985 OPM report indicated that many agencies are experiencing increases in productivity as a result of the flexitime program. Service to the public has also been enhanced as some employees are working later hours allowing greater accommodation for an ever-changing American work force. Traffic has been eased by the staggered rush hours that AWS provides and there has been a significant reduction in the number of employees arriving late for work because of traffic jams. Flexitime has helped morale as well. The March 1985 OPM report stated:

> . . . AWS led to increased job satisfaction among employees because of easier commuting, a greater sense of control over their work situation, the ability to schedule appointments on off days rather than use leave, and greater ease in making child-care arrangements.

One of the more attractive features of the AWS Program is that it allows Federal employees to spend more time with their families. For example, under flexitime, it is possible for one parent to be home when a child leaves for school in the morning and another to be home when the child returns from school in the late afternoon.

This program enjoys a broad base of support and was cosponsored by nearly 70 Members of Congress. In addition, this measure is supported by the administration and was unanimously approved by the House Committee on Post Office and Civil Service.

Mr. Speaker, during recent months major changes in the pay and benefits of Federal employees have been proposed which have demoralized the Federal work force. I believe that permanent extension of the AWS Program will help to counter the negative effects these proposals are having.

This program deserves permanent extension. The benefits to the American public, to the Government, and to the Federal employees and their families have been documented. We have an opportunity to do the right thing today and I urge my colleagues to support this measure.

Mr. ACKERMAN. I appreciate the remarks of the gentleman.

Mr. Speaker, I yield 4 minutes to the gentlewoman from Colorado [Mrs. SCHROEDER].

Mrs. SCHROEDER. Mr. Speaker, the Alternative Work Schedules [AWS] Program has increased employee morale and productivity and has had a positive effect on management, according to the results of a General

Accounting Office [GAO] survey I requested. The key finding is that both supervisors and employees are delighted with AWS.

In April 1984, I requested that the General Accounting Office undertake a review of the use of alternative work schedules in the Federal Government. I did this in anticipation of the upcoming expiration of the AWS authorization in July 1985. Although AWS legislation has been in place since 1978, there had not been a rigorous evaluation of the value and effectiveness of the program.

In one of its largest, most comprehensive survey efforts ever, GAO sent out 2,688 questionnaires to a randomly selected sample of executive branch employees and supervisors throughout the continental United States. With a remarkable 75-percent response rate, GAO obtained a wealth of data with which to assess the benefits and problems of Alternative Work Schedules Program. Although GAO's final review and analysis will not be completed until the end of this month, I am able today to provide some very significant findings based on the replies to the questionnaire.

Where in place, the Alternative Work Schedules Program has proved a demonstrable boon for family life, employee morale, organizational effectiveness, productivity, and quality of work environment. Of Federal employees responding to the particular question, 91 percent support the continuation of the AWS Program; 83 percent say that AWS has a favorable effect on their morale; 71 percent say that AWS has a favorable effect on their job performance; 83 percent say that AWS gives them greater flexibility to meet family obligations; 37 percent say that AWS has increased their work unit's ability to provide direct services to the public, while only 4 percent note a decrease; 49 percent say that AWS increases their work unit's hours of operation, while only 2 percent note a decrease; and 57 percent say that AWS increases their productivity, while only 5 percent say that productivity declines.

Among supervisers responding, 79 percent say that AWS has a favorable effect on their subordinates' morale, with only 4 percent noting an unfavorable effect; 55 percent say that AWS has a favorable effect on their subordinates' sense of responsibility, with only 7 percent noting an unfavorable effect; 58 percent say that AWS has a favorable effect on their satisfaction with their job as superviser, with only 7 percent noting an unfavorable effect; 48 percent say their subordinates' productivity under AWS was increased over what it might have been under a fixed schedule, with only 10 percent stating a decrease; 59 percent say that, on balance, the advantages of AWS outweigh the disadvantages, with only 7 percent saying that the disadvantages outweigh the advantages.

The results of the GAO study confirm that alternative work schedules have achieved important benefits to both the Government and the employee. In addition, the findings refute the claims that AWS will lead to a management disaster. For the most part, supervisers are pleased with AWS and the impact it has had on their employees, their work unit's productivity, and their personal job satisfaction.

In her testimony before the House Human Resources Subcommittee, Ms. Rosslyn S. Kleeman, Associate Director of the General Accounting Office's General Government Division, stated that those problems with AWS cited—difficulty in scheduling meetings, problems in office coverage, and so on—could "be minimized through better management controls. Management can, through better planning or monitoring of the program, assure that the programs are working."

Through its survey, GAO was able to determine that there are approximately 489,000 Federal workers currently on alternative work schedules in the executive branch. This figure points up a most disturbing element of the AWS progams. The former Director of the Office of Personnel Management [OPM] recently testified that there are only 300,000 Government employees covered under AWS—a startling 39 percent discrepancy. Under current law, OPM is charged with overseeing the implementation, administration, and review of the Alternative Work Schedules Program. The fact that OPM is unable even to accurately monitor the size of this program should be an issue of concern and future attention.

I urge Congress to take note of the GAO findings and the strong sentiments of Federal employees and quickly provide permanent authorization for the Alternative Work Schedules Program. In addition, I hope private industry will take note of the proven value of AWS to the Nation's largest employer and implement programs of its own.

Mr. BURTON of Indiana. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey [Mr. SMITH].

Mr. SMITH of New Jersey. Mr. Speaker, I rise in support of H.R. 1534, the Federal Employees Flexible and Compressed Work Schedules Act of 1985.

As I'm sure you know, the civil service has been operating under an experimental program, the Alternative Work Schedule Program, for the past 6 years. During these 6 years, the program has received resounding approval from both agency management officials and employee representatives.

For the employees, flexible and compressed schedules allow greater control over their own lives. Civil servants are better able to schedule their time outside of traditional work period—leaving more time for recreation and an enhanced quality of life. Parents in two-income families are better able to work around their childrens' schedules, and can often arrange for one to be at home before children leave for school and the other when they return.

Flexible schedules, Mr. Speaker, are not to the employees' benefit alone. The Alternative Work Schedule Program has allowed the Federal Government to better serve the public by extending service hours. While extending service hours, surveys by the Office of Personnel [OPM] Management and the General Accounting Office [GAO] show that productivity has also been increased and morale heightened as a result of this program.

Mr. Speaker, flexible time has worked and enjoys overwhelming support from employees, managers, the GAO and OPM. I, therefore, strongly urge my colleagues on both sides of the aisle, as this is indeed a bipartisan issue, to support H.R. 1534 and make flexible and compressed work schedules a permanent part of civil service employment.

Mr. BURTON of Indiana. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. ACKERMAN. Mr. Speaker, I yield 2 minutes to the gentleman from Maryland [Mr. HOYER].

Mr. HOYER. I thank the gentleman for yielding and congratulate him, the gentleman from Indiana [Mr. BURTON], and the members of the committee. Also, I am sorry she has left the floor, but I want to congratulate the gentlewoman from Colorado [Mrs. SCHROEDER] who for so long served as chairman of the subcommittee from which this bill comes.

I had the opportunity to serve on the Committee on Post Office and Civil Service when I first came to the Congress, and I am, of course, very interested in the rights and benefits of Federal employees.

The alternative work schedule which, as the gentlewoman from Colorado [Mrs. SCHROEDER] pointed out, was first adopted back in 1978 as a test program, has now become a program which is, obviously, affecting Federal employees positively, as well as the management of our Federal Government.

□ 1220

That is the reason, Mr. Speaker, that I believe the Office of Personnel Management and all of us in the Congress, on a bipartisan basis, are in strong support of this legislation.

I want to say that I believe this legislation is not only beneficial in terms

of families, and in terms of individuals being able to construct their schedules positively as it relates to those families, but also because of that flexibility, gives to managers the ability—as the Congressman from New Jersey has so correctly pointed out—the ability to really extend service hours consistent with the alternative work schedules of the employees. I think this is a benefit, certainly, to the citizens that we all serve.

Mr. Speaker, I rise in strong support of this legislation and urge its unanimous approval.

Mr. ACKERMAN. Mr. Speaker, I yield 3 minutes to the gentleman from Iowa [Mr. BEDELL].

Mr. BEDELL. I thank the gentleman for yielding me this time.

Mr. Speaker, I rise at this time to point out a problem that exists in regard to the flexitime scheduling.

First of all, let me say that I am a strong supporter of flexitime. The business that I used to operate, operated with flexitime; I believe it is better for the employees, and better for everyone. The problem exists in that in the past there is a difficulty that I encountered as I made unannounced visits to the agencies.

One of my projects here, when I have free time, is to go down to Washington, and just walk into any old agency and just punch a button on the elevator and start going down the hall and go in to see what is happening at the different agencies. What I found was that under flexitime, as people sign in, they have sheets where people sign in, and they sign out. If the people that are supervising that, leave before the other people, there is no check at all as to whether they signed out at the time they left or whether they left at a different time.

There is an easy way to solve this; the way to solve it is simply that you have seriatim time sheets, wherein the person that arrives signs their name and the time; the next person signs their name and time; the next person signs their name and time, so it is impossible for somebody that arrives after somebody else to come in and say that they arrived at a prior time. The same way when you leave.

We have succeeded in getting the rules and regulations changed that now provide for seriatim time sheets for all agencies that operate under flexitime, which would solve the problem.

The difficulty that occurs is that some of the union contracts that they have with their unions prohibit seriatim time sheets. I would say only that as those contracts are renegotiated, if this is not corrected, I see no choice except for us to pass a law to say that we are requiring seriatim time accounting if we are going to have flexitime.

It requires no extra time; nothing extra to be done. Certainly it is the responsibility of us if we are going to see that people enjoy this great opportunity, that we have an accounting system which will see that the people are actually there for the time they claim are there.

I congratulate the committee for extending flexitime; I am a strong supporter, but I wanted to call this to the attention of the Members.

Mr. ACKERMAN. Mr. Speaker, the gentleman has some legitimate concerns as he has had in the past and raised with the committee and when this bill has come up previously.

The subcommittee will request that OPM look into this and see if we can address those concerns.

Mr. BEDELL. Mr. Speaker, will the gentleman yield?

Mr. ACKERMAN. I yield to the gentleman.

Mr. BEDELL. They have looked into it, and the regulations now require seriatim time recording. The problem is that some of the union negotiations previously prohibited so they could not overrule those negotiations.

It would be this gentleman's opinion that in the future, in any new negotiations under new contracts should not prohibit seriatim time recording inasmuch as the regulations now say that that is the type of recording we are to have when we have flexitime.

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield?

Mr. ACKERMAN. I yield to the gentleman.

Mr. BURTON of Indiana. I thank the gentleman.

As the ranking minority Member on the subcommittee, I think the gentleman has made a great suggestion and we should followup on that. I would suggest to the subcommittee chairman that maybe we could send a letter to those union leaders urging them to incorporate his suggestion in his next union contract, and then if they do not, we can take further action.

Mr. ACKERMAN. The subcommittee will certainly consider that, and we will see if we can sit down with all of the parties concerned on this issue.

● Ms. OAKAR. Mr. Speaker, today I rise in strong support of H.R. 1534, a bill to make permanent the temporary authority to allow Federal employees to work on a flexible or compressed work schedule.

Mr. Speaker, my good friend and colleague, Congressman ACKERMAN, chairman of the Subcommittee on Human Resources of the House Post Office and Civil Service Committee, should be commended for his leadership in moving so expeditiously on this important legislation of which I am very proud to cosponsor.

Mr. Speaker, as you may know, in 1982, Congress authorized the Alternative Work Schedules Program [AWS] for a second 3-year experiment. The program will expire in 2 months—July 23—unless we act to make it permanent.

Studies of the 6-year program have shown that it has been extremely successful. In a survey conducted by the General Accounting Office of 11 executive agencies, the perceptions of the AWS Program were highly positive and the officials who were questioned, with only one exception, favored continuation of the program.

Mr. Speaker, most of the agency officials cited improved employee morale, productivity, decreases in overtime, and tardiness. In general, greater efficiency of operations was realized in those agencies participating in the program. Additionally, a majority of the agencies surveyed felt that the AWS Program has enhanced their ability to serve the public.

The AWS Program has also had positive effects on Government employees. The flexitime and compressed schedules have permitted employees to adjust their schedules to meet individual needs without intruding upon valuable office time.

In particular, parents have benefited from the AWS Program. Both women and men who have either sole or joint responsibility for child-care arrangements cited greater leeway in arranging their home lives and personal schedules as an asset to improved job performance. The compressed schedules allowed employees to conduct necessary family activities while still devoting the same number of hours per week to their jobs. Such flexible schedules make it easier for working parents to enter and stay in the work force, and aid in the recruitment of part-time and handicapped individuals.

Generally, all agency officials surveyed believe employee morale has greatly improved. Employees have more positive attitudes, are more satisfied with their jobs, and are able to devote more time to family and personal interest—all without taking time away from their office duties.

The U.S. Government, as an employer, must recognize the changing nature of American life and the necessity of balancing work and personal lives so both can thrive. Our work force has dramatically changed over the past decade, as has the lifestyle of the American worker. It is important that governmental institutions and employers reflect this change in working practices to maintain an experienced and productive work force.

Mr. Speaker, I firmly believe that the AWS program should be permanently reauthorized and ask all my colleagues to support this important legislation.●

● Mr. PARRIS. Mr. Speaker, I strongly support House passage of the Alter-

native Work Schedule Program [AWS] which allows Federal employees to utilize work schedules that depart from the traditional 5-day, 40 hour workweek. I am an original cosponsor of the legislation being discussed today which permits a variety of arrangements in which fixed times of arrival and departure are replaced by core working hours and expanded arrival and departure times.

This program, Mr. Speaker, has proven to be an outstanding success during its trial period in the Federal Government as well as private industry. There are currently 10 million full-time workers in the private sector who enjoy flexible work schedules. These variations have evolved as a means of coping with social change, particularly the dramatic increase of women in the work force.

Flexible schedules have proven to be of benefit to both employee and employer. There is very convincing evidence that this type of work schedule has increased productivity, reduced the use of sick leave and tardiness, has a very salutory effect on employee morale.

Besides the obvious benefits to Federal employees, the Federal Government and families of Federal workers also benefits from this legislation. During the AWS trial period, the Government experienced greater efficiency in operations and services. Department and agency supervisors, by carefully arranging work shifts, have been able to keep offices open longer, providing an increased service to the public. This legislation also allows workers to gain some control over their daily schedules, permitting them to spend more time with their families. By adjusting their work hours, they can meet their personal needs and preferences and still maintain their commitment to their jobs.

The flexitime program, which has increased Government efficiency through improved employee morale, enjoys wide support among workers and administrators and deserves to be made a permanent option for Federal employers.●

● Mr. DYMALLY. Mr. Speaker, as an original cosponsor, I would like to express my support for H.R. 1534, a bill to make the current alternative work schedule experiment in the Federal Government a permanent authority.

As a member of the Post Office and Civil Service Committee, I have been actively involved in the struggle to help Federal employees retain a level of pay and benefits commensurate with the vital services they perform every day for the American people. This year, with budget deficits at the forefront of the national consciousness, the administration has attempted again to slash the salaries and benefits of its own employees, salaries which already lag significantly behind those found in the private sector, according to the President's own pay agent. Morale among the Federal work force is at an all-time low.

That is why I believe it is so important to enact the piece of legislation we have before us today. In the 6 years alternative work schedules have been implemented in the Federal Government, they have been an unqualified success. On this point, Federal employees, managers and the administration are in agreement. Not only have the flexible schedules improved employee morale, but it is highly likely that they have increased productivity and efficiency in Federal offices.

Alternative work schedules were designed to accommodate both the changing structure of the work force and changing values about family and work time. In recent years, women have made up an increasingly large proportion of the work force. Working women often have significant child care responsibilities as well. A traditional 9-to-5 job becomes extremely difficult, if not impossible, to maintain without sacrificing either job performance or family time. Because the realities of today's economy often mandate that both parents work, family becomes the expendable variable. A work schedule that allows parents the flexibility to cope with family emergencies and child priorities is a needed improvement for the changing times.

Furthermore, child care responsibilities are no longer the sole province of women. Both fathers and mothers are involved in all aspects of child-raising. With a flexible work schedule, it becomes possible to coordinate larger blocks of time to spend together as a family. Also, parents can alternate their work times so that at least one parent can be on hand to care for young children at home.

Alternative work schedules have other benefits as well. Employees can control their own schedule and set their own priorities regarding work and leisure time. Appointments can be scheduled without using up sick or leave time. Commuting may be less stressful, as employees arrive at and leave the workplace at offpeak hours. Early or late working hours can provide employees with much needed "quiet time" to concentrate on specific projects.

And the American people benefit as well from a more efficient, more productive, more highly motivated Federal work force. At no cost to the taxpayer, this program is one which should definitely be continued. I urge my colleagues in the House to support H.R. 1534 and continue a highly beneficial program.●

● Mrs. BYRON. Mr. Speaker, I rise today in support of H.R. 1534, a bill to permanently extend the authority of Federal agencies to establish the alternative work schedule, or flexitime program, for Federal employees. I am a cosponsor of this legislation because I have been continually impressed with the success of the flexitime program for the past 7 years. It has allowed Federal workers to utilize work schedules which no longer fit into the traditional 5-day, 40-hour workweek structure. It has also increased the morale of those Federal employees who have the flexibility to work schedules more suitable to their needs. And finally: Flexitime has helped reduce the heavy amount of traffic I have to sit in on my commute home to Frederick every evening.

According to the latest census, over 17,000 Federal employees currently reside in my Sixth District of Maryland. I have been approached several times by these constituents who feel that the flexitime program has provided them with the opportunity to work at those times when they are most stimulated and energized by their jobs. This, I think, is what is most worthwhile about the program.

Mr. Speaker, I have always held that good government begins with happy, motivated employees. I feel certain that the flexitime program has made important contributions toward ensuring that our valuable Federal workers remain this way. Therefore, I urge my colleagues to support the passage of this worthwhile legislation. Thank you.●

Mr. ACKERMAN. Mr. Speaker, I have no further requests for time and yield back the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from New York [Mr. ACKERMAN] that the House suspend the rules and pass the bill, H.R. 1534.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill passed.

A motion to reconsider was laid on the table.

VETERANS' COMPENSATION BENEFITS AMENDMENTS OF 1985

Mr. MONTGOMERY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2343) to amend title 38, United States Code, to make certain improvements in veterans' compensation programs, and for other purposes, as amended.

The Clerk read as follows:

H.R. 2343

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Veterans' Compensation Benefits Amendments of 1985".

SEC. 2. VETERANS' ADMINISTRATION REGIONAL OFFICE IN EACH STATE.

(a) IN GENERAL.—Section 230(a) of title 38, United States Code, is amended to read as follows:

"(a)(1) The Central Office of the Veterans' Administration shall be in the District of Columbia.

"(2)(A) The Administrator shall maintain a regional office in each State. Subject to subparagraph (B) of this paragraph, such offices shall be responsible for processing—

"(i) claims for benefits under chapters 11, 13, and 15 of this title;

(ii) claims for educational benefits or vocational rehabilitation provided under laws administered by the Veterans' Administration;

"(iii) loans under chapter 37 of this title; and

"(iv) applications for assistance under chapter 39 of this title.

"(B) This paragraph does not require the Administrator to provide functions through a regional office in a State other than those functions that were being performed by that office on January 1, 1985.

"(3) The Administrator may establish such other regional offices and field offices within the United States, its Territories, Commonwealths, and possessions as he considers necessary.

"(4) For the purposes of this subsection, the term 'State' means one of the 50 States or the Commonwealth of Puerto Rico.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on October 1, 1985.

SEC. 3. SPECIAL CONSIDERATION FOR LOSS OF PAIRED EXTREMITIES.

(a) REVISION OF SECTION 360.—(1) Section 360 of title 38, United States Code, is amended to read as follows:

§ 360. Special consideration for certain cases of loss of paired organs or extremities

"Where a veteran has suffered—

"(1) blindness in one eye as a result of service connected disability and blindness in the other eye as a result of non-service-connected disability not the result of the veteran's own willful misconduct;

"(2) the loss or loss of use of one kidney as a result of service-connected disability and involvement of the other kidney as a result of non-service-connected disability not the result of the veteran's own willful misconduct;

"(3) total deafness in one ear as a result of service-connected disability and total deafness in the other ear as the result of non-service-connected disability not the result of the veteran's own willful misconduct;

"(4) the loss or loss of use of one hand or one foot as a result of service-connected disability and the loss or loss of use of the other hand or foot as a result of non-service-connected disability not the result of the veteran's own willful misconduct; or

"(5) permanent service-connected disability of one lung, rated 50 percent or more disabling, in combination with a non-service-connected disability of the other lung that is not the result of the veteran's own willful misconduct,

the Administrator shall assign and pay to the veteran the applicable rate of compensation under this chapter as if the combination of disabilities were the result of service-connected disability.".

(2) The item relating to such section in the table of sections at the beginning of chapter 11 of such title is amended to read as follows:

"360. Special consideration for certain cases of loss of paired organs or extremities.".

(b) CONFORMING AMENDMENT.—Subsection (t) of section 314 of such title is repealed.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 1985.

SEC. 4. SENSE OF CONGRESS CONCERNING TAXATION OF VETERANS' COMPENSATION.

It is the sense of Congress that payments by the Veterans' Administration to veterans as compensation for service-connected disabilities should remain exempt from Federal income taxation. The President is urged to reject any proposal to tax such payments in connection with any tax reform legislation that the President submits to Congress.

SEC. 5. VETERANS' LIFE INSURANCE PROGRAMS.

(a) SERVICEMEN'S GROUP LIFE INSURANCE.—(1) Subsection (a) of section 767 of title 38, United States Code, is amended—

(A) by striking out $35,000" and inserting in lieu thereof "$50,000"; and

(B) by striking out "the amount of $30,000, $25,000, $20,000, $15,000, $10,000 or $5,000" and inserting in lieu thereof "an amount less than $50,000 that is evenly divisible by $10,000".

(2) Subsection (c) of such section is amended by striking out "the amount of" the first place it appears and all that follows through "as the case may be," and inserting in lieu thereof "any amount less than $50,000, he may thereafter be insured under this subchapter in the amount of $50,000 or any lesser amount evenly divisible by $10,000".

(3) Subsection (d) of such section is amended—

(A) by striking out "the effective date of this subsection" each place it appears and inserting in lieu thereof "January 1, 1986"; and

(B) by striking out "up to a maximum of $35,000 (in any amount divisible by $5,000)" and inserting in lieu thereof "in the amount of $50,000 or any lesser amount evenly divisible by $10,000".

(b) VETERAN'S GROUP LIFE INSURANCE.—(1) Subsection (a) of section 777 of such title is amended—

(A) by striking out the first sentence and inserting in lieu thereof the following: "Veterans' Group Life Insurance shall be issued in the amounts specified in section 767(a) of this title. In the case of any individual the amount of Veterans' Group Life Insurance may not exceed the amount of Servicemen's Group Life Insurance coverage continued in force after the expiration of the period of duty or travel under section 767(b) or 768(a) of this title."; and

(B) by striking out "$35,000" in the second sentence and both places it appears in the last sentence and inserting in lieu thereof "$50,000".

(2) Such section is further amended by adding at the end the following new subsection:

"(h)(1) Notwithstanding any other provision of the law, members of the Individual Ready Reserve and the Inactive National Guard are eligible to be insured under Veterans' Group Life Insurance. Any such member shall be so insured upon submission of an application in the manner prescribed by the Administrator and the payment of premiums as required under this section.

"(2) Notwithstanding subsection (b)(2) of this section, Veterans' Group Life Insurance coverage under this subsection shall be issued on a renewable five-year term basis, but the person insured must remain a member of the Individual Ready Reserve or Inactive National Guard throughout the period of the insurance in order for the insurance of such person to be renewed.

"(3) For the purposes of this subsection, the terms 'Individual Ready Reserve' and 'Inactive National Guard' have the meaning prescribed by the Administrator in consultation with the Secretary of Defense.".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the first day of the fourth month beginning after the date of the enactment of this Act.

SEC. 6. ACTIVE DUTY STATUS BASED ON ACTIVE GUARD AND RESERVE OR ACTIVE-DUTY SUPPORT STATUS.

(a) IN GENERAL.—Section 101(22)(C) of title 38, United States Code, is amended by inserting "performed for training purposes under title 10 or" after "full-time duty".

(b) EFFECTIVE DATE.—(1) The amendment made by subsection (a) shall apply with respect to duty performed after September 30, 1985.

(2) A member or former member of the National Guard or Air National Guard in active guard and reserve or active duty support status on the date of the enactment of this Act shall be eligible for benefits under chapter 37 of title 38, United States Code, if the member (or former member) continuously served in such status for 181 days or more before application for such benefits and is otherwise eligible.

SEC. 7. EXTENSION OF AUTHORITY TO OPERATE A REGIONAL OFFICE IN THE REPUBLIC OF THE PHILIPPINES.

Section 230(b) of title 38, United States Code, is amended by striking out "September 30, 1985" and inserting in lieu thereof "September 30, 1988".

SEC. 8. DIC RATE FOR SURVIVING SPOUSE OF COMMANDANT OF COAST GUARD.

(a) EQUALIZATION WITH OTHER SERVICE CHIEFS.—Footnote 2 of the table I section 411(a) of title 38, United States Code, is amended by striking out "or Commandant of the Marine Corps," and inserting in lieu thereof "Commandant of the Marine Corps, or Commandant of the Coast Guard,".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on October 1, 1985.

SEC. 9. TECHNICAL AMENDMENTS TO VETERANS' BENEFITS IMPROVEMENT ACT OF 1984.

(a) AMENDMENTS TO PUBLIC LAW 98-543.—(1) Section 105 of the Veterans' Benefits Improvement Act of 1984 is amended by striking out "413" and inserting in lieu thereof "413(a)".

(2) Section 111(c)(1)(B) of such Act is amended by striking out "subsection (b)" and inserting in lieu thereof "subsection (c)(1)(B)".

(b) AMENDMENTS TO TITLE 38.—(1) Section 524 of title 38, United States Code, is amended—

(A) by striking out "subsection (d)" in subsection (a)(2) and inserting in lieu thereof "subsection (b)";

(B) by striking out "subsection (a)(1)" in subsection (b)(4) and inserting in lieu thereof "subsection (a)"; and

(C) in subsection (c)—

(i) by striking out "Notwithstanding subsection (c) of section 525 of this title, a veteran" and inserting in lieu thereof "A veteran";

(ii) by striking out "subsection (b)" the second place it appears and inserting in lieu thereof "subsection (b)(1)"; and

(iii) by striking out the period and inserting in lieu thereof "without regard to whether the veteran's entitlement to pen-

sion is so terminated during the program period".

(2) Section 525(a) of such title is amended by striking out "under section 521 of this title".

(3) The item relating to section 524 in the table of sections at the beginning of chapter 15 is amended by inserting "program of" after "Temporary".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in the Veterans' Benefits Improvement Act of 1984 (Public Law 98-543).

The SPEAKER. Is a second demanded?

Mr. BURTON of Indiana. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Mississippi [Mr. MONTGOMERY] will be recognized for 20 minutes and the gentleman from Indiana [Mr. BURTON] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Mississippi [Mr. MONTGOMERY].

Mr. MONTGOMERY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 2343 would amend title 38, United States Code, to provide several benefits that would assist our Nation's veterans. Among other things, the bill would:

First, require the Veterans' Administration to continue to maintain at least one regional office in each State;

Second, increase the maximum insurance for service personnel from $35,000 to $50,000, and extend this coverage to members of the Individual Ready Reserve and the inactive National Guard;

Third, make members of the National Guard eligible for full benefits for active duty authorized for operational support purposes;

Fourth, extend authority for the VA to operate a regional office in the Philippines through September 30, 1988; and

Fifth, express the sense of the Congress that compensation payments made to veterans for service-connected disabilities should continue to be exempt from taxation.

Mr. Speaker, I commend the distinguished gentleman from Ohio [Mr. APPLEGATE], the very able chairman of the Subcommittee on Compensation, Pension and Insurance, for his leadership in bringing this bill to the floor and I now yield such time as he may consume for a more detailed explanation of the bill.

Mr. Speaker, in closing I want to thank the very able ranking minority member of the subcommittee, the gentleman from New York [Mr. SOLOMON] for his assistance in bringing this bill to the floor.

As usual, the distinguished ranking minority member of the full committee [Mr. HAMMERSCHMIDT] has provided outstanding leadership and I want to thank him for all the work he has done on this bill.

Mr. Speaker, according to the Congressional Budget Office this measure would result in expenditures of $2 million in fiscal year 1986, $3 million in fiscal year 1987 and $3 million in 1988. It is a good bill that deserves the support of the House and I urge its adoption.

□ 1230

Mr. Speaker, I yield such time as he may consume to the chairman of the subcommittee, the gentleman from Ohio [Mr. APPLEGATE].

Mr. APPLEGATE. I thank the gentleman for yielding time to me.

Mr. Speaker, I, too, want to thank Chairman MONTGOMERY for his work and input into this bill and his leadership on the committee, and also the gentleman from Indiana [Mr. BURTON], who is filling in for the ranking member, the gentleman from New York [Mr. SOLOMON], and I certainly want to extend all the compliments to Mr. SOLOMON for the work that he has put into it and the assistance that he has given to our subcommittee. Without those kinds of cooperative efforts, we would not be here on the floor today with this bill.

Mr. Speaker, the President, in his budget submission for fiscal year 1986, requested funds for a 4.1-percent cost-of-living allowance [COLA] for the service-connected disability compensation and dependency and idemnity [DIC] programs. The increase proposed by the President would become effective December 1, 1985.

In our committee report to the Budget Committee, we agreed with the President's request for the 4.1-percent increase. The House has not, as of this time, agreed to the first concurrent budget resolution. Because we have always made an effort to stay within the fiscal target of the budget resolution, action on a COLA for the compensation and DIC programs will be deferred until the House has acted on the budget resolution.

Mr. Speaker, the bill we bring to you today is a modest bill, costing only $2 million for fiscal year 1986. It does affect a wide range of issues vitally affecting veterans' programs.

Since World War II, the Veterans' Administration has operated a network of regional offices to administer a broad range of veterans' benefits, including disability and death compensation, disability and death pension, educational benefits, vocational rehabilitation training, and the loan guaranty program. At the present time, 58 such regional offices are in operation, including at least one in each of the 50 States as well as in Puerto Rico and the Philippine Islands.

The President, in his budget request for fiscal year 1986, proposed that all adjudication, loan processing, and administrative functions in the 58 regional offices, be consolidated into three central locations over a 3-year period beginning in fiscal year 1986. On the day the President's budget was received, the committee was informed by the Administrator of Veterans' Affairs of the general proposal and that a task force had been established to develop an implementation plan by July 1985.

Current law provides that the Administrator may not in any fiscal year implement a major administrative reorganization such as the President proposed unless the Administrator first submits to the appropriate committees of the Congress a report containing a "detailed plan and justification" for the administrative reorganization. Any such report must be submitted not later than the day on which the President, pursuant to section 1105 of title 31, submits to the Congress the budget for the fiscal year in which the administrative reorganization is to be implemented. No action to carry out such reorganization may be taken after the submission of such report until the first day of such fiscal year.

On February 11, 1985, Chairman MONTGOMERY and Mr. HAMMERSCHMIDT, informed the Administrator that the notice in his letter of February 1, 1985, was inadequate since it did not contain, among other things, details as the statute requires. The Administrator responded that the notice was adequate and provided the chairman with an opinion from his Acting General Counsel to that effect.

The Acting General Counsel stated that Congress did not intend to block significant reorganizations so much as to gain time to learn of, and evaluate, such proposed agency actions. I would point out that the Administrator does not plan until late July to inform the committee of the details of his plan which would include the locations of the proposed centralized offices, the number of employees affected, the costs of relocating employees, the savings involved, and a myriad of other factors pertinent to relocation of thousands of employees across the Nation. These are precisely the details that should have been submitted to the committees when the budget for fiscal year 1986 was sent to the Congress. I believe it to be unrealistic to assume that the details of such a move, presented to the Congress just prior to the traditional August recess, would afford the committees and the Congress a reasonable opportunity to enact legislation, should that be the will of the Congress.

The committee received testimony from the veterans' service organizations that consolidation of major adjudication functions would disrupt effi-

cient delivery of benefits and services to veterans and their dependents, would destroy the due process rights of VA claimants, and bring total disarray to the VA benefits system.

The bill we bring to you today would simply require the Administrator to maintain the regional office structure as it existed on January 1, 1985. It would not require him to establish any new office nor would it require the relocation of any functions from one office to another. The committee, in bringing this bill to the floor today, is simply ensuring that the Administrator does not consolidate any regional office functions without affording the Congress an opportunity to exercise its oversight responsibility by evaluating the effect of such a move on the delivery of veterans' benefits in an acceptable manner.

Current law provides that a veteran who loses one eye in service and later loses the other eye from non-service-connected causes is eligible for compensation as if the blindness in both eyes is service-connected. This principle of "paired organ" impairment also covers disabilities involving kidneys and ears. The administration has asked that this principle be extended to veterans who have a severe service-connected disability involving one lung and later develop an unrelated disability of the other lung. This provision is included in the bill we bring you today.

In 1977, the House passed H.R. 6501 which would have added the loss of paired extremities to the "paired organ" provision of the law so that his principle would apply with equal force in the case of a veteran who has suffered both a service-connected and non-service-connected loss of either both upper of lower extremities. The other body would not accept the bill as passed by the House and it was necessary to compromise with a more limited benefit for these cases.

The committee has again reconsidered this proposal, as suggested by the Disabled American Veterans. The Veterans' Administration reports only 64 veterans would benefit from this amendment and the cost would be insignificant. Under this section, the 64 veterans would be entitled to total disability benefits as a result of having the "paired extremity" included along with "paired organs."

Mr. Speaker, compensation benefits have traditionally been exempted from taxation. This exemption has been reflected in the rates of compensation provided by law which take cognizance of their tax-exempt status. The committee is aware that a tax reform proposal under consideration by the administration would abridge this exemption and subject all or part of compensation payments to taxation.

In his State of the Union Message this year, the President said, "one thing that tax reform will not be is a tax increase in disguise." I just want to point out that if such a tax reform package becomes law and does include a provision to tax disability compensation, veterans who have to subsist solely on their compensation payments will begin paying taxes. I do not want to be the one to tell them that this would not be a tax increase.

Mr. Speaker, some people may ask, "What's so special about veterans' compensation?" Well, I want to say here and now that compensation is very special because it represents a paraplegic, a quadriplegic, the loss of limb and the loss of sight, suffered while fighting for our country.

The bill before us has a section which expresses the sense of Congress that veterans' disability compensation should remain exempt from Federal taxation.

The bill would increase the maximum coverage of Servicemen's Group Life Insurance from $35,000 to $50,000 and would, for the first time, extend this coverage to members of the Inactive National Guard and to the Individual Ready Reserve. This program is funded by premiums collected from the individual insureds in our all-volunteer Armed Forces, except the Government is responsible for costs relating to deaths caused by combat.

I would point that last year, the House passed a similar measure but it was not accepted by the other body. The House-passed bill was amended by the other body to limit the increased coverage to servicemembers with 5 or more years service. This limitation was unacceptable to the House. In rejecting their amendment, I informed the House at that time that of the 248 men who lost their lives in Lebanon and Grenada in the tragic events in 1983, there were 198 who had less than 5 years service. Most of them were survived by widows, children, and parents. I feel very strongly that the survivors of a servicemember with less than 5 years service need assistance and protection as much as those with more than 5 years. I hope the other body will reconsider its position on this matter this year because I do not want to try to explian to a widow that because her husband had only 4 years service, his life is not worthy as much as another serviceman with 6 years service.

Mr. Speaker, one provision of the bill would redefine full-time National Guard Service performed for operational purposes so that these individuals would be considered as having performed "active duty," rather than "active duty for training." Those guardsmen who serve limited tours for training purposes are protected for any disability incurred as a result of that training. It is the current practice of the Department of Defense to sometimes order guardsmen to active duty for lengthy periods for operational, support, or recruiting duty. The committee believes these individuals should be considered as serving on active duty rather than a more limited active duty for training category. The principal veterans' benefits that would accrue under this amendment would be loan guaranty and medical benefits in the future on a non-service-connected basis. This proposal is supported by the administration.

Under present law, the Administrator of Veterans' Affairs operates a regional office in the Republic of the Philippines. The authority to operate this office expires September 30, 1985. A section of this bill would extend the authority to maintain this office through September 30, 1988.

The Administrator has advised the committee that he believes the operation of a regional office in the Philippines is the most efficient means of administering the VA programs of compensation, pension, and educational benefits to the thousands of beneficiaries residing in the Philippines. VA reports more than 31,000 beneficiaries in the Republic of the Philippines are in receipt of monthly benefits from the VA.

Last, a provision of this bill would ensure that the surviving spouse of a former Commandant of the Coast Guard who died from service-connected causes would receive DIC at the same rate as now provided to surviving spouses of former chiefs of the other uniformed services. Prior to October 30, 1984, the Commandant of the Coast Guard received the same service pay as those of other flag officers of the Coast Guard. On that date, Public Law 98-557 was enacted and included a provision to increase the Coast Guard Commandant's service pay to the same level as the chiefs of the other uniformed services. Since the DIC rates for surviving spouses are related to the service pay of the veteran, this adjustment in the DIC rates is justified.

Mr. Speaker, while each of the provisions of the bill is meritorious, the Congressional Budget Office advises the first year cost of the bill would only be $2 million. I would point out that $1 million of this is for the continued operation of the regional office in the Philippines and is actually not a new expenditure or an extension of veterans' benefits per se. The remaining provisions, totaling less than $1 million, are significant and needed refinements in benefits provided for those who fought our wars and were disabled as a result of that service. I urge my colleagues to support the bill.

Mr. BURTON of Indiana. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 2343. The entire minority membership of the Committee on Veterans' Affairs endorses the Veterans' Compensation Benefits Amendments of 1985. As a member of the Subcommittee on Compensation, Pension and Insurance and as a cosponsor of the measure, I believe its passage would be a significant accomplishment on behalf of America's veterans.

H.R. 2343 would require the Veterans' Administration to maintain a regional office in each State, and would liberalize benefits for veterans who have a service-connected loss of one of certain paired organs and who subsequently lose the second organ.

It would express the sense of the Congress that veterans' service-connected disability compensation should not be taxed, and would increase servicemen's group life insurance and veterans' group life insurance coverage. The increases in coverage would be paid for through the policy premiums and would not entail any cost to the Government, except in the event of war.

H.R. 2343 would define full-time service on active duty by certain National Guard members as active duty for purposes of the Veterans' Administration, and would extend current authority to operate a regional office in the Philippines for 3 more years.

Finally, the bill would equalize the rate of dependency and indemnity compensation paid to the widow of the former Coast Guard Commandant with that paid to other widows of service chiefs.

None of the bill's provisions would entail significant new costs to the Government, and they are all in keeping with the need for fiscal restraint.

All of these provisions deserve favorable action, but I especially want to comment on keeping the VA's regional offices open and the resolution against taxing veterans' disability compensation.

The proposal to consolidate the VA's 58 regional offices into just three offices is one that is truly ill-advised. Consolidation should not be done for the following basic reasons: First, the consolidation would mean a serious reduction in the quality and availability of regional office services to veterans.

Second, the VA has no idea where it would put the three offices which would be left.

Third, the VA predicates the consolidation on non-existent improvements in automated data processing for which it has no specific plans.

Fourth, the VA has not adequately taken into account the enormous administrative and personnel costs of consolidation.

And, fifth, the VA's proposed consolidation could not in any event legally be accomplished in fiscal year 1986, because the United States Code requires that, prior to the submission to Congress of the budget for the fiscal year in which the reorganization is to be accomplished, the VA must submit to the Congress a detailed plan of reorganization. This proposed consolidation was a bad idea in 1981, and it is a bad idea now.

It is important to note that this bill would not require the VA to change or expand the services offered by the existing regional offices. We should act on this measure is order to prevent the VA from rushing headlong into a unwise action which will hurt our Nation's veterans.

Taxation of veterans' disability compensation is not a proposal before this body, and it never should be. Evidently, this tax has been studied at the Department of the Treasury. Hopefully, Secretary Baker will not propose it to the President. Such a tax is more than ill-advised; it is unthinkable. It would be nothing less than a slap in the face to veterans who have sacrificed their arms, legs, and sight because they loved and served their country. Our resolution would be an unmistakable message to the entire country that any proposal for taxation of veterans' disability compensation is unworthy of consideration by the Congress.

I want to pay a well-deserved tribute to Mr. MONTGOMERY, the chairman of the Veterans' Affairs Committee, for the outstanding job he has done in bringing this legislation through the committee and to the floor.

Also, I would be remiss if I did not commend Mr. APPLEGATE, chairman of the Subcommittee on Compensation, Pension and Insurance, Mr. HAMMERSCHMIDT, the committee's ranking member, and Mr. SOLOMON, the subcommittee's ranking member, for their invaluable work in the formulation of this bill.

At each stage, this bill has had unanimous support from every member of the committee. I don't know what better recommendation it could have.

□ 1240

Mr. MONTGOMERY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to reiterate again what the chairman of the subcommittee, the gentleman from Ohio [Mr. APPLEGATE], has said and also what the gentleman from Indiana [Mr. BURTON] has said. This is an excellent bill. It is low-cost, and it would certainly help the veterans and their dependents.

I would like to point out, Mr. Speaker, that we have summaries of the three bills that the Committee on Veterans' Affairs will bring up today. They are at the Democratic desk, and if any Members would like summaries of these bills, they can come by the Democratic desk and pick them up. They are the blue sheets at the desk.

● Mr. LEATH of Texas. Mr. Speaker, I am most pleased to speak in support of H.R. 2343. I want to congratulate Chairman MONTGOMERY and his fine committee for moving so expeditiously on this legislation.

I strongly support all of the provisions of this bill, especially the sections expressing the sense of the Congress that veterans' disability compensation should not be subject to taxation by the Internal Revenue Service and which would require the VA to keep at least one regional office in each State to handle veterans claims and home loan applications.

In 1981, the present administration proposed to consolidate the regional office functions into three locations. We soundly rejected it at that time as a bad idea. I sponsored legislation, which was enacted in 1981 that requires the Administrator of Veterans' Affairs to submit to the Congress, along with the budget proposal, a detailed plan and timetable for any major reorganization. We did not receive any plan with the fiscal year 1986 budget but the VA did tell us they were making such plans and would share them with us in July.

Since they obviously have no intention of complying with the requirement of giving us detailed plans in sufficient time to hold oversight hearings and evaluate the results of such a consolidation before they actually begin, I introduced H.R. 1568 which would end once and for all their plans to consolidate. My bill is now included as section 2 of H.R. 2343 which is before us at this time. This proposed amendment would simply require the VA to maintain a network of regional offices so that each State would have the same adjudication and loan processing activity continued as they existed on January 1, 1985.

I feel very strongly on this issue and I am not going to stand by and watch the VA's mission be undermined by such a totally ridiculous reorganization. Veterans are entitled to have reasonable access to their claims records and to have personal hearings without having to travel hundreds or thousands of miles for that purpose. I would also point out that such a consolidation would involve relocation of several thousand employees; severancy pay or early retirement of employees terminated; facility closures; equipment transportation and/or procurement; and training of new personnel estimated to cost tens of millions of dollars which have not been included in the President's proposed budget.

I urge my colleagues to support H.R. 2343.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, I rise in strong support of H.R. 2343, the Veterans' Compensa-

tion Benefits Amendments of 1985. This measure, of which I am a cosponsor as ranking member of the Veterans' Affairs Committee, has provisions important to all veterans.

The Veterans Administration is proposing to reduce in fiscal year 1986 the number of its regional offices from 58 to 3. The VA made a similar proposal in 1981, which I opposed. This proposal found no support then. The VA is attempting to revive the proposal as a way of saving money. However, I believe the regional office consolidation would be a monumental and costly mistake. The VA really has no plan for consolidation and could not have such a consolidation in fiscal year 1986 as a practical matter, assuming the idea had merit. Even if the consolidation could achieve the claimed savings, which is very doubtful, the cost to veterans in lost services would far exceed any savings. I fully support the requirements of H.R. 2343 that the VA maintain a regional office in every State. The misguided VA attempt to close nearly all of its regional offices should be stopped decisively.

Few issues come to mind which have given our country's veterans more concern than the spectre that compensation for service-connected disabilities might be taxed. A tax on disability compensation would strike at the very heart of our Nation's obligation to the men and women who have answered its call to defend freedom and democracy around the world. The tax idea was raised by individuals in the Department of the Treasury who have no real understanding of the nature of veterans' disability compensation.

The idea has absolutely no support in this body, and I am very hopeful that Secretary Baker will see to it that no formal proposal to tax veterans' disability compensation ever becomes part of the President's proposal on tax reform. The sense of the Congress resolution in H.R. 2343 will put every Member clearly on record as being unalterably opposed to any taxation of veterans' disability compensation.

This measure would give a welcome increase to update coverage for Servicemen's Group Life Insurance and Veterans Group Life Insurance. Both programs are financed by policy payments at no cost to the taxpayer, except in wartime.

Full-time service on active duty by certain National Guard members would be active duty for VA purposes, under this measure. Moreover, VA authority to operate a regional office in the Philippines would be extended throughout fiscal year 1988, and the rate of dependency and indemnity compensation which the former Coast Guard Commandant's widow receives would be raised to the same level as is paid to other service Chief's widows.

I congratulate my good friend and colleague, Mr. MONTGOMERY, chairman of the Committee on Veterans' Affairs, on H.R. 2343. I count it a privilege to be the ranking member on the committee which he chairs. Mr. APPLEGATE, chairman of the subcommittee, and Mr. SOLOMON, ranking member of the subcommittee, also deserve congratulations on this measure. Its passage is important to America's veterans. I urge each of my colleagues to vote favorably on it.

Thank you, Mr. Speaker.●

Mr. MONTGOMERY. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BURTON of Indiana. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. GRAY of Illinois). The question is on the motion offered by the gentleman from Mississippi [Mr. MONTGOMERY] that the House suspend the rules and pass the bill, H.R. 2343, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent to revise and extend my remarks, and that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous matter on the bill, H.R. 2343.

Also, Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous matter, on H.R. 2344 and H.R. 1408.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

VETERANS' HOUSING AND MEMORIAL AFFAIRS AMENDMENTS OF 1985

Mr. MONTGOMERY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2344) to amend title 38, United States Code, to make improvements in the National Cemetery System and in the Veterans' Administration program that provides assistance to certain disabled veterans in acquiring specially adapted residences, and to express the sense of Congress with respect to the Veterans' Administration home loan origination fee.

The Clerk read as follows:

H.R. 2344

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Veterans' Housing and Memorial Affairs Amendments of 1985".

SEC. 2. ORDERLY EXPANSION OF THE NATIONAL CEMETERY SYSTEM.

(a) ANNUAL REPORT.—Section 1000 of title 38, United States Code, is amended by adding at the end the following new subsection:

"(c) Not later than July 1 of each year, the Administrator shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report on the construction and expansion of national cemeteries. Each report shall include—

"(1) a five-year plan for the construction and expansion of the National Cemetery System;

"(2) a list, in order of priority, of the 10 geographic areas in the United States in which the need for additional burial space for veterans is greatest;

"(3) an assessment of the desirability and feasibility of acquiring existing State cemeteries in the geographic areas included on the list; and

"(4) general plans (including projected costs, site location, and, if appropriate, necessary land acquisition) for each cemetery or proposed cemetery included in the five-year plan and general plans for the expansion of the National Cemetery System in each geographic area included on the list.".

"(b) SUBMISSION OF FIRST REPORT.—The first report under section 1000(c) of title 38, United States Code, as added by subsection (a), shall be submitted not later than July 1, 1985, or the end of the 30-day period beginning on the date of the enactment of this Act, whichever is later.

SEC. 3. GRAVE MARKERS.

(a) IN GENERAL.—Section 1004(c) of title 38, United States Code, is amended—

(1) by inserting "(1)" after "(c)"; and

(2) by adding at the end the following:

"(2) Each such marker shall be upright, except that, if the person buried (or the survivor or legal representative of the person buried) has requested that the grave be marked with a flat marker, the person shall be buried in a cemetery section set aside for graves marked with flat markers and a flat marker shall be used.".

(b) EFFECTIVE DATE AND TRANSITION RULES.—(1) The amendments made by subsection (a) shall apply with respect to markers for the graves of persons who die after September 30, 1985.

(2) During the period beginning on October 1, 1985, and ending on December 31, 1985, the Administrator of Veterans' Affairs—

(A) may waive the applicability of section 1004(c)(2) of title 38, United States Code, as added by subsection (a), in the case of the grave of a person to be buried during such period in a cemetery in which there is no section set aside for graves with upright markers; and

(B) may deny a request under section 1004(c)(2) of title 38, United States Code, as added by subsection (a), that the grave of a person to be buried in a national cemetery be marked with a flat marker if the denial is for the reason that in the cemetery in which the burial is to take place there is no section set aside for graves with flat markers.

(3) Not later than January 1, 1986, the Administrator of Veterans' Affairs shall designate for each cemetery in the National Cemetery System a section in which graves shall be marked with upright markers and a section in which graves shall be marked with flat markers.

SEC. 4. ESTABLISHMENT OF A NATIONAL CEMETERY.

(a) IN GENERAL.—Subject to the conveyance to the United States of the land described in subsection (b), the Administrator of Veterans' Affairs shall establish a national cemetery in Merced County, California, on that land.

(b) ACCEPTANCE OF LAND.—The Administrator is authorized to accept from the Romero Ranch Company, a California corporation, a tract of land consisting of 350 acres, more or less, located in Merced County, California, if donated to the United States by the Romero Ranch Company for the purposes of the establishment of a national cemetery. The exact acreage and legal description of the land to be conveyed shall be determined by the Administrator and the company.

(c) ADMINISTRATION.—A national cemetery established under this section shall become part of the National Cemetery System and shall be administered under chapter 24 of title 38, United States Code.

SEC. 5. ASSISTANCE TO CERTAIN DISABLED VETERANS IN ACQUIRING HOUSING WITH SPECIAL FEATURES ALREADY IN PLACE.

(a) IN GENERAL.—Section 801(b)(1) of title 38, United States Code, is amended by inserting before the period at the end the following: "or in acquiring a residence already adapted with special features determined by the Administrator to be reasonably necessary for the veteran by reason of the veteran's disability".

(b) AMOUNT OF GRANT.—Section 802(b)(1) of such title is amended by striking out "cost" and inserting in lieu thereof "cost, or, in the case of a veteran acquiring a residence already adapted with special features, the fair market value,".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to residences acquired after September 30, 1985.

SEC. 6. HOME LOAN ORIGINATION FEE.

(a) FINDINGS.—The Congress finds that—

(1) the Veterans' Administration home loan guaranty program, which assists veterans in becoming homeowners, was established in recognition of veterans' service to the Nation;

(2) in establishing that program, Congress had no intention that the program serve as a means to achieve any Federal economic objective;

(3) the program has achieved its purpose of enabling veterans to obtain homes and has done so at the lowest possible cost to Federal taxpayers;

(4) the program is widely used by veterans seeking to buy their first home;

(5) the existing one-percent origination fee for Veterans' Administration home loan guarantees is designed to offset the costs of the program;

(6) the fivefold increase in the Veterans' Administration home loan origination fee proposed in the President's budget for fiscal year 1986 would, if enacted, have a serious detrimental effect on the ability of veterans to obtain loans for housing and would discourage homeownership; and

(7) this proposed increase in the origination fee is actually a disguised tax on home buying veterans.

(b) SENSE OF CONGRESS.—It is, therefore, the sense of the Congress that—

(1) the Veterans' Administration loan origination fee should remain at its present level of one percent of the amount of the loan guaranteed; and

(2) the President should review the level of funding necessary to support the Veterans' Administration home loan guaranty program and, if additional funding for the program is required, should submit an amended budget request recommending additional appropriations for the program.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Mississippi [Mr. MONTGOMERY] will be recognized for 20 minutes and the gentleman from New Jersey [Mr. SMITH] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Mississippi [Mr. MONTGOMERY].

Mr. MONTGOMERY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 2344 would, among other things:

First, provide for the orderly expansion of the National Cemetery System;

Second, require that upright gravemarkers be placed in national cemeteries unless the family requests a flat marker;

Third, establish a new national cemetery to be located in Merced County in northern California, the 350 acres will be donated to the Veterans' Administration; and

Fourth, express the sense of the Congress that the 1 percent loan fee paid by veterans for a VA home loan should not be increased to 5 percent as proposed by the administration.

Mr. Speaker, I want to thank the distinguished gentleman from Alabama, the very able chairman of our subcommittee on Housing and Memorial Affairs, Mr. SHELBY, for his outstanding leadership in bringing this measure to the floor today.

Mr. Speaker, I want to thank the distinguished gentleman from New Jersey, the ranking minority member of the subcommittee, Mr. SMITH, for the cooperation he has displayed and the work he has done on this bill.

I also want to compliment the very able ranking minority member of the full committee, the gentleman from Arkansas, Mr. HAMMERSCHMIDT, for his usual cooperation and hard work.

Mr. Speaker, this is a good bill. It is not costly. According to the Congressional Budget Office the cost of the bill, if fully implemented, would be $3 million in 1986, $4 million in 1987, and $4 million in 1988.

I urge the adoption of the bill.

Mr. Speaker, it is now a pleasure for me to yield as much time as he would like to use to the distinguished gentleman from Alabama [Mr. SHELBY].

Mr. SHELBY. Mr. Speaker, the committee bill, H.R. 2344, is a modestly priced measure which makes necessary and vital improvements to the national cemetery system and enhances the Veterans' Administration specially adapted housing program.

First, it would expand the national cemetery system on an orderly basis. It requires the Veterans' Administration to submit on July 1, 1985, and yearly thereafter, a 5-year plan for the construction and expansion of the national cemetery system; a list, in order of priority, of the 10 geographic areas in the United States in which the need for additional burial space for veterans is greatest; and general plans and projected costs for each cemetery or proposed cemetery.

Mr. Speaker Public Law 93-43, which established the national cemetery system within the Veterans' Administration, offered virtually no direction regarding the structure of the national cemetery system but rather allowed for determination of the system structure at a later time, based on the recommendations of a 1974 VA study; and subsequently, the regional cemetery concept comprised of 10 standard Federal regions was adopted as an interim method of system expansion.

Since 1973, under the regional cemetery concept, the VA has designated eight new national cemetery sites. Six of these, Calverton, Long Island, New York; Riverside, CA: Bourne, MA; Fort Custer, MI; Indiantown Gap, PA; and Quantico, VA are open for burials. The other two, Fort Mitchell, AL, and Withlacoochee, FL, are expected to open between 1986 and 1987. In fiscal year 1981, the two-acre Fort Meade, SD, cemetery was transferred to the system.

At the end of fiscal year 1984, the system consisted of 109 operating cemeteries on approximately 9,000 acres of land. The 32 miscellaneous burial plots and monuments constitute about 20 acres.

Of the 109 operative national cemeteries, 51 are in closed status. Although the remaining 58 have ample gravesite resources, they are not appropriately located or distributed to effectively meet veterans' present or future burial needs. This is largely due to the evolutionary development of the system over more than 100 years. As many cemeteries were established immediately after the Civil War and some time thereafter, their size, scope, and location have no relationship to the needs of today's veteran population.

Interments in national cemeteries have generally increased each year since establishment; and during the next 15 years, as the peak period of demand approached, veteran deaths in the Nation will continue to increase annually, while unoccupied gravesites in the national cemetery system will be greatly reduced and scattered in location. The projected peak period is estimated at between the years 2000 and 2015, at which time the age 65 and over veteran group will increase from its present level of about 4 million to about 9 million individuals.

Although regional cemeteries were considered at the time to be the best method of expansion to meet immediate needs, in retrospect they did not provide for meeting the known needs of the veteran population as a whole. Standard Federal regions are comprised of a number of States. Standard Federal region No. 10, for example, consists of 815,945 square miles.

Mr. Speaker, regional cemeteries do not provide adequate service to an entire standard Federal region. Statistics indicate that veterans and their dependents prefer to be buried within a 50-mile radius from their homes.

Presently, about 9.5 million veterans or about 34 percent of the estimated 28 million living veterans reside within 50 miles of an open national cemetery. This means that 66 percent or 18.5 million veterans remain unserved by an open national cemetery.

Proposals have been received by the committee to establish a national cemetery in every State. In light of the present budgetary atmosphere and in the interest of good management, the committee does not believe this to be the best route for expansion. Rather, future expansion should provide for maximum usage. The committee therefore believes that the most equitable method for expansion is at selected locations with concentrated veteran populations. As an example, 1.2 million veterans reside in northern California. A national cemetery in that area would obviously be well utilized.

Mr. Speaker, the bill also contains a provision to require the Administrator to assess the desirability and feasibility of acquiring existing State veterans' cemeteries in the geographic areas included in the VA's yearly report. One of the 10 areas in the country identified with a heavy veteran population is Phoenix, AZ, where a State veterans' cemetery has been in existence since 1978. It is the most utilized State veterans' cemetery in the country. The committee has been advised that Arizona has the highest percentage of senior citizens moving into a State. Under the bill, the VA could determine whether or not it would be in the best interests of the Federal Government to establish and operate a national cemetery in Phoenix.

The committee believes that this provision of the reported bill requiring a 10-area breakdown of heavy veteran migration centers provides for an extremely efficient method of cemetery expansion. It follows proven management practices used in private industry known as the "establishment by need" concept where outlets for goods and services are established for optimum access by users.

Second, the bill would require that new grave markers in national cemeteries be upright except in specific instances where flat markers are requested by either the veteran or the survivors of the veteran.

In 1976, based upon a recommendation from the Advisory Committee on Memorial Affairs, the Veterans' Administration adopted a policy to install flat markers in regional cemeteries. On March 1, 1982, DMA circular 40-82-01 expanded this policy to include existing national cemeteries. Currently, 70 percent of all markers being placed in national cemeteries are flat.

One of the reasons the committee believes that the Veterans' Administration should revert to upright grave markers is because of the difficulty encountered by family members in locating flat grave markers in the snowbelt areas. Flat markers are not visible for long periods of time in areas subject to heavy snowfalls.

Additionally, flat markers constitute a parklike atmosphere rather than the traditional symbolic soldiers' formation represented by upright markers. As national cemeteries commemorate the sacrifices of those who served, instituting an upright headstone policy will serve to enhance the dignity and beauty traditionally associated with our national cemeteries.

Mr. Speaker, it is not the committee's intention to restrict a veteran or his family to a particular type of grave marker. Provision, therefore, has been made to accord a choice by designating certain portions of national cemeteries for use of flat markers so that the families who prefer flat markers will have the right to select one. This provision passed the House last year, but was not acted upon by the Senate. Hopefully, we can move it all the way through this year.

In order to maintain conformity in our national cemeteries, the Administrator has been given 90 days after the effective date of this provision (October 1, 1985) in which to designate separate sections for flat and upright markers. During this period of time, the Administrator shall have discretionary authority to deny placement of either an upright or flat gravemarker if such denial is for the reason that in the cemetery in which the burial is to take place there is no section set aside for the specific type of gravemarker requested.

Third, the bill would establish a cemetery in Merced County, CA. The Veterans' Administration has identified northern California as the area in the country most in need of a national cemetery as 1.2 million of California's veterans reside in the northern part of the State. There has been too much delay in establishing a cemetery in this heavily populated area and this bill would authorize the Administrator to accept 350 acres of land which is available at no cost to the Government.

Nationally, California ranks first in veteran population with almost 3 million veterans. This represents 10.6 percent of total veteran population. In order of magnitude, northern California has been identified as the area of the country most in need of a national cemetery because 1.2 million of California's total veterans population live in the northern part of the State. The closest national cemetery open for full-casket burials is at Riverside, CA, which is more than 400 miles south of the major population centers of San Francisco and Sacramento.

Under longstanding policy, the Veterans' Administration will consider land only if it is available through donation or through transfer from excess Federal property, and if it meets the criteria for cemetery purposes. Another critical factor is proximity to centers of veteran population. This policy was reiterated at a March 14, 1985, hearing before the Subcommittee on Housing and Memorial Affairs.

Since 1983, the Veterans' Administration has conducted numerous site inspections in northern California, including Beale Air Force Base, Dixon U.S. Naval Transmitter Facility, Hamilton Reserve Air Force Base, Alameda U.S. Naval Air Station, Oak Knoll U.S. Naval Hospital, Camp Parks, Moffett Naval Air Station, Stockton U.S. Naval Communication Station, and the U.S. Naval Ammunition Storage Facility in Concord. The Veterans' Administration also contacted the county of Alameda to see if they could acquire 400 acres near the Camp Parks site which had previously been donated to the county by the Department of the Army. The county land was not available.

In 1984, the Agency advised us that it had narrowed its consideration to two sites—a 150-acre tract of land at the Camp Parks reserve forces training area in Dublin, and a 350- to 400-acre parcel privately owned in Merced County near the San Luis Reservoir which is available at no cost to the Government.

The Veterans' Administration stated that Camp Parks, which is located in the San Frnacisco Bay area, was their primary choice since 36.8 percent of the northern California veteran population resided within a 50- to 100-mile radius of the Camp Parks site.

The committee, however, is aware of several problems associated with this site.

First, many segments of the community are opposed to the establishment of a national cemetery on the Camp Parks location.

Second, the land has not yet been declared surplus. Even if excessed to the Department of Defense's needs, it is not certain the land would go to the Veterans' Administration since others are interested in acquiring the property.

Third, 150 acres is not adequate to establish a regional cemetery of the magnitude needed in northern California.

Fourth, current Federal property management regulations require Federal agencies to pay the General Services Administration the fair market value of excessed Government property. According to recent estimates, the 150-acre tract of land at Camp Parks is valued between $20–$35 million.

Mr. Speaker, there is a critical need to establish a cemetery in northern California. Although the Veterans' Administration states that the Los Banos site is not as convenient to the downtown San Francisco area as the Camp Parks site, the committee recommends that the Administrator move to establish a national cemetery in Merced County. There has been too much delay in establishing a cemetery in this most populous region in our country. The committee believes the Veterans' Administration must move with an alternate site. There are no assurances that the problems facing the Camp Parks site will be resolved in a timely manner, and this alternate site with substantially larger acreage is available immediately at no cost to the Government.

At a time when the administration and the Congress is considering reductions in veterans' health care, freezing cost-of-living increases in veterans' benefits and increasing loan origination fees to raise revenues, the committee adamantly opposes the Veterans' Administration paying for land which the Department of Defense declares excess to its needs.

The Merced County site was recommended by the Veterans' Administration as the second best location, and there are some who would suggest it is superior, although there is currently a smaller veteran population in the immediate Los Banos area. It is the committee's understanding, however, that the population centers are expanding southward. The center for continuing study of the California economy in Palo Alto, CA, has determined that, among large cities in California, San Jose, which is located approximately 89 miles away from Los Banos, ranks third in total population growth since 1980. Additionally, this site is convenient to Fresno and Modesto, which were ranked fourth and eighth in terms of population growth since 1980.

The legislature of the State of California adopted a resolution in behalf of the Los Banos site. In addition, the California Department of Veterans Council has endorsed this selection.

The fiscal year 1986 budget allocates $6 million for land acquisition costs for the establishment of a national cemetery in northern California. The committee recommended in its budget report to the Budget Committee on March 15, 1985, that these funds be used in conjunction with the development of land and other such planning costs as may be necessary for the establishment of such cemetery in Merced County.

Fourth, this bill would authorize service-connected disabled veterans entitled to the $6,000 specially adapted housing grant to acquire a suitable housing unit with specially adapted modifications already in place and to be reimbursed for the fair market value of such adaptions.

Mr. Speaker, the purpose of the specially adapted housing grants is to assist certain veterans whose service-connected disabilities are such as to require specially adapted housing facilities.

Under current law, there are two types of specially adapted housing grants payable by the Veterans' Administration—one up to $35,500 for veterans who are essentially so disabled by their service-connected disabilities that they are precluded from locomotion without resort to a wheelchair, and one up to $6,000 for veterans who are not as severely disabled but also require special modifications to their homes. Unlike service-connected veterans who are eligible for the larger grant, however, this other category of deserving service-connected disabled veterans cannot use it to acquire a suitable home which already has the necessary modifications. This bill corrects the discrepancy between the two programs and treats them equally.

Mr. Speaker, the last item in this bill is a provision expressing the sense of the resolution that the 1-percent VA home loan origination fee not be increased.

The fiscal year 1986 budget proposes to increase the VA home loan origination fee from 1 to 5 percent of the mortgage principal.

Mr. Speaker, the implementation of a 5-percent-user fee would result in veterans being charged an average amount of $3,000 for the privilege of using the program. This would negate the beneficial aspects of the no-down-payment feature of the program and could effectively destroy it. In essence, this could be considered as a downpayment requirement without giving the veteran the benefit of reducing the principal on his mortgage—in other words a selective tax burden on home buying veterans. If the increased origination fee was added to the mortgage principal and financed, the Congressional Budget Office estimates that there would be a subsequent increase in the VA home loan foreclosure rate. This would result not only because of increased monthly mortgage payments, but because of the longer length of time necessary to build up property equity. Initially, the Veterans' Administration would be guaranteeing a loan for a larger amount than the property value.

The committee is very concerned about this proposed change. The VA Administrator, himself, characterizes his endorsement as "reluctant" and urges caution. Other VA officials have stated that a 5-percent fee could reduce loan originations by as much as 50 percent. Additionally, the Congressional Budget Office projected that outlays in 1990 could actually be higher than under the existing program were this fee to be imposed.

At a March 5, 1985, hearing before the Subcommittee on Housing and Memorial Affairs, the National Association of Realtors calculated that the proposed reduction in loan originations as a result of the fee increase would create a larger dollar loss upon the gross national product than the projected revenue gains. Additionally, the president of the Mortgage Bankers Association stated that his bank would no longer offer VA guaranteed home loans were the administration proposal to be enacted.

Accordingly, the committee recommended to the House Budget Committee on March 15, 1985, that the VA Home Loan Guaranty Program remain at ongoing levels and that the 1-percent user fee be retained.

Mr. Speaker, the Congressional Budget Office states that the revenue is not needed to maintain the solvency of the loan guaranty revolving fund. Additionally, the committee is of the firm opinion that the imposition of a larger fee would only serve to raise general revenues at the expense of our homebuying veterans—in particular, Vietnam era veterans who account for 43.6 percent of all VA guaranteed home loans. It should also be emphasized that this discriminatory tax would eliminate a substantial number of potential veteran homebuyers from participating in the VA Home Loan Guaranty Program. According to the Congressional Budget Office, a phased-in rate of 3.8 percent by 1990 could result in 141,250 fewer veterans from using their VA entitlement to purchase a home over that period of time.

This sense of the Congress resolution reaffirms the committee's strong opposition to the administration's proposal.

Mr. Speaker, this is not an expensive bill, but it is important. The Congressional Budget Office has estimated its first year cost at $3 million. I urge that its provisions be adopted.

I would like to extend my thanks to the chairman of the full committee, the Honorable G.V. (SONNY) MONTGOMERY of Mississippi for his leadership in moving so quickly on this legislation. I also wish to express my appreciation to the ranking minority member of the subcommitte, the most

capable Member from New Jersey, Mr. CHRIS SMITH, and to convey my gratitude to the distinguished gentleman from Arkansas, the ranking minority member of the full committee, Mr. JOHN PAUL HAMMERSCHMIDT.

There follows a brief history of VA guaranteed home loan origination fees:

In 1966, Congress approved the Veterans' Readjustment Benefits Act of 1966, better known as the cold war GI bill. This act, among other things, made servicemen and post-Korean veterans, persons who had served in active duty in the Armed Forces after January 31, 1955, eligible for VA guaranteed home and farm loans and direct loans. Although the loan benefits for post-Korean veterans and servicemen were similar in type to those available for World War II, and Korean veterans, there was one noticeable difference. Unlike the loans available to World War II and Korean veterans, the post-Korean loan program was subject to a one-time funding fee in the sum of one-half of 1 percent of the loan. In other words, the funding fee requirement was imposed by Public Law 89-358, in the interests of distinguishing between the "hot war" veterans of World War II and the Korean conflict and the "cold war" veterans of service after January 31, 1955.

The elimination of charging a funding fee to post-Korean veterans through the enactment of Public Law 91-506 on October 23, 1970, was a change rendered inevitable by events in Southeast Asia since 1965.

The President's fiscal year 1983 budget contained a proposal to reinstate the one-half percent loan processing fee for all loans guaranteed, insured or made by the VA. However, instead of the revenues being deposited into the loan guaranty revolving fund as had been done previously, the fees would be deposited in the Treasury as miscellaneous receipts and credited as general offsets to the Veterans' Administration.

The committee did not oppose the proposed legislation. However, it felt that three amendments were necessary:

First, deposit the fees into the VA loan guaranty revolving fund to insure its solvency since guarantees are paid from it in the event of foreclosures; and

Second, exempt service-connected disabled veterans from payment.

Third, the fee not be made permanent.

The committee has always believed that service-connected disabled veterans must receive priority and preferential treatment in view of disabilities incurred in service to their nation. Additionally, the committee suggested adding the fee to the loan principal to alleviate the one-time cost to the veteran.

Public Law 97-253 which became effective October 1, 1982, did exempt service-connected disabled veterans from paying the fee and permitted veterans to add the fee to their mortgage principal if they so desired. The measure also contained a sunset provision. The revenues generated by this fee, however, were deposited to the Treasury. Although overall VA outlays were credited by these offsets, the loan guaranty revolving fund did not benefit and its funding problems were not alleviated.

The VA loan origination fee was increased to 1 percent by the enactment of the Deficit Reduction Act of 1984, Public Law 98-369. This law continued to exempt service-connected disabled veterans with a 10 percent or more disability; required that these funds be deposited in the loan guaranty revolving fund, and contained certain administrative reforms in the VA loan guaranty program. The Congressional Budget Office has projected that these implemented changes will help to assure the future solvency of the VA loan guaranty revolving fund.

□ 1250

Mr. SMITH of New Jersey. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as both a sponsor of H.R. 2344 and as ranking member of the Veterans' Affairs Subcommittee on Housing and Memorial Affairs, I rise to ask my colleagues to pass this important legislation today.

I am very pleased to report to the House this afternoon that one of the major provisions of H.R. 2344 corrects an inequity in current law regarding specially adapted housing. Under current law, veterans eligible for specially adapted housing under section 801(b) of title 38 may not use their $6,000 grant to acquire housing which already has the necessary special features. It may only be used to make necessary adaptations to a home. Section 5 would provide for the payment of fair market value of adaptations to certain disabled veterans acquiring houses with special features already in place. I would like to especially thank the Blinded Veterans of America for their role in assisting the committee in our efforts to correct this problem.

H.R. 2344 also expresses the sense of Congress that the user's fee for the VA's Home Loan Guarantee Program should not be increased above the current 1 percent rate. Mr. Speaker, an increase of the user's fee above its current rate may portend the demise of a program which has benefited over 11 million veterans by enabling them to buy a home. Our Nation's real estate and residential construction industries have also benefited enormously from this program which has infused over $230 billion into our economy.

Over the course of this program, it has consistently been the intent of Congress to provide veterans assistance in acquiring and retaining homes, in part as payment for services rendered to a grateful nation. Consequently, Mr. Speaker, any proposed changes in the delivery of these promised benefits must be scrutinized most carefully.

The Subcommittee on Housing and Memorial Affairs held extensive hearings on this topic and on the Home Loan Program in general. After receiving testimony from veterans organizations, realtors and mortgage bankers, among others, we determined that a fivefold increase in the user's fee would effectively kill the program. A result that is totally unacceptable.

The Veterans' and Housing Memorial Affairs Amendments of 1985—H.R. 2344—also requires the Veterans' Administration to submit an annual 5-year plan for the construction and expansion of the national cemetery system. Mr. Speaker, this provision will greatly enhance the ability of Congress and other interested parties to understand and act appropriately to meet the memorial needs of veterans and their dependents.

The regional concept of national cemetery expansion enacted in 1973 has proven to be too restrictive and not realistically attuned to the long-range needs of the veterans population. The concept of building one national cemetery in each of 10 standard Federal regions had led to some cemeteries being greatly underutilized, while others cannot begin to meet the demand in the region.

The size, scope and location of many of our national cemeteries have no relationship to the needs of today's veterans population. H.R. 2344, by requiring that future expansion be based on maximum usage will eliminate this problem.

H.R. 2344 also requires the placement of upright markers in national cemeteries. Veterans will be allowed a choice between flat and upright markers by designating certain portions of national cemeteries for the use of flat markers. This measure reiterates action taken by the House last year, but which was not enacted by the Senate.

The bill also requires the VA to establish a national cemetery in Merced County, CA, an area of critical need located in northern California.

H.R. 2344 was reported unanimously be the committee under the very capable leadership of Mr. MONTGOMERY, the distinguished chairman of the Veterans' Affairs Committee, and of Mr. HAMMERSCHMIDT, the committee's distinguished ranking minority member. I would also like to take this time to

compliment my good friend, Mr. SHELBY, the chairman of the Subcommittee on Housing and Memorial Affairs for his excellent work on this measure as well.

I recommend this measure strongly to my colleagues as one which is clearly in the best interest of not only our veterans, but also the Nation as a whole.

Mr. Speaker, I yield back the balance of my time.

Mr. MONTGOMERY. Mr. Speaker, let me just comment again that the gentleman from New Jersey [Mr. SMITH] has pointed out just a few minutes ago, as well as the gentleman from Alabama [Mr. SHELBY], that this loan fee increase on home loans that has been recommended, the GI Home Loan Program, the full committee is strongly opposed to any increase in user fees on veterans' loans.

Mr. Speaker, this is a good bill. As pointed out by Chairman SHELBY, it is not a big cost item and we certainly hope this bill will be adopted by the full House.

● Mr. COELHO. Mr. Speaker, I want to begin by commending the distinguished chairman of the full committee, the gentleman from Mississippi, for the outstanding job he has done in handling this legislation and bringing it to the floor. I would also like to commend the distinguished chairman of the Subcommittee on Housing and Memorial Affairs, Mr. SHELBY, for all of his work on this legislation.

I rise in support of H.R. 2344, the Veterans' Housing and Memorial Affairs Amendments of 1985. The bill: First, provides for the orderly expansion of the national cemetery system; second, requires the placement of upright grave markers in national cemeteries; third, requires the Administrator to establish a national cemetery in Merced County, CA, which is in my district; fourth, authorizes certain service-disabled veterans to acquire a housing unit with specially adapted modifications already in place and to be reimbursed for the fair market value of such adaptions; and fifth, expresses the sense of Congress that the 1-percent VA home loan origination fee not be increased.

I have been particularly interested in the provision for the establishment of a national cemetery in Merced County, CA, as the land, some 350–400 acres, is being donated to the VA by a private land owner in my district, the Romero Ranch Co.

Today it is generally acknowledged that there is a critical need for a national cemetery in northern California which is home for about half of the State's large and growing veteran population. Today, California has 3 million veterans, the largest of any State in the Union. Only one national cemetery in California, located near Los Angeles at Riverside, is still open for full-casket burials. San Francisco, the major population center of northern California, is some 400 miles from Riverside, and 500 miles from Willamette, near Portland, OR, the next closest national cemetery.

In early 1982 the VA sought to identify county-owned tracts of land within a 50-mile radius of Livermore, CA, which would be suitable for a national cemetery and could be made available at no cost to the Government. No offers were forthcoming. Nor was the VA able to locate suitable Federal land excess to the Government's needs.

I am pleased that because of the generous offer of the Romero Ranch Co., 300–400 acres of land in Santa Nella, CA, will be made available to the VA and I am hopeful that work on the cemetery can begin without further delay. The site is about 85 miles southeast of San Francisco and 45 miles southeast of San Jose. It is situated in an area of low-density development, adjacent to land dedicated to wildlife preservation and agricultural use. Indeed, in the words of the VA's cemetery experts, who surveyed the site back in 1983, it is "an ideal setting of privacy, dignity and serenity for a national cemetery."

Those who have seen the site are deeply impressed with its incomparable beauty and I predict that once the cemetery is built it will rival the National Memorial Cemetery of the Pacific, the famous "punch bowl" in Hawaii as the place of beauty and quiet repose for our veterans.

I urge the adoption of this legislation.

In closing, I would like to thank the staff of the committee and subcommittee, and in particular Mack Fleming and Gloria Royce, for all of their hard work and the help and guidance they have given my staff.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, I rise in support of H.R. 2344 and urge its passage by my colleagues in the House. The bill has the unanimous approval of the House Veterans' Affairs Committee.

Mr. Speaker, this bill has five major provisions. It calls for the Veterans' Administration to submit a 5-year plan to the Congress concerning possible modest expansion of the national cemetery system. It calls for placement of upright markers in national cemeteries if that be the wish of veterans or the next of kin. It provides for a critically needed new VA cemetery in northern California. It corrects an inequity in current law affecting some seriously disabled service-connected veterans who are acquiring specially adapted housing and, finally, Mr. Speaker, it contains a sense of the Congress resolution in opposition to a proposal to dramatically increase origination fees on GI home loans.

Mr. Speaker, this latter provision of H.R. 2344 deserves additional comment. In the view of our committee, the proposed large increase in fees is counterproductive. It will cause some veterans to not qualify for GI loans. It will not provide any equity to the home buyer, and it would undoubtedly cause a substantial reduction in the number of GI loans.

Mr. Speaker, this proposal has aroused the veteran community and properly so. I trust our action expressing the sense of the Congress against it will be helpful in putting it to rest.

Mr. Speaker, the chairman of the House Veterans' Affairs Committee, the gentleman from Mississippi, SONNY MONTGOMERY, is to be congratulated for moving this bill forward. The chairman of the Subcommittee on Housing and Memorial Affairs, Mr. SHELBY of Alabama, and the ranking member, the gentleman from New Jersey, Mr. SMITH, are also to be congratulated.

Mr. Speaker, this is a good bill, which, in my opinion, deserves wholehearted support in the House.

Thank you, Mr. Speaker.●

● Mr. SHUMWAY. Mr. Speaker, I firmly support the provision of H.R. 2344 which directs the Veterans' Administration to establish a national cemetery in Merced County, CA. California now has a veterans population of 3 million, the largest of any State in the Nation, and yet only one national cemetery in the State located near Los Angeles, has available grave space. Clearly, a new national cemetery is critically needed to serve the veterans of the northern part of the State. I know that the Veterans' Administration has recognized this need and I commend the agency on its attempts to locate a site near the largest population centers of northern California. Unfortunately, there have been numerous setbacks and delays in this process and I believe that the legislation before us will enable California to move ahead in the expeditious development of a national cemetery.

While the Merced County site established by H.R. 2344 is further south than the VA and many of us had desired ideally, it possesses many positive qualities and advantages. Its considerable size, 350 acres, will allow it to serve a great number of veterans over a long period of time. Furthermore, the fact that the land is being donated will allow the Veterans' Administration to apply its funds directly to development of the cemetery, rather than the purchase of land, thereby hastening its completion and availability to our veterans.

Mr. Speaker, I am pleased to support this effort to address the vital needs and interests of California's large and growing veteran's population. The establishment of a new national ceme-

tery will allow us to honor our veterans as they deserve.●

Mr. MONTGOMERY. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi [Mr. MONTGOMERY] that the House suspend the rules and pass the bill, H.R. 2344.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

VETERANS' EMPLOYMENT AMENDMENTS OF 1985

Mr. MONTGOMERY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1408) to amend the Emergency Veterans' Job Training Act of 1983 and title 38, United States Code, with respect to certain veterans' employment programs, as amended.

The Clerk read as follows:

H.R. 1408

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Veterans' Employment Amendments of 1985".

SEC. 2. EXTENSION OF EMERGENCY VETERANS' JOB TRAINING ACT.

(a) EXTENSION.—Section 17 of the Emergency Veterans' Job Training Act of 1983 (Public Law 98-77; 29 U.S.C. 1721 note) is amended by striking out "February 28, 1985" and "September 1, 1985" and inserting in lieu thereof "December 31, 1985" and "July 1, 1986", respectively.

(b) ELIGIBILITY.—Section 5(a)(1)(B) of such Act is amended by striking out "fifteen of the twenty" and inserting in lieu thereof "5 of the 20".

(c) AUTHORIZATION OF APPROPRIATIONS.—Section 16 of such Act is amended by inserting "and $75,000,000 for fiscal year 1986" in the first sentence after "and 1985".

SEC. 3. VETERANS READJUSTMENT APPOINTMENTS.

(a) IN GENERAL.—Section 2014(b)(1) of title 38, United States Code, is amended—

(1) by striking out "GS-9" in clause (A) and inserting in lieu thereof "GS-11";

(2) by striking out "who is" in clause (C) and all that follows in that clause through "line of duty".

(3) by striking out "and" at the end of clause (C);

(4) by redesignating clause (D) as clause (E); and

(5) by inserting after clause (C) the following new clause:

"(D) a veteran of the Vietnam era who has more than 14 years of education and who is entitled to disability compensation under the laws administered by the Veterans' Administration or whose discharge or release from active duty was for a disability incurred or aggravated in line of duty shall be given a preference for such an appointment over other veterans of the Vietnam era who have more than 14 years of education; and".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to appointments made after September 30, 1985.

The SPEAKER pro tempore. Is a second demanded?

Mr. MCEWEN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi [Mr. MONTGOMERY] will be recognized for 20 minutes and the gentleman from Ohio [Mr. MCEWEN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Mississippi [Mr. MONTGOMERY].

Mr. MONTGOMERY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the reported bill, H.R. 1408, as amended, would extend for 1 year the Emergency Veterans' Job Training Program we enacted in 1983. This program has placed about 30,000 Vietnam and disabled veterans in jobs during the past 18 to 20 months, and has been one of the better jobs programs enacted by the Congress.

The bill would also make certain amendments with respect to the Veterans Readjustment Appointment Program that has successfully placed thousands of Vietnam veterans in Federal employment.

These two programs are working, Mr. Speaker, and they are cost effective.

I want to commend the distinguished gentleman from South Dakota, the very able new chairman of our Subcommittee on Education, Training and Employment [Mr. DASCHLE] for the leadership he has provided, not only in bringing this bill to the floor, but for his leadership as a member of the committee for a number of years in doing everything he can to enhance the lives of our Vietnam and disabled veterans.

Mr. DASCHLE is a Vietnam era veteran and has served as chairman of the Vietnam veterans' caucus in the Congress.

I congratulate the gentleman for his work.

Mr. Speaker, in closing I want to thank the very able ranking minority member of the subcommittee, the distinguished gentleman from Ohio [Mr. MCEWEN] for the work he has done on this bill and for the cooperation he has given to the subcommittee chairman.

Finally, I want to thank the ranking minority member of the full committee, the very able and distinguished gentleman from Arkansas, for the leadership and cooperation he has provided in getting the measure to the floor.

I also want to acknowledge the work of the two chief sponsors of the Emergency Veterans' Job Training Act, the gentleman from Texas [Mr. LEATH] and the gentleman from New York [Mr. SOLOMON].

The gentleman from Texas has taken a leave of absence from the committee to serve on the Budget Committee and the gentleman from New York is now the ranking minority member of our Subcommittee on Compensation, Pension and Insurance. Both have been instrumental in helping employ veterans and I congratulate them for their good work.

Mr. Speaker, this is a good bill and I urge its adoption.

Mr. Speaker, I yield such time as he may consume to the gentleman from South Dakota [Mr. DASCHLE].

□ 1300

Mr. DASCHLE. Mr. Speaker, I thank the chairman for yielding and for his kind words.

Mr. Speaker, I strongly recommend that the House today approve the legislation we are considering today, H.R. 1408, the Veterans' Employment Amendments of 1985. This legislation amends the Emergency Veterans' Job Training Act of 1983 and title 38, United States Code, with respect to the Veterans Readjustment Appointment [VRA] authority.

Public Law 98-77, the Emergency Veterans' Job Training Act of 1983 [EVJTA], was signed into law on August 15, 1983, establishing a program of job training assistance for certain unemployed Korean conflict and Vietnam era veterans. This program was established in response to the employment difficulties being experienced by large numbers of Vietnam era and Korean conflict veterans. The severe recession and fundamental structural changes in the American economy exacerbated preexisting employment problems and contributed to the highest unemployment rate ever recorded for veterans.

This innovative program is the first truly meaningful employment assistance program for those veterans of Vietnam and Korea who have been out of work for an extended period of time. The initial months of EVJTA were disappointing with a start-up time that was longer than expected. This program has now, however, achieved wide employer acceptance and is viewed by veterans as an effective program that can help them find permanent, stable employment.

Statistics released by the Veterans Administration on April 30, 1985, indicate that nearly 30,000 veterans have been placed in meaningful jobs, thus assisting them in their efforts to get off the unemployment rolls and into productive employment. Over 320,000 veterans have been certified and recertified for participation in the program established by EVJTA, 46,500 employers have been certified to participate,

and over 110,000 job slots have been approved. Additionally, of the $140 million made available for the program in 1983, $114 million has been committed.

Although approximately $25 million remains available for use under EVJTA, thousands of job slots are approved and available, and over 415,000 Vietnam-era veterans are still unemployed, this program unfortunately expired for new participants on February 28, 1985. Additionally, under current law veteran participants must be enrolled in a job training program by September 1, 1985. H.R. 1408 would extend the date by which a veteran must apply to participate in EVJTA from February 28, 1985, to December 31, 1985. The bill would also extend the September 1, 1985, deadline to July 1, 1986.

The Bureau of Labor Statistics indicates that in April 1985, Vietnam era veterans were unemployed at rates higher than those for their nonveteran peers. For those veterans between the ages of 30 and 39, the unemployment rate was 7 percent. Those in the same age group who did not serve in the military were unemployed at the much lower rate of 5.6 percent. This disparity in the unemployment rate between veterans and nonveterans is particularly alarming. This high Vietnam veteran unemployment rate during a time of relative economic prosperity dramatically reaffirms the need to extend the effective, cost-efficient Emergency Veterans' Job Training Act.

For the 415,000 Vietnam-era veterans unemployed in April 1985, there are no other effective employment programs available. It is important to note that there has never been a coherent, consistent Federal policy to guide the development of programs which would train and employ Vietnam-era veterans in stable, career-oriented jobs. Since 1969, many training programs have come and gone. Too often veterans merely rode on the "coat tails" of other targeted groups, competing for the same jobs and training opportunities. Even title IV, part C, of the Job Training Partnership Act, which authorizes the Secretary of Labor, through the Assistant Secretary for Veterans' Employment and Training, to conduct programs to meet the employment and training needs of certain veterans, can have only a minimal impact on veteran unemployment. Based on a designated formula, the current level of funding for the veteran program is $9.7 million, clearly an inadequate amount given the extent of the unemployment problem among certain veterans.

The unemployment trends over the past 15 years indicate that many Vietnam veterans have not found their permanent place in the national labor market and that unemployment problems for Vietnam veterans are structural, not cyclical; that is, many Vietnam veterans do not have job skills that meet the needs of the labor market. A short-term program, therefore, is unlikely to have a lasting impact on their unemployment situation. EVJTA addresses the underlying structural problem responsible for the dramatic rises in unemployment among Vietnam veterans and should be extended in order to assist as many veterans as possible.

The need for EVJTA is clear, and the extension of the program provided in H.R. 1408 is justified based simply on that evident need and the effectiveness of the program as a means of meeting that need. In addition, however, EVJTA is cost-effective, a tremendously important factor during this time of budget consciousness. Veterans employed under EVJTA immediately become taxpayers, not tax users, thus benefiting the taxpayers of the United States. In testimony before the Subcommittee on Education, Training, and Employment, witnesses pointed out that a veteran entering a $16,000 per year job will pay at least $1,600 in Federal taxes during the first year. Since the cost of the program for that veteran will be approximately $4,000, about 40 percent of the cost of training is returned to the Federal Treasury during the first year of employment alone. This offset does not include other considerations such as unemployment insurance, AFDC, food stamps, and other costs in taxpayer dollars which are obviated by the veterans' employment.

I would also like to stress that when EVJTA was enacted in 1983, the authorization was for $300 million. Only $150 million of that amount has been appropriated, thus the $75 million authorization provided in H.R. 1408 is still far below the original authorization for EVJTA. The program established by the Emergency Veterans' Job Training Act is a badly needed and cost-effective program. It deserves to be extended and adequately funded.

The Veterans Readjustment Appointment [VRA] Program provides a means by which eligible Vietnam-era veterans may be appointed noncompetitively to a Federal civilian job which leads to competitive status and career or career-conditional tenure upon satisfactory completion of 2 years of service and education or training. The VRA program was established by Executive Order 11521 in March 1970 to help in the readjustment of thousands of veterans returning from Southeast Asia.

Since that time, as shown by Veterans' Administration statistics, 80 percent of Vietnam-era veterans have utilized at least a portion of their GI bill educational assistance benefits. Accordingly, H.R. 1408 would eliminate the current educational restriction which prohibits a nondisabled veteran of the Vietnam-era from qualifying as a VRA appointee if he or she has over 14 years of education. To deny these veterans employment because they elected to enhance their education defeats the main purpose of the VRA program which is to provide long-term employment opportunities to Vietnam-era veterans.

We on the Veterans' Affairs Committee firmly believe that this Nation's first commitment must be to those who were disabled while serving in our armed services. The committee recognizes that under current law service-connected disabled veterans have a certain advantage because they are not subject to the 14 year education restriction. Accordingly, H.R. 1408 would provide that a service-connected disabled veteran of the Vietnam era who has more than 14 years of education would be given preference for a VRA appointment over other Vietnam-era veterans who have more than 14 years of education. It is expected that the Office of Personnel Management will design guidelines to ensure that this preference is provided and monitored.

Under current law, a VRA appointment may not be made above the GS-9 level or the equivalent. The bill before us today would increase that maximum level to GS-11. By deleting the educational criteria while increasing the grade level, several things would be accomplished. The VRA program would be more attractive to veterans and would provide greater career opportunities. Agencies would have greatly increased flexibility to make employment decisions. A better educated veteran would be attracted to Federal service and agencies would be able to hire a better trained VRA candidate. This change in existing law would respond to the fact that many Vietnam-era veterans have obtained the necessary educational qualifications or have met the experience requirements to be employed at higher grade.

I want to take this opportunity to thank the ranking minority member of our subcommittee, BOB MCEWEN of Ohio, for his leadership and support in developing this legislation, and all members of the subcommittee for their cooperation and assistance. I also want to thank the chairman of the full committee, SONNY MONTGOMERY, for his leadership.

This Nation has a clear obligation to assist the hundreds of thousands of unemployed veterans who served their country in Vietnam and during the Korean conflict. This legislation is a modest but firm step in that direction. I firmly believe that the Emergency Veterans' Job Training Act and the VRA program are reasonable, effective programs. I urge the House to approve

H.R. 1408 and I am hopeful that the Senate will take prompt action on this legislation. Additionally, I would like to stress to the Appropriations Committee the need to fully fund the authorization for EVJTA provided in H.R. 1408. This is a meritorious bill and I urge my colleagues to support it.

Mr. McEWEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1408, the Veterans' Employment Amendments of 1985. As ranking member of the Subcommittee on Education, Training, and Employment, and as a cosponsor of this measure, I very much urge its passage.

This bill would improve and extend the Emergency Veterans' Jobs Training Act [EVJTA], which, after a slow start, is currently proving to be a cost-effective way of placing Vietnam-era veterans into real and permanent jobs. Vietnam-era veterans in certain age groups have continued to have an unemployment rate above the national average. They deserve our continued help.

Emergency veterans' jobs training is the kind of program which benefits everyone, because it reduces the need for transfer payments, unemployment assistance, and it creates new taxpayers. Emergency veterans' job training relies on private sector training by employers who actually have the jobs they are trying to fill. This is not make-work, or training for jobs which don't exist.

Specifically, these amendments extend the application deadline, which expired January 28, 1985, to end of the year and the enrollment deadline to July 1, 1986.

Also, the amendments would liberalize what has proven to be an overly restrictive length of unemployment criteria. It would change the unemployment requirement from 15 of the 20 weeks to 5 of the 20 weeks immediately prior to the date of the veteran's application.

H.R. 1408 would authorize $75 million for the program for fiscal year 1986. In my view, this is a sound expenditure of scarce dollars, and it is not in excess of the amount originally authorized.

UNEXPENDED FUNDS FROM THE EXPIRED PROGRAM

H.R. 1408 would make needed improvements in the Veterans' Readjustment Appointment Program as well. It would allow appointment to Federal jobs at a maximum grade level of GS-11, rather than GS-9. It would eliminate the 14-year education limitation for Vietnam-era veterans. We must frankly acknowledge that some Vietnam-era veteran college graduates who have 16 years of education are having trouble finding work. Finally, Mr. Speaker, this measure would appropriately give a preference to service-connected disabled veterans with more than 14 years of education.

We owe much of our thanks for this legislation to our very capable Veterans' Affairs Committee chairmen, Mr. MONTGOMERY; a special expression of gratitude to our Education, Training and Employment Subcommittee chairman, Mr. DASCHLE, and to the committee's outstanding ranking member, Mr. HAMMERSCHMIDT.

H.R. 1408 was reported unanimously by the Veterans' Affairs Committee because it is a good bill, and it deserves the vote of every Member of this body.

Mr. Speaker, I reserve the balance of my time.

Mr. MONTGOMERY. Mr. Speaker, I yield 1 minute to the gentleman from New Mexico [Mr. RICHARDSON], a former member of our committee.

Mr. RICHARDSON. Mr. Speaker, I rise in strong support of H.R. 1408, which I consider to be an extremely important piece of legislation for veterans. When I was a member of this committee, I worked very actively on this bill.

I think it simply is—as the two gentlemen, the chairman and the ranking member, have stated, it is a restatement of the principles of this legislation and a reextension of the act, a program that has worked very well and that does have veterans' preference, especially to Vietnam veterans, Korean veterans, and disabled veterans.

It is an extremely important piece of legislation and I wish to commend the chairman, the gentleman from Mississippi [Mr. MONTGOMERY], and the ranking minority member, the gentleman from Ohio [Mr. McEWEN], as well as the gentleman from South Dakota [Mr. DASCHLE], for their fine work.

I urge the House promptly approve this piece of legislation and I yield back the balance of my time.

□ 1310

Mr. MONTGOMERY. I thank the gentleman for his kind remarks. He always has a place on my committee; we enjoyed having him on the committee during the time he served.

Mr. Speaker, in closing, I want to thank the very able ranking minority member of the subcommittee, the distinguished gentleman from Ohio, BOB McEWEN, for the work he has done on this bill, and for the cooperation he has given to the subcommittee. I am sorry that Mr. HAMMERSCHMIDT, the ranking minority member, is not here today, but he is totally supportive of this legislation.

● Mr. SMITH of New Jersey. Mr. Speaker, I rise in strong support of H.R. 1408, the Veterans' Employment Amendment of 1985.

I am proud to be a sponsor of this laudable measure that will help Vietnam-era veterans help themselves.

Specifically, H.R. 1408 will enhance and extend the Emergency Veterans Job Training Act which is helping veterans qualify and find meaningful and permanent jobs.

As you know, Mr. Speaker, Vietnam-era veterans continue to have an unemployment rate exceeding the national average. It therefore behooves us to continue to address this compelling problem in an appropriate way.

H.R. 1408, I am pleased to point out to my colleagues, is not a make-work jobs program. It doesn't put the veteran job applicant on a dead-end street. Rather, this highly successful program relies on the private sector and effectively matches employers with eager employees.

Mr. Speaker, H.R. 1408 extends the application deadline which expired January 28, 1985, and the enrollment deadline to July 1, 1986.

Also, the bill liberalizes what has proved to be an overly restrictive length of unemployment criteria. It changes the unemployment requirement from 15 of the 20 weeks to 5 of the 20 weeks immediately before the date of the veteran's application.

H.R. 1408 authorizes $75 million for the program for fiscal year 1986. In my view, this is a prudent expenditure of funds, and it is not in excess of the amount originally authorized.

H.R. 1408 also makes needed improvements in the Veterans' Readjustment Appointment Program as well. It allows appointment to Federal jobs at a maximum grade level of GS-11, rather than GS-9. It eliminates the 14-year education limitation for Vietnam-era veterans. Finally, Mr. Speaker, this measure gives a preference to service-connected disabled veterans with more than 14 years of education.

Mr. Speaker, I urge my colleagues to adopt this legislation so we can continue to provide meaningful assistance to a group of veterans who were, for too long, forgotten and underappreciated.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, I rise in full support of H.R. 1408.

This bill extends for a very limited time the Emergency Veterans' Job Training Act and reauthorizes $75 million for it. It also makes needed improvements in the Veterans' Readjustment Appointment Program.

Mr. Speaker, when Congress passed the emergency jobs bill, it recognized a special need for certain Vietnam-era and Korean veterans to receive assistance in finding employment. After a slow start the program is not only now providing that assistance but, it is also paying dividends in other ways. It has created new taxpayers while reducing the necessity for unemployment insurance for these veterans. In my view, this is a worthy program that needs

the limited extension contained in H.R. 1408.

The changes in the Readjustment Appointments Program for appointment of Vietnam veterans to the Federal Civil Service are not extensive. However, in my opinion, they improve the program by raising the maximum hiring level to GS-11 from GS-9, and by eliminating an educational impediment. The bill also gives additional preference to service-connected disabled veterans.

Mr. Speaker, I congratulate the chairman of the House Veterans' Affairs Committee, SONNY MONTGOMERY, for his fine work on this bill. I also congratulate the chairman of the Subcommittee on Education, Training, and Employment, the gentleman from South Dakota, Mr. DASCHLE, and the ranking member of the subcommittee, Mr. SMITH of New Jersey.

Mr. Speaker, this is a good but modest bill, and I urge its approval by the House.

Thank you, Mr. Speaker.●

Mr. MONTGOMERY. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. McEWEN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi [Mr. MONTGOMERY] that the House suspend the rules and pass the bill, H.R. 1408, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON THE BUDGET TO FILE REPORT ON THE FIRST CONCURRENT RESOLUTION ON THE BUDGET FOR FISCAL YEAR 1986

Mr. GRAY of Pennsylvania. Mr. Speaker, I ask unanimous consent that the Committee on the Budget have until 5 p.m. today to file its report on the first concurrent resolution on the budget for fiscal year 1986, with additional and minority views.

The SPEAKER pro tempore. Is there objections to the request of the gentleman from Pennsylvania?

There was no objection.

MY ADVICE TO THE PRIVILEGED ORDERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. GONZALEZ] is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker, I rise again on behalf of trying to reach the powers that be, the privileged orders, with my advice to the privileged orders in the vein of the patriot Joel Barlow.

For some time, I have been speaking on the fact that the privileged orders, the money managers, the dollar barrons, the panjandrums of finance, who now are in total control of the decision-making processes that determine whether or not the American standard of living as we like to interpret it is a viable, continued and sustained choice the American people will have.

Since 1965, and the beginning of what was obvious to some of us, what today is commonly referred to as "stagflation," it was obvious that the Congress had to do something in the sense of its responsibilities as the national policymaking body, but in those halcyon days in which rates of interest were no more that about 6 percent, I guess by the credit crunch of 1966, 1 year later, in the summer of 1966, the average rate of interest would have been about 6.2, 6.3.

It was very hard at that time to advise either the colleagues of that time or those in power in the executive branch of the Government that the handwriting was on the wall; that it was inevitable that one of two things would happen:

One, either we would get a type of inflationary pressure which was reminiscent of the war conditions in which governmental procurement, after reaching a certain level, pressures—what I call the soft underbelly of our economy.

It was obvious in 1965. It was patently clear in 1966, when history if you read it will show we had what was called then a credit crunch; the first credit crunch.

Now since the so-called end of the war, which as I have been in a frustrating manner attempting to show that we have not terminated World War II, there is no peace treaty signifying an end to that very, very awesome era, rather we continue on a sustained basis with incremental movement, on a war economy basis.

Our country in fact has really become a garrison state in which everything is sacrificed to what we call defense, what in other days and other eras would be called war preparation.

Nevertheless, be that as it might, as far as the domestic conditions were concerned in that day and time, and I am speaking of just a little better than some 20 years ago, the facts will show, and I think history and historians who are even today engaged in the job of recording chronologically those facts will show that when a nation or a society enters that point at which America had reached more or less about June 1966, because on June 19, the prime interest rate—now this is defined as the interest rate at which the big, big interests, the largest mega-corporations and banking institutions lend to their favored customers; GM, General Foods, AT&T, and the like.

It was also a time in which the so-called Eurodollar—now that sounds fancy, but what it means is that by the time 1966 rolled around, and that in itself was about a 20-year period after 1945, that the whole world structure of international finance had changed.

Imperceptible to the average? Yes, but a change nevertheless, and that unless the recognition of that fact was admitted to and confronted, we would be faced with forces that inevitably would result in one of two things, as I say.

One, an inflationary pressure that would undermine the basis of the American economy. The basis of an economy that during the war was called the "arsenal of democracy." The United States was a producing nation.

In less than 4 years, the United States has metamorphosed, it has changed from a producing nation to a consuming dumping ground for foreign-made products with the unemployment that is incidental to that process.

The interest rate jumping up overnight 1 percent, a whole point, had never happened, even at the height of the Civil War. So some of us became inquisitive and asked questions. The questions to this day have never really been answered, even the most outstanding economists, national and well as international, are very loath to be reminded of what they were saying at that time.

□ 1320

It was obvious by 1968 that a tremendous chasm had arisen in international finance. Now, that sounds like a lot of high-flown talk. But in the world as structured as it is today, what happens internationally outside of our borders over which we have little control has a direct and immediate impact on what we call the American standard of living, employment, wages, the ability to own a home that one can call his or her own, the ability to live not at a lower level of material well being, because the profusion of material goods, apparel, dress and some of the other things that we consider creatures of necessity today rather than creatures of just plain comfort, and some in fact have become necessities, such as automobiles. Why is it, then, that at the time that actions could have been taken—I addressed a letter to then President Lyndon Johnson. Now, those of my colleagues who have tried to distill my utterances in the light of partisanship had better take a look at the record, because President Johnson was not only a President representing and the standard bearer of the same party I belong to and I am quite proud to continue to belong to but he was also a neighbor and a fellow Texan and a personal friend.

But I have never been a respecter of persons and have seen the folly is not the privilege of just the ignorant, the poor or the powerless. The most powerful leaders of the world have acted very foolishly and in fact we have such books as Barbara Tuckman's recent book, "The March of Folly," the whole book intended to bring out this historical phenomenon of the foolishness of great leaders of countries since the Trojan war to Vietnam, who persisted headstrong and obdurately in a given course of action despite all of the established facts, all of the reasoned advice, all of the known forces in balance and in play at the time. But as Barbara Tuckman sadly confesses, there is no way that that can be predicted, it is just a matter of fact that history shows that human beings are frail and weak and none of us is exempt from that weakness and frailty and certainly none of us is infallible.

I think this is the basis of the American system of government, the first real experiment. It is very young. It is the youngest form of government in existence that we can truly call a participatory democracy. But all of that is based on certain predicates, equality of access to economic opportunity as well as to political participation.

What good does it do to have political equality if we are economic slaves and have no economic freedom? This I think is the feature question of this generation and the one that it will have to pose to each succeeding generation.

During the civil rights struggle in the 1950's some very beautiful phrases were struck by some of the participants. One of them which I think was profoundly an eternal truth is and was freedom isn't free, and every generation must win it for itself in its own way, under its own conditions.

The question at this point is whether or not the American people, as attempted to be represented by their own individual agents known as Members of Congress in the House or Senate or through their Chief Executive and the Vice President, all of whom are elected by the people, whether or not the greatest interest of the greatest number is truly going to be served, so that when we go back to these basic questions and ask why was it when some of us, or at least I did, wrote a letter to President Johnson in 1965, saying, "Mr. President, the Federal Reserve statistics show now that the rate of procurement as of this year will exceed $45 billion on the Federal level. This means that we are beginning to see some symptoms of pressure on the soft underbelly of our economy."

For example—and I pointed this out—back home, school districts had had bond elections for the purpose of construction of new facilities. No sooner had they voted favorably for the bond issues when they discovered the amount was insufficient in order to pay for the cost, the new cost, the incremental increase in the cost of prime materials, copper, steel, and labor. Coincidentally with that if one looked at the help wanted ads in the newspapers—and this was true not only in my hometown of Texas but all over the country—one would see ads offering prime pay for scaled workers. To do what? To construct the base at Camranh Bay, for example, in Southeast Asia, which I might point out to my colleagues, today is being used as sort of a naval station by the Russian fleet. And so all of those who like to distill these things as partisan, economic matters being Republican or Democratic, foreign policy and foreign errors and defeats being Democratic or Republican, are going to be disillusioned and are going to be disappointed because folly is not the exclusive privilege of any one party or any one group or even any type of leadership in this human existence.

So we pointed out these facts and showed that the reason for this was that the Federal procurement level, because of the conduct of what turned out to be, even though at that time I think the average American would have said, "What war?" very much like they are doing today in the case of Central America. I doubt, if I were to ask my colleagues if they would swear that there was a grave national emergency because of El Salvador or because of Nicaragua, a grave national emergency—this is a letter of the word and the word of the law—I doubt it, yet the President just 2 weeks ago signified to that fact and proclaimed an embargo on Nicaragua. Now, under the Constitution you would not have that right except by the delegation of power that the Congress years ago gave the Chief Executive under similar types of situations in which the reason for quick action had to be determined by a unitary source of power such as the President rather than the body of 535 Members. But this President just 2 weeks ago, in order to justify imposing a unilateral embargo, announced a national crisis, a national emergency.

Well, it was not apparent, as it is not now, because at this point we do not have Americans directly dying. I predict, and I hope I am dead wrong, that it will not be long before they will be if the President continues in his present course of action, just as my follow-up letter to President Johnson in 1966, the first letter I wrote when I received the annual Federal Reserve report, which I read. Since I received no answer from him and since he made no allusion to any letter I had written him on the numerous trips I had taken in the interim on his invitation on Air Force I, to travel back home to the district—President Johnson was the most generous man and any time he went back to his place 55 miles away he called some of us and asked if we wanted a ride, and I invariably would because I have made it a habit and a practice and a policy to go back to the district all these 24 years every weekend that I am able to do so. That means I put in better than 8.5 million air miles just between here and the district in 24 years, and a little percentage of that was on Air Force I at the time President Johnson was President.

□ 1330

So when I saw that there was no reply, I figured the letter had been bucked over to somebody. So I called one of his assistants. His assistant said, well, they would try to dig it up. It was finally located with some submerged lesser official in the Treasury Department, of all places, and I finally received an acknowledgement, but no revelation that the matter had been considered.

In the meanwhile, the thought of asking for any taxes, what I was suggesting in that letter was the same type of action that President Truman had taken in the case of the Korean war, and had requested of the Congress, and the Congress gave it to him. So they controlled.

For instance, at the height of World War II, we were using 46 percent of the gross national product on the Federal level. The idea was every single food, fiber, weapon produced in America; Americans enlisting to serve, was all united in the purpose of winning the war. The objectives were clear; the unity was absolute.

But even at that point, now, today, the economists supporting this administration, who, incidentally some have been repudiated by the President, so that his Committee of Economic Advisers is sort of a pliant, nonexistent body at this point. The last one, selected by the President himself, was discharged finally and was not certainly considered for reappointment, because the administration did not like what he was saying. He was trying to be honest, but sometimes men in power, people in power, do not like to get the truth told if it is uncomfortable, and if it does not bear up with their protestations and their boasting.

Here we were in the middle of a situation in which it was obvious to anybody who has ever studied the matter, that no society under the same situation would end up differently, other than one, inflation, or, two, runaway interest rates.

But all during the time that this President has been saying when he was trying to defeat his predecessor that there was a direct cause between the national, that is the domestic defi-

cit, and the rates of interest. Now that he has produced the most monstrous deficit in the history of any government, and says that it is going to be so for the next three budgets; the next three fiscal years. He finds no such connection.

Now, of course, interest rates, depending, are in our country footloose and fancy-free. So many of my citizens in the constituency and so many of my colleagues sometimes ask me, "Well, we thought there was a law against any interest over 10 percent?" I smile and I say, "Well, you know, some of us have been trying to point out that this has not happened on the national level since 1865, and the enactment by the Congress, right after the death of Abraham Lincoln, of the National Currency Act of 1865." That began the basis of what we call today, roughly, our National Banking System.

But President Lincoln was so concerned about what he saw was about to happen, that that is what he had uppermost in his mind at the time he was assassinated.

So when we read all of this history and we see the repetitious tendency of those forces that in any clime, in any country, including our own, are greedy by nature, by definition. The more they have, the more they want. Unless restrained, restrained by whom? Well, by the only power that can restrain: The law and the Government.

So when I say no there is no such thing as any legal limit, in fact, it has worked the other way around. The States that still continue to have such things as maximum 10 percent interest rates. Beyond that, it was usury and criminal, as it has been and it should be.

Those States have been under pressure because of the National Government and because of the national agencies such as FHA, VA, and the like, that make it impossible for any transaction, unlimited, in its interest rate, that is the procurement of money.

What we forget, and what very few economists will tell you, and define it so, but I have and I know I am right, interest is the mechanism by which wealth is transferred within a society. This was true 7,000 years before Jesus Christ as reflected in the Code of Hammurabi. It was true at the time of our Lord, Jesus Christ. For there were laws that imposed hard sentences, including death, against usury.

The ancient Hebrew kinds, for example, were absolutely sworn to prescribing not only usury, but any kind of interest charge for any transaction. Now, I think it would be very difficult to say that we could extrapolate and make rough comparisons with the type of civilization that we could even dimly imagine at that time and what faces us today. But I think the basic fact is that we have law and we have government because there are forces amongst us that, unrestrained, will cannibilize or victimize the rest of us. It is that simple. It is not complicated at all.

What is complicated is the zeal to do anything about it, as in the case of Christianity, where the English writer G.K. Chesterton said, "Christianity has not been tried and found a failure or found wanting. Christianity was tried and found difficult and left untried."

That is what is true today with the rest of us that have, we like it or not, we went out and sought these jobs. Nobody put a pistol to our head, and therefore, the rather distasteful job of trying to hem in some potential benefactor; some powerful businessman; some powerful banker; some powerful agencies controlled by these vast panjandrums of wealth and economy.

Franklin Roosevelt knew what he was talking about and exactly what he had in mind when he called them, "Malefactors of great wealth." But today, as a consequence of, as I said, and I am going to say it even though it may sound braggadocio, it is a fact. The reason I say it is a fact is because anybody who wants to challenge that can look at the RECORD published by the House of Representatives going back, not to 1965, but 1963.

In 1963, as a newly arrived Member of the Banking and Currency Committee, as it was known then, we had the august Secretary of the Treasury, Mr. Dillon, who was considered an expert, but in fact came from the same stable that every Secretary of the Treasury has come since the Henry Morganthau era during Franklin Roosevelt's term of office, and that is that bond houses and bond dealers in Wall Street. They do not know anything about international finance. What they know could not even fill a thimble.

□ 1340

As a result, we have lost all of the confrontations because wars follow diplomatic and financial failures. Let nobody make that mistake. And we have lost those wars at the financial tables of these international moneychangers, which today are so great they transcend the authority of any one nation to control.

In fact, they have annual meetings, semi-secret meetings, over in France near Versailles, and you have the big pandandrums, the Big 10 or the Big 20, depending upon who they see fit to invite at that time, and there, in private, they make the decisions that are going to be impacting the rest of the nations, and they transcend sovereignties. There is not one country in the world, whether it is the United States or England or France, that has the power to absolutely control those transnational entities that are gargantuan by any definition today.

So that whatever we do here now may end up in being a wasted effort if these forces ever care to impinge on us, as recently the Continental Illinois Bank, in which the sudden withdrawal of this fickle, foreign, quick, hot money is withdrawn. This is why I have spoken out on these occasions, in fact I did last week, to try to point out the real purpose of the economic summit meeting in Bonn. Every American, I think, who read the newspapers and not conversant with the reasons would think that the whole purpose was President Reagan to go over and visit a cemetery, as unwise as that decision was.

But that was incidental. The reason for going over was the Bonn round of summit economic discussions going back to before 1979. In 1979, the last occasion on which such a meeting was held in Bonn, President Carter went over, and the same thing happened there without any real interpretation ever being given to either the Congress or the American people. I pointed out how now, with the Big 6 having more gold as reserve than the United States, they finally decided they were going to flesh out what they call the European Currency Unit and the European Monetary System, the idea being that that will displace the American dollar as the international medium of exchange.

Now, what does that mean to us? What it means is jobs, and the continuing erosion of those jobs. The last statistics—and incidentally, they were published the same day the President went to Germany where he was going to try to tell his European consorts that America had prosperity, that it had created jobs—the statistics, even those now approved by the Department of Commerce, show that there were fewer jobs in this last accounting period than before.

The President has bragged of how there have been a million or so new jobs. It certainly is not true. The facts are that we have over 10 million unemployed Americans. I would say that not less than two-thirds of those longtime unemployed, at this point that I am speaking, for more than 6 months, so they drop out of the picture. You cannot have that. You cannot have unemployment, underproduction, and keep jobs. They have been exported out. We have lost them.

We still have over 225,000 ex-automobile workers out of work. Now, surely we cannot reach that point of oblivious indifference that I perceived in 1966, that I perceived not only with respect to not only financial matters, but to the war itself, because as long as that war did not affect some of us, the overwhelming majority at that time, where I pointed out at the same time I wrote the letter to President Johnson that in August of 1965, about

47 percent of the boys who were either engaged or likely to be engaged in any kind of hostile action in Vietnam were draftees—draftees. And the draft based on a system that no nation in the history of the world ever attempted.

England at the height of its empire never would draft a little old cockney and send him to India to fight. Rome in the height of its imperial greatness would never think of impressing a slave to fight as a soldier of the imperial legions of Rome. That was for free born Romans. But it took us to say no matter what, if you are poor, if you do not have a certain level of education, then you have no exemptions. You are going to be drafted to serve, whether you like it or not, and you are going to be drafted to serve in an undeclared war.

These are the things that the men who wrote the Constitution, like Thomas Jefferson, feared the most, just like they feared the eternal possibility that these massive forces of economic oligarchy would take over, and they resisted it, and they said so. It took our generations in the 20th century to sell that heritage for what—for a mess of potage.

Where do we stand now? We stand in the third phase of what I call the latest version of the money manias. Like I said, when you get these forces in play, you can predict easily, you do not have to be a prophet, you do not even have to be an expert. You can have either inflation, the consequences of that, which will bring the money manias, the development of such things as the money markets, which obviously led to what the Congress had to do, or felt it had to do, although I did not think so, kind of a lone voice in trying to prevail against it, the 1982 Banking Act. Some call it the Garn-St Germain Act, but it is really the most major revision of the basic 1985 Banking Act since 1935, yet it was not palmed off that way. There was no Member who would have said, who really had not gone into it, and most of this was done in conference, we never had hearings, committees never heard them, we never heard debate, naturally. In fact, the whole thing passed out on a voice vote to 10:30 at night on October 2, 1982.

I went before the Committee on Rules. It was not easy. I do not like to contradict leaders who I respect and want to follow, but I do not care who they are, whether they are Presidents, or colleagues, or chairmen or bankers, I do not consider that I am here for their convenience. I am here charged in my oath of office of representing a given district, and the people therein, and that is all; nothing more, nothing less. If I allow myself, out of fear, out of fear of losing the job, out of fear of something else, then I do not think the American system would be working, and I think this is the real area that we ought to be concentrating on.

Mr. GAYDOS. Mr. Speaker, will my colleague yield?

Mr. GONZALEZ. I would be delighted to yield to the distinguished gentleman from Pennsylvlania.

Mr. GAYDOS. I thank the gentleman for yielding.

Mr. Speaker, at that point I think it is only proper that I insert in the record just a couple observations, if my colleague would permit me.

Mr. GONZALEZ. Absolutely.

Mr. GAYDOS. The gentleman mentioned whom he represents. I think it imperative at this time that the record show that here is at least one Member from the Pittsburgh area in Pennsylvania that has a most profound respect for my colleague from Texas, and that the residents of San Antonio and the congressional district which my colleague represents should feel extremely proud because their Representative has persistently and consistently over the last 5 or 6 years of my memory taken time out of a very busy schedule to come down in the well under many adverse circumstances and spread his philosophy and reasoning on the record.

□ 1350

He has done it without the benefit of notes in most instances, and I would challenge many of my colleagues in the House today to be able to duplicate that feat. When my colleague speaks, he speaks from the heart, he speaks from a vast reservoir of information, and he has demonstrated courage time and time again. At certain times in particular, I remember, he takes a particular situation and he makes sure that he is persistent, and he continues on until he makes what he calls a point and hopefully engenders or encourages some reaction.

I remember the very unsavory situation that occurred down in Texas involving a judge. It was this Representative who took over a year, again out of his busy schedule, to persistently come down on this floor and raise questions of a technical nature and of a practical nature, almost becoming a self-made investigator, which ultimately resulted in justice being done and the perpetrators of that crime being brought to justice. I am sure my colleague knows of the instance to which I refer.

I think at this time it should be brought out in the RECORD that listeners and viewers at this point and at times in the future should be cognizant, and I would like to remind them, of the reason why special orders do exist in the House. I would just like to succinctly say at this time that the reason why we have special orders is that it is almost impossible during the daily business on the floor of this House to bring in your feelings and to demonstrate your vast knowledge, the studying that you have done, what your experience indicates you can do, and to make type of arguments that my colleague is making, all for the general benefit of his colleagues, yes, and also for the citizens of this country and, in particular, the residents of his congressional district. So it is this time that is set aside to allow a Member to expand in detail on particular interests that involve his congressional district or him personally or his expertise to which he has been exposed throughout his time in Congress.

So my good friend, the gentleman from Texas [Mr. GONZALEZ], has dealt with economics and banking. Yes, they are very highly technical, boring subjects, but they are so very, very important that they ultimately end up with a person having a job or not having a job and end up with seeing whether a business is going to progress and flourish or whether it is going to go down in utter defeat, and also have international consequences which affect the very strength and sinews of this Nation.

I do not know how many times my colleague receives comments, but I want him to know that I believe that he possesses an unheard of and unequaled profound knowledge of the subject matter that he approaches on a regular basis. I think he is doing this institution a favor, and I think he is doing his constituents and this Nation a favor by taking the time to come down here and speak. I want him to know that if I am not here on the floor, I usually listen to him in my office on the TV, and I go home, in my own mind, a better informed legislator, a much better informed legislator, one who will hopefully be able to confront the problems that we have that are like and sometimes unlike the subject matter into which my colleague puts so much time and so much effort.

Mr. Speaker, I want to congratulate the gentleman. I think that is proper right at this point because the gentleman did mention at this point the matter of time and about why he is speaking in the well. I just wanted to confirm that.

Mr. GONZALEZ. Mr. Speaker, I want to thank my distinguished colleague, the gentleman from Pennsylvania [Mr. GAYDOS], because he, too, has spent many lonely hours here. I do not know if today he is waiting on me in order for him to be recognized, and what I want to do is try to sum up as quickly as I can so he will not have to sit here unduly long. But I want to express my profound gratitude to the distinguished gentleman from Pennsylvania, who also has spoken faithfully and sometimes unpopularly. It is not easy to sound critical of powerful forces and individuals.

Certainly I am sure it is neither the gentleman's nor my intent to do that, but one must speak as one sees the facts as they fall into place, because as much as one does not want to displease anybody, we have got to act in conformity with the greatest interests of the greatest number that we are charged with representing.

In the gentleman's case, he has seen the travail of the closing of steel mill after steel mill. One of his predecessors from Pennsylvania was a great inspiration to me, and I refer to the Honorable John Dent. Back in the early 1960's he was anticipating the net effect of forces that were emerging from Europe itself, because nobody wanted to accept the fact that the world had indeed changed and continues to change.

What I want to sum up with today is to say that the reason I am impelled to speak out is always because there are specific things that are happening. I am not speaking in general terms. The gentleman referred to the time that I spoke, not for 1 year—it was 2½ years—on the assassination of the first Federal judge in our judiciary to be assassinated, John W. Wood. Even though he was actually murdered outside the bounds of my district, it was in the confines of the San Antonio area, and that was a part of the district that I represented during my first 8 years, because the district used to consist of the entire county. But it also bore a sad proof to what I had been predicting for 4 years in San Antonio.

Now, I never bothered anybody up here because in the beginning, in 1970, for example, and in 1972 and 1974 I went to the Bexar County grand jury, and there were some elements involved, In fact, the newspaper this last Sunday, just yesterday, had a frontpage story about the murder last December of a notorious figure that it took this long to find out had been involved in such things as the assassination of President Kennedy. Well, that accounts for a lot of things that happened, and nobody, including the FBI, seemed to know why they were happening. But since that involved my hide, I was interested. For instance, the FBI reported a $35,000 contract on my life, and then the FBI clammed up and would not give me facts and whatnot. It took 2 years, through the Freedom of Information Act, to finally find out what kind of a dossier the FBI had on me, and it was not very pleasant.

But these are things that I feel are quite necessary if we really are going to live up to a system that I consider myself a great beneficiary of and that I am profoundly grateful for. Given my background, I think I have a deepness of appreciation that might escape the average American who has been priviliged to have been here for several generations. I think also what happens is that we take things for granted.

What I wanted to talk of today is something that is happening that is going to startle and is going to hurt many people with respect to savings and loans. We have been reading about the special State savings and loan systems that are giving us quite a number of problems in the State of Ohio and now Maryland, and there is only one other State—and I am not going to mention that name—and that have the same kind of structure, State charters and funding and what not, and that are regulated to the extent these savings and loans are. And they are very vulnerable, have always been, but now they are the first of those to go.

Now, let me point out one other thing. I have written down what I have discovered in my own backyard, and always the source of, I would say, 65 percent of my activities goes to individual citizens. I will give one example: the half-dollar coin, the John Kennedy coin. I am the one who introduced the resolution. I am on the committee and on the Subcommittee on Coinage. But I got that idea 4 days after the assassination of President Kennedy from a citizen in San Antonio, TX, who new something that I, even as a member of the Banking Committee, did not know, and that was that the law had been amended in 1957 providing that no coin could be changed as to the design except once every 25 years.

□ 1400

He said the half dollar, the Benjamin Franklin half dollar, is due and it is quite eligible and nothing would be greater than to have it coined in memory of President John Kennedy; so I introduced a resolution that eventually got enacted into law.

I got that from a citizen. I pride myself that I stay in touch, not forgetting where I came from, just trying to stay in touch.

As I said, I have gone over 8½ years of this.

Mr. GAYDOS. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. Yes, I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. Mr. Speaker, it is interesting, and I would just take one second to commend the gentleman, my colleague, that that is true.

Mr. GONZALEZ. It is.

Mr. GAYDOS. Because I had a workshop at one time, and the gentleman may remember at one time when the IRS form, where you followed the 1040 form, when it first passed they had a $1 contribution to the Presidential election.

Mr. GONZALEZ. Yes, I remember.

Mr. GAYDOS. There was a box there and you either checked the box or you did not. One of my constituents got up and said, "If I didn't want to put or allow a dollar to be deducted from the U.S. Treasury and I did not put that check in there, what is to prohibit somebody along the line from putting the check in because they felt it should be in?"

I complained to the IRS, and they now have two boxes. You put a check in if you want the dollar to go in and you put a check in if you do not want it to go in, so you have it covered both ways.

Again that illustrates, as my colleague has just indicated, what a constituent and citizen participation can be, and I congratulate the gentleman.

Mr. GONZALEZ. I think that is the reason we have such an affinity of interest and concern that has led us out of 435 Members to have a little bit closer association than the average.

Well, I want to point out what is happening, because it is a consequence, another form of the money manias that have agitated and whiplashed this country, with great destructive impact. That has to do with the inflated values of some of these institutions. At this point it seems to be concentrated in the savings and loans. I think one reason is that Congress, wittingly or unwittingly, homogenized all financial institutions and we do not have real savings and loans anymore. They are banks. Credit unions are banks.

So here is step one. A developer or promoter buys a 3,000-acre tract of land for $5,000. Some of you say, "Where in the world can that be done?" Well, it is still possible over in our stretch of the woods.

He then sells part of it, say 200 of the 3,000 acres, to a supposedly nonrelated party for $20,000 per acre, because the demand is there.

This is probably with little or no down payment and a note for the balance.

Step 3. He then sells another tract of land to a supposedly unrelated party for $20,000 or more on very lenient terms.

Step 4. He has now established a fair market value on the land of $20,000 per acre. He then goes to a friendly savings and loan, and let us use that word advisedly, a friendly savings and loan, and creates a joint venture partnership to develop the remainder, or a part of the remainder, based on a value of $20,000 an acre, that same acreage that he bought for $5,000 an acre.

The savings and loans are allowed to loan 75 percent or 80 percent of fair market value. Then the savings and loan can lend from $15,000 plus per acre of land that he acquired for $5,000 per acre.

Step 5. If he has a close relationship with the savings and loan, and most of the promoters do, he might even sell

his land to the savings and loan for $20,000 per acre and then take his profits and buy stock in the savings and loan and end up controlling the savings and loan with their own money. It will give the savings and loan more capital, thus it can participate in more deals; however, the capital does not really exist until they sell the land at an inflated price.

Setp 6. The savings and loan then sells this land to another developer on very favorable terms and a few points of brokerage which they add on to the loan and which they show as profit.

Actually, little money, if any, has changed hands at all; however, the savings and loan shows this as an asset on their books, plus the paper profit on this transaction.

The project may go slow and the purchaser cannot pay the note or the interest earnings. If it was a $10 million sale, they are accruing probably 14 percent, or $1,400,000 that does not exist. These kinds of deals have worked, as I said and repeat, during these times that we have associated with a high inflationary spiral.

Instead of foreclosing a loan, they will increase the loan by the amount of interest due. In other words, as the saying is in Spanish, and I will not repeat it today, but what it means is that you are paying debts with debts.

They have reported a $1,400,000 income that only exists if the land were truly to inflate to the original inflated price, plus accrued interest.

The probability exists that this will eventually collapse. As their earnings are phony, they have no real reserve base for losses. Then the FSLIC has to step in and pay off all the depositors up to $100,000, except that recently in the case of the FDIC and the Continental Illinois Bank, every major holder of more than $100,000 was paid off because the taxpayers through the Federal Reserve Board had ante'd up $6 billion and we in effect nationalized that bank.

If this had been done in another country, we would have said they nationalized it. In the United States, we still do not use those words, but that is what we did.

Now, how much the FSLIC has in reserve is questionable. Well, it has not been questionable to me again since 1971.

You know, my colleague is a member of the same party as I am; yet you ask the average American who has swallowed this President and his party's propaganda whole, you would think that the Democrats were responsible for inflation, they were responsible for the deficit and that there is no other cause.

The truth is that the Democrats never devalued the dollar. The Republicans, did, not once but twice, with President Nixon. They did not call it that in the American newspapers, but that is what it was. It was a wholesale devaluation of the dollar. That is when the European press said that we had gone off the gold standard, that is, we stopped redeeming dollars in gold.

This is why the Europeans finally are going to tell us how the cow ate the cabbage and are going to use their superior gold reserves as their backing for the European currency unit.

This is why we are in a terrible jam, with no awareness on the part of our national leaders, such as the President, such as the Secretary of the Treasury or anybody in the Congress that I know of; so that the day of reckoning is not too far off.

Now, as I said, what is the reserve? Well, as of 15 years ago, maybe give a year or two, take a year or two, the FSLIC had no more than about $6 billion to cover about $650 billion of covered deposits or accounts, whatever you want to call them.

Now they could have a draw, like the FDIC, on the Treasury, but it would never match.

Now, the FDIC has never had at any time more than $13 billion plus the emergency right to draw $3 billion from the U.S. Treasury, to cover what—a trillion dollars of insured deposits.

So let us face the facts. That system has been done under over the course of about a decade and a half or two decades, a decade and a half.

So this sums up the current money mania that is destined to have some pretty catastrophic results.

To accompany this, I will insert into the RECORD at this point an article demonstrating the concern of the State authorities in Texas are manifesting, which appeared in the San Antonio Express News Monday, May 13, 1985:

GROWTH OF S&L'S IN STATE PROMPTS CRIMINAL PROBE

DALLAS.—Financial experts say the unprecedented growth of savings and loan associations in Texas is the focus of criminal investigations of about a dozen institutions.

Savings associations purchased by investors outside the financial industry and bolstered by deposits raised through high interest rates have provided the money for commercial and residential real estate construction or purchase of undeveloped land, regulators say.

"Clearly, some (Texas associations) have been shooting craps," Paul Horvitz, a University of Houston banking professor who serves on the board of the Federal Home Loan Bank in Dallas, said.

Officials said loans and investments of the state's associations grew 37 percent last year, compared with 8.8 percent for banks.

Horvitz, who completed a survey of associations' real estate lending practices in the state, said his results were "hair-raising."

Industry experts said at least 24 Texas associations with assets of $100 million or more doubled or tripled in size last year, while more than 20 others with more than $100 million in assets grew between 50 and 100 percent.

"We have seen a lot of excessive speculation through the thrift industry, and the losses we're likely to experience over the next few years are testimony to the concerns many of us have had," said W. W. "Bo" McAllister, chairman of San Antonio Savings Association.

McAllister said assets at his institution grew 32 percent last year to $2 billion.

U.S. Attorney James Rolfe of Dallas said activities of about a dozen associations in the northern district of Texas are under criminal investigation.

About half the cases are connected to the failure of Empire Savings & Loans of Mesquite last year, Rolfe said.

He declined to release names of the institutions under investigation.

A local real estate appraiser in the Empire case has pleaded guilty to preparing more than 400 inflated appraisals used to obtain loans for land and condominiums along Interstate 30, east of Dallas, authorities said.

At least four other Texas thrifts were hurt by construction problems along I-30, officials said.

Mr. Speaker, I have always believed that the American people, if informed, will bring about some form, sooner or later, of expression if our system is still viable, and I say if, because we have had some forces that have moved in, such as the huge multibillion-dollar PAC influences in our electoral processes.

□ 1410

But if we are still resilient—and I have been privileged to travel this country from one end to the other, and what I see is a democracy, healthy, among our people. If we have the wit and the will to just uphold our oath of office, which says we shall perform well and faithfully.

I yield back the balance of my time.

MAKE AMERICAN STEEL COMPETITIVE: REDUCE INTEREST RATES; INCREASE CASH FOR MODERNIZATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. GAYDOS] is recognized for 30 minutes.

Mr. GAYDOS. Mr. Speaker, first of all, I would like to commend my colleague, Mr. GONZALEZ, for another excellent discourse. I want the gentleman to know that some day someone is going to put together all of the special orders and they are going to be called the Gonzalez discourses, and they are going to be in a library down there in San Antonio, one of these days, and anybody that is interested can go down there and can get the background of a very vibrant and scintillating history in this House of the last 20 years. So I would very firmly recommend that to any of the students down there in that area.

I think along that line of what was being said in previous special orders, that at this time, I would like to make

reference very hurriedly to an article that appeared in one of my local newspapers.

Mr. Speaker, since we have a trade deficit estimated at between $140 billion and $160 billion staring this country in the face this year, and there is a growing demand across the country hopefully to buy American, the trouble is there appears to be very few American-made products available to the patriotic consumer of today.

This situation is graphically illustrated in what would be a most humorous article submitted to me by one of my constituents, again were it not for the fact that the issue is so fundamentally serious. The article is entitled, and I quote, "The Trouble Is" and then it ends the quote. That is how the article appears. And the article was taken from the American Legion News and reprinted in the April 19 newsletter of the New Kensington Area Chamber of Commerce. It was forwarded to me by Grace Girardi, comptroller of Gerald L. Sanders Electrical Co. in New Kensington, PA.

I fervently urge my colleagues to read the following article. It carries a message for all of us, and I think I would just take 1 minute to read it.

This is under the heading of "The Trouble Is."

It starts out:

He drove his German car made of Swedish steel and interior of Argentine leather to a gasoline station, where he filled up with Arab oil shipped in a Liberian tanker and bought two French tires, composed of rubber from Sri Lanka.

At home, he dropped his Moroccan briefcase, hung up his Scottish tweed wool coat, removed his Italian shoes and Egyptian cotton shirt, then donned a Hong Kong robe and matching slippers from Taiwan.

More comfortable now, he poured a cup of hot Brazilian coffee into an English coffee mug, set a Mexican placemat on an Irish linen tablecloth atop a Danish table varnished with linseed oil from India. Then he filled his Austrian pipe with Turkish tobacco, lit it, and picked up a Japanese ballpoint pen with which he wrote a letter to his Congressman demanding to know why the United States has an unfavorable balance of trade.

Mr. Speaker, this article means a lot, and I think the trouble with the article, "The Trouble Is", is, it is all too very, very true in this country today.

On past occasions, I took that very subject and went into great length to talk about it and I hope to do it sometime in the very near future.

But today, Mr. Speaker, I want to talk about America's steel industry and how it is being battered left and right.

Mr. Speaker, a couple of weeks ago, Wheeling-Pittsburgh Steel filed for reorganization under chapter 11 of the Federal Bankruptcy Code. At the same time, Armco Steel was also reeling and facing a possible bankruptcy filing. Sharon Steel, in Pennsylvania, too, is in trouble.

And just last Friday, LTV Corp., the Nation's No. 2 steelmaker since its merger with Republic Steel less than 1 year ago, announced an internal restructuring of its steel division which will result in the closing of its Aliquippa, PA, factory.

This tragic move will result in the disruption of the lives of 1,300 workers at that mill and their families. Those men and women who have been working at that plant will now have to search for other kinds of employment—and it won't be easy.

A survey by the Department of Labor's Bureau of Labor Statistics in January 1984 indicated that even then there were about 120,000 displaced workers in steel and related metal industries.

What is more, these workers have characteristics that make it far more difficult for them to find alternative employment. Generally, the survey found that displaced steelworkers are disproportionately male, married, and have a family; have some high school education with little or no college; have some skills, mainly as factory operatives; and have 20 years work experience with about 10 years on their last job. That is the average unemployed steelworkers' characteristics and qualifications.

Further, they are concentrated, by and large, in specific steel regions in the North Central part of the country in which there is a shrinking number of available workplaces.

Just to give you some idea of where these displaced steelworkers are: Some 45 percent of the 120,000 in January 1984 had found alternative employment. That is the lowest for all industries in this country today. The average across the board in all industries was 60 percent.

So what will happen to these workers—those that cannot find substitute employment? What kinds of futures do they have? And what about the communities in which they live? A lot of other families—those who work in local banks, supermarkets, drug stores, and what all—will suffer as well.

In an advertisement in Monday's newspapers, LTV has tried to focus on the problem. They note that during the past 10 years, some $600 million were spent to modernize the Aliquippa mill so as to remain competitive with steel imports.

In its advertisement, LTV says:

We cannot say that every management move at LTV was correct. We cannot ignore the increase in steel-substitute products. And we cannot deny that costs—including employment costs—reached high levels.

Still, the truest answer to Aliquippa's trauma lies not in Pennsylvania, but overseas.

Unfair foreign competition, in the form of subsidized and "dumped" steel, intruded on product lines of steel bars, oilfield pipe and casing, continuous weld pipe, rod and wire, light structural steel, fence wire, and even nails—until we could no longer compete. What was finally left—pipe—now has an import penetration level of more than 60 percent.

That was quoted by LTV.

The LTV advertisement goes on to say that the corporation supported the administration's efforts to curb steel imports at a level of 18.5 percent through voluntary restraint agreements, even though it was giving away a big chunk of the American domestic market.

Well, if the administration's effort had worked, Aliquippa might be in business today and a year from now. But the truth of the matter is that imports are still well above the expected mark and I expect they will stay there for quite some time.

For example, just last week, the figures for steel imports for the month of March and the first quarter of 1985 became available and, quite frankly, while there is some good news to go along with the bad, the bad news is much worse.

The good news is that steel imports are reflecting a slight decrease as a share of apparent market in each of the first 3 months of 1985. In January, the imports captured nearly 31 percent of the American market; in February, the share was just over 27 percent; and in March, the import share fell to 24.5 percent.

□ 1420

At this time I am very happy to yield to my colleague from Pennsylvania in the adjacent congressional district, and who is presently serving as chairman of the steel caucus, which I serve as chairman of the executive committee, and who has had some of the miseries I am speaking of occur in his own area of Johnstown, PA, and who is probably one of the most informed Members on steel, steel imports, and the results of which has been spread on the record I think to anybody in Congress.

So at this time I would like to yield to my colleague from Pennsylvania, Mr. MURTHA.

Mr. MURTHA. I appreciate the gentleman yielding to me, and I just wanted to commend you for taking this special order, and also commend you for the work that you have done.

I know how difficult it is when a plant is cut back and reduced so substantially. What it means to the people who are going to be unemployed and the workers and the tremendous impact it has on them.

The figures you cited are so important, the fact that members of the steel caucus were able to convince the President that we needed to restrict these imports—not eliminate them, but restrict them substantially—these subsidized imports coming into this country. Nobody has had more to do

with that than you have, and your influence has been so substantial.

Hopefully some of these plants that have been shut down and cut back will be started back up again, and more people will be put to work. They predict that 7 or 8 million tons of steel that is used next year will come from, this coming year used in this country will come from this country because of this voluntary restraint agreement.

So I just wanted to compliment the gentleman for the work that he has done in this area. Hopefully it will have an impact by this year, and of course, as the gentleman knows, we are sending a letter to the President, urging him to enforce this legislation, because it does not do any good to have it on the books if it is not enforced.

I know that working with the administration, we will come up with some policy that will reduce subsidized imports and increase the amount of steel produced in this country.

Mr. GAYDOS. I want to thank my colleague, and I do want to commend him for the persistency. I think we have been working together along with some of our colleagues in the steel caucus, and with the steel caucus for the last 6, 7, years. In fact, I think that our birth date, 6 years, is about due this month; in fact very shortly.

I think during that time both of us have experienced, maybe to our chagrin and disappointment that we have had so many promises; we have gone through so many suggested solutions, and in the last analysis, we end up picking up an empty bag.

As I commented I think in one of our special orders, that empty bag that we are picking up in this country is marked "made in Japan," to illustrate that it is a serious, ongoing problem. I do not know that this is the answer. As my colleague has indicated, we hope it is. We are talking about the voluntary restraints, the negotiation of agreements.

I am going to voice some of my doubts as to the inadequacy of it. I would have liked to have seen some immediate action, but that is the only ball game in town; we are trying to negotiate these voluntary arrangements between these exporters that are importing into this country.

We do not know if it is going to work. We hope it works. We have gone through so many disappointments. I do not know, I would hope, sincerely hope, that the administration, if this should fail, would sit down at arm's length again with the steel caucus as they have in the past, with a sincerity to attack the problem and then work out maybe something in the line of mandatory quotas.

I think my colleague and I both agree that Mr. Nixon in years past—and I have mentioned this so many times—he has been criticized for many things that he should not have done, and that is not for me to judge, but I remember one thing that I have given him affirmative credit for: When we had a vast influx of automobiles which we are about to have today, and it looks like we are going to have, at that time, years back, President Nixon was not afraid; took a very solid stance, and he put a 10-percent surtax on all foreign automobiles coming into this country.

That was at the time when people were saying that he was going to start an international trade war, that it wasn't going to work; he was doing something that was improper, but he did it, and he did it from the courage of his convictions. I have to say that it worked. He saved the automobile industry.

Now, some 15 years later, we had the same type of an impasse; we did negotiate voluntary quotas, as recently as 2 years ago, where the Japanese did enter into an agreement and did limit their exports of automobiles into this country, it was working and did work.

Our automobile sales increased; Chrysler came back; people were making money; jobs were created; our people were working, but again it looks like an influx is coming in and that we are going to have to do something, and I do not know what the solution is going to be, I am not clairvoyant; but we are going to be faced again with the same type of a predicament and I am sure the steel caucus is going to be there on all fours, ready and willing to work with the administration or against them, depending on what position they take.

I yield again to my colleague.

Mr. MURTHA. I just want to also say to the gentleman how much all of us appreciate you taking leadership in this very important subject.

I remember John Dent, both of our predecessors, who represented part of Westmoreland County, had been saying this for 20 years. You and I have been saying it for 10 years, and now the Congress and the public are beginning to recognize how important the work is in reducing these subsidized imports coming into the country.

So I appreciate the hard work and foresight the gentleman from Westmoreland and Allegheny County has had, and the work that you are doing on the steel caucus. All of us appreciate it. Hopefully, it will have some impact the rest of this year.

If these voluntary restraint quotas go into effect we should have a substantial increase in production of steel in this country, if the administration will enforce it. I hope that will happen. I hope we will see a tremendous increase in the amount of steel that is produced in this country.

Mr. GAYDOS. I think my colleague makes a very important point: enforcement. Now we have always argued, over the last 10 years—and regardless of which administration; whether it is Republican or Democrat; does not make any difference—history shows, unadulteratedly, that each succeeding administration was always hesitant to assign adequate personnel, No. 1, to check on imports coming into the country; each administration was always hesitant to slap the wrists of those countries that were violating some of our international trade laws; it always took time; it always seems to occur that an industry in this country was going to be stripped, going to be defeated or going to be put out of business before something was done.

We have a very erratic history of enforcing our trade laws. So that, along with the very great tensions that exist today in the Nation, internationally, where trade is involved and where the people in Brazil and Argentina have to have a dollar to pay their great debts to the bankers in this country—and they always claim and defend that when they cannot pay that debt that it is because they cannot ship any products to this country to make money, so that they can pay that international debt off.

Eventually, each succeeding administration acquiesces, and they will change and they will say, "All right, you are allowed to ship into this country, we are not going to be so strict."

□ 1430

And eventually the unemployment is created here, and our competitors are working. In Korea, which ships so much to this country, something like 40 percent of what they make they ship to this country—it does not go to Japan, it goes to this country—the unemployment rate is roughly 3½ to 4 percent. In our country we are talking about 8 percent.

So these things just do not work. We cannot take care of the whole world, we cannot keep shipping our employment overseas and importing unemployment. Somewhere sometime somebody is going to have to answer. And that is what we are trying to do with the steel caucus in taking these special orders, trying to alert the American people, the listeners here on this floor today, my colleagues, and, internationally, yes, to alert the international community that the time is going to come when this country cannot absorb unfair subsidized foreign imports.

We have an obligation first at home, that is, to provide employment. The old saying goes, and it has not changed, that you cannot wash my shirt and I wash your shirt because we have nothing to pay each other with. We end up as a bartering nation. That may well happen. But our standard of living, of necessity, must fall if we do not solve this problem and have other economies and other countries with

full or better employment than we have. We can only take so much.

So the bad news, if I may get back to my prepared remarks, is that imports accounted for a larger share of the domestic market for the first quarter of this year than for the first quarter of 1984, and 1984 was one of the worst ever for the American steel industry.

For the first quarter of 1985, imports took more than 27½ percent of the apparent supply. For that same period last year, imports captured just over 25 percent. The difference is that imports today represent a penetration level of almost 2½ percent higher for the first quarter than they did last year.

The big question is, of course, are these voluntary restraint agreements the U.S. Trade representative has worked out with some of the major steel exporting nations working?

The answer, as far as I have been able to determine, as of this time is both yes and no. It appears to be working because the month-by-month level of imports appears to be dropping. At the same time it is not working because some nations have yet to finalize the agreements they have initialed and others have either not been asked to come to terms or have refused to do so and now are increasing their steel shipments to the United States.

As far as I am concerned, if we refuse to set specific quotas on steel and steel products, we must enforce the executed agreements and bring other steel exporting nations under agreements if we are to succeed. At the same time, we must look for ways to provide less expensive funds—lower interest rates—for the steel industry so it can develop and implement new technology that will bring production costs down and make American steel competitive with imports.

I raise this point because of a report I received late last week from the Congressional Research Service. The report, "Hypothetical Effects of Lower Interest Rates on the Costs of Production of the Integrated Steel Industry," was prepared by Dr. David Cantor, whose understanding of the steel industry in this country and the trends within that industry have been on or very close to the mark over the past years.

Dr. Cantor notes in this report that American integrated steel companies are paying bond interest rates of between 13.5 and 16.5 percent while new issues of high-grade corporate bonds fall into a narrow range of between 11.5 and 12.25 percent.

This report suggests that a drop in the interest rates for the integrated steel industry could have a profound impact on the industry's ability to cut the cost of producing steel and implement state-of-the-art technologies and processes that would make American steel more competitive here in our own markets.

Thus, Dr. Cantor notes in this report, if the interest rate paid by the integrated steel companies could be dropped to that of the rate paid on high quality bonds in this country—that is, from 15½ to 11½ percent, a 2-percent cut—costs of production of hot-rolled steel sheet could be reduced by between 1.9 and 2 percent or about $8 a ton.

Why is this important? Simply because the steel industry is being forced to undercut its own price lists to compete.

Data Resources Inc., in a May 1985, forecast, estimates the actual realized price for hot-rolled steel sheet to be about $378 per ton. At the same time, the National Academy of Engineering, in its recent report on the steel industry, estimates the actual cost of a ton of hot-rolled steel sheet to be in the range of $396 to $432 per ton, depending on the production process used.

Based on those estimates, the steel companies are losing between $18 and $54 per ton. A drop in the interest rates of 2 percent could reduce the loss per ton to between $10 and $46.

As Dr. Cantor says:

Reducing losses by these amounts would provide a significant increase in financial resources for investment to the industry. An $8 reduction in costs per ton resulting from a 2-percentage point drop in the interest rate would have meant nearly $730 million of additional net revenue from steel operations. This estimate is based on industry output of 91.2 million tons. Lowering the interest rate by 3.5 percentage points would have meant nearly $1.3 billion in additional revenues. While industry losses would clearly not be eliminated, the effect on steel industry cash flow resulting from the losses would be substantially reduced. Given that the industry is obligated by title VIII of the Trade and Tariff Act of 1984 to reinvest substantially all of its net cash flow from steel operations in those operations, the potential for additional investment in new technologies and the cost reductions resulting from them is considerable.

Dr. Cantor's points are important. And, because they are so crucial to our understanding of the problems facing the integrated steel industry, I am including the full report with these remarks in the RECORD.

There is another factor to this issue of interest rates. As we all noted last week, the prime rate in the United States is dropping to 10 percent. For those who may not be aware of it, the prime rate in Japan is 8 percent. And, given the savings and borrowing patterns, that means Japanese companies, including steel operations, can borrow money from Japanese lenders at considerably lower interest rates than in this country.

As Dr. Cantor pointed out with regard to the American steel industry, this means that the cost of producing a ton of steel in Japan is considerably less.

Not only can Japanese companies borrow money less expensively for operations in Japan, those same companies can borrow money for offshore functions with approval from Japan's Ministry of Finance. And, according to what I have learned, the Ministry of Finance is only concerned with the fact that the money is going out of the country.

This means that National Steel in this country, now substantially owned by Nippon Kokkan [NKK], through NKK, can borrow funds from Japanese lenders at substantially lower interest rates, thereby making improvements in its operations here in this country.

Thus, National's cost of steel making would be reduced, as Dr. Cantor says, through lower borrowing rates as well as implementing state-of-the-art technology.

Yes, it is true that American steel companies, if approved by a Japanese lender, could borrow from Japan's financial institutions and, possibly, could get approval from Japan's Ministry of Finance to use the money for modernization of a U.S. plant, but, given a substantial drop in the value of the dollar as compared to the yen, that American company could lose any savings if the loan was called, unless it had a yen source, such as National Steel's ties with NKK.

□ 1440

There is one other point I would like to make with regard to this issue of less expensive money. Earlier, I alluded to Japan's savings patterns, something many economists have discussed for some time from the perspective of seeking ways to encourage Americans to copy.

I think it is important to consider why Japanese save, on average, about 20 percent of their earnings as compared to between 4 and 6 percent of earnings for American workers. It is important to understand because it provides Japanese companies access to a relatively larger amount of capital at lower interest rates, which they borrow, and they improve their industries.

An article in the May 14 issue of the Wall Street Journal sums it up quite clearly. First, while social security benefits in Japan are paid on roughly the same level as that of the United States and begin at age 60, the lifetime jobs Japanese workers have tend to end when workers are about age 55. That means the average Japanese worker employed by one of the larger companies has to have enough to support himself and his family for some 5 years until his social security benefits begin.

For workers in smaller companies, who don't have the guarantee of lifetime employment—and there are a

great many of them, despite all you read about worker protection from layoffs, an even larger nest egg is necessary.

Second, the Japanese are concerned about the solvency of their social security system, much as we are, and, with the period of retirement increasing as the lifespan for the average Japanese increases, they realize that taxes are going to rise to keep benefits intact. So they must have that nest egg handy.

A third reason for a heavier rate of savings in Japan is that the Japanese have less incentive to spend on luxury items. The average Japanese workweek is 42.5 hours, as compared to 37.5 hours here. That means the Japanese worker is working on Saturday, too, and can't get away for a weekend at the beach or in the mountains, so the demand for boats, campers, and many other recreational items doesn't exist.

A final reason is housing. Just like Americans dream of owning their own homes, so do the Japanese. But it isn't easy. Houses cost about 10 percent more in Japan, partly because of the scarcity of desirable land. For that the Japanese save also.

The downpayment is usually about 40 percent, as compared to between 10 and 20 percent here, so it takes considerably longer for the Japanese family to save that.

Thus, Mr. Speaker, the Japanese have a strong incentive to save.

It should also be noted that most Japanese savings are in postal bonds that pay an interest rate of about 3 percent. If you look at the ads for American savings institutions, you will find that Americans aren't going to put money into savings unless they are going to get a substantial return on their investment, especially when they know they will have to pay taxes on interest earnings over a specified amount.

Perhaps, Mr. Speaker, the steel industry should be looking for ways to borrow at cheaper rates. Perhaps we, the Congress, ought to consider looking for ways to help in this direction as well as with our concern about high levels of imported steel.

Mr. Speaker, I conclude my remarks with the final observation that we will be back again, that is the steel caucus, to continue to make this information available to our colleagues and to the American public on weekly occasions.

Mr. Speaker, at this point I include the report from the Congressional Research Service.

HYPOTHETICAL EFFECTS OF LOWER INTEREST RATES ON THE COSTS OF PRODUCTION OF THE INTEGRATED STEEL INDUSTRY

(By David J. Cantor, Congressional Research Service, May 14, 1985)

ABSTRACT

If the interest rate charged to high quality borrowers was paid by integrated steel companies, their cost of producing finished steel products could be lowered by from 8 to 14 dollars per ton, or from 1.9 to 3.5 percent. Cost reductions of these magnitudes could result in additional cash flow for reinvestment in the range of 0.7 and 1.3 billion dollars, with additional and more significant cost reductions resulting from more modern plant.

HYPOTHETICAL EFFECTS OF LOWER INTEREST RATES ON THE COSTS OF PRODUCTION OF THE INTEGRATED STEEL INDUSTRY

The high cost of financing capital expenditures is a major problem facing the integrated segment of the steel industry. With steel demand flat at best and imports accounting for more than one-fifth of the market, the large integrated steel companies are paying rates of interest ranging from about 13.5 percent to nearly 16.5 percent. This contrasts sharply with the yields on new issues of high-grade corporate bonds in the range of 11.5 percent to 12.25 percent.

These relatively high interest rates paid by the large integrated steel companies creates two related problems for them. First, they add to the cost of producing steel, making domestic steel even less competitive with foreign steel. Second, they make less attractive those investments in state-of-art technologies and processes that could lower costs of steel production and, therefore, permit American steel to compete in at least domestic markets.

While some may complain that interest rates paid by so-called "high quality" corporate borrowers are too high, the even higher rates paid by integrated steel companies—2 to 5 percentage points higher than "high quality" borrowers—only exacerbate the difficulties of the steel industry. This report, utilizing cost estimates for producing steel recently issued by the National Academy of Engineering (NAE),[1] assesses the potential effects of lower interest rates on the cost of producing steel.

Using the NAE cost estimates only as a base reference case, the cost of producing 1 ton of hot-rolled sheet could be lowered by from 3.3 percent to 3.5 percent, if the steel industry could borrow long-term at a rate of interest of 11.5 percent instead of the 15 percent rate assumed by the NAE. Cost savings in the range of about 14 dollars per ton could be achieved. Even a 2-percentage point reduction in the cost of long-term borrowing would reduce steel-making costs by from 1.9 to 2.0 percent, or by about 8 dollars per ton to finished product.

Although these magnitudes may seem small even trivial to some, they are in fact considerable in relation to the cost savings achieved by the processes financed by new investment. Again, based on the NAE assumed cost of a continuous caster of 142 million dollars, production of semifinished steel shapes using continuous casting technology achieves cost reductions of about 35 dollars per ton. The reduction of total costs of 14 dollars per ton resulting from a 3.5 percentage point drop in the interest rate is equivalent to 40 percent of the savings achieved by continuous casting. Lower costs of capital can contribute significantly to achieving lower costs of production of steel products.

I. Methodology and assumptions

This analysis develops estimates of the cost savings in producing steel products resulting from a drop in the interest rate by modifying the interest rate assumptions made by the NAE in its cost estimate. NAE developed its total cost estimates of steel production using the technical input coefficients at each stage of production of the MIT simulation model of the steel production process.[2] NAE multiplied these input coefficients by its estimates of 1983 input prices.[3]

This approach recognizes the complexity of the steel-making process. A large integrated steel company plant is in reality several establishments: it includes materials' processing facilities, the blast furnace for producing pig iron, the steel-making furnace, facilities for fabricating semifinished shapes (either a combination of ingot and semifinished steel shape casting operations or continuous casters), and the finishing mills. The MIT model identifies 11 different operations, illustrating the complexity of the total process.[4]

Capital investment in new techniques can obviously be made at each stage of production. For example, investment could be made in a continuous casting process, but not in either the blast furnace molten steel-making operations or in the finishing mills. Also, the amount of investment expenditures varies by stage of production. For example, NAE assumes that a new continuous caster involves an expenditure of 142 million dollars, but the initial investment in a Basic Oxygen furnace would amount to 11 million dollars.[5] By separating the total process of manufacturing one ton of finished steel mill product into its several operations, the capital charges (and those for every other input) attributable to the end product can be estimated.

With respect to allocation of investment charges to output, NAE makes two relevant assumptions. First, NAE assumes an interest rate of 15 percent. Second, the investments are assumed to be amortized over a 10 year period. The interest rate assumption appears to be reasonable in view of the fact that steel industry long-term debt yields are in the range of 13.4 to 16.5 percent. The period of amortization, 10 years, may be considered arbitrary.

NAE's assumptions of investment requirements at each stage of the steel production process are presented in table 1. These estimates were based on 1983 costs of equipment as projected by commercial macroeconomic models.[6] To the extent that they are under—or overstated, the capital charges developed by NAE are too low or high in relation to current actual experience. If NAE estimates are too low, then the actual capital charges would be higher at each stage of production; the effect of a lower interest rate would be greater. Nevertheless, the NAE assumptions are used herein to establish a base reference case.

The case examined apply to integrated steel companies. These companies produce steel by, first, fabricating pig iron from iron ore, iron ore pellets, and coke and second, refining steel from the pig iron, scrap, and other additives. Nonintegrated companies produce steel in electric furnaces, relying mainly on scrap as a raw material.

Two cases are considered herein. In the first, the raw molten steel produced in a

[6] Ibid., p. 64.

basic oxygen furnace is processed by pouring ingots and then casting the ingots into semifinished steel shapes for finishing. In the second, the raw, molten steel is processed directly into semifinished shapes in a continuous caster. The total investment in a new plant that cast ingots first and then semifinished shapes would be over 1.7 billion dollars; the plant using continous casters would cost just under 1.7 billion.

TABLE 1.—INVESTMENT REQUIREMENTS FOR STEEL-MAKING BY STAGE OF PRODUCTION: ASSUMPTIONS OF THE NATIONAL ACADEMY OF ENGINEERING

Stage of production	Output	Total investment (millions)	Capital charge per unit of output [1]
Pelletizing	Iron ore pellets	$18.75	$10.67/ton of pellets.
Sintering	Sinter	15.00	9.96/ton of sinter.
Coking	Coke	860.00	55.10/ton of coke.
Blast furnace	Pig iron	685.00	21.93/ton of pig iron.
Basic oxygen furnace	Raw steel	11.00	10.96/ton of raw steel.
Ingot casting	Ingots	1.00	0.66/ton of steel ingot.
Ingot milling	Semifinished steel	10.00	6.64/ton of semifinished steel.
Continuous casting	Semifinished steel	142.00	10.25/ton of semifinished steel.
Finishing mill	Finished steel, mill product.	100.00	28.46/ton of finished steel.

[1] Assumes 15 percent rate of interest, and amortization of investment over a 10 year period.

Source: National Academy of Engineering and the National Research Council. The Competitive Status of the U.S. Steel Industry. Washington, National Academy Press, 1985. p. 148 f.

NAE makes other cost assumptions, which may or may not conform to reality. For example, NAE assumes the cost of production labor to be 25 dollars per hour.[7] This amount exceeds the American Iron and Steel estimate for 1982 by about 1.20 dollars per hour, and fails to take into account wage concessions of $1.25 per hour in 1983.[8] Again, the NAE estimates are utilized to establish a base reference case.

II. Hypothetical effects of lower interest rates on the costs of production of finished steel

If the interest rate paid by integrated steel companies could be lowered to the rate paid on high quality bonds, costs of production of hot-rolled steel sheet could be lowered by between 3.3 percent and 3.5 percent, or by about 14 dollars per ton. A 2-percentage point reduction in the interest rate could result in the lowering of costs by between 1.9 percent and 2.0 percent, or by about 8 dollars per ton. These effects are summarized in table 2.

The effects vary slightly depending upon the steel-making process. Companies using conventional methods for producing semifinished shapes (namely, casting ingots from the raw molten steel and, then, casting semifinished shapes from ingots) could achieve marginally higher dollar savings per ton, but smaller percentage reductions in cost than companies employing continuous casters to fabricate semifinished shapes. The larger dollar cost reductions of companies using conventional methods is due to the higher capital inputs per ton.

The cost reductions identified assume that capital investments in the amounts indicated in table 1 are made for every operation involved in steelmaking—from the production of iron ore pellets through the rolling of the finished steel product. Thus, the lower cost of inputs from prior processes resulting from lower interest rates are asusmed to be passed through to each successive stage of production.

Suppose, however, that a company only made new investments in a continuous casting process and finishing mills, and that operations up to and including the basic oxygen furnace process were financed at the base reference case interest rate of 15 percent. This company would value the raw molten steel at a price of $244.22, based on NAE estimates. Changing technologies in successive operations would lower total costs per ton of finished product to $396.34 at the 15 percent rate of interest, to $393.36 at the 13 percent rate of interest, and to $391.19 per ton at the 11.5 percent rate of interest. total savings would be $35.77 per ton, if the interest rate were unchanged. If the interest rate fell by 2 percentage points to 13 percent, total savings would be $38.75; an interest rate of 11.5 percent would result in lower costs of $40.19. Clearly, most of these savings result from adoption of the continuous casting process; still, lower interest rates would reduce costs further by an additional 8.3 to 12.4 percent, depending on the interest rate chosen.

TABLE 2. HYPOTHETICAL EFFECTS OF LOWER INTEREST RATES ON COSTS OF PRODUCTION OF HOT-ROLLED STEEL SHEET

[Dollars per ton]

Interest rate scenario	Total cost	Change from base case
Base case (15 percent interest rate):		
Conventional ingot/semifinished process	$432.11	NA
Continuous casting	396.34	NA
2 percentage point reduction (13 percent interest rate):		
Conventional ingot/semifinished process	423.88	−8.23 (−1.9%)
Continuous casting	388.36	−7.98 (−20%)
3.5 percentage point reduction (11.5 percent interest rate):		
Conventional ingot/semifinished process	417.73	−14.38 (−3.3%)
Continuous casting	382.40	−13.94 (−3.5%)

NA: Not applicable.

III. Conclusions

Lowering the interest rates paid by integrated steel companies can make a positive difference in their financial pictures and in the outlook for American steel. Reducing costs of production is important in the light of apparent severe discounting of list prices by the steel industry. Furthermore, it is important if the industry is to generate substantial increases in cash flow to make the investments necessary to be competitive with foreign steel in U.S. markets.

Apparently, the U.S. industry is discounting its list prices to achieve market share. Data Resources, Incorporated estimates that the actual realized price of domestic steel products in 1984 was about 548 dollars per ton.[9] Its 1984 estimate of domestic list prices was about 623 dollars per ton.[10] If these estimates are correct, then the industry has been selling steel at a 12 percent discount from list prices.

Furthermore, assuming the NAE cost estimates for hot-rolled sheet are correct, the domestic industry is losing considerable money on this product. Data Resources, Incorporated estimates the actual realized price for hot-rolled sheet to be about 378 dollars per ton.[11] NAE estimates its cost to be in the range of 396 dollars per ton to 432 dollars per ton, depending on the process used. Thus, steel companies producing this product are losing between 18 and 54 dollars per ton. If the interest rate could be lowered by 2 percentage points, the loss per ton could have been reduced to between 10 and 46 dollars. A 3.5 percentage point drop in the interest rate would have cut the loss per ton to between 4 and 39 dollars.

Reducing losses by these amounts would provide a significant increase in financial resources for investment to the industry. An 8 dollar reduction in costs per ton resulting from a 2 percentage point drop in the interest rate would have meant nearly 730 million dollars of additional net revenue from steel operations. This estimate is based on industry output of 91.2 million tons.[12] Lowering the interest rate by 3.5 percentage points would have meant nearly 1.3 billion dollars in additional revenues. While industry losses would clearly not be eliminated, the effect on steel industry cash flow resulting from the losses would be substantially reduced. Given that the industry is obligated by Title VIII of the Trade and Tariff Act of 1984 to reinvest substantially all of its net cash flow from steel operations in those operations, the potential for additional investment in new technologies and the cost reductions resulting from them is considerable.

The possible effects of lower interest rates charged to the integrated steel industry are, again, dependent on the cost assumptions made. Thus, the estimates presented in this report must be viewed as hypothetical only. Higher capital costs or different amortization schedules could significantly change the estimates; differences in other input cost assumptions would lead to similar changes. What is, perhaps, most important is that lower interest rates could have a noticeable effect on total costs of production.

Finally, this report is limited to assessing the possible effects of lower interest rates on the integrated segment of the steel industry. This segment of the industry accounts for about two-thirds of raw steel production. While no estimates are developed for the nonintegrated or "minimill" segment of the steel industry, it would obviously benefit as well from lower interest rates.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

SENATE JOINT RESOLUTIONS REFERRED

Joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 32. Joint resolution to authorize and request the President to designate September 21, 1986, as "Ethnic American Day"; to the Committee on Post Office and Civil Service.

S.J. Res. 40. Joint resolution to designate the month of October 1985 as "National Down Syndrome Month"; to the Committee on Post Office and Civil Service.

S.J. Res. 57. Joint resolution to designate the week of October 20, 1985, through October 26, 1985, as "Lupus Awareness Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 108. Joint resolution authorizing the Secretary of Defense to provide to the Soviet Union, on a reimbursable basis, equipment and services necessary for an improved United States/Soviet Direct Communication Link for crisis control; to the Committee on Armed Services.

ENROLLED BILL SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 1869. An act to amend the Internal Revenue Code of 1954 to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes.

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 103. Joint resolution to designate the month of May 1985, as "Very Special Arts U.S.A. Month."

BILL PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, a bill of the House of the following title:

H.R. 1869. An act to amend the Internal Revenue Code of 1954 to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes.

ADJOURNMENT

Mr. GAYDOS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly at (2 o'clock and 44 minutes p.m.) the House adjourned until tomorrow, Tuesday, May 21, 1985, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1304. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to recover costs of carrying out the export inspection and certification programs for apples, pears, grapes, and plums; to the Committee on Agriculture.

1305. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to recover costs of establishing standards and specifications for agricultural products; to the Committee on Agriculture.

1306. A communication from the President of the United States, transmitting requests for supplemental appropriations for fiscal year 1985 and amendments to the request for appropriations for fiscal year 1986, pursuant to 31 U.S.C. 1107 (H. Doc. No. 99-69); to the Committee on Appropriations and ordered to be printed.

1307. A letter from the Comptroller General, General Accounting Office, transmitting a report on the status of budget authority proposed for rescission in the President's sixth special message, but for which Congress failed to pass a rescission bill, pursuant to 2 U.S.C. 685; to the Committee on Appropriations.

1308. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a listing of supplemental contract award dates for the period June 1, 1985 to June 30, 1985, pursuant to 10 U.S.C. 139(b); to the Committee on Armed Services.

1309. A letter from the Secretary of the Navy, transmitting the unit cost exception reports as additional information to the report of April 15, 1985 (Executive Communication No. 993) concerning the A-6E/A-6F aircraft and the Phoenix missile, pursuant to 10 U.S.C. 139b(d)(3)(A); to the Committee on Armed Services.

1310. A letter from the Treasurer of the United States, transmitting the 1985 first quarter report on the activities relating to the minting of the 1984 Los Angeles Olympic Games' coins, pursuant to Public Law 97-220, section 11; to the Committee on Banking, Finance and Urban Affairs.

1311. A letter from the Auditor, District of Columbia, transmitting a copy of his report entitled, "Annual Audit of the Washington Convention Center for Fiscal Year 1984," pursuant to Public Law 93-198, section 455(d); to the Committee on the District of Columbia.

1312. A letter from the Director, Federal Mediation and Conciliation Service, transmitting the annual report for fiscal year 1983, pursuant to the act of June 27, 1947, chapter 120, secton 202(c); to the Committee on Education and Labor.

1313. A letter from the Administrator, Environmental Protection Agency, transmitting a report on the inventory of all wells in the United States which inject hazardous waste, pursuant to Public Law 98-616, section 701(a) (98 Stat. 3288); to the Committee on Energy and Commerce.

1314. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's proposed letter of offer to Korea for defense articles and services (Transmittal No. 85-34), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

1315. A letter from the Assistant Secretary of State for Legislative and Intergovernmental. Affairs, transmtting a report of political contributions by Lewis A. Tambs, Ambassador Extraordinary and Plenipotentiary-elect, and members of his family, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

1316. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report of political contributions by Lannon Walker, Ambassador Extraordinary and Plenipotentiary-elect, and members of his family, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

1317. A letter from the Acting Director, Office of Personnel Management, transmitting the annual report on the financial status of the U.S. civil service retirement system as of September 30, 1984, pursuant

to 31 U.S.C. 9503(a)(1)(B); to the Committee on Government Operations.

1318. A letter from the Secretary of the Board, Board of Governors of the Federal Reserve System, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the committee on Government Operations.

1319. A letter from the Secretary of Transportation, transmitting the sixth annual report on the Highway Bridge Replacement and Rehabilitation Program, pursuant to 23 U.S.C. 144(i), to the Committee on Public Works and Transportation.

1320. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a report from the Chief of Engineers, Department of the Army, on Canal 18 Basin-Loxahatchee Slough, central and southern Florida, together with other pertinent reports; to the Committee on Public Works and Transportation.

1321. A letter from the Executive Secretary, Department of Defense, transmitting the report on Department of Defense procurement from small and other business firms for October through November 1984, pursuant to SBA, section 10(d); to the Committee on Small Business.

1322. A letter from the Assistant Secretary for Legislative and Intergovernmental Affairs, Department of State, transmitting a draft of proposed legislation to implement the Nairobi Protocol to the Florence Agreement on the Importation of Educational, Scientific, and Cultural Materials, and for other purposes; to the Committee on Ways and Means.

1323. A letter from the Secretary of Health and Human Services, transmitting a report on the Fiscal Year 1984 Low Income Home Energy Assistance Program, pursuant to 42 U.S.C. 8629(b); jointly, to the Committees on Education and Labor and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DE LA GARZA: Committee on Agriculture. House Resolution 172. Resolution to recognize the centennial anniversary of the Holstein-Friesian Association of America, a premier dairy cattle breed organization (Rept. No. 99-134 Pt. I). Ordered to be printed.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. GRAY of Pennsylvania: Committee on the Budget. House Concurrent Resolution 152. Concurrent resolution revising the congressional budget for the U.S. Government for the fiscal year 1986 and setting forth the congressional budget for the U.S. Government for the fiscal years 1986, 1987, and 1988; referred to the Committee on Rules for a period ending not later than May 21, 1985, for consideration of such portions of the concurrent resolution as fall within that committee's jurisdiction pursuant to clause 1(q), rule X (Rept. No. 99-133, Pt. I). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

[Omitted from the Record of May 16, 1985]

By Mr. McCAIN:

H.R. 2539. A bill to amend title 18, United States Code, with respect to offenses relating to the sexual exploitation of children, and for other purposes; to the Committee on the Judiciary.

[Submitted May 20, 1985]

By Mr. DASCHLE:

H.R. 2547. A bill to integrate the Hilltop and Gray Goose Irrigation Districts, SD, into the Pick-Sloan Missouri Basin Program; to the Committee on Interior and Insular Affairs.

By Mr. NEAL (for himself, Mr. JONES of North Carolina, Mr. HEFNER, Mr. DUNCAN, Mr. WHITLEY, Mr. VALENTINE, Mr. PERKINS, Mr. TALLON, Mr. BOUCHER, Mr. ROSE, Mr. MCMILLAN, Mr. HENDON, and Mr. COBEY):

H.R. 2548. A bill to amend the Internal Revenue Code of 1954 to provide that the amount of any contribution to any no net cost tobacco fund or any no net cost tobacco account shall be treated as a deductible expense; to the Committee on Ways and Means.

By Mr. SHUMWAY:

H.R. 2549. A bill to amend title IV of the Social Security Act to provide that States which provide aid to dependent children of unemployed parents must require the unemployed parent to participate in a community work experience program; to the Committee on Ways and Means.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

133. By the SPEAKER: Memorial of the House of Representatives of the State of Hawaii, relative to the existence of American prisoners of war in Southeast Asia; to the Committee on Foreign Affairs.

134. Also, memorial of the Legislature of the Territory of Guam, relative to the Small Business Administration; to the Committee on Small Business.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 6: Mr. ROSE.

H.R. 8: Mr. GALLO.

H.R. 44: Mr. SMITH of New Hampshire.

H.R. 84: Mr. MONSON and Mr. SHUMWAY.

H.R. 467: Mr. CLINGER.

H.R. 468: Mr. CLINGER, Mr. CRAIG, Mr. BORSKI, and Mr. GONZALEZ.

H.R. 527: Mr. STANGELAND, Mr. TRAFICANT, and Mr. HUTTO.

H.R. 528: Mr. GEJDENSON.

H.R. 602: Mr. MRAZEK, Mrs. ROUKEMA, Mr. KOLBE, and Mr. KOLTER.

H.R. 644: Mr. MARLENEE, Mr. GROTBERG, and Mr. CLINGER.

H.R. 782: Mr. EDGAR.

H.R. 882: Mr. SABO, Mr. ORTIZ, Mr. BROOKS, and Mr. BRYANT.

H.R. 930: Mr. DEWINE, Mr. BARTON of Texas, and Mr. FROST.

H.R. 1101: Mr. FRANK, Mr. DWYER of New Jersey, Mr. ORTIZ, Mr. BILIRAKIS, Mr. MATSUI, Mr. MURPHY, Mr. BORSKI, and Mr. GONZALEZ.

H.R. 1102: Mr. FRANK, Mr. ORTIZ, Mr. MATSUI, Mr. MURPHY, Mr. BORSKI, and Mr. GONZALEZ.

H.R. 1103: Mr. FRANK, Mr. DWYER of New Jersey, Mr. BILIRAKIS, Mr. MATSUI, Mr. MURPHY, Mr. BORSKI, and Mr. GONZALEZ.

H.R. 1104: Mr. FRANK, Mr. DWYER of New Jersey, Mr. ORTIZ, Mr. MATSUI, Mr. MURPHY, and Mr. BORSKI.

H.R. 1142: Mr. BARTLETT.

H.R. 1154: Mr. CROCKETT, Mr. HEFTEL of Hawaii, and Mr. WEISS.

H.R. 1398: Mr. DYMALLY.

H.R. 1442: Mr. SOLARZ, Mr. BARNES, Mr. FEIGHAN, Mr. GUARINI, Mr. ACKERMAN, and Mr. MANTON.

H.R. 1524: Mr. WOLPE, Mr. DWYER of New Jersey, Ms. KAPTUR, Mr. GONZALEZ, Mrs. COLLINS, Mr. PEASE, Mr. SMITH of Iowa, Mr. RODINO, Mr. OLIN, Mr. MOLLOHAN, Mr. AKAKA, and Mr. ROBINSON.

H.R. 1540: Mr. FRANK, Mr. VENTO, and Mr. FAUNTROY.

H.R. 1550: Mr. GLICKMAN and Mr. RINALDO.

H.R. 1739: Mr. MITCHELL and Mr. STAGGERS.

H.R. 1811: Mr. MONTGOMERY, Mr. RALPH M. HALL, Mr. BARTON of Texas, and Mr. SKEEN.

H.R. 1812: Mr. GRAY of Pennsylvania, Mr. MINETA, and Mr. VALENTINE.

H.R. 1877: Mr. KOSTMAYER, Mr. LANTOS, Mr. ROE, Mrs. BURTON of California, Mr. BOLAND, Mr. FAUNTROY, Mr. LEVINE of California, Mr. LEHMAN of Florida, Mr. FRANK, Mr. MRAZEK, Mr. TOWNS, Ms. KAPTUR, Mr. EDWARDS of California, Mr. JEFFORDS, Mr. HAYES, Mr. YOUNG of Missouri, Mr. AKAKA, Mr. KOLTER, Mr. BATES, Mr. MARTINEZ, Mr. HEFTEL of Hawaii, Mr. BERMAN, Mr. YATRON, Mr. GUARINI, Mr. STUDDS, and Mr. WEISS.

H.R. 1878: Mr. O'BRIEN.

H.R. 1879: Ms. KAPTUR.

H.R. 1927: Mr. EVANS of Illinois.

H.R. 1935: Mr. KASTENMEIER, Mr. PARRIS, Mr. WHITEHURST, Mr. MARTINEZ, Mr. FAUNTROY, Mr. BARNES, Mr. MURPHY, Mrs. BURTON of California, Mr. VENTO, Mrs. BENTLEY, Mr. MOAKLEY, Mr. FISH, Ms. KAPTUR, Ms. SNOWE, and Mr. PORTER.

H.R. 2032: Mr. FROST, Mr. MARTINEZ, and Mr. MORRISON of Connecticut.

SENATE—*Monday, May 20, 1985*

(Legislative day of Monday, April 15, 1985)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Our prayer today is the hymn entitled "National Hymn" by George William Warren, written in 1892:

"God of our fathers, whose almighty hand Leads forth in beauty all the starry band Of shining worlds in splendor through the skies, Our grateful songs before Thy throne arise.

"Thy love divine hath led us in the past; In this free land by Thee our lot is cast; Be Thou our Ruler, Guardian, Guide and Stay; Thy word our law, Thy paths our chosen way.

"From war's alarms, from deadly pestilence, Be Thy strong arm our ever sure defense; Thy true religion in our hearts increase, Thy bounteous goodness nourish us in peace.

"Refresh Thy people on their toilsome way, Lead us from night to never ending day; Fill all our lives with love and grace divine, And glory, laud, and praise be ever Thine." Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each, to be followed by special orders in favor of Senators PRESSLER and PROXMIRE.

Mr. President, I ask unanimous consent that the special order in favor of Mr. PRESSLER be vitiated.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DOLE. Following that, there will be a period for routine morning business with statements limited therein to 5 minutes each. After the period for routine morning business has expired the Senate will resume consideration of S. 1160, the Department of Defense authorization bill. It has been announced that there will be no rollcall votes today prior to 5 p.m.

I hope we will also be able to consider the Israel free trade area agreement (S. 1114) which was unanimously reported by the Finance Committee.

It is my understanding that Senator GOLDWATER very much would like to finish action on the DOD bill this week. Based on his willingness to pursue that policy we can expect fairly early mornings and probably late evenings.

The last time I visited the chairman of the Committee on Armed Services it was his hope and intention to try to complete action by Friday of this week, before the Memorial Day recess period. So I would urge Members who have amendments to be in touch with the managers on each side and, if possible, if Senators could reach some time agreement, time agreements are encouraged.

It would be most helpful if we could work out time agreements on matters that have been fairly well debated, whether it be SDI, MX, or some other proposal. It would seem to me, if we could work out some time agreements, we could take action on the amendments surely in fairly rapid fashion.

Mr. President, I reserve the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The distinguished Democratic leader is recognized.

Mr. BYRD. Mr. President, I thank the Chair, the distinguished President pro tempore.

LEADERSHIP OF SENATOR DOLE

Mr. BYRD. Mr. President, there is an excellent article in today's Washington Post commenting on the leadership of Mr. DOLE, especially with reference to his work in connection with the recently adopted first concurrent budget resolution by the Senate. It is a very good article by Helen Dewar, and it pays deserved compliments to Mr. DOLE. I ask unanimous consent that I may insert that statement in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 20, 1985]

DOLE RIDES HIGH AFTER BUDGET VICTORY

(By Helen Dewar)

It was the kind of political high-wire act the Washinton loves but rarely sees: a brazen wave to the crowd, then a series of nerve-jangling wobbles and finally a safe landing for the star performer.

For four months, Senate Majority Leader Robert J. Dole (R-Kan.) kept the town in suspense as he tried—often with more grit than grace—to patch together a huge package of spending reductions that would cut deficits by half within three years without raising taxes.

The White House had tried and failed at the task; the Democrats showed no interest in trying. In his first few months as leader of Senate Republicans, Dole was still in job-training and had a mixed record, ranging from a victory on the MX missile to a rebuff from his troops on emergency farm-credit legislation.

But, from the start, the deficit-reduction effort was clearly going to be an early make-or-break test of Dole's leadership skills, made all the more dramatic by the bravado with which he launched the effort from the steps of Blair House before President Reagan finished writing his budget proposal.

It was a gamble, Dole concedes, and he was not always as certain of vindication as he appeared in public.

He knew he got off to a bad start when the Republicans promised a deficit plan by Feb. 1 and soon missed the deadline. His efforts to reach an early consensus among committee chairmen fizzled in full public view. When he then turned to the Budget Committee to draft a plan, the White House stomped all over the results. There were backroom sessions in which Republican senators were all but throwing erasers at one another.

Dole began to have at least fleeting thoughts of what it would be like to try to repair the damage from defeat.

"I could see the epitaph: 'Here lies the leader who lasted only three months,'" he said in a recent interview. He laughed but added more seriously that it would have been a "lonely six months of rebuilding" if he had failed.

However, a week ago, after a grueling trial-and-error exercise that often seemed to teeter on the brink of failure, Dole's painstaking effort paid off—barely. Sen. Pete Wilson (R-Calif.), hospitalized for a ruptured appendix, was wheeled into the chamber, setting up a 49-to-49 tie vote that Vice President Bush broke in favor of the plan.

Shaky as it was, even Democrats credited passage as an extraordinary accomplishment in light of the difficulties that had been surmounted, ranging from White House reluctance to tamper with Social Security or its defense buildup to the parochial concerns of Dole's troops, especially the 22 Republicans whose seats are up for election next year.

"I give him high marks . . . there's nothing quite like success," said Sen. Lawton Chiles (Fla.), ranking Democrat on the Senate Budget Committee, who had been standing by with his own plan, ready to pick up the pieces if Dole crashed.

In the process of finding a Senate consensus on spending cuts, the Dole-led Republican majority in the Senate moved further—

and more aggressively—away from White House policies than it had done under Dole's popular but less daring predecessor as majority leader, Howard H. Baker Jr. (R-Tenn.), who has retired from the Senate.

Dole and other GOP leaders persuaded Reagan to accept not only Social Security benefit limits he had vowed never to embrace but also a major cutback in his high-priority defense buildup, concessions that rivaled any that the president made in his first term.

Dole avoided an open break with the White House largely by getting the president's lieutenants to sit down in his own office to hear about problems he faced. "We did everything we could . . . and the president knew no one up here was playing games," Dole said.

With the outcome apparently hinging on a variety of concessions, especially the defense cutback, "Dole was saying in effect, 'Mr. President, we're going to make you an offer you can't refuse,' " said Sen. Bob Packwood (R-Ore.), Dole's successor as chairman of the Senate Finance Committee.

Packwood, who is close to Dole and Baker, draws this distinction between the two: "Howard regarded himself as the president's liege, Bob regards himself as leader of Senate Republicans. And there's a big difference."

The victory, no matter how narrow, clearly enhanced Dole's clout within the Senate in a way that could help him in legislative battles ahead, according to senators of both parties.

The victory, however, was won not with the fast quips and virtuoso maneuvers that have marked Dole's public image.

Instead, it was won unglamorously, in the trenches—in more than 100 private negotiating sessions, in parliamentary maneuvers that proved a match for Minority Leader Robert C. Byrd (D-W.Va.) and his renowned procedural skills, and with constantly shifting tactics that, in the process of skirting deadlock, wore down the opposition and created a sense of inevitability about passage.

It was also done in concert with Budget Committee Chairman Pete V. Domenici (R-N.M.), a rival for the majority leader's post who tangled over turf with Dole, then finance chairman, during previous budget battles. With Domenici's facts and figures and Dole's relentless pressure, "it was a formidable combination," said a Republican who had received the full Dole-Domenici treatment.

During the bargaining sessions, sometimes six to eight a day, often overlapping, Dole coaxed, wheedled and massaged his colleagues, individually and collectively, and cut deals in which money was restored to favored programs in exchange for votes. Sen. Edward Zorinsky (Neb.), the lone Democrat to support Dole's plan, said his vote helped produce a couple of billion dollars more for farm programs. Republicans got money for everything from Amtrak to Urban Development Action Grants; for some, Dole agreed to introduce amendments that he adamantly opposed, in hopes of winning their support in the end.

Roll was taken at the meetings, and absentees were rounded up. There were meetings for senators who refused to attend other meetings. When one senator complained that he had not been consulted, he was quickly told that he had been invited to 15 meetings and attended four. Only half facetiously, another senator said he was convinced that some of his colleagues agreed to go along with Dole simply to avoid having to attend any more meetings.

Baker, too, was a patient man with a collegial approach to leadership. But Dole, as stubborn as he is patient, appears more inclined to stick it out until he gets his way, shifting strategy as he goes but never losing sight of his goal.

"If nothing else, he's shown everyone that he can outlast them," a Democrat said. "That goes a long way around here."

Although it may bring them grief on Social Security, the plan bought Senate Republicans—who face a tough 1988 election—an insurance policy against economic adversity by enabling them to claim that they had voted to curb one of the major causes of high interest rates, inflation, unemployment, trade imbalances and other economic ills.

Moreover, victory was achieved without pressing the shakiest of the troops to the wall. For instance, it is thought to be no coincidence that the hair-thin margin of victory was engineered without need of a favorable vote from Sen. Paula Hawkins (R-Fla.), whose reelection is in such doubt that a vote to limit Social Security benefits as part of the package could have doomed her chances.

But it is less clear whether the victory has accomplished similar wonders for Dole as a possible contender for the 1988 Republican presidential nomination.

Hampered by an earlier reputation as a hatchetman and by a more recent image as a moderate pragmatist swimming against a tide of ideological conservatism within his party (he's been called "tax collector for the welfare state" by one of the young House conservatives), Dole has nonetheless made no secret of his presidential ambitions. And, at age 61, he may be running out of time to fulfill them.

Several political strategists, none of them serving Dole at the moment, suggested that his national reputation was helped, but not decisively, by his budget victory.

Meanwhile, Dole faces problems in the Senate, ranging from fending off further concessions in negotiating final deficit reductions with the Democratic-controlled House to keeping the Senate in GOP hands next year.

But, for the time being, he is riding high, shuttling around town to share his joy with just about anyone who will listen. As he said at a low point in the deficit struggle, "On the whole, I prefer winning."

Mr. DOMENICI. Mr. President, I wonder if the distinguished majority leader will yield 1 minute to the Senator from New Mexico.

Mr. DOLE. I am pleased to yield 1 minute.

FIRST CONCURRENT BUDGET RESOLUTION

Mr. DOMENICI. Mr. President, 1 week ago last Thursday night this Chamber adopted what I consider to be a most historic resolution—the first resolution on the budget for fiscal year 1986. Since that time a number of journalists and editorial writers have commented very favorably on the courage exhibited in that 50 to 49 vote.

As all Members know, a budget resolution is a set of numbers aggregated by broad functional categories. Reconciliation savings in a resolution are similarly aggregated by the appropriate committees of jurisdiction. In developing those numbers, however, assumptions are made as to how the figures could be met. Assumptions are not binding in a resolution, but the final numbers are.

Since a number of my colleagues have requested the assumptions that were used in developing the resolution, I have asked the Budget Committee staff to prepare a set of tables that outline these assumptions, including the final figures that have been updated for some technical corrections which they were authorized to make.

Mr. President, I ask unanimous consent to insert in the RECORD three sets of tables. These are: First, aggregate functional totals, second, narrative description of major assumptions in the resolution, and third, summary of reconciliation savings with assumptions by Senate committee.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

FIRST BUDGET RESOLUTION FOR FISCAL YEAR 1986, SENATE CONCURRENT RESOLUTION 32, AS PASSED BY THE SENATE

[In billions of dollars]

	Fiscal year—			
	1985	1986	1987	1988
050: National defense:

[Summary of Major Provisions and Assumptions, Senate Concurrent Resolution 32]

FIRST CONCURRENT RESOLUTION ON THE BUDGET, FISCAL YEAR 1986

(Senate-passed May 10, 1985)

FUNCTION 050—NATIONAL DEFENSE

Provide for real growth in defense spending of 0, 3, and 3 percent for the years FY 1986–1988 respectively.

Growth is based on OMB economic assumptions, consistent with the overall resolution.

Assume full funding for President's strategic program request and support of major conventional programs.

Savings would be achieved from slowing growth of troubled weapon systems, various non-major weapon systems' procurement accounts, and other accounts.

FUNCTION 150—INTERNATIONAL AFFAIRS

Terminate Eximbank direct loan program.

Provide $175 million each FY 1986–88 for a larger and more flexible interest rate buy down than the I-Match program originally proposed by the President.

Allow an increase of $200 million in FY 1986 BA above the level reported by the Foreign Relations Committee on foreign aid.

FUNCTION 250—GENERAL SCIENCE, SPACE AND TECHNOLOGY

For FY 1986 all programs in function frozen at their FY 1985 program level.

After FY 1986 funding increases based on projected inflation. Major programs in function include: National Science Foundation, National Aeronautics and Space Administration, and Department of Energy general science program.

FUNCTION 270—ENERGY

Reduce REA electric loan levels by $550 million in FY 1985 and 1986; $600 million in FY 1987 and $650 million in FY 1988.

Reduce funding for fossil energy research and development by 11 percent in FY 1986, adjusted for inflation FY 1987–88.

Reduce funding for energy supply research and development by 6 percent in FY 1986, adjusted for inflation thereafter.

Reduce funding for energy conservation by 14 percent in FY 1986, adjusted for inflation FY 1987–88.

Reform the uranium enrichment program so as to limit appropriations to level of revenues received from uranium enrichment sales, and accelerate payment of DOE obligation to Treasury for the government's prior investment in the enrichment enterprise.

Impose a 3-year moratorium on strategic petroleum reserves; continue operation and maintenance funding.

FUNCTION 300—NATURAL RESOURCES AND ENVIRONMENT

Reduce funding for discretionary public land purchases by 42 percent in FY 1986, adjust for inflation thereafter.

Reduce funding for soil and water conservation by 15 percent over FY 1986–1988.

Reduce funding for water project construction; operation, and maintenance by 6 percent in FY 1986.

Reduce funding for BLM and Forest Service programs by 7 percent over FY 1986–1988.

Reduce funding for National Park Service operation and construction by 16 percent over FY 1986–1988.

Initiate recreation user fees.

FUNCTION 350—AGRICULTURE

Freeze agriculture research, extension, and funding for agriculture services in FY 1986 at FY 1985 levels, adjust for inflation thereafter.

Reform farm price support programs to achieve savings of $0.5 billion in FY 1986, $1.1 billion in FY 1987, and $3.9 billion in FY 1988.

Phase out direct farm loans over a five year period; increase guaranteed loan levels to maintain a $4.0 billion per year package of loans. Institute an interest rate buy down program with statuatory limit of $240 million over FY 1986–1988.

Eliminate emergency disaster loans in areas served by federally subsidized crop insurance.

FUNCTION 370—COMMERCE AND HOUSING CREDIT

Retain the SBA and certain loan programs but reduce direct loans 70 percent from the FY 1985 level and reform the loan guarantee program.

Retain the Farmers Home Administration rural housing program but reduce the program level by more than half. Fund about 35,000 single family homeownership and rental housing units; and provide additional rural housing assistance through HUD.

Reduce appropriations for postal subsidies but continue reduced rates for most mailers now eligible including small newspapers, nonprofit organizations and other mailers as well as free mail for the blind and handicapped.

Eliminate the U.S. Travel and Tourism Administration.

Eliminate trade adjustment assistance provided to firms by the International Trade Administration.

End promotion of fishery products by NOAA.

FUNCTION 400—TRANSPORTATION

Reduce urban mass transit operating subsidies by 20 percent in FY 1986, and frozen at this reduced level thereafter. Transit capital programs are reduced from the current available level of $2.7 billion to $1.7 billion by FY 1988.

Reduce Amtrak by 12.5 percent in FY 1986, 25 percent in FY 1987 and 40 percent in FY 1988: Savings of $0.6 billion over the next three years.

Reduce aviation research, development, facilities and equipment funding.

Allow for pay back of ship construction differential subsidies.

Sell Conrail.

Reduce federal-aid highway obligations from enactment of S. 391, the interstate cost estimate (ICE) bill, and hold highway obligations at the FY 1985 level in FY 1987 and FY 1988.

Eliminate the Local Rail Service Assistance Program, the United States Railway Association, and the Northeast Corridor Improvement Project.

Levy Coast Guard user fees, yielding $150 million in annual receipts.

Freeze air carrier subsidies.

FUNCTION 450—COMMUNITY AND REGIONAL DEVELOPMENT

Reduce community development block grants (CDBG) by 10 percent.

Reduce urban development action grants by 20 percent in FY 1986 and terminate them in FY 1987; terminate the CDBG loan guarantee program and section 312 rehabilitation loans.

Terminate rental development grants; impose a two-year moratorium on rental rehabilitation grants.

Terminate Economic Development Administration and Appalachian Regional Commission.

Freeze loan volume for the rural telephone bank at the FY 1985 level.

Reduce the funding for TVA development programs and the Bureau of Indian Affairs.

Terminate SBA disaster assistance to farmers and the non-physical disaster loan program.

FUNCTION 500—EDUCATION, TRAINING, EMPLOYMENT AND SOCIAL SERVICES

Reduce funding for impact aid, Part B.

Freeze elementary and secondary education programs.

Reduce guaranteed student loans resulting in savings of $200 million in FY 1986, about one-half the President's request. Savings could be achieved through reduction in subsidies to lender banks.

Terminate work incentive program.

Reform the employment service.

Freeze support for cultural activities.

Reduce funding for the community services block grant in 1986, terminate thereafter.

Reduce funding for Job Corps by 30 percent.

Increase funding for programs for the disabled.

FUNCTION 550—HEALTH

Assume $1.2 billion in medicaid savings during FY 1986–1988. The savings do not assume a cap on federal medicaid payments to states.

Reduce new and competing NIH awards to 6,000 per year.

Reform federal employees health benefits program and require DC government to pay the employers share for their retirees.

FUNCTION 570—MEDICAL INSURANCE

Freeze medicare payments to hospitals and some doctors and clinical labs at their current levels in FY 1986. Payments to other smaller providers would be frozen or reformed.

Reduce by half medicare adjustment paid to teaching hospitals.

Extend the "working elderly" provisions adopted in 1982, allowing employers to provide their health insurance as primary coverage (medicare secondary) for workers 65–69.

Assume additional unspecified savings of $2.8 billion over the next three years. These savings could be achieved by increases in beneficiary cost sharing, premiums or other reforms.

FUNCTION 600—INCOME SECURITY

One year COLA freeze in FY 1986 for railroad retirement, federal civilian and military retirement, and related programs.

Increase supplemental security income benefits by $10 per month for individuals and $15 per month for couples.

Increase PBGC insurance premiums to ensure trust fund solvency.

Reform railroad retirement by applying the rules for taxing social security benefits only to those railroad retirement benefits that are equivalent to social security benefits; extend the regular state-federal unemployment system to railroad workers.

Reform federal civilian retirement by increasing employee contributions from 7 percent to 9 percent in 1987 and beyond and by increasing the contribution made by the Postal Service and the District of Columbia.

Reform military retirement to allow and encourage some members of the armed forces to stay in the service longer.

Eliminate annual payments for certain public housing projects as a result of debt forgiveness.

Reduce public housing operating subsidies.

Reform the food stamp program by strengthening work requirements for recipients and by providing a block grant at the FY 1985 level of funding for state food stamp administrative expenses.

Achieve saving in child nutrition program of about $1.2 billion, FY 1986–1988.

FUNCTION 650—SOCIAL SECURITY

One year COLA freeze in FY 1986.

Improve administration of social security program by increasing automation and other management improvements.

FUNCTION 700—VETERANS' BENEFITS AND SERVICES

Freeze for one-year COLA adjustment for veterans compensation and pension programs.

Reform eligibility for free VA hospital and medical care through the imposition of a means test for non-service connected veterans regardless of age.

Allow third-party reimbursement to the VA for the cost of care provided to privately insured veterans.

Increased VA housing loan origination fee from one to 3.8 percent over a 5 year period.

Reduce funding for remaining discretionary VA programs to the level of the President's request.

FUNCTION 750—ADMINISTRATION OF JUSTICE

Freeze all discretionary appropriated accounts in the function.

FUNCTION 800—GENERAL GOVERNMENT

Levy user fees on operations of the U.S Customs Service.

Require government-sponsored credit agencies to pay a fee to the Treasury when borrowing or issuing pass-through securities.

Reduce operations of the legislative branch by 10 percent.

FUNCTION 850—GENERAL PURPOSE FISCAL ASSISTANCE

Fully fund general revenue sharing in FY 1986 and terminate it in FY 1987.

FUNCTION 900—NET INTEREST

Adjusted to reflect savings in all other functions.

FUNCTION 920—ALLOWANCES

Freeze federal civilian and military pay for one year in FY 1986.

Achieve savings through management and workforce reform to include: Reduce the workforce by 44,000 positions through attrition, 10 percent reduction in administrative expenses, one-year delay in in-grade pay increases, and make permanent existing annual work hour calculation.

FUNCTION 950—UNDISTRIBUTED OFFSETTING RECEIPTS

Adjusted to reflect policy changes in other functions: primarily loss of receipts from freeze on federal pay.

REVENUES

Adjusted to reflect policy changes in other functions but no tax increases.

Mr. DOMENICI. Mr. President, I yield the floor.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER (Mr. HECHT). Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

A DIFFERENT LESSON FROM BITBURG

Mr. PROXMIRE. Mr. President, there was more than one message that emerged from President Reagan's recent trip to Europe and especially to Germany. There was the appalling failure by our President to recognize the overwhelming contrast between the deliberately calculated extermination of European Jewry by Adolf Hitler and his forces on the one hand, and on the other, the death in battle of the Nazi troops that had so fanatically supported their Fuhrer.

That was a failure the world noticed. There was another failure of memory that escaped notice. It was the failure to face the terrible tragedy of World War II itself, the tens of millions of people killed, and the utter destruction of the lives of so many others. Consider: This was the 40th anniversary of the end of World War II in Europe. Why is our memory today of that most terrible of wars so critical? There has never been another example of the absolute insanity of war. As that remarkable first woman Member of Congress, Jeannette Rankin, said, "No one wins a war, any more than anyone wins an earthquake."

But Pulitzer Prize winner Studs Terkel entitled his book, "The Good War." How about that? Was World War II really "The Good War"? If ever there was a war in which the forces of freedom opposed the forces of evil, it was World War II. Hitler, Mussolini and Tojo represented unmitigated, arrogant evil. From the standpoint of America, World War II was a noble struggle for a decent as well as a peaceful world.

So what was the big lesson we should have learned from World War II? The answer is not as easy to understand for this victorious country that survived with its native land untouched, and with its heartbreaking casualties confined largely to brave young soldiers on the field of battle. The lesson we should learn is the absolute, unmitigated, total failure which modern war represents. World War II was fought in Europe without nuclear weapons. But in England, France, Germany, Italy, and Russia, the devastation was overwhelming. It was sickening. It was very similar to the destruction left by nuclear weapons. And the human slaughter was enormous—in the tens of millions. Certainly we should take from that memory of World War II for all of our lives the memory of the hideousness of war.

Oh, how we need that memory of war's utter inhumanity. Somehow the experience of war in one generation after another does not seem to overcome the forces of chauvinism and price and selfishness that drives this country we love to the brink of war in the Middle East, in Central America, and elsewhere. The searing memories of World War II were refreshed for many Americans with our President's trip to Europe this spring. But they mostly seemed to be romantic and nostalgic.

Fortunately, many of us were reminded of the ferocious inhumanity of Hitler's Holocaust against the Jews. We should have been. That is a memory we should never allow to grow dim. More than that, this Senate should ratify the Genocide Convention with full World Court jurisdiction over the United States. That kind of ratification would show we really mean business about doing something truly effective and useful in honor of Anne Frank and the millions of other Holocaust martyrs who perished at the hands of Hitler's Nazis.

But in this 40th year since the end of history's most terrible war, we should keep the memory of the full agony of that war alive. In that memory, we should work for peace with all our heart. And what does that mean? It means that we stop the nuclear arms race. No, we cannot stop it unilaterally. We don't live in that kind of world. Our adversary is the Soviet Union. Its leader is Gorbachev, not Martin Luther King, but not Hitler, either. Mr. Gorbachev is likely to be the Russian leader for many years. He will have time to consolidate his power. He may or may not be willing to negotiate a mutual, verifiable, and comprehensive treaty which would stop the arms race. But we should put him to the test. We know his country has everything to gain from such a treaty, just as we know our Nation has everything to gain from stopping the arms race.

In this 40th year since the end of the most terrible war in the Earth's history, in this 40th year since the advent of nuclear weapons as the ultimate catastrophic instrument of a superpower war, we should look squarely at the horror and misery of World War II. We should resolve that such a catastrophe will never happen again. We should move with all our heart to make that possible by ending the nuclear arms race.

A PHYSICAL SYMBOL

Mr. PROXMIRE. Mr. President, the Washington Post of Saturday, May 11, carried an article on the progress of plans for the proposed United States

Holocaust Memorial Museum. On May 10, the preliminary architectural design plans were unveiled at a House appropriations subcommittee hearing. These plans indicate that the architects are having difficulty in meeting the highly sensitive and different objectives of the project. The building must serve simultaneously as both a symbol and a functional structure.

As the article reports, "The building is to be at once a memorial, a museum, and a learning center with significant archival holdings for scholars as well as innovative educational programs for lay persons of all ages."

The memorial will be located between 14th and 15th Streets south of Independence Avenue. Since it is located near the Mall, the Holocaust Memorial must not clash architectually with the Lincoln Memorial, Washington Monument, or any of the museums nearby.

But, more important, the memorial must first and foremost serve as a tool for educating people of the horrors of the Holocaust so that such outrageous events never happen again.

While building a physical structure is necessary, good and important, such an act by itself is not sufficient to show the world our commitment to ending genocide. Senate action on the Genocide Convention would be such a positive move in the right direction. We must give our mark of approval and place the U.S. name among those nations which have already signed the Genocide Convention. Mr. President, the time is now, more than ever, for the Senate to ratify the Genocide Convention.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond 11 a.m., with statements therein limited to 5 minutes each.

NATIONAL TOURISM WEEK

Mr. INOUYE. Mr. President, for the second consecutive year Congress has designated the week beginning May 19, 1985, as National Tourism Week, and the President has issued a proclamation accordingly.

On this occasion last year I said that it was the men and women in the travel industry who should be recognized during National Tourism Week, and it is their effort which should be celebrated. One of the most significant reasons that Congress is beginning to appreciate the importance of tourism is because the industry has succeeded in making us aware of how much it means to our national welfare.

On several occasions the diverse segments of this industry have been willing to subordinate their individual concerns, and unite for the common good. I would like to cite two very significant instances where this has occurred, and the national interest has benefited as a consequence.

First, there was the international marketing plan developed by a highly prestigious industry committee under the aegis of the Travel Industry Association of America, and presented to the Secretary of Commerce, the United States Travel and Tourism Administration, and the Office of Management and Budget on August 14, 1984.

That plan was developed at no cost to the Government, and conservative estimates place the cost to the industry at $500,000. It was the industry's response to OMB's suggestion that a comprehensive marketing plan, identifying appropriate roles for Government and the private sector, would aid USTTA significantly when the agency made its budget recommendations.

In my judgment, the industry response was most unique and commendable. Usually, it is an agency of Government which expends Federal funds to assist an industry. Just the opposite occurred here, however.

Mr. President, because that effort typifies this new found industry unity, I believe it would be instructive and worthwhile to review briefly its history.

In 1983, the Travel Industry Association of America organized an international marketing plan development committee to develop the kind of marketing plan for USTTA that had been suggested by OMB.

That industry committee, made up of top international marketing executives from all segments of the U.S. travel and tourism industry, devoted a full year to examining the international tourism market. Particular emphasis was placed on: Increasing competition between governments for international visitors, the historic and likely future performance of the United States in international tourism trade, and strategies available to begin returning the United States to its previously held competitive position.

Task forces of the committee circled the globe to visit seven key markets to determine the best approach for the United States to take in improving its competitive position in international tourism trade and how the private sector could make a greater contribution to a unified national effort. The countries visited were: Canada, Mexico, Japan, West Germany, France, London, and the Netherlands.

Mr. President, I ask unanimous consent that the biographical sketches of the members of that blue ribbon panel be inserted in the RECORD at the conclusion of my remarks.

The administration's response to that monumental effort by some of the best marketing talent in the world was a rescission message to Congress proposing to reduce USTTA's budget for fiscal year 1985 by one third; and another proposal to terminate the agency by the end of fiscal year 1986.

Mr. President, I can understand those who feel that the administration's recommendations are not responsive to the industry's good faith effort to form a public-private partnership and to provide a comprehensive plan for renewed U.S. competitiveness in global tourism trade.

But Congress did not agree to the President's rescission message, and I am reasonably confident we will insist that USTTA remain in business. The industry's strong opposition to what the administration proposed has been most persuasive in Congress. And that is the second instance I had in mind where the travel industry has united for its common good and the national interest.

Mr. President, I do not want to give the impression that the industry is united on all issues, or that Congress fully appreciates the importance of the industry. Manifestly this is not the case. But the seeds have been sown; and from what I have seen over the past 10 years the travel industry will work diligently and unselfishly to ensure that those seeds bear fruit. And so once again may I suggest that during National Tourism Week we honor the millions of men, women, and teenagers who are the U.S. tourism industry.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

INTERNATIONAL MARKETING PLAN DEVELOPMENT COMMITTEE

J. KAY ALDOUS

Vice President-Public and Government Policy, American Automobile Association.

J. Kay Aldous has been Vice President of Public and Government Policy of the American Automobile Association since July 1978. He first served AAA as Director of Public Relations from April 1968 until December 1973, when he was appointed Managing Director, Public Affairs Division. In July 1977, Mr. Aldous was named Managing Director of Public and Government Policy.

Mr. Aldous is now responsible for the Departments of Public Affairs, Public Relations, Publications, Government Affairs, Legislative Affairs, Traffic Safety, Highway Transportation and Environment and Energy. He is also the publisher of AAA World magazine.

Before joining AAA, Mr. Aldous served from 1962 to 1968 as Director of Public Relations, Advertising and Sales Promotion for American Newspaper Representatives, Inc. (ANR) in New York City.

A veteran journalist, he served as Editor-General Manager of Suburban Newspapers in Salt Lake City, Utah, and as a columnist and sportswriter with the Deseret News-Salt Lake Telegram.

Kay Aldous earned a B.S. degree in Journalism from the University of Utah.

ROGER H. BALLOU

Senior Vice President-Vacation and Leisure Travel, American Express Company.

Roger H. Ballou came to American Express from Citibank in 1979, where he managed outside sales forces, developed and implemented business and marketing plans, and structured call programs, direct mail, and advertising support.

Mr. Ballou's first position at the Travel Division of American Express was as Regional Vice President, Destination Services. A year later, he assumed control of Travel Products Marketing with responsibility for vacations for U.S. citizens. Mr. Ballou's responsibilities changed again in January 1981 to include Destination Services Marketing—concentrating on inbound travel for foreign citizens. In October 1981 he became responsible for the Worldwide Representative Program, U.S. Supplier Management and Negotiations, Industry Relations and Retail Marketing.

Mr. Ballou was promoted to his present post in 1983. He is responsible for product development, marketing and profitable operation of the U.S. vacation stores, Travel Products Marketing and Representative Program.

He received his MBA from the Amos Tuck School of Business Administration at Dartmouth College in 1975. His undergraduate work was completed at the Wharton School, University of Pennsylvania.

WILLIAM L. BLAZIEK

Senior Vice President-Sales and Marketing, Resorts International Casino Hotel.

Mr. Blaziek joined Resorts International Casino Hotel in 1982 as Senior Vice President of Sales and Marketing.

A 14-year veteran of hotel and casino marketing, Blaziek was formerly vice president of sales and marketing for Del Webb Hotels in Las Vagas, Nevada. During his tenure with Webb, Blaziek served as director of sales and marketing for Webb Properties in Nevada, California, Hawaii and Arizona.

Mr. Blaziek takes an active role in helping to guide the growing resort and tourism industry in the Garden State. He serves on the Southern New Jersey Development Council, the New Jersey and Greater Atlantic City Tourism Council and the Atlantic City Convention and Tourism Marketing Committee.

He is also a member of the Hotel Sales Management Association, the International Society of Incentive Travel Executives, the National Association of Exposition Managers, the American Society of Association Executives and Meeting Planners International.

Mr. Blaziek was a commissioned officer during the Vietnam conflict. He was educated at Washington State University and California State University.

CHRISTOPHER C. BROWNE

Senior Vice President/Managing, Director-Systems Hotels, Holiday Inns, Inc.

Christopher C. Browne is Senior Vice President and Managing Director of System Hotels for Holiday Inns, Inc.

Mr. Browne joined Holiday Inns, Inc. in 1978 and has served as Senior Vice President of Marketing, as well as Director and Vice President of National Advertising and Promotions. From 1974 to 1978, he was Divisional Marketing Director for Burger King.

Mr. Browne gained valuable marketing experience prior to joining the restaurant chain, serving as Account Executive with two of the nation's top advertising agencies. At BBDO International, Inc., he worked on the Burger King account, and before that worked for Young & Rubicam, Inc., New York. He also served as Assistant Brand Manager with Johnson & Johnson.

Mr. Browne has also been active in the travel industry as part-owner of Voyager Travel, an incentive travel agency.

Born in Washington, DC, Mr. Browne holds an MBA from the University of Chicago and a BS in mathematics and economics from Florida State University.

JAMES C. COLLINS

Senior Vice President-Marketing, Hilton Hotels Corporation.

James C. Collins was elected to his present position as Senior Vice President-Marketing for Hilton Hotels Corporation in August, 1977. He is responsible for the corporation's sales, advertising, public relations, and marketing research efforts affecting both domestic properties and those of the company's international subsidiary, Conrad International Hotels. In addition, he is senior vice president of marketing for Hilton Inns, Inc., Hilton's franchise division.

A native of Chicago, Collins joined Hilton in 1945, following military service, as Assistant Manager of the exhibit hall at the Conrad Hilton in Chicago. After progressing through the hotel sales staff, he joined the corporate sales staff in 1957 as Assistant to the General Sales Manager.

In 1962 Collins was appointed National Sales and Convention Manager and the following year was elected Assistant Vice President; two years later he was elected Vice President-Sales.

Mr. Collins is a member of the Board of Directors of various Hilton subsidiaries including Hilton Inns, Inc.; Hilton Service Corporation, and Compass Computer Services. He is also active in numerous industry organizations, including the Travel Industry Association of America (Chairman—International Committee and International Marketing Plan Development Committee); the American Society of Association Executives (member-Board of Directors); Convention Liaison Council (Chairman); Institute of Certified Travel Agents (Fellow); American Society of Travel Agents (member-Allied Committee); Hotel Sales Management Association (member-Industry Advisory Council); and the American Hotel and Motel Association (Vice Chairman-Marketing Committee).

GORDON L. DOWNING

Vice President-General Sales, National Car Rental System, Inc.

Gordon L. Downing is responsible for National Car Rental System's commercial, agency, association and trade advertising.

Mr. Downing joined National Car Rental System, Inc. as a sales representative in 1969 and has steadily progressed to his current position as Vice President-General Sales, which he assumed in 1982. He also served as District Sales Manager; Regional Sales Manager; Manager of Agency and Interline; Director of Agency and Interline; and Divisional Vice President, Travel Industry and International Sales.

Mr. Downing attended El Camino College in California, where he received an Associate Arts Degree in Business Administration and a scholarship to Pasadena Playhouse in Dramatic Arts. He has participated in professional programs offered by the American Management Association, University of Minnesota, and Yale University for Strategic Planning for International Marketing, Sales and Advertising.

Mr. Downing serves on a number of industry committees including ASTA Allied Council, Convention Liaison Council, TIA International Committee, International Marketing Plan Development Committee, and the CREST (Creative Retailer Excellence in selling Travel) Award Committee. Most recently, Downing was appointed Area Director of the Travel Industry Association of America.

WILLIAM H. EDWARDS

President, Hilton Hotels Division, Hilton Hotels Corporation. Ex Officio Member of the International Marketing Plan Development Committee.

William H. Edwards' career at Hilton Hotels and in the travel industry is marked with achievement.

During the development of the International Marketing Plan, Mr. Edwards served as TIA's National Chairman.

His hotel career began as an Assistant Manager at the Grand Hotel on Mackinac Island, Michigan. He has since served with Hilton Hotels Corporation in many managerial and executive positions at properties in Detroit and Chicago, including Vice President and General Manager of Chicago's Palmer House.

He was elected Vice President of Hilton Hotels Corporation, supervising the Chicago Division, in 1968. He was elected Senior Vice President, Hilton Hotels Corporation in 1970, and Executive Vice President-Operations in 1971, when he was elected to the Board of Directors and Executive Committee. Mr. Edwards was elected President of Hilton Hotels Division in 1978.

He has held many key posts within the hotel and tourism industry and has received numerous awards and honors.

Mr. Edwards is Co-Chairman of the 1984 Olympics Hotel and Housing Advisory Committee.

NEIL M. EFFMAN

Senior Vice President-Marketing and Planning, Trans World Airlines.

Neil M. Effman was named senior Vice President-Marketing and Planning for Trans World Airlines in 1981 following more than two decades of experience with the airline industry.

Mr. Effman is responsible for strategic planning, product development and quality control through the functions of forecasting, scheduling, pricing, passenger services, marketing and advertising, and government affairs.

In 1958, Mr. Effman joined TWA as an analyst in the forecasting department. He later became Manager-Traffic and Revenue Analysis, Director-Route Structure Research, and Director-Passenger Strategy Planning.

Named Staff Vice President-Marketing Planning and Forecasting in 1970, he became Staff Vice President-Reservations Marketing in 1975. Then, in 1977, Mr. Effman was promoted to Vice President-Planning.

Mr. Effman holds a degree in economics from the City College of New York. He serves on the Advisory Committee of the Center for Transportation Studies at the Massachusetts Institute of Technology.

SIG S. FRONT

Senior Vice President-Director of Marketing, The Sheraton Corporation.

Sig S. Front is responsible for the Sheraton Corporation's world-wide advertising, sales and marketing activities.

He began his hotel career in 1956 with Schine Hotels in Miami—first as a management trainee and then as a sales representa-

tive. In 1957, Mr. Front left Schine Hotels to help form the sales department of the brand-new Beverly Wilshire Hotel in Los Angeles. In 1960, he was named Director of Sales for Fred Harvey Hotels and Restaurants and directed the company's marketing program.

Before joining Sheraton, Mr. Front served as Vice President of Sales and Marketing at Del Webb Hotels, International, in Nevada from 1962 until 1974. In 1974, he joined Sheraton as Managing Director of the 600-room Brussels-Sheraton Hotel.

Mr. Front attended West Virginia University and is a graduate of the Linsly Military Institute.

He is a past president of Hotel Sales Management International and a former committee chairman of the American Society of Association Executives.

C. DEAN GAISER

Director, Florida Division of Tourism.

C. Dean Gaiser has served as Director of the Florida Division of Tourism since 1983 and for more than a decade has been working to promote tourism there.

Mr. Gaiser served as Acting Director of Tourism during a change of administration, from May 1978 until June 1979 prior to becoming Director. From 1973, until assuming the directorship in 1983, Mr. Gaiser was Florida's Assistant Director of Tourism.

He served as Personnel Officer for the Department of Commerce, and Manager of Training and Development for the Florida Department of Administration. He was director of Executive Recruitment and Development for Maas Brothers Department Stores of Florida. He also served as Consultant for Distributive Education, Florida Department of Education, where he supervised high school and junior college programs of marketing and distribution.

A graduate of Florida Southern College, Lakeland, Mr. Gaiser holds a B.S. degree in economics. He is active in a number of professional organizations.

ROBERT GIERSDORF

President, Exploration Holidays and Cruises.

Robert Giersdorf, president and founder of Exploration Holidays and Cruises, was elected chairman of the Travel Industry Association of America (TIA), in May 1984.

Mr. Giersdorf built a reputation in commercial aviation with Alaska Airlines, where as Senior Vice President for Marketing and Sales, he became known for innovation in marketing and promotion.

Mr. Giersdorf directly negotiated the protocol agreements between Alaska Airlines and the Soviet Union that opened the door from Alaska to the Soviet Union.

In 1972, Giersdorf left Alaska Airlines to establish his Alaska Tour and Marketing Services, Inc. (ATMS), which operates and packages tours and provides marketing, sales, public relations and advertising services for other Alaska travel firms. The trade name of Exploration Holidays and Cruises was implemented to better suit the expanded cruise and tour services.

Giersdorf maintains his home and business headquarters in Seattle, though he remains active in Alaska with extensive tour operations throughout the state.

When Alaska achieved statehood in 1959, Giersdorf was elected to the first legislature.

CHARLES GILLETT

President, New York Convention & Visitors Bureau.

Charles Gillett is widely recongized as one of the travel industry's leading professionals, credited with playing a major role in stimulating worldwide interest in the attractions of New York City. He conceived of and directs "The Big Apple" campaign for New York City—one of the most successful promotions in the travel industry.

Under Gillett's direction, tourism is now New York City's leading growth industry, bringing more than $2 billion annually in visitor spending.

Mr. Gillett is Past President of the International Association of Convention and Visitor Bureaus and the National Association of Travel Organizations, which later became the Travel Industry Association of America (TIA). He is a lifetime Director of TIA and a member of its Executive Committee.

A member of the United States Congressional Travel and Tourism Caucus Advisory Board, Mr. Gillett serves on the Executive Committee of the Travel and Tourism Government Affairs Council, the U.S. Commerce Department's Travel and Tourism Advisory Board, and the New York State Board of Tourism Commissioners.

Mr. Gillett has received many honors, including the travel industry's highest, The Golden Horseshoe Award for outstanding achievements in promoting and developing travel.

ELLIOT E. HEIT

International Marketing Director, Tauck Tours.

Elliot E. Heit joined Tauck Tours in 1981 and quickly put his 25-years of international tourism experience to work, aggressively involving the firm in international markets, including Visit U.S.A. countries.

Mr. Heit's association with Visit U.S.A. coincides with its early days of development. In 1961 he represented the Gray Line Association and, together with Pan American World Airways and Greyhound, travelled through Europe and the U.K. on board a Greyhound Scenic Cruiser to complete one of the first projects to stimulate interest in travel to the U.S.

Shortly after Greyhound acquired Gray Line New York Tours, he was invited to join Greyhound where, as Vice President of International Sales, he developed the international division to a prominent position in Visit U.S.A.

Mr. Heit is a 1950 graduate of the United States Military Academy. When he resigned from the service, he was serving as a Crew Commander in the 47th Bombardment Squadron of the Tactical Air Command.

Mr. Heit is Vice President of the West Point Society of New York and a member of the Board of Trustees for the Alumni Association of West Point.

JAMES W. HURST

Executive Vice President, Greater Los Angeles Visitors & Convention Bureau.

James W. Hurst began his tourism career with the Chicago Convention & Tourism Bureau in 1957. He served as Executive Assistant Director for the bureau prior to taking on his present responsibilities in California.

In 1979, Mr. Hurst joined the Greater Los Angeles Visitors and Convention Bureau as Executive Vice President—an organization with 50+ employees and a budget exceeding $4 million per year. In 1982, visitor spending in Los Angeles exceeded $8 billion.

In 1965, Mr. Hurst became executive vice president of the Atlanta Convention and Visitors Bureau where he served prior to taking on his present responsibilities in California.

Mr. Hurst is a member of TIA, Hotel Sales Management Association, National Association of Exposition Managers, Professional Convention Management Association, International Association of Convention and Visitors Bureaus, Western Association of Convention and Visitors Bureaus, and the International Congress and Convention Association.

He was Co-Chairman of the 1981 Western Tourism Conference. In 1983, he was President of the Western Association of Convention and Visitors Bureaus, and in a member of the Past Presidents Council of the International Association of Convention and Visitors Bureaus.

Mr. Hurst is a 1951 graduate of the Western Reserve Academy, Husdon, Ohio. He holds a degress in economics from Northwestern University, and is a veteran of Korea having served in the U.S. Army from 1953–1955.

SAMUEL B. JAMIESON, JR.

Vice President, Short Line Tours.

Samuel B. Jamieson, Jr. has been an important part of the bus industry for over 35 years, with broad experience in Operations, Sales and Marketing.

In addition to this responsibilities as Vice President of Short Line Tours, Mr. Jamieson is Vice President of a number of Short Line affiliated operating companies.

These include:

American New York Tours/American Sightseeing International, New York, N.Y.

American Sightseeing of Philadelphia

Chenango Valley Bus Lines, Binghamton, N.Y.

Colonial Coach Corp., Mount Holly, N.J.

International Bus Service, Inc., Brooklyn, N.Y.

Mr. Jamieson serves his industry in many other capacities, as well.

He is Chairman of the Board of Directors of American Sightseeing International. He is a Director of the American Bus Association and Chairman of ABA's Northeast District-Legislative Committee.

A Past President of the Bus Association of New York, he is currently a member of the Transportation Advisory Boards of Orange County and Sullivan County, N.Y., American Society of Travel Agents, Inc., National Bus Traffic Association, National Tour Association, and Travel Industry Association of America.

MICHAEL L. JENKINS

Director—Business Marketing, AT&T Communications.

Michael L. Jenkins assumed his current position as Director of Business Marketing for AT&T Communications in 1982.

An 18-year company veteran, Mr. Jenkins began his career with AT&T in Louisville, KY and has held positions in Operations, Sales and Marketing. Prior to being named to his present position, Mr. Jenkins served as a member of AT&T's Reorganization Planning Committee.

Based at AT&T Headquarters in Basking Ridge, NJ, Mr. Jenkins and his staff are responsible for developing marketing and sales strategies for AT&T's information transfer services. These communication services are provided to the travel, leisure and transportation industries, as well as AT&T's six million small business customers.

Mr. Jenkins attended the University of Tennessee, where he majored in Industrial Management. He is also a certified business consultant.

Mr. Jenkins is a member of the Travel Industry Association of America Board of Directors and the Small Business Administra-

tion Advisory Committee. He is a guest speaker and author of numerous papers and articles on such subjects as tourism, transportation, small business, communications and marketing.

THOMAS J. KOORS

Executive Vice President—Marketing and Sales, Northwest Airlines, Inc.

Thomas J. Koors was elected to Northwest Airlines' newly established position of Executive Vice President, Marketing and Sales on February 1, 1983.

A 23-year Northwest Airlines veteran, he has held many key positions in sales management, both in the United States and abroad.

Initially, Mr. Koors served in headquarters economic research. Subsequently, he became the airlines's Country Manager in the Philippines. He served as sales manager for the Tokyo, Los Angeles, and Chicago sales districts before a term as General Sales Manager at the company headquarters. In December 1979, Mr. Koors was named to the position of Vice President, Transportation Services for Northwest Airlines.

In his present post, Mr. Koors is responsible for all facets of the airline's marketing, sales advertising and sales reservations functions.

A native of St. Paul, Minn., Mr. Koors earned a Bachelors Degree in economics from the University of Minnesota.

JACK B. LINDQUIST

Executive Vice President-Marketing, Walt Disney Productions.

Jack B. Lindquist was named Executive Vice President of Marketing for Walt Disney Productions in October 1982.

Mr. Lindquist joined the company in August, 1955 as Disneyland's first advertising manager, and in 1965 was promoted to Marketing Director of the park. His responsibilities were expanded in 1971 with the opening of Walt Disney World, when he was named Marketing Director for both Disneyland and Walt Disney World.

In 1974, Mr. Lindquist assumed the position of Vice President, Marketing for both parks and four years later was elevated to Vice President, Marketing, for all of the company's outdoor recreation activities. From 1980, until assuming his present job, he was Senior Vice President of Advertising, Publicity, Promotion and Public Relations for Walt Disney Productions.

In addition to his marketing duties, Lindquist is President of the Walt Disney Travel Company, Vista Advertising and the company's Magic Kingdom Club. He serves on the Advisory Board of the California Angels.

After spending two years in the U.S. Air Force, Mr. Lindquist completed his education at the University of Southern California, where he majored in advertising.

WILLIAM S. NORMAN

Executive Vice President, Marketing and Business Development, Amtrak.

William Norman joined Amtrak in 1979 after extensive experience at Cummins Engine, Co., Inc. and with the U.S. Navy Department in Washington, DC.

Mr. Norman began his Amtrak career as Vice President-Marketing and within two years was given added responsibility for sales. In December 1981, he was named Group Vice President-Marketing and Corporate Planning. He was named Executive Vice President for Marketing and Business Development in 1983.

At Cummins, Mr. Norman served in two executive marketing posts before being named Vice President for the Eastern Division in August of 1978.

Mr. Norman joined Cummins in 1973 as Director of Corporate Responsibility after twelve years as a Naval flight officer with the Navy Department, where he served in such positions as a History and Foreign Affairs Instructor at the U.S. Naval Academy, a White House Social Aide, Carrier Division Staff Officer, and Special Assistant to the Chief of Naval Operations for Special Projects.

A former public school teacher in Norfolk, Virginia, Mr. Norman is a member of the Council on Foreign Relations, the TIA Board of Directors, and numerous other industry and professional organizations.

MALCOLM D. PYNN

President, Holiday Americas.

Malcolm D. Pynn, who formed Holiday Americas in 1981, has spent the last 30 years working in the travel and transportation industry. For the last 12 years his work has focused on Visit U.S.A.

Born and educated in England, Mr. Pynn came to the United States in 1958 with British Rail International, transferring from British Railways in London to British and Irish Railways in New York, where he began as a reservation clerk. He subsequently worked as sales representative and reservations/sales manager for North America.

Mr. Pynn left British Rail International in 1968 and joined Universal Sky Tours as Assistant to the President. He became President in 1972. Six years later, he left to joint Tourpak International as Vice President, Sales & Marketing.

Mr. Pynn is a former two-term President of New York Bons Vivants, and the former Auxiliary President of the 41-74 Club of New York.

In addition, Mr. Pynn serves on the Board of Directors of the Travel Industry Association of America. In 1982 and 1983, he chaired the Discover America International Pow Wow Planning Committee. He is also a member of the Association of Group Travel Executives.

DONALD J. RYAN

Former President, Camping Group, Kampgrounds of America, Inc.

Donald J. Ryan has broad experience in both marketing and in the outdoor recreation-camping industry.

Before becoming President of KOA's Camping Group, Mr. Ryan served as Vice President, Marketing for the firm. Prior to joining KOA, he served as President of Recreational Marketing Services and in marketing for Mead-Johnson and United Airlines, and in sales for the Inland Steel Company.

Mr. Ryan is Past President of the Family Camping Federation and a Director of the American Camping Association.

In addition, Mr. Ryan has taught economics at the University of Evansville.

He completed both his undergraduate and graduate work at the University of Wisconsin, where he received a Masters of Business Administration degree in marketing.

MARTIN R. SHUGRUE, JR.

Vice Chairman, Pan American World Airways, Inc.

Martin R. Shugrue, Jr. was Senior Vice President-Marketing at Pan American World Airways until he was elected Vice Chairman in 1984.

In his present position, Mr. Shugrue directs the airline's marketing programs and passenger and cargo sales efforts. He also oversees Pan American's worldwide station operations and passenger service activities, including in-flight service, catering and reservation. He is also responsible for maintenance, engineering, flight operations and airline safety.

Mr. Shugrue joined Pan American in 1968 as a B-707 pilot/flight engineer after six years of service as a carrier-based pilot in the U.S. Navy. He still maintains his military affiliation as a Captain in the U.S. Naval Air Reserve.

In 1970, Mr. Shugrue was appointed to the staff of the Executive Vice President and General Manager. He joined the Personnel Department in 1972, and in 1974 was appointed Staff Vice President—Corporate Personnel.

Mr. Shugrue became Regional Managing Director—United Kingdom and Western Europe in 1978. He was elected Vice President—Industrial Relations in May 1980 and then Vice President—Personnel in February 1981. In November 1981, he was named Senior Vice President—Administration, and in December 1982, became Senior Vice President—Marketing.

WILLIAM D. SLATTERY

President, Braniff, Inc.

William D. Slattery became President of Braniff, Inc. on December 15, 1983, upon consummation of the Braniff/Hyatt Agreement.

Prior to joining Braniff, Mr. Slattery worked for 16 years for Trans World Airlines, where he began as an analyst in 1967.

Mr. Slattery spent his last three years with TWA based in Paris, France while serving as Vice President—International Division. He was responsibile for all sales and service activities for Europe, Asia and Africa.

Before heading TWA's International Division, Mr. Slattery worked for three years as Regional Vice President of the New York Region. He was in charge of metropolitan New York and Newark sales and services activities, including one of the airline's largest reservation offices in New York City. As Regional Vice President, Mr. Slattery was also responsible for the operations at John F. Kennedy, La Guardia and Newark airports.

He received a B.A. degree from the University of Notre Dame in 1965 and an M.B.A. from the University of Santa Clara in 1967.

ROBERT A. SMALLEY

President and Chief Executive Officer, American Land Cruises.

Robert A. Smalley began his career in 1946 with the Couture Rent A Car System—a car rental company operating in Florida, the Caribbean and Latin America.

He was Vice President and General Manager of the firm when it was acquired by the Hertz Corporation in 1957. Mr. Smalley joined Hertz and a year later was named Asssitant Vice-President.

After 14 years of extensive experience, Mr. Smalley, in July 1969 was elected President and Chief Executive Officer of Hertz, a post that he held until retirement in January, 1972.

Within seven months, Mr. Smalley had founded American Land Cruisers, Inc., in Miami, Fla., today one of the nation's largest recreational vehicle dealerships. The company's rental division operates one of the nation's largest motorhome rental fleets, with locations in Los Angeles, San Francisco, New York, Orlando, Tampa and Miami. Plans call for further expansion into other key cities throughout the United States and Canada.

Smalley is a native of Detroit, Michigan. He is a graduate of St. Leo Prep, and is a World War II Veteran, having served in the Naval Air Corps.

BRADLEY P. SMITH

Executive Director-Foremost West, Four Corners Regional Tourism Organization.

Bradley P. Smith has a wealth of experience in travel marketing and was formerly a tour operator.

Prior to joining the Foremost West, a regional organization formed by the governors of the five member states, Mr. Smith founded and was president for seven years of Challenge Incorporated, a travel company specializing in package tours and sports clinic/academies in the western U.S. He has also held sales and marketing positions with Michelin Tire and 3M Business Products.

Today, as Executive Director of the Foremost West, a position he has held for 10 years, he is directly involved in international travel marketing for the interior western states, a crucial position as the U.S. seeks to generate increased travel from abroad.

Mr. Smith has been actively involved in many travel-related activities, and with the Travel Industry Association of America. He serves as a member of TIA's International Committee and the International Marketing Plan Development Committee. In addition, he has served as a member of the Pow Wow Planning Committee.

Mr. Smith is immediate past chairman of the National Council of Area and Regional Travel Organizations and serves on the Board of Trustees of the U.S. Travel Data Center. He is a graduate of the University of Utah.

BRIAN D. SMITH

Vice President-Marketing, Busch Entertainment Corporation.

As Vice President of Marketing for Busch Entertainment Corporation, Brian D. Smith oversees the marketing activities for all five Busch Entertainment properties in Pennsylvania, Virginia, Florida and Texas.

The Busch Entertainment theme parks, the Dark Continent in Tampa, Fla., and the Old Country in Williamsburg, Va., host more than five million visitors annually. Busch Entertainment also owns and operates Adventure Island, a water theme park in Tampa, Fla. and Sesame Place play parks for children in the Dallas and Philadelphia markets.

Prior to joining Busch Entertainment Corporation, a subsidiary of Anheuser-Busch Companies, Inc., Mr. Smith was Vice President-Marketing for Hanes Corporation L'Erin cosmetics division.

After earning his Masters of Business Administration degree from the University of Wisconsin, Mr. Smith joined Foote, Cone & Belding as an account executive and was later promoted to Vice President, Account Supervisor in New York.

He also has held major marketing positions with Kimberly Clark Corp. and Norton Simon, Inc.

Mr. Smith resides in St. Louis where Busch Entertainment Corporation is headquartered.

JOHN STOCKTON

Vice President-Marketing, Roy Rogers Restaurants Division-Marriott Corp.

John Stockton joined Roy Rogers Restaurants in his present position in June 1980 and directs all marketing activities for the chain of more than 500 restaurants throughout the nation.

His overall responsibilities include management of advertising and promotion, market research, product development and public relations functions and staffs.

Prior to joining Marriott, Stockton was Vice President, Health Product Planning for Colonial Penn Insurance Group in Philadelphia for four years. He worked in Marketing Management at General Foods Corporation for ten years prior to joining Colonial Penn.

A native of Long Beach, California, he holds a Master of Business Administration degree from Western Michigan University.

Mr. Stockton is recognized in his industry for his outstanding ability and leadership in marketing and advertising.

WILLIAM D. TOOHEY

President, Travel Industry Association of America.

William D. Toohey was elected National Chairman of Discover America Travel Organizations, now TIA, in 1969 when the organization was founded. In 1971, he was named President and Chief Executive Officer.

Before assuming the association post, Mr. Toohey was Executive Vice President of the Chicago Convention and Tourism Bureau and a director of Greenfield Village and Henry Ford Museum, near Detroit.

He was a founder, first chairman and is an officer of the United States Travel Data Center, in Washington, D.C.

Mr. Toohey has chaired several industry coalitions to address specific federal issues, including national tourism policy, development of equitable national energy programs, and facilitation of international travel to the U.S.

Mr. Toohey has served as the North American Affiliate Vice Chairman of the World Tourism Organization and as Vice Chairman of the Travel and Tourism Industry Advisory Council of the U.S. Senate Committee on Commerce, Science, and Transportation. He is Vice Chairman of the U.S. Congressional Travel and Tourism Caucus Industry Advisory Board and the Travel and Tourism Government Affairs Council.

A fellow of the Institute of Certified Travel Agents, Mr. Toohey is a graduate of the University of Detroit. He served in the U.S. Navy Air Corps during W.W. II.

JOHN A. UEBERROTH

President, Carlson Travel Company, President, First Travel Company, and Chairman, Ask Mr. Foster Travel Service.

John A. Ueberroth began his career in providing travel services in 1968. After two years as lieutenant in the United States Navy, Mr. Ueberroth joined First Travel Corporation (then known as Transportation Counsultants International).

He served as Vice President and General Manager of the Eastern Region, and then, when First Travel acquired Ask Mr. Foster Travel Service, he was transferred to California and became a Director of the company. In January 1974, Mr. Ueberroth was elected President of Ask Mr. Foster.

Five years later, he was elected Chairman of Ask Mr. Foster and the President of First Travel Corporation, when it was acquired by Carlson Marketing Group in December 1979. In 1983 Ueberroth was appointed to head all Carlson Companies' retail, wholesale and incentive travel operations, Carlson Travel Company.

Ueberroth is also a Director of the United States Tour Operators Association, is currently the treasurer of the Travel Industry Association of America, and a member of the Young Presidents' Organization. He is on the Board of Directors of the Braille Institute.

Ueberroth received a BA from the University of California at Berkeley and an MBA from the University of Southern California.

TERRY L. UNDERWOOD

Vice President-Passenger Marketing Greyhound Lines, Inc.

Terry L. Underwood has a broad background in marketing planning and advertising, experience essential to the development of the International Marketing Plan for the travel industry.

Mr. Underwood was appointed Vice President-Passenger Marketing at Greyhound in May 1983.

He is responsible for market plan development, advertising, sales promotion, merchandising and pricing of Greyhound's regular scheduled passenger service. In addition, Mr. Underwood has direct responsibility for charter operations and all international sales.

Prior to joining Greyhound, Underwood was Vice President of Marketing for the U.S. Rent-A-Car Division of Avis, Inc.

During his 13 years with Avis, Underwood held a variety of sales and marketing positions. Earlier in his career, he was an Account Executive with N.W. Ayer & Son.

Mr. Underwood is a graduate of the University of Tampa.

A. RUSSELL UPSHAW, JR.

Vice President-Government Affairs, Eastern Airlines.

A. Russell Upshaw, Jr., Vice President-Government Affairs for Eastern Airlines, is responsible for coordinating Eastern Airlines' interest in federal, state and local governmental activities.

Prior to joining Eastern's governmental affairs unit in the Fall of 1981, Mr. Upshaw was Vice President-Sales and Services for Eastern's Central Region.

He joined Eastern Airlines in March 1947 as a reservations agent in Atlanta and advanced through various positions in operations and passenger services in Chicago, Newark, Washington, Miami, and New York.

From 1974 to 1978, Mr. Upshaw was based in Charlotte, N.C., where he was Director of Sales and Services for the South Central Region.

Before assuming his responsibilities in Charlotte, he was a System Director for Caribbean Operations for two years in San Juan, P.R. Mr. Upshaw coordinated integration of the operations of former Caribbean Atlantic Airlines at 14 islands into Eastern's route structure, following Eastern's acquisition of the local-service airline in May 1973.

Mr. Upshaw received a B.S. degree in aviation management from Auburn University. He served in the U.S. Air Force during World War II as a pilot in Europe.

MISSING CHILDREN

Mr. SPECTER. Mr. President, the disappearance of more than 1.5 million children each year is one of the greatest tragedies facing our country today. Of the 38,700 missing persons in the FBI's missing person file as of April 1, 1985, 28,244 are juveniles. The numbers of missing children in Pennsylvania are staggering. In Pittsburgh, alone, there are 2,600 reports of missing children each year. Since the beginning of this year, 1,959 children have been reported missing in Philadelphia. In Scranton there were 343

missing children reports in 1984, and 135 new cases since January 1985.

To address this national tragedy, I introduced the Missing Children's Assistance Act in the 98th Congress. This act, which President Reagan signed into law on October 12, 1984, establishes a national clearinghouse for information on missing and exploited children and a national toll-free hotline.

Later this week, the Senate Subcommittee on Juvenile Justice, which I chair, will hold another in a series of hearings on missing children. The hearing will focus on private sector initiatives to assist in efforts to find missing children, and the dangers of fraud and abuse in the missing children's industry. Many corporations such as Wawa Dairy Products and the Trailways Corp., have responded swiftly to address the plight of missing and abducted children. We encourage others in the business community to assist in this important national effort.

A few weeks ago, my colleague from Pennsylvania, Senator HEINZ, and I met with the parents and friends of 8-year-old Cherrie Mahan, who has been missing from her home in Cabot, PA, since February 1985. There are many other concerned groups actively seeking to locate missing children like Cherrie and to reunite them with their families. Efforts like these deserve our assistance, as nationwide attention is essential if missing children like Cherrie are to be located.

I believe that one extremely important step toward this goal would be an undertaking by the television networks to air pictures of missing children as part of their regular programming, and to help publicize the National Center's hotline and information services. Senator HEINZ and I have contacted our colleagues in the Senate, and asked them to join us in urging that the major television networks undertake these steps. Mr. President, I am pleased to report that over 80 Members of the Senate have joined Senator HEINZ and me as signatories to this letter, which today is being sent to the Nation's major broadcasting companies. I thank them for their support.

I for one pledge my tireless efforts to end the tragic disappearance of more than 1 million of our children each year.

Mr. HEINZ. Mr. President, there is no worse tragedy parents can face than to find their child missing. On February 22, 1985, 8-year-old Cherrie Mahan disappeared while walking the 75-yard distance between her school bus stop and her home in Cabot, PA. My colleague from Pennsylvania, Senator SPECTER, and I met with her family and neighbors a few weeks ago, and offered our assistance. Although we were pleased to assist in every request made of us, it is clear that we must and can do far more for Cherrie Mahan and so many other children like her.

Some 1.5 million children are reported missing each year, Mr. President. Finding those children who have been abducted requires the efforts of all Americans—not just the family and friends of the child and local law enforcement officials. Congress recognized the need for greater efforts and increased coordination when it passed the Missing Children's Assistance Act of 1984, which established the National Center for Missing and Exploited Children and the center's toll-free hotline and research grant.

At the same time, the private sector has responded in an impressive way. Pictures and descriptions of missing children can now be found in shop windows, on packages and paper shopping bags, milk cartons, and on television. The media, because of its ability to reach all Americans, is central to the effort to involve all Americans in the plight of missing children. For this reason, Senator SPECTER and I have written a letter to the networks and the major media companies, thanking them for their efforts thus far, and urging them to do still more on behalf of missing children. We are not dictating to the networks what they should or should not do, only expressing our deep concern. Nearly all the Senate agreed with our sentiments; 85 have signed the letters, which will be mailed at the conclusion of my remarks. I wish to thank my colleagues for joining with me in expressing our concern for missing children, and our hope that broadcasters throughout the Nation will continue to be a critical part of the effort to locate these children.

Mr. President, I ask that the text of the letters, sent to 11 networks and major broadcasting groups, appear at the conclusion of my remarks with the names of the cosigners.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, May 20, 1985.

Mr. GRANT TINKER,
Chairman of the Board and Chief Executive Officer, National Broadcasting Company, Inc., New York, NY.

DEAR MR. TINKER: We the undersigned members of the United States Senate respectfully call upon you to join us in assisting in an increased nationwide effort to help locate missing children. On April 27th three missing children were located through the efforts of the media.

Approximately 1.5 milion children are reported missing each year. One response by Congress has been the Missing Children's Assistance Act of 1984, which established the National Center for Missing and Exploited Children, a national toll-free hotline, and a grant program for research on missing and sexually exploited children.

Currently there are many concerned groups actively seeking to locate missing children and to reunite them with their families, and their efforts deserve your support. The broadcast media is uniquely capable of reaching Americans with vital information, including pictures and descriptions. Many broadcasters already play a central role in the efforts to find missing children. We commend these broadcasters for this vital public service, but encourage even greater voluntary efforts by the industry.

One crucial step towards the goal of locating missing children is nationwide dissemination of their photographs and descriptions and of the National Center's toll-free hotline (1-800-843-5678) and informational services. We urge you to air on a regular basis the pictures and descriptions of missing children.

We congratulate you on your successful efforts thus far and look forward to your prompt consideration of this request.

Sincerely,

Arlen Specter, John Heinz, Jeremiah Denton, Mitch McConnell, Paula Hawkins, Alfonse D'Amato, John Melcher, Patrick Leahy, Lloyd Bentsen, Frank Lautenberg, Don Nickles, Jake Garn, Daniel Inouye, Warren Rudman, Mark Andrews, Gordon Humphrey, Christopher Dodd, Edward M. Kennedy, Bill Bradley, J. James Exon, John F. Kerry, James Abdnor, Richard G. Lugar, Slade Gorton, Chic Hecht, Quentin N. Burdick, Dennis DeConcini, David Pryor, Jim Sasser, Ernest F. Hollings, Edward Zorinsky, Bob Packwood, David L. Boren, Lawton Chiles, Carl Levin, Gary Hart.

HONORARY PARK RANGER

Mr. PRESSLER. Mr. President, on Monday, April 22, the National Park Service gave its highest award, the Honorary Park Ranger Award, to Kay Riodan Steuerwald. Mrs. Steuerwald is president of the Mountain Co., Inc., at Mount Rushmore National Memorial in South Dakota. She joins a distinguished group of honorees, including John F. Kennedy, Ladybird Johnson, early NPS Director Horace Albright, the late photographer Ansel Adams, and in 1984, composer Richard Adler.

Mrs. Steuerwald has headed the Mountain Co., for 34 years. The Mountain Co., is widely recognized within the National Park Service for its high

operating standards and is an example for concessions throughout the system. In being presented this most prestigious award, Mrs. Steuerwald was cited for insisting that only high-quality, theme-related publications be sold at Mount Rushmore; for her strong support of Native American arts and crafts; for developing a visitor services training program for Mountain Co., employees in cooperation with the NPS; and for her encouragement and support of special programs such as "Teddy on the Mountain, Sculptor-in-Resident."

Mrs. Steuerwald is responsible for the planning and building of concession facilities at Mount Rushmore at no cost to the Federal Government. This extremely generous gesture would surprise any outside observer. But for those of us who are fortunate enough to know Kay and understand her dedication and love for that mountain, and her desire to share its story with the rest of the world, it is no surprise at all.

I have known Mrs. Steuerwald for many years, and her contribution as a member of the U.S. Senate Travel and Tourism Industry Advisory Council has been of great benefit to me and my colleagues interested in increasing the role of the tourism industry in today's economy.

Her drive for excellence and her philosophy and commitment to national park ideals has been spread across the park system through her active participation in a variety of organizations. She helped start the National Park Foundation, has been on the board of the Christian Ministry in the National Parks for many years, and has served on the executive board of the Conference of National Park Concessioners. Mrs. Steuerwald is widely recognized and respected in South Dakota. She has an honorary doctorate of business from the South Dakota School of Mines and Technology, received the Ben Black Elk Award for tourism and was the South Dakota Small Business Person of the Year.

Through her leadership of the Mountain Co.—from a small, struggling operation into a very successful, profitable, and widely-respected business—Mrs. Steuerwald has been an outstanding ambassador for Mount Rushmore National Memorial and a leading spokesperson for our national parks across the country.

SUPPORT FOR ICC SUPPLEMENTAL APPROPRIATIONS REQUEST

Mr. PRESSLER. Mr. President, I want to take this opportunity to express my support for the supplemental appropriation requested by the Interstate Commerce Commission and to call attention to the very serious situation presently developing at the Commission. Because the situation is so critical, a number of Senators, including me, will be circulating a letter to all Senators urging immediate action to approve these supplemental funds, or at least to send a clear signal to the ICC so they can return to normal operations.

Recently, in order to avoid a budget deficiency, the Commission was forced to implement a furlough plan which requires Commission employees to be furloughed without pay 1 day per week.

The consequence of this action is that employees will suffer a 20-percent pay cut, and many highly-qualified, loyal Government workers will be forced to find work elsewhere so they can make ends meet. Those who remain will have to figure out how to support their families for 20-percent less. Some will be able to do this. Some will not.

Mr. President, as a member of the U.S. Congress, I think we owe it to the employees of the ICC to get this issue resolved as quickly as possible and get them back to work on a full-time basis. They have weathered some pretty rugged storms in the past couple of years. We have demanded much from them and they have always responded like true public servants, and I am proud of them for that. But I think there comes a point when we can go too far, and I believe we have reached that point. There are policy problems, to be sure. And there are good reasons on both sides of this issue for taking action. However, in our day-to-day policy struggles, we should not lose sight of the real-world implications of the actions we take.

A combination of circumstances has brought the Commission to this point. In fiscal year 1984, the actual ICC budget was $60 million. In fiscal year 1985, the OMB-approved ICC request was $53.97 million. The House appropriated $54.55 million. The Senate, however, approved only $48 million. Subsequently, the House and Senate subcommittees became deadlocked on transportation funding issues. Thus, no ICC money bill was passed and the agency was included in the continuing resolution appropriations. The continuing resolution filed October 10, 1984 and signed by the President authorized a funding level of $48 million for the ICC for fiscal year 1985.

Additionally, the CR detailed by office a staffing level of 914 as the average full-time employee [FTE] complement for the fiscal year.

On October 1, 1984 the ICC had 1023 full-time employees on board.

The scope of the problem thus presented, centers on the two benchmarks mentioned: First, a $48 million funding level; and second, a 914 FTE staffing level; $48 million funds a FTE average of 860 employees. By contrast, an average FTE of 914 employees requires funding at the level of $51.5 million. To achieve the average FTE of 860 employees funded by $48 million would have required RIFing some 400 employees. A bit less draconian, but equally drastic, would have been a RIF of some 200 employees to achieve the 914 average FTE set out in the CR. To put the staffing level issue in perspective, I should note the historical decline of Commission employment:

	Employees
1980	1,946
1981	1,852
1982	1,540
1983	1,319
1984	1,150
1985	984
1986 (est.)	923

This illustrates the significant reduction both in funding and in staffing levels that has already occurred in recent years.

Some argue that the $48 million figure should have been the bottom line planning figure as soon as it became apparent that the conferees could not reach an agreement. Others argue that reasonable allowances and consideration should have been made in anticipation of an ultimate compromise between the House and Senate figures, or that a supplemental request was justified and expected, given the staffing level language in the CR.

As I have said, there are reasonable arguments on both sides of the issue and I do not think it is necessary to get into a squabble here about what did or should have happened. My only point is that we on the policymaking level should be able to find a better way to deal with the problems than by placing the brunt of the burden on Government employees.

Early in this process, the ICC implemented a number of austerity measures which have resulted in approximately $1 million in discretionary expenses. Unfortunately, one result of this has been that many of its more effective programs and offices, such as the Office of Special Counsel, have been substantially curtailed.

In January, when advised that the supplemental request would take the ordinary schedule of budget proceedings in the House and Senate, it became clear that other contingency plans would have to be developed. The consequence was a furlough plan for all employees 1 day per week.

Following House and Senate hearings, which resulted in a House markup of $3.15 million, but no Senate action, the Commission, on April 15, implemented the furlough plan, resulting in a 4-day workweek for all Agency employees.

I understand that the current damage control assessment is that this is a disaster, devastating both to the employees and to the Commission. The reality is worse than the anticipa-

tion. Morale is extremely low, and employees are suffering from the stress.

The Agency workload is falling behind; deadlines are being missed. Significant pending cases are falling off pace. Hearings are being delayed or not being held. Field office outreach is diminished. The Agency's ability to fairly and adequately review various issues is on the verge of being seriously compromised.

I am especially concerned about field outreach and hearings. I understand that under the present funding plan without the supplemental, ICC field operations will cease to function. This would present special problems for States like mine.

For instance, 2 years ago South Dakota was threatened with a proposed abandonment of a 165-mile railroad line—the only major line in the entire western half of the State. We were able to have an ICC administrative law judge come out to the State to conduct field hearings, and were able to provide guidance to the local shippers through the ICC Office of Special Counsel. We ultimately prevailed in our effort to save the line, but I have no doubt that it would have been impossible without those kinds of field operations. They are essential in running any effective enforcement agency. This would be impossible under the current situation at the ICC.

I might just point out here that it is largely through the efforts of Senator ANDREWS that rural States like North Dakota and South Dakota still have available to them many of the services provided by the Office of Special Counsel.

In this past year, the ICC's outreach has involved communities and programs in 20 States. In addition, there are the activities of the six regional offices nationwide and the field offices in each of our States which are too voluminous for summary here.

My basic point today is simply that without this funding, there is little or no hope for a truly effective ICC. Without it, we may as well take back the rest of the money and close its doors. We do have to more closely scrutinize how this money is being spent. I share many of Senator ANDREWS' concerns and agree we have to take a close look to make certain this money is being used in a manner that truly reflects congressional intent—especially in the deregulation areas. Rural States like North Dakota and South Dakota are the hardest hit by the push for blind deregulation.

In my view, however, any alteration of the scope and mission of the Commission is best achieved by substantive legislation and debate, not by an appropriations measure. In any event, we owe it to the ICC employees to find a way to resolve our policy disputes without making them pay the price. I am afraid that if we do not approve this supplemental, the ongoing furlough will cause a continuing exodus of the high quality staff and, in general, aggravate already major morale problems.

I do think it is absolutely vital that we go ahead now and approve the supplemental appropriation requested by the Interstate Commerce Commission. The employees at the Commission deserve it, and the policy concerns in the various States cannot be addressed without it.

Whatever may be our respective views or assessments of the ICC, I want to emphasize that its employees deserve our consideration in providing supplemental relief for the Agency's financial needs. And if we really expect it to function effectively, we must go forward now.

So I urge all my colleagues to join us in signing the letter we will be circulating so we can send a clear signal of support to the ICC and it can once again begin effective operations and put its employees back to work full-time. They deserve our support.

THANKS TO KANSAS STAFF FOR WORK ON BUDGET

Mr. DOLE. Mr. President, I want to take a moment to say a special "thank you" to the members of my Kansas staff who made an important contribution in the Senate's adoption of the fiscal 1986 budget resolution.

Their work on specific areas, such as child nutrition, defense, and transportation, was very helpful in our deliberations both before and during floor action.

I would like to especially recognize the effort of Linda Murphy, Judy Brotman, John Peterson, Mark Scanlan, Chris Bolton, Ed Duckers, Al Lehn, and Dave Cordova and the rest of my staff who were kept busy answering questions and otherwise assisting my constituents.

Mr. PROXIMRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Denton). Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1986

The PRESIDING OFFICER. The clerk will report the pending business.

The legislative clerk read as follows:

A bill (S. 1160) to authorize appropriations for the military functions of the Department of Defense and to prescribe personnel levels for the Department of Defense for fiscal year 1986, to authorize certain construction at military installations for such fiscal year, to authorize approporiations for the Department of Energy for national security programs for such fiscal year, and for other purposes.

The Senate resumed consideration of the bill.

Pending:

Goldwater Amendment No. 147, to provide improved procurement procedures for the Department of Defense, on which the yeas and nays have been ordered.

Mr. GOLDWATER. Mr. President, last Friday, before we recessed, I laid down an amendment authored by Senator QUAYLE of Indiana. We are now prepared to discuss that amendment. Senator QUAYLE is on the floor. I will yield to him.

I would hope that the Democratic side, which also has, I believe, an amendment to this amendment, would get over on the floor sometime. We are not in a great hurry, but we only have until Thursday evening to finish this bill and we already have 39 amendments that we know of. So in order to expedite, I would urge all Senators to pay attention to this piece of legislation. It is one of the most important that we have before us this year. It contains some rather drastic reductions in our defense approach, and I think we should make ourselves clear on whether we want these reductions or not or in what form we want them.

I would also like to arrange for a time on each of these amendments, but I see nobody from the Democratic side. Would the Senator from Indiana have some idea of the time he might need?

Mr. QUAYLE. Mr. President, I will probably talk maybe 15 minutes or so on this amendment. I presume that a couple of others want to speak on it. But I think the important thing is to perhaps try, down the road, to get a certain time that we are going to vote, at least on this amendment and any of the substitutes that are going to be offered to this amendment. We know a few of them are floating around. We hope in fact they would be offered in the next hour or couple of hours.

Does the chairman perhaps have in mind sometime later this afternoon that he would like to vote on at least this amendment or any substitute amendment added to this amendment? I think that might help Senators through the day to begin to focus that we are going to vote at a certain time, because the chairman is absolutely

right. We have to get this bill moving. Thirty-nine amendments between now and Thursday or Friday is quite a row to hoe, but we can do it.

Mr. GOLDWATER. I might say that last Friday the leadership indicated that there would be no votes until 5 o'clock this afternoon. So the Senator may proceed with any time that he may need.

When Senator PRYOR or Senator GRASSLEY arrives in the Chamber we will discuss the total time to be spent on these particular amendments.

Mr. QUAYLE. Mr. President, I suggest to the chairman that perhaps we might want to work on our side and on the other side of the aisle to get an understanding that we might begin a vote at 5 o'clock.

Mr. GOLDWATER. I certainly hope that we can finish debate by 5 o'clock.

Mr. QUAYLE. I think we will be able to finish debating it by 5 o'clock. It depends on what amendments are going to be offered to it.

I think you are going to find, at least I hope the Senate will find, very satisfying the work that has gone into this. It came out of committee unanimously. It is an important issue. It is a big issue. There are a lot of things that can be done here. We will get into the discussion and I certainly do not intend to prolong the debate. But in the amendments and substitutes that may arise to this, it will take some time to point out the flaws that they have.

Mr. GOLDWATER. I think the amendment will be in the nature of a substitute, so the Senator may proceed.

AMENDMENT NO. 147

(Purpose: To provide improved procurement procedures for the Department of Defense).

Mr. QUAYLE. Mr. President, I rise to support not only the Defense Department Authorization Act, but in particular the committee amendment that is presently before the Senate, the amendment known as the Defense Procurement Improvement Act of 1985.

Before I proceed to the elements of the amendment and the pending business, I wish to make a few points of observation. First, I express my sincere appreciation and gratitude to the chairman of the Armed Services Committee for not only the work that he has done in the Armed Services Committee as a whole, but in particular in this area of acquisition and procurement.

He has told me, time and time again, of the personal importance that he attaches to procurement reform. He has been a very active participant in the Subcommittee on Defense Acquisition Policy as well as a steadfast proponent of trying to get more efficiencies, and a better understanding of how we do business, within the Department of Defense. Without his strong support, we would not be here today. I appreciate his encouragement and his leadership and what he has been able to do for me on that committee, particularly in the subcommittee which, I hope, is going to make a contribution here today—this is just the beginning—and a contribution down the road as well.

He is an expert in this area. He has a lot of background in the armed services, and he also has a background in business. He understands good old business sense and a business background.

Every once in a while, you get that flair of thinking from the chairman of the Armed Services Committee. He puts on his business hat and goes back to talking about when he was in business out in Arizona and says, "Why can't we do some of these things in the Pentagon as we used to do them out there in the private sector?"

I assure the Senate this morning that a lot of things we will be recommending and a lot of changes that will come before this committee are a lot of commonsense, good old business practices that we can employ. Because of that, Mr. President, we are in a position here today to move forward with this committee amendment.

I also thank the ranking member of the Committee on Armed Services [Mr. NUNN] for his efforts and leadership in the committee and his excellent suggestions.

I want particular attention paid to my ranking member Mr. LEVIN, who has joined with me and been very, very energetic in offering a lot of insight and recommendations on the Procurement Reform Act. He has a good background not only in the Armed Services Committee, but the Governmental Affairs Committee on which he serves.

We have a lot of other active members on our subcommittee. One of them is handling the bill right now for the minority, Senator BINGAMAN of New Mexico, who has been an exceedingly active member, coming forward with recommendations.

What we have here, Mr. President, is a procurement reform package that has strong bipartisan support within the Armed Services Committee. This package basically went through about a year and a half of deliberations before we got to the final enactment. Before the Defense Acquisition Subcommittee was established, we had a task force on procurement policies. Over the last 2 years, we have had something like 11 days of hearings, but we had 4 days of hearings specifically on this particular package.

I can tell the Members of the Senate that we are going to be going forward in this area again this summer. As a matter of fact, we have hearings scheduled in June, two hearings already scheduled, that will further examine procurement practices. And there is no shortage of ideas and issues and areas where we ought to get involved.

As a matter of fact, Mr. President, one of the biggest problems that I have had over the course of the last couple of years is trying to focus in on what we should be concentrating on. It is so big. Any time you have an agency that does 17 million procurement transactions a year, you are going to have problems. And there are going to be mistakes. What we are charged with is to try to come up with a system that is going to be as efficient as possible.

You know, Mr. President, we have been barraged by stories and publicity over the last couple of years pointing out some of the problems we have in the area of acquisition. We just had the latest series now running in the Washington Post. Today, the front page talks about a vehicle that is made in my home State, the Hummer vehicle. Just going through and trying to read that in the early morning over a cup of coffee—I profess to have a little bit of expertise in this area, but it is confusing. It is not only confusing to those of us who sit there and deal with it on a day-to-day basis, but I ask the Members of the Senate to try to read that. I thought it was a thoughtful article, trying to show all the bureaucratic steps and number of requirements you have to go through to get a vehicle out in production.

Then we have a situation there over the design of a whistle. We start talking about design specifications or a lot of pages put into a design specification for just getting a whistle. That will put us into another area of asking why we have to have a lot of these things before we get into procurement and production and acquisition.

Mr. President, contrary to some others, I welcome this scrutiny. I welcome the idea and the opportunity to see what we can do in the area of acquisition and the area of procurement reform. I believe that it is our challenge here today to put together a consensus that, in fact, will come to grips with what approaches we should be taking in this area of procurement. I believe that that consensus has to be among those of us in Congress, those who are across the river or downtown in the executive branch, and those who are out in the private sector, particularly in the defense contracting industry, who have the responsibility of manufacturing the weapons systems and other things that are necessary and important for national security.

Also, we have another constituency that is of tremendous interest. That is the taxpayer. The taxpayer pays the bills for national security. Taxpayers are not the least bit reluctant nor reticent to put up money to pay for national security. They understand that

that is the No. 1 requirement of any nation, particularly this Nation that has the responsibility of moving forward and being the bastion of hope and freedom throughout this world. But when they are willing to ante up a lot of money for national security, they expect and anticipate a wise and prudent expenditure of those funds.

I would dare say that, over the course of the last couple of years, there has been a problem of credibility that we have right now in convincing the American public that they are getting an efficient utilization of taxpayers' dollars. I think that, rather than turning the cheek the other way and saying "We don't want this publicity because 99.9 percent of the things are OK and there is only a small percentage out there that is not performing according to the rules, according to the laws," I look at this as an opportunity of getting down to a perhaps even more efficient system and trying to see how we can move forward in a more productive way. Because, Mr. President, let us face the facts: We are going to be confronted in this Nation of ours with a budgetary crunch over the next decade like we have never seen before. That budgetary crunch and that fiscal restraint is going to come across the board. It is going to apply to defense as well as in the area of nondefense.

Therefore, as we reestablish the credibility that so rightly deserves to be reestablished, we also have to realize that we are going to have to do some things better. We are going to have to do things more efficiently, because we are really going to have less money than we would like to have. Therefore, we are going to have to be able to produce more planes per dollar, more ships per dollar, more missiles per dollar. We are going to have to take some of these business practices that have been known in the private sector and employ them in defense as well. We are going to have to look at ways that can in fact beef up the whole procurement and acquisition situation that we now find ourselves in.

I look forward to it as a challenge. It is not something that I fear, it is something that I welcome. I know the chairman welcomes it and others welcome it. But I daresay we have to deal with this thing on a very serious and substantive basis.

I realize there are times when it is exceedingly popular to just come across as being able to kick the Department of Defense in the shins. That is a way to get a lot of good positive publicity.

I suppose there are times they deserve to be kicked in the shins, and they ought to be, but there is also a time that we have to settle down and look at the landscape and see where we are. I suspect as we look at this challenge of reform, we had better keep in mind that there are some counterproductive things that Congress can do and in fact has done in the past.

I do not need to spend a lot of time on the congressionally mandated waste and inefficiency that has been passed in the House and in the Senate, but it is there. I suggest that as we look at this situation we look at it in its totality, rather than try to do it on a micro-management basis.

I think what our subcommittee has done, or the Committee of the Armed Services has done, is take a vastly complicated issue, an issue that, in fact, has taken up a lot of publicity throughout the press. It has taken on a lot of attention here in the Congress. It is one that deserves our attention very much. But as it deserves our attention, we also have to exercise a degree of responsibility in doing the things that we know are right in accordance with trying to create better efficiencies.

I would say that the goal we all have is to try to preserve the competition we have in the Department of Defense and try to enhance the competition that we can get in the Department of Defense. That is the No. 1 goal of any kind of procurement system. The question is not how do we in fact go ahead and get more competition, but how do we follow what Congress and the administration have agreed on in the past to get competition?

We passed legislation last year, some in the area of procurement reform, some in the area of contract competition, and some in the area of spare parts and small business. We have, in fact, been consumed with the idea of trying to get more competition. I daresay we have made some headway; we have made some progress in these areas. I think that now that we have made some progress, certainly we are going to make some more progress.

Mr. President, I think that now I would like to spend some time on the particulars of this bill, in particular this amendment that is presently before the Senate. I believe and we believe them to be constructive and a responsible, bipartisan approach to promoting increased efficiency within defense procurement. We do have a strong bipartisan basis of support for this.

The first section of our committee amendment contains a series of congressional findings that clearly define the purpose of the legislation. In our amendment, we have sought:

To increase continuous competition during the production cycle of major weapon systems;

To expand the use of "should cost" analyses during contract negotiations for major weapon systems;

To ensure that acquisition personnel in the Department of Defense are sufficiently qualified and that an appropriate career path exists for acquisition officers in the military;

To promote increased disclosure of the activities of employees of defense contractors who were employees of the Department of Defense;

To prevent conflicts of interest by employees of the Department of Defense involved in the negotiation and administration of Government contracts;

To increase competition by continuing procurement technical assistance through Outreach Programs; and

To shift the burden of proof in the resolution of certain Government contract disputes from the Government to the contractors.

Mr. President, throughout the course of hearings, it has become clear that competition is the most effective means of forcing efficiencies in defense procurement. Procuring weapon systems from two or more sources is one proven means of insuring some form of competition throughout the life of a program. Section 603 of our amendment requires the Secretary of Defense to prepare an acquisition plan that includes the establishment and maintenance of two or more production sources for major acquisition programs that meet the following criteria:

Establishing two or more production sources would increase competition and would likely result in reduced overall costs;

It would not result in acceptable delays in fulfilling the needs of the Department of Defense; and

It would otherwise be in the national security interest of the United States.

Under our provision, the Secretary of Defense will be required to submit the acquisition plan for each major weapon program no later than the time of the initial budget request for production of the program. If the Secretary determines that the criteria for the establishment of two or more production sources are not met, he must include cost estimates or other background material supporting his determination.

There are some Senators who are suggesting that this provision does not require continuing competition between the two sources. The amendment does not specifically refer to continuing competition because another law, the Competition in Contracting Act of 1984, requires such competition when more than one source is available. Thus, this committee amendment in conjunction with existing law would require annual competition between the multiple sources.

Section 604 of the committee amendment directs the Secretary of Defense to conduct a should cost analysis for each major defense acquisition program for which contracts were award-

ed to a single source by other than competitive means.

Mr. President, in the March 20, hearing before our subcommittee, the representatives from the Department of Defense and the military services indicated that, with the exception of should cost analysis, virtually all the cost estimating procedures used by the services and the Department of Defense rely on historical data and industry trends rather than a careful assessment of the efficiency of the individual defense contractor. A should cost analysis uses different established industrial engineering measurement tools to determine the cost of a system produced in the most efficient manner. Although the witnesses testified that demonstrated savings had resulted when should cost analyses have been utilized by the contracting officer during the contract negotiation process, should cost studies are only conducted on a limited basis because of inadequate resources.

If we are ever going to be in a position to demand greater efficiency from defense manufacturers, we must utilize should cost analyses to a greater extent. Our provision would require the Secretary of Defense to conduct a should cost analysis at one point during the first 4 years of production for each major defense acquisition program for which contracts were awarded to a single source by other than competitive means. This requirement applies to all systems for which funds are provided for initial production in fiscal year 1986 and all subsequent fiscal years.

One of the primary issues that our subcommittee has examined has been the qualifications of the defense acquisition work force. We have held two separate hearings on this issue and we are especially concerned that the services have not stressed the importance of education and experience in the acquisition, support and maintenance of weapon systems in their selection of program managers for major acquisition programs or in their selection for flat and general officer assignments in the major buying commands.

If we are to store the public's confidence in the defense acquisition process, we need the best qualified officers in major command positions in defense acquisition. However, we must provide adequate incentives for military officers to choose a career in acquisition management. Section 605 of the committee amendment requires the Secretary of each military department to issue regulations establishing the minimum requirements in education, training, and experience for program managers of major defense acquisition programs. We have laid out some elements of the minimum requirements to be issued by the service Secretaries, including:

Attendance at the program management course at the Defense Systems Management College or other comparable insitution; and

A minimum of 8 years of total experience in the acquisition, support, and maintenance of weapon systems, at least 4 years of which must have been spent in assignments in the major buying commands of the services.

We have provided an incentive for young officers to select a a career in acquisition management by requiring the Secretary of each of the services to issue similar minimum requirements for assignment to the flag and general officer positions at the major military buying commands. We have thus tried to insure that officers in the acquisition management field are selected for these positions.

Finally, section 605 addresses a problem that came to light during the October 18 hearing on quality assurance at the Hughes Aircraft Co. plant in Tucson. There is currently no formal introductory training for quality assurance personnel in the Department of Defense. Our provision requires that the Secretary of Defense develop a formal Introductory Training Program of not less than 4 weeks in duration for all personnel who are responsible for assuring quality in contractor facilities.

Sections 606 and 607 deal with the issue of Department of Defense employees who leave the Government to accept employment with a defense contractor. Both of these carefully crafted sections are largely the work of my colleague and good friend Senator CARL LEVIN from Michigan, who is the ranking minority member on our subcommittee. He will, I understand, explain these provisions in some detail, so I will only briefly discuss them now.

On March 19, the subcommittee received testimony from several witnesses on the issue of permissible employment and activities and employment of former DOD employees, which is more popularly know as the revolving door issue. Sections 606 and 607 address deficiencies in the current laws and procedures that became evident through the hearing.

Section 606 tightens up the reporting requirements applicable to military and civilian employees who go to work for a defense contractor. The content of the required report has been significantly expanded. The section also changed the criminal sanctions for failing to file to an administrative penalty, because the criminal sanctions for failure to report have rarely been used.

Section 607 establishes new limitations on contacts concerning employment between Department of Defense procurement personnel and defense contractors. Under this section, any covered official must report contacts with a defense contractor regarding future employment and disqualify himself from any participation in the performance of contract functions relating to that defense contractor. A covered official would be barred from accepting employment for 2 years with a defense contractor if he fails to report or disqualify himself. He would also be subject to an administrative penalty of up to $10,000.

Section 608 provides an authorization of $3,000,000 in each of fiscal years 1986 and 1987 to continue the participation of the Department of Defense in the Procurement Assistance Cooperative Agreement Program with local governments and private nonprofit organizations. This program has demonstrated its effectiveness on a pilot basis to assist local businesses in securing contracts with the Department of Defense, whether it be for spare parts, support equipment or other goods and services.

Mr. President, this section goes to the heart of trying to get more small businesses within the Department of Defense industry. We have always been concerned with the industrial base in this country. Not only will this help expand the industrial base, but, obviously, if we have more businesses able to compete on these particular components, whether they be major weapons systems or just spare parts, we are going to have lower costs. There is no example I know of that when you have competition the price does not automatically fall. If we do have competition, with more companies involved, the price obviously is going to go down. Therefore, we have to figure out a way to get more people and more businesses into this system.

I know in my State of Indiana every 2 years we have a statewide defense procurement conference where over a thousand small businesses attend. We bring in defense industry people. We bring in people from the Department of Defense. We bring in other experts to explain to our folks how to do business with the Department of Defense. Believe me, there is a maze of bureaucracy over there. There is a lot of redtape. There are a lot of things we have to try to make more efficient and get a better handle on, but by and large we have been successful in getting more people involved in this system. These outreach programs have been exceedingly helpful, and this authorization expands their participation for fiscal years 1986 and 1987.

Section 609 is specifically intented to overturn the presumption established in the case of Bruce Construction Corp. versus United States, which is that the costs incurred by a government contractor are reasonable. Section 609 requires that in any proceeding before the Armed Services Board of Contract Appeals, the U.S. Claims

Court, or any Federal court in which the reasonableness of general or administrative costs in a defense contract is at issue, the burden of proof shall be upon the contactor to demonstrate the reasonableness of the costs.

Mr. President, this package, which was the outcome of 11 days of hearings, was approved unanimously by the Senate Armed Services Committee. I again commend my colleague, Senator LEVIN, for his hard work and creativity in this legislation, as well as other members of the Defense Acquisition Policy Subcommittee.

Mr. President, in conclusion I think we have put together a package which moves in the right direction. Other Senators on our committee—Senators GOLDWATER, WARNER, HUMPHREY, GRAMM, DIXON, BINGAMAN, and GLENN—have all had definite input into this committee amendment. We stand by to answer any questions. We feel, from our vantage point on that subcommittee and on the Armed Services Committee, that this is a positive step forward. We have announced more hearings, and we look forward to dealing with this issue not only today but continuing to monitor the situation and add our 2 cents worth in trying to get better efficiency and a better system of management within the Department of Defense because we really have to regain the confidence that has slipped by these past few years. I think there is a perception out there that the Department of Defense does not do anything but purchase hammers that are overpriced or toilet seats that are overpriced, which is simply not the case. But that is the perception that is out there.

This legislation, in fact, offers substantive reform, substantive recommendations on how we can get a better system at the Defense Department. I hope the Senate will join me in enacting this major piece of legislation, which now is in the form of a committee amendment. It is perhaps the most substantive piece of legislation in the area of procurement with which we will be dealing this year.

Obviously, this is not going to be the only time we will visit this issue, and I look forward to my colleagues on the Armed Services Committee and those who are not on the Armed Services Committee joining me in support of this amendment and joining me as we continue to have this discussion.

The only way we are going to improve the system is to have open communication, to have a competition of ideas—a competition of ideas that will come forward in the spirit of trying to make this a better system.

Mr. President, with that, I obviously urge adoption of this committee amendment. I understand that there possibly may be a substitute. If that is offered, we will certainly discuss it, and we will perhaps discuss some of the substance at a later time.

Mr. GOLDWATER. I thank the Senator from Indiana.

Mr. President, there will be a substitute offered by Senator PRYOR and Senator GRASSLEY. At present, those Senators are not on the floor.

Mr. President, I have this comment, before the Democratic side proceeds: This committee was first established by Senator JOHN TOWER when he was chairman of the committee. It was continued for a while as a task force, when we were not allowed to exceed the committee list of six. Since that time, it has been made an armed services subcommittee, and we replaced the task force to take care of that.

The matter of procurement is one that has hit the American public rather solidly because of the mistakes, either intentional or unintentional, by a very few of the manufacturers in this country who do business with the Pentagon. Keep in mind, when talking of a budget that runs around $320 billion, that is is a large sum of money; and when we talk about 17 million contracts being signed a year, that is 68,000 per day. I mention those figures just to give some idea of the immensity of this problem.

In my opinion, Senator QUAYLE, in chairing this committee, has done one of the best jobs of subcommittee work I have seen in my years in the Senate. There has been no appearance of an antagonistic attitude with respect to the manufacturers who have been represented or others. The approach has been "What can we do with you to help this whole thing work better?"

I am not going to excuse the handful who have abused the process under which we work, but I do think that legislation is needed in this field.

I am very happy that the Democrats have prepared a proposal. Ours has been prepared by Senator QUAYLE. I think this will be found to be a bipartisan issue. As President Eisenhower said, we want to get the biggest bang for our buck.

I feel certain that after the enactment of this amendment, or whatever we adopt in its place, we will have much better cooperation from the manufacturers of our country, and we will have provided the Pentagon with better guidelines as to how they do business with $320 billion a year. It should be kept in mind that we have no corporations that even approach that size. I know that corporations doing $2 billion or $3 billion business a year are confronted with massive problems of procurement, and that gives some idea of what we are up against here.

I might say to the Senator from Indiana that I read the startling article in this morning's Post. I read a rather more startling article in yesterday morning's Post. I notice that this is No. 2 of three articles, so I will await tomorrow's disclosures with a great deal of anticipation.

I do not know how they can make so many mistakes in reporting on military matters. They have expert people up here on the Hill; but when they reported on the Hummer, which I have driven and which I think is an excellent weapon, it is kind of hard to realize that perhaps they have never put their hands on it.

The other article had to do with a whistle and a flashlight, I believe. It was very revealing—but so are many of the things we read in the local press, I might say.

Mr. President, the Senator from Arkansas in not quite ready yet, so I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PRYOR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRYOR. Mr. President, today the American public has lost confidence in the Department of Defense's ability to procure weapons, materials, and services.

We read about procurement horror stories daily. We see unprecedented war profiteering in peacetime. We see weapons that do not work, and cost overruns that stagger the imagination and bleed the taxpayers, taking away precious tax dollars and defense dollars and throwing those dollars down a rat hole. We see a buddy system in sole-source contracting. We see virtually no competition in defense procurement.

We see more and more dollars buying less and less. And, strangely and sadly enough, Mr. President, it seems as if in the last 2 or 3 years, and especially in 1985, we see a mysterious set of circumstances when the Congress is spending more time dealing with our own Pentagon and our own contractors than we seem to be spending on what the Russians are up to.

The Department of Defense today operates in a noncompetitve economy. We not only need a law with teeth, we must now have a law with fangs. And today, with my colleagues that I will mention later in this discussion, we will offer a perfecting amendment to the amendment now pending before the Senate.

First, Mr. President, I would like at this time to acknowledge the long, hard, and dedicated work of Senator QUAYLE from Indiana and the Members who compose his procurement subcommittee of the Armed Services Committee.

Senator QUAYLE and his Subcommittee on Procurement have attempted to

identify the problems caused by the existing laws and have done a good job in that regard.

Our perfecting amendment that I will offer later in the day, sponsored by members of both parties, is a sincere and a conscientious effort, after many weeks of work across party lines and political philosophies, to forge an even stronger set of rules for the Pentagon and the contractors than proposed by the distinguished Senator from Indiana and other members of the Armed Services Committee in the Senate.

Our proposal would provide a capitalistic approach to defense contracting. It makes true competitive contracting easier and makes sole-source contracting without any competition more difficult. It does not take effect in 1990 or 1989 or 1988 or 1987, as would some provisions sponsored by the Senator from Indiana, but most of our amendment would take effect October 1 of this year, 1985.

It would force the Congress to authorize sole-source contracts. As the very distinguished Senator and chairman of the Armed Services Committee, Senator GOLDWATER, will note, Congress has basically allowed the Department of Defense and other agencies to oversee contracting in the Department of Defense.

We think, Mr. President, it is now time that the Congress deal itself back into this game; deal itself back into this arena where we will have the authority, the right, and the obligation to approve sole-source contracting of major weapons systems.

Out perfecting amendment would require contractors to submit to penalties of perjury if false claims were submitted. That, Mr. President, is no different than what any American taxpayer submits to on April 15 when we file our income tax returns—the penalty of perjury if false claims or false reports are submitted. We think that this is a must. And, once again, we think that this is a strengthening section of our proposal over that offered by the Senator from Indiana.

Our proposal shifts the burden of proving what costs are reasonable from the Pentagon to the contractor. I might say that this is generally the same language as proposed by Senator QUAYLE, and I compliment Senator QUAYLE and his subcommittee and those who have worked this language out.

Our perfecting amendment will require at least two bidders on major weapons systems procurement, what is called "dual-sourcing." And for once and for all it will prohibit and address the revolving door problem in a very strong way.

Our proposal differs from Senator QUAYLE's proposal and the committee amendment proposal in that our perfecting amendment will have language that requires the defense contractors to pay for the repair or the replacement of defective parts or equipment—not the taxpayers. It is the contractors who must bear this burden and who should bear this burden.

Our perfecting amendment to the Quayle language now before the Senate is tough, it is to the point, and it should lead, Mr. President, to defense dollars going a longer way.

I feel very certain that our proposal will probably—let me strike out "probably"—I feel very certain that our proposal will be opposed by the contracting community and by the Department of Defense itself. And if the situation were otherwise, I might worry that our proposal was not strong enough.

Mr. President, it is time Congress started to get serious about cleaning up the mess in our military procurement. In the last few years it has become painfully obvious that a deep and pervasive sickness is afflicting our national defenses. With very few exceptions, Congress has been prescribing aspirin for a patient that clearly needs to go into the intensive care ward.

Only the briefest scanning of any newspaper on any day tells us the problem is large and is not getting any better—in fact, it is getting worse. We now appear to be in a situation of unprecedented "war profiteering" in peacetime. The result is not just the waste of uncounted billions but also too few weapons—and too many of them that will not work much of the time. The defense buildup over the last 6 years has been in dollars and not much else; we are building toward failure, not strength.

The problem is not a new one; it has been building for decades. More money in the absence of reform has just accelerated it. President Reagan is not the only President to blame; there is plenty of that to spread around to both parties. It is unavoidable, however, that in the last 4 years we have proved the dictum that you cannot solve problems by "throwing money at them."

Many in Congress have identified competition as an effective way to reduce outrageous defense costs because it give the producer incentives to build his product right. But our deeds in Congress have not matched our rhetoric. We have not passed any legislation that actually requires competition, real competition, in defense procurement. Today, $40 billion in contracts is awarded every year without competition. That figure represents about one-third of the procurement total.

Members of Congress, the press and the public—our constituents—have complained bitterly about the dubious ethics of senior defense officials going onto the payroll of the very same companies they were supposed to monitor when they were public servants. But all we have done in Congress so far is to ask for reports on the so-called revolving door. Nothing in the law so far would put an end to what many agree is an unethical practice.

We have read horror stories in the press of weapons delivered to our armed services that would not pass the most rudimentary quality control tests in the private sector. Two years ago we passed warranty legislation to address this problem; only last year we revised that law to carve some loopholes into it. The quality control director of the Defense Logistics Agency has said that many systems cost 50 percent more than they should because of shoddy workmanship by the contractor.

There is no incentive today, Mr. President, for the contractor not to make shoddy weapons.

In addressing these problems some advise us to take our time. In hearing after hearing, and year after year, we hear the officials from the Department of Defense come before this Congress and say,

> We have solved this problem. We have straightened this mess out. No longer are we going to be hearing about those horrow stories. We have our act together. We have found the solutions to whatever problem at hand.

How many times have we heard that, Mr. President? How many more times will we have to hear it before the Congress of the United States decides to get tough with an unthinkable situation. When the solutions are clear and obvious, the only reason to delay is to allow this ripoff to continue. We are not in favor of this approach.

Once again, Mr. President, I would like to commend Senator QUAYLE and his new subcommittee for tackling this issue, and for identifying several areas that need immediate attention. In our amendment, we have addressed those same issues but in a considerably different way. We have tried to make the results equal, with tough policy decisions, and tough laws that deal not only with the Department of Defense, but also the contracting establishment.

With all due respect to Senator QUAYLE, I would like to point out some areas where his proposal falls short of the mark:

His amendment has identified the need to increase competition and to conduct more "dual sourcing," which is the production of a weapon system by two or more producers; however, his amendment allows the Secretary of Defense to waive the dual sourcing requirement whenever the Secretary of Defense finds that in the "national interest" a waiver is justified.

Mr. President, this national interest exception was identified as a significant loophole when the Competition

in Contracting Act was written into law last year, and it was removed. The committee amendment would reestablish that loophole. Even worse, the committee amendment, or the Quayle amendment, does not really require competition in its dual sourcing. There is nothing that I can find in the committee amendment that strictly requires the two dual sources to compete against each other. Nothing prevents them from having a 50-50 split of the pie, which would remove any incentive once and for all for one producer being cheaper or better than the other.

In the committee amendment under that issue of "revolving door" language, there are also significant loopholes, Mr. President. There is nothing in the committee amendment that would prevent a Government worker from going to work for a contractor he supervised, unless the employee misleads the Government and is caught. I think that we can do better on the issue of this revolving-door problem. I would like to think my friend and colleague, Senator PROXMIRE from Wisconsin, who has long been concerned, who has long brought this matter to the attention of the Congress and the taxpayers that we need to do something very strong to prevent the revolving-door situation from getting worse.

I might also add that Senator PROXMIRE is a cosponsor of this amendment that we will shortly send to the desk. The committee's language, or Senator QUAYLE's language, if I might call it that, bars a Government employee from working for a contractor he supervised only—only—when the contractor offers him a job, when the employee is still in the Government and when the employee fails to disqualify himself from further Government supervision of the contractor. But, Mr. President, if the contractor is smart enough not to offer that employee a job until after he leaves the Government, and if the contractor is crooked enough—and I hope that is not the case—to do everything but offer the Government worker a job, there is no bar to the revolving-door problem in Senator QUAYLE's amendment.

There are also loopholes in the committee's language regarding quality control. Under that language the Department of Defense quality control workers are required to get quality control training. But contractor quality control workers are not. Furthermore, Mr. President, absolutely nothing in Senator QUAYLE's amendment would cause the contractor to pick up the cost of his own deficient work. The committee amendment would leave standing loopholes in the existing warranties legislation: an exemption from quality control warranties for the first 10 percent of any production line and for any item costing less than $100,000 or program costing less than $10 million. There may be a reason to exempt such items from performance guarantees, but there is no justification for exempting such items from the quality control specifications that a contractor has agreed to in a contract.

There is still another weakness, Mr. President, in the committee amendment that is pending at this time. This is respecting the "should cost" problem that exists in today's defense procurement situation. The committee's language would allow the contractor to tell us what his products should cost. Mr. President, can we expect anything more than self-justification from this provision? Even if that loophole were covered, however, the Quayle amendment would be deficient in this Senator's opinion. In the past, the Department of Defense has told us with a perfectly straight face that stool caps "should cost" $1,000, that pliers "should cost" $600, and that hammers "should cost" $436. Mr. President, we should be asking for an end to this tragically comical self-justification. We should not be asking for more of them.

There is still another problem occurring with the committee language respecting education and training for program managers and generals in the services' various materiel commands. The committee amendment seeks more of the very same training that has been available up to this point. This is not calling for a change, nor does it call for an improvement. It is calling for more of the same. It is stating that we will be willing to accept busines as usual. We feel that the business-as-usual approach now existing, that relationship between the contractor and the Department of Defense, cannot be justified.

Quite properly, Mr. President, the committee amendment puts the burden of proof on the contractor when he is in dispute with the Department of Defense over the reasonableness of the cost. Unfortunately, however, there is still another loophole. Only general and administrative costs are covered and not all costs are covered. Also, it is not clear whether the committee's "burden of proof" language would allow, or not allow an existing definition of the term "reasonable" in the Armed Services Procurement Manual. This dubious definition allows any cost which DOD paid in the past, no matter how high, to be termed "reasonable."

Finally, the Quayle amendment fails to put itself into effect anytime soon.

We may spend another $1 trillion in our Department of Defense before the committee amendment or Senator QUAYLE's amendment actually takes effect. Some of the committee's provisions will not go into effect until the year 1990. My question, Mr. President, is this: Is there any Member of this body who would care to wait until 1990 to address the serious deficiencies that we all know exist today in the Department of Defense procurement system?

It is time Congress got serious about actually solving the problems we all know exist. Weak provisions, filled with loopholes, going into effect years from now will not accomplish our mission. We need real solutions, and we need them now.

First, we need a dual sourcing requirement that actually forces dual sourcers to compete against each other by rewarding the best bidder with a majority of production under the contract. Furthermore, we need to start the dual sourcing requirement at the development stage and not wait for a sole-source developer to get his foot in the door for a production contract after he has done all the development for a weapons system. Finally, we should not want to grandfather onward to the future all sole source contracts that exist today, and we should want to put into place a mechanism that discourages sole sourcing and encourages competition and dual sourcing. The committee amendment does none of these things.

The amendment that I shall submit in behalf of myself and Senators GRASSLEY, Senator PROXMIRE, and others later, during the course of this discussion, we sincerely feel does all of these things.

We need a revolving door requirement that actually closes the revolving door. We need to prevent for a minimum of 3 years a Government worker's going to work for the contractor he was supposed to supervise in Government. We need to apply fines and civil penalties against those who attempt to operate unethically.

If we really want to find out what a weapons system "should cost," we should see what it costs in the commercial world where true competition exists. If no commercial item compares to the defense system we are considering, we should see how much a similar system costs when it is produced abroad. That will give us some objective standard to measure against. If the item is not available commercially or abroad, we should be requiring an independent cost analysis, not the analysis furnished by the contractor.

When a contractor delivers equipment, no matter what it is, to DOD and that equipment is defective from a quality control standpoint. Who should pay the cost—the taxpayer or the contractor? We believe that the contractor should be picking up that cost, including labor and installation costs.

Should we be paying the contractor twice for equipment; once to build it wrong and a second time to build it right? The answer to that question is obvious.

When the "reasonableness" of a contractor's costs are at issue, all of his costs should be covered, not just some of them. We should also be defining the term "reasonable" in a commonsense manner.

We should be addressing these problems as if they existed today, as they do, not as if they might exist sometime in the distant future. Our loophole-less solutions should go into effect as soon as possible, not in 1987, 1988, 1989, or 1990.

Finally, Mr. President we have to demonstrate that we are deadly serious and not just playing around nor just giving lip service to a problem that is demoralizing our hope for a strong national security system. Contractors and Government employees who breach ethical standards, who attempt to defraud the Government and to steal the taxpayer's dollars should be going to jail; not contractor salary nirvana, not cozy retirement, and not ever higher paying jobs in Government and industry.

Sixteen million contracting decisions are made every year at the Department of Defense. If we can inject competition into some of those decisions, we will save the taxpayers billions of dollars.

Furthermore, we will not only be purchasing weapons that work, but we will be protecting the lives of our soldiers and our military and civilian personnel whom we have charged with protecting the national security of our country.

The main purpose of our amendment is to introduce something that has been foreign to the Pentagon. It is an idea called capitalism. Capitalism made this country great and it can help and should help us build a stronger defense and get more out of our defense dollars than we are getting today.

Procurement reform involves some very, very complicated issues. Honest men and women will disagree over the proper approach. Today, I wish to thank once again Senator QUAYLE, Senator LEVIN, the members of the Procurement Committee, and members of the Committee on Armed Services, especially Senator GOLDWATER and Senator NUNN and their staffs, for being so cooperative on this matter. I shall be glad to discuss any and all of these provisions of my amendment in greater detail as this debate continues this afternoon.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. QUAYLE. Mr. President, I shall have more to say about this substitute amendment when it is acted on later on this afternoon, but I would like to make a couple of brief observations.

First, I appreciate the interest of the Senator from Arkansas in this area of procurement. I certainly welcome his input on these important issues and encourage him to continue to communicate with me, with Senator LEVIN, and with others who are on the subcommittee. Obviously, I do not encourage or like the substitute that is going to be offered to the Senate for a number of reasons.

First and foremost, Mr. President, I think it is important to point out that there seems to be an agreement that the subcommittee, through all of its hearings—11 hearings—all of the hours of work we put in there, has at least identified the appropriate issues we ought to be discussing. I think Senator PRYOR had indicated that that was in fact an agreed-upon condition, that we have identified the issues and started the debate and moved this thing forward where it should be.

I would say that this is not the so-called business as usual. The Armed Services Committee, in the past, has never really been in the business of looking at procurement. Under the leadership of this chairman and the creation and establishment of this subcommittee, the Armed Services Committee has now gotten into the business of looking at procurement and acquisition. So there is no disagreement, the way I understand the initial statement on this, on what the issues are.

There appears to be a disagreement on the technicalities of those amendments and those issues. I point out technicalities, Mr. President, because as of now, we have not seen the final substitute. We will see that substitute. I understand they have made a number of changes in the competition and contracting section from the previous substitute that was going to be offered and I think they have in fact moved in the right direction. I think that they are in fact moving in the right direction. I know the Senator from Michigan [Mr. LEVIN] and the Senator from Maine [Mr. COHEN], the primary movers of that amendment, will certainly appreciate that they have changed some of those positions. So in many respects, Mr. President, we are going to be discussing and arguing technicalities on this amendment, whether it is the committee amendment or the Pryor amendment.

As chairman of that subcommittee, we have put in one heck of a lot of work to try to iron out these technicalities. This is not anything that we talked about in the cloakroom or discussed casually over a cup of coffee. We had a lot of hearings. We put in a lot of work. As a matter of fact, one of the markup sessions lasted 5 or 6 hours, if my memory serves me correctly. There were a lot of issues to be discussed. The issue of dual sourcing is an important issue, particularly when we get into production. We want to encourage that because when we have two contractors out there and you can play it back and forth, you are going to get a lower price. Obviously, you have to have a couple exceptions, but we extended the Competition in Contracting Act where they merely authorized dual sourcing in production and now the committee is requiring it except for certain circumstances.

Now, this is a continuation of what we started with, the Competition in Contracting Act. This is a way of saying that we want to have more competition. This is what this committee amendment seeks. This is not business as usual. It is a very serious effort by a number of very serious Senators who spent a lot of time on this issue in the committee trying to figure out what we ought to be doing in the area of dual sourcing.

As to the revolving door issue, Senator LEVIN, who is the primary sponsor of the committee amendment, will be speaking a lot more about it. But the problem with this absolute prohibition, very quickly, Mr. President, is that it would be detrimental to getting people into Government, particularly at the Assistant Secretary level and higher. We already have enough problems getting good people to sign up and put in a tour of Government service. I think that this will complicate it, and for this reason and others that we will get into later, I would be opposed to that particular section.

Mr. President, the Senator from Arkansas talked about the warranties provision. We went through the warranty provisions last year. We started with the good Senator from North Dakota [Mr. ANDREWS], who put it on an appropriations bill. The Armed Services Committee then worked with Senator ANDREWS, myself, Senator LEVIN, and others, and we worked out a very comprehensive warranties policy, an issue that I think now is being not only enforced but complied with and a change of events that the Pentagon actually welcomes. A lot of them over there are saying, "I am glad we have that now." At first there was a lot of opposition to it, but now they are very much in favor of it.

The Senator from Arkansas talks about timeliness, when this amendment is going to be enacted. Part of the committee amendment, as he well knows, becomes effective on October 1, but there are provisions that become effective as late as 1990. But mainly those provisions apply to our education and training requirements are going to be for acquisition personnel.

Obviously, Mr. President, if we are going to require, as we should, of our program managers, particularly of major weapons programs, 8 years of service in the area of procurement, there are not that many people who have that background right now and so why would we want to put in a provision that simply cannot be complied with? The Department of Defense

knows what we want. I think this is a reasonable phase-in period, but there is no way that we could comply with that 8-year provision if in fact we had everything effective on October 1.

So, Mr. President, obviously we have a choice, but I think when we narrow this thing down, perhaps the spirit of the substitute and the committee amendment is not terribly different. It is not terribly different because we have identified all the issues. There have been changes. We will have to see what the exact substitute is when offered. And I will speak to it at that point. We have put in a lot of hard work. There is a strong bipartisan support for the committee amendment. It came out of the committee unanimously, with Republicans and Democrats joining hands on this very important issue. It is a step forward. It is a step that I think we ought to take, and I hope the Senate will adopt the committee amendment rather than the substitute when it is offered.

AMENDMENT NO. 148

(Purpose: To strengthen the provisions in the Committee amendment regarding post-employment)

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. LEVIN. Mr. President, I send an amendment for myself and Mr. RIEGLE to the desk and will ask for its immediate consideration. I do expect that this amendment will be accepted by the majority and the minority. It is an amendment to the committee amendment.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Michigan [Mr. LEVIN] proposes an amendment for himself and Mr. RIEGLE numbered 148 to amendment 147.

Mr. LEVIN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In Committee amendment number 147:

On page 14, line 21 strike the words: "personally and substantially"

On page 18, line 9 strike the words: "personally and substantially"

On page 18, line 12 after the word "awarded" insert: ", or an agent of such contractor,"

On page 19, line 23 strike "two-year period beginning on the date of the contract" and insert in place thereof "ten-year period beginning with the date of separation from government service"

Mr. LEVIN. Mr. President, as I indicated, I am hopeful and act on the belief in sending this amendment to the desk that it will be acceptable to the floor managers of the bill and of the committee amendment. I want to make some comments now on the committee amendment, and during those comments the purpose of this perfecting amendment I have just sent to the desk will become clear.

However, first, Mr. President, I commend the chairman of our subcommittee, Senator QUAYLE. He has been a most responsive and responsible chairman during the first year of this new acquisition subcommittee. He is its first chairman. He has handled this job with distinction, with courage, and with fairness. I commend him for that. It has been a pleasure to serve with him as ranking member of that subcommittee. He has established a pattern and a precedent of careful deliberation in this most complex of areas. If we follow this pattern, if we carefully deliberate on the reforms that we need in the procurement area, then I believe we can in fact stimulate competition and eliminate some of the excesses and some of the waste that exists in our procurement system.

Mr. President, just a word about my friend from Arkansas. I welcome Senator PRYOR's contribution and his effort. I do not know exactly what the details of his amendment will be. I look forward to seeing them later on this afternoon. But I do know we need all the help we can get to reform a system which desperately needs reform. This is not the first effort today, by the way. We had the Competition in Contracting Act last year. We had a number of other laws and amendments, as my friend from Arkansas knows. As a matter of fact, he cosponsored and worked very hard on many of them. But it is a continuing effort to attack a massive problem and we welcome his support and his involvment in that effort. I do not know where it will all end in terms of his substitute, what parts of it we will find acceptable, if any, and what parts we would oppose for reasons which will become more clear during the debate. But I do want him to know, before this debate proceeds further, that I particularly welcome his contribution. He is a dear friend of mine. He has shown great sensitivity this last week in terms of consideration of his perfecting amendment to the existing Competition in Contracting Act which we passed last year.

Mr. President, I first want to this afternoon address my comments to the revolving door issue. That is one portion of this title, but it is the portion in which I have the most involvement and to which I would like to address my comments.

One side of the revolving door question refers to Government employees who leave Government service to work for contractors who they may have had a responsibility for managing. This issue has been a matter of great personal concern to me, as I know it has been to many other members of the Armed Services Committee and many other Members of the Senate and House of Representatives. Indeed, I raised this issue in many of our subcommittee's 11 hearings regardless of the immediate subject at hand, because I find that it has application to many of our discussions. We wanted in our hearings the benefit of every possible opinion we could get on the revolving door issue. I think the concern of the public and Congress boils down to this: Have these employees been watching after the interests of the taxpayers or have they been watching after their own interests?

That is the bottom line ethical issue which has tremendous ramifications for our procurement process. Have these employees, the ones who are working for us on Friday and then the next Monday are working for a defense contractor whom they monitored, been watching after the interests of the taxpayers, or have they been watching after their own interests?

The public, Congress, and the Department of Defense must be assured that our employees have solely the interests of the taxpayers at heart when they are monitoring the contracts with defense contractors.

Department of Defense employees are involved in a myriad of activities that might be termed the monitoring of expenditures of taxpayers' dollars. We must have concrete assurance that our representives at the bargaining table are as zealous as possible and are totally committed in their efforts to produce the best possible results for the taxpayers.

The issue of the revolving door has been subjected to intense public scrutiny. Last January, we read in the press an in-depth story documenting the hemorrhage of army talent from the Divad Program to Ford Aerospace and its subcontractor, Westinghouse Co. Before the 1980 competition for production of Divad, Ford hired three lieutenant generals who had been involved in developing the proposal. Subsequently, five more Army officers involved in the competition were hired by Ford and Westinghouse. Because of my interest and my subcommittee assignments, I was determined to study this issue closely.

Public Law 91-21 requires the Secretary of Defense to send to Congress a list of all Department of Defense personnel above the grade of GS-13 who accept jobs with DOD contractors receiving more than $10 million in negotiated contracts with the Department. This report is simply a compilation of all the forms required to be filed by the employees for the 3-year period after leaving Government service.

In the 1984 report, there were 2,240 such forms. I directed my staff to review each of the 2,240 forms filed with the Armed Services Committee last year and to bring back an analysis of the information therein.

From this review, we learned several things: First, of the 2,240 reports filed, there is not enough information to determine whether the employee was involved with a contractor while he or she worked for the Government. Second, it was impossible to determine whether the person took steps, or might have taken steps, to disqualify himself from dealing with a contractor with whom that person was discussing employment.

In addition, the problem is not getting any smaller. Last Friday, the Senate Armed Services Committee received the 1985 shipment of forms. The number has grown from 2,240 to 3,308.

This weekend, we went through those 3,308 forms. Again, the vast majority of the forms do not yield the kind of information necessary to make a decision about whether a former employee has dealt with a contractor or whether the former employee has been discussing potential employment with the contractor while monitoring that contractor for the Government.

This amendment of the committee is going to correct that deficiency in those forms. After this amendment becomes law, if it does become law, we are going to know from those 3,300 forms whether or not those employees had any contact with the employer for whom they went to work, whether or not discussions took place when they were monitoring those contracts, and whether they disqualified themselves from any dealings with the contractor while they were working for the Government and discussing potential employment for themselves.

Our review did not begin or end with the forms. We also reviewed the current criminal statutes that might be applicable. One criminal statute, often cited as the postemployment conflict-of-interest law, does not address the question of whom one accepts employment from. It picks up the script after the former government employee departs Government employment. It bars that employee from representing a contractor before the Government on the same particular matter on which the employee was personally and substantially involved while a government employee.

The problem with this statute was that the implementing regulations had so narrowly defined the three operative terms—representing, particular matter, and personally and substantially—that the statute became almost totally ineffective.

A second criminal statute, 18 United States Code 208, makes it a crime to participate in contracting decisions on behalf of the Government with parties with whom the government employee has a financial interest. The statute designates an agreement for future employment as creating a financial interest on behalf of the employee. However, one court already has interpreted this statute to mean that the nature of any contact between the government employee and the contractor over a possible job must rise to the level of negotiations in order for the criminal statute to apply. Discussions are not prohibited. The requirement for negotiations may have been appropriate for the court to impose before applying criminal sanctions. My comments are not directed to the appropriateness of that criminal case.

However, this Senator does not believe that the contact between a contractor and a government employee should have to rise to the level of negotiations for employment, before an individual should have to disqualify himself from dealing with that contractor on behalf of the taxpayer.

The Acquisition Subcommittee held a hearing on the revolving-door issue. Among the witnesses was Deputy Secretary of Defense Taft. I asked Secretary Taft at that March 19 hearing what I consider to be the central question in this debate. I asked,

> Can you tell us, of the 2,240 reports filed last year, how many of those people were "personally and substantially" involved with the companies with whom they subsequently took jobs? And, of those who were "personally and substantially" involved with the contractors with whom they accepted employment, how many took steps to disqualify themselves from monitoring contracts for the Government while at the same time discussing future employment?

Deputy Secretary Taft could not answer those questions. No one else at the hearing could answer those questions. No one in the Department of Defense could answer those questions, and they have not subsequently been able to answer those questions. So I cannot answer those questions, and neither can the Senate Armed Services Committee nor anyone else in this body answer those questions.

However, what we all can do is to take steps today to ensure that those questions will not go unanswered again, in order that we might be protected, as taxpayers, from persons who might, even subconsciously, be affected by a contractor for whom a government employee is thinking about working, thus placing that government employee in a conflict-of-interest situation.

I offered an amendment in the Armed Services Committee that was accepted by my colleagues and in many ways is stronger than a blanket bar. At the same time, this amendment is targeted at the problems of the conflict of interest. It is stronger because it goes right to the heart of the matter, and that is, I do not want people working for the Government, monitoring expenditures of billions of dollars, discussing with those on the other side of the table their own prospects for future employment. That is what this issue is about: You cannot represent us and discuss employment with them.

The committee amendment has a ban on employment—if this perfecting amendment is adopted, a 10-year ban. This ban does not run from the time of the contact between the employee and the outside contractor, as previously drafted, but with this modification runs from the time the employee leaves Government service and it runs for 10 years, as it should, because this is the penalty that an employee should pay if he violates the requirements of this statute that he disqualify himself from any contacts with a contractor if that employee is monitoring the contract of Government with that contractor.

We believe that these provisions are the best way to slam that revolving door shut on those who violate the spirit of our conflict-of-interest laws.

We have laws on conflict of interest, and those laws are usually applied criminally and have had very little effect in this area.

We want an administrative enforcement with this 10-year ban, a monetary penalty of $10,000 to make sure that employees keep their eye on the taxpayers' dollars and not on their own future.

We want any employee who is discussing future employment for himself or herself to disqualify himself or be banned from employment with that company for 10 years.

So the committee amendment is stronger in many ways than a blanket bar. It is stronger in a critical way. For instance, it applies to covered employees who have any involvement with the contract. The involvement need not be personal and substantial—that is the other modification in this amendment which was sent to the desk—because we believe that if you have any contact at all with an outside company about their contract with the Government, whether that contact is substantial or minimal, you should not be discussing employment for yourself at the same time. That is a very important ethical principle which this amendment with this modification would embody.

We say no matter how minor the contact with the contractor, do not discuss a job for yourself while representing the Government. The contact may be minor but the ethical issue here is major.

The committee amendment not only avoids defining the degree of involvement in order to apply the 10-year ban but it also adopts an administrative penalty for enforcement.

We have done this in recognition of the fact there has not been a single criminal prosecution, according to our knowledge, under 18 U.S.C. 207. Thus, the committee gives the authority to the Secretary of Defense to administer

penalties under guidance of the Administrative Procedures Act.

This should result in greater policing of the committee's provision.

The committee's amendment is strong because it includes again a 10-year ban when the employee has failed to live by the procedure established and did not disqualify himself from making procurement decisions while discussing a job as required by law.

The committee language is also strengthened in this modifying amendment to pertain not only to contact by or discussions with a defense contractor but also any person acting on behalf of the defense contractor, and thus the committee amendment would even cover any employment agency or other third party acting as an agent for the contractor in attempting to reach an employee for job discussion.

Mr. President, the strongest and the fairest approach to the revolving door is to slam that door on those who abuse the system and place themselves in a conflict of interest situation, slam it hard, with a 10-year ban on employment and a fine, but slam it on the right people, those who have contacts no matter how slight while discussing jobs for themselves, who have not disqualified themselves from any monitoring of that defense contractor's work with the Government.

Mr. President, I do not know whether my friend, the floor manager, the distinguished chairman of our committee, has had a chance to review this amendment to our committee amendment.

I yield the floor.

Mr. THURMOND. Mr. President, section 603 requires the Secretary of Defense to formulate an acquisition plan that includes two or more production sources for major acquisition programs. Such dual sourcing must meet the following criteria:

Dual source would likely reduce costs.

Not result in unacceptable delays in fulfilling the needs of the Department of Defense.

It would be in the interest of our national security.

The Secretary of Defense would justify his decision in the first budget request containing funds for production of the specific program.

Section 604 requires a "should cost" analysis for each major acquisition program/awarded to a single source. Should cost analyses have proven to be more accurate in the past than normal cost analyses, but have been infrequently used.

Section 605 requires each service secretary to issue regulations establishing minimum requirements in education, training, and experience for program managers. The following are requirements:

Attendance at the Program Management Course at the Defense Systems Management College or other comparable institution.

Minimum of 8 years experience in acquisition, support, and maintenance of weapon systems/with at least 4 years in major buying commands.

A quality assurance training program is also mandated by section 605.

Section 606 and 607 deal with former defense employees who leave Government work to work for defense contractors. Section 606 strengthens reporting requirements of civilian and military personnel who go to work for a defense contractor. The content of the report is expanded and the criminal sanctions are altered. Section 607 limits contacts concerning employment between Defense personnel and contractors. Under the section, Government officials must disqualify themselves from working on contracts with contractors when consideration for employment is broached. Failure to disqualify one self could result in a $10,000 fine and a bar from employment with contractor for 2 years.

Section 608 provides continued authorization of $3 million in fiscal year 1986 and 1987 for DOD to participate with local governments and nonprofit organizations to assist local businesses in securing contracts with the Department of Defense.

Section 609 shifts the burden of proof from the Department of Defense to the contractor in proving the reasonableness of costs. This will apply to Federal court, the U.S. Claims Court or the Armed Services Board of Contract Appeals.

These provisions should improve our acquisition process and ultimately save tax dollars. I indorse the Quayle-Levin amendment which is now embodied as a committee amendment, and hope the Senate will adopt it. It is bipartisan and was adopted by the full committee.

Mr. GOLDWATER. Mr. President, I might say I do not believe the Senator from Indiana objects to this amendment. I do not believe there is any objection from the minority side.

So, Mr. President, we will accept the amendment of the Senator from Michigan.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 148) to amendment No. 147 was agreed to.

TECHNICAL AMENDMENT

Mr. GOLDWATER. Mr. President, we have a technical correction. On page 11, line 22, of the Armed Services Committee bill, the term "Director of Operational Test and Evaluation" appears. The correct term should be "Director of Defense Test and Evaluation."

The Director of Operational Test and Evaluation is funded in the "Operation and maintenance account."

We have a proposed amendment that the minority side agrees to.

On page 11, line 22, of S. 1160 strike the words "Director of Operational Test and Evaluation" and insert the following: "Director of Defense Test and Evaluation."

I ask unanimous consent that that be done.

Mr. PRYOR. Mr. President, reserving the right to object, what role are we transferring for the Director of Operational Testing here?

Mr. GOLDWATER. This is a technical correction that Senator NUNN has agreed with.

Mr. PRYOR. I understand.

Mr. HEFLIN. Mr. President, I understand the chairman says that Senator NUNN, the floor manager on our side, has accepted this technical amendment, so we have no objection.

Mr. GOLDWATER. He knows all about it.

Will the Senator send the amendment to the desk?

The amendment is as follows:

On page 11, line 22 of S. 1160 strike the words "Director of Operational Test and Evaluation" and insert the following, "Director of Defense Test and Evaluation."

Mr. GOLDWATER. Is there any further discussion of this amendment. I hate to pass it without anyone here.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, are we talking about the technical amendment or the committee amendment?

Mr. GOLDWATER. No; the Senator's amendment has been accepted. The technical amendment has been accepted.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HUMPHREY). Without objection, it is so ordered.

Mr. NUNN. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside and become the pending business after the disposition of an amendment which I hope will be accepted by the committee.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

AMENDMENT NO. 149

(Purpose: To authorize the Secretary of the Army to accept and to operate a National Science Center for Communications and Electronics)

Mr. NUNN. Mr. President, I send an amendment to the desk and ask for its immediate consideration. It is on

behalf of myself, Mr. MATTINGLY, Mr. THURMOND, and Mr. CHILES.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Georgia [Mr. NUNN], for himself, Mr. MATTINGLY, Mr. THURMOND, and Mr. CHILES, proposes an amendment numbered 149.

Mr. NUNN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title IX of division A of the bill, insert the following new section:

ARMED SERVICES NATIONAL SCIENCE CENTER FOR COMMUNICATIONS AND ELECTRONICS

SEC. 916. (a) The Congress hereby finds—

(1) that scientific and technological developments in communications and electronics are of particular importance to the United States in meeting its national security, industrial, and other needs;

(2) that enhanced training in the technical communications, electronics, and computer disciplines is necessary for a more efficient and effective military force;

(3) that the Secretary of the Army, through the Training and Doctrine Command, is responsible for providing training to members of the Army;

(4) that the Ninety-seventh Congress, in Senate Concurrent Resolution 130 of that Congress, encouraged the establishment within the United States of a national center dedicated to communications and electronics;

(5) that the Secretary of the Army entered into a Memorandum of Understanding with the National Science Center for Communications and Electronics Foundation Incorporated, a nonprofit corporation of the State of Georgia, in which the Army and such foundation agreed to develop a science center for (A) the promotion of engineering principles and practices, (B) the advancement of scientific education for careers in communications and electronics, and (C) the portrayal of the communications, electronics, and computer arts.

(b) It is the purpose of this section to recognize the relationship between the Army and the National Science Center for Communications and Electronics Foundation Incorporated (hereinafter in this section referred to as the "Foundation") for the development, construction, and operation of a national science center and to authorize the Secretary of the Army (hereinafter in this section referred to as the "Secretary") to make available a suitable site for the construction of such a center, to accept title to the center facilities when constructed, and to provide for the management, operation, and maintenance of such a center after the transfer of title of the center to the Secretary.

(c)(1) Subject to paragraph (2), the Secretary may provide a suitable parcel of land at or near Fort Gordon, Georgia, for the construction of an armed services national science center by the Foundation to meet the objectives expressed in subsection (a). Upon completion of the construction of the center the Secretary may accept title to the center and may provide for the management, operation, and maintenance of such center out of funds appropriated to the Army for such purpose.

(2) As a condition to making a parcel of land available to the Foundation for the construction of a national science center, the Secretary shall have the right to approve the design of the center, including all plans, specifications, contracts, sites, and materials to be used in the construction of such center and all rights-of-way, easements, and rights of ingress and egress for the center. The Secretary's approval of the design and plans shall be based on good business practices and accepted engineering principles taking into consideration safety and other appropriate factors.

(d) The Secretary may accept conditional or unconditional gifts made for the benefit of, or in connection with the center.

(e) The Secretary may appoint an advisory board to advise the Secretary regarding the operation of the center in pursuit of the goals of the center described in subsection (a). The Secretary may appoint to the advisory board such members of the board of directors of the Foundation as he considers appropriate. The Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to the advisory board appointed under this subsection.

(f) Consistent with the mission of the armed services and the efficient operation of the center, the Secretary may make facilities at the center available to the Foundation for its corporate activities and for such endeavors in the area of communications and electronics as the Secretary may consider appropriate.

(g)(1) The Secretary may make the center available to the public and to other departments and agencies of the Government for research and study and for public exhibitions. The Secretary may charge for such uses as he considers necessary and appropriate.

(2) Any money collected for the use of the facilities of the center shall be deposited to a special fund maintained by the Secretary for the maintenance and operation of the center. The Secretary shall require the Auditor General of the Army to audit the records of such fund at least once every two years and to report the results of the audits to the Secretary.

Mr. NUNN. Mr. President, I ask unanimous consent that the Senator from Arizona [Mr. GOLDWATER] be listed as a cosponsor on this proposal.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, this amendment is to establish what we call the Armed Services National Science Center.

In December 1982 Congress adopted a Senate concurrent resolution which I coauthored with Senator Schmitt supporting the establishment of a National Center for the Advancement of Science and Technology in the specific areas of communications and electronics.

To carry out this congressional resolution, a private nonprofit foundation was established and organized under the laws of the State of Georgia. The foundation, under the chairmanship of Harry Gray and the vice chairmanship of Lt. Gen. William Hilsman, (retired), represents both educational interests and industries who have a critical need for technologically trained workers.

That is why communications and electronic industries and educational institutions have been actively supporting and participating in the foundation's work.

The major thrust of the Center is to serve as a catalyst to increase the quality of science and math education in high schools, junior colleges, and work settings so those workers entering government or private industry will come with increased technical literacy. The Army, as a major consumer of technical graduates, has a vested interest in seeing improved education in these vital skills.

This will be the only science center devoted exclusively to communications and electronics, and will be the only center capable of reaching a national audience through multimedia "telelinks."

The foundation has now undertaken a $44 million private—and I emphasize the word "private"—fundraising effort to build and equip this center.

The Department of Defense believes the Center will be an "important supplement to the Department's technical training and education programs." An April 30, 1985, letter from Deputy Secretary of Defense Taft to Senator STEVENS sets forth the endorsement of DOD.

I ask unanimous consent that that letter containing DOD's enthusiastic endorsement for this program be printed as part of the RECORD immediately after my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. NUNN. On July 19, 1984, the Secretary of the Army and the foundation entered into a memorandum of understanding to support and cooperate in the development of the plans and facilities of the National Science Center. Army Secretary Jack Marsh is personally committed to this effort.

The Army has set up an internal special task force on the Center, under the leadership of General Richardson, the TRADOC Commander.

As part of the effort to bring the Center to fruition, certain minor impediments have been identified by the Army. To address those concerns, and after consultation with the Army, I introduced S. 787. That bill was referred to the Army Services Committee. This amendment is identical to that bill except for the section references.

Under this legislative proposal, Army is: authorized to designate a suitable location for the facility; given responsibility to approve all design and construction plans; authorized to accept the Center as a gift, and to assume operational control and maintenance of the Center; and retain and use at the Center any fees which may be collected from the public. The Army will not pay a fee for any mili-

tary who use the Center on official business.

The Army estimates that approximately $1.25 million will be required in O&M in the first year, to be offset by whatever fees may be collected. The maximum O&M costs are presently estimated by the Army to be $1.58 million. These funds are already included in the President's fiscal year 1986 and outyear budget requests.

Mr. President, I have talked to the Senator from Arizona about this. He is a coauthor. There has been no more enthusiastic leader in this whole area of communications and electronics than the Senator from Arizona. I hope this amendment will be accepted by the managers.

EXHIBIT 1

THE DEPUTY SECRETARY OF DEFENSE,
Washington, DC.

Hon. TED STEVENS,
Chairman, Subcommittee on Defense, Committee on Appropriations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: This letter is in response to the requirement contained in the Conference Report on the FY 1985 Department of Defense Appropriations Act for submission of a "prior approval reprogramming" before expenditure of the $689,000 that was appropriated to the Army for expenses related to the establishment of the National Science Center for Communications and Electronics at Fort Gordon, Georgia.

The Center will be an important supplement to the Department's technical training and education programs. It will serve as a focal point for the development of educational materials and national programs related to communications and electronics. It will also sponsor exhibits and presentations related to communications and electronics. As a result it will be an important asset to both the Department of Defense and the Nation in the communications and electronics field. Therefore, because of the direct and indirect benefits that will accrue to the Department of Defense, the Department strongly supports its establishment.

Attached is a background summary concerning the Center which provides responses to the questions contained in the Conference Report on the 1985 Appropriations Act. In accordance with the direction contained in that report, the funds provided to the Army for its FY 1985 program with respect to the Center will not be expended until approval is provided in response to this letter.

This letter has also been sent to the Honorable Joseph P. Addabbo, Chairman of the Subcommittee on Defense, House Appropriations Committee.

Sincerely,

WILLIAM H. TAFT IV,
Deputy Secretary of Defense.

Mr. GOLDWATER. Mr. President, the amendment will be accepted. I just want to comment on it.

I think the National Science Center for Communications and Electronics Foundation, Inc., is a group to which we owe a great debt.

It has always been a peculiar thing for me to understand that in this Nation, with its great technological ability and its leadership generally in the field of communications, we find a great lack of understanding of the communications problem among the Army, the Navy, and the Air Force—and the Marines sort of tag along with the Navy.

For example, it has been necessary for the United States to buy an Army communications system from England at $300 million. I am not belittling the English product, but it is hard for me to understand, after having spent a lifetime in communications, why we cannot do that in the United States.

We have not yet reached a complete agreement on a communications system between the Navy and the Air Force. It is hard to believe that these two services cannot communicate very readily with the equipment we have.

I think that this center, being for the entire armed services, will prove to be a great asset. We will no longer have to rely upon the private sector for the development of ideas—not necessarily equipment, but ideas—in communication. It will provide a center where we can train young people so that they will come up with an interest in communications, where we can train members of the armed services so that they will have a better grasp of the necessity for interservice dependability, so that when they want to talk to one another, they can do it.

I congratulate the Senator from Georgia for bringing this to the attention of the Senate. As the chairman of the committee, I accept it wholeheartedly.

Mr. NUNN. Mr. President, I thank the chairman.

I might add a footnote. One of the purposes of this center is to develop educational methods that may flow from the military application and have that disseminated as rapidly as possible to the American educational system.

So I think that one of the prime beneficiaries of this center will be the education of our Nation, particularly those involved in high technology and math and science and other forms of scientific endeavor.

One of the first projects undertaken, even though there is no facility yet, is the coordination of the educators in the State of Texas.

So I have high hopes for this center.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 149) was agreed to.

Mr. NUNN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GOLDWATER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GOLDWATER. Mr. President, I am expecting the Senator from Indiana at any moment. He has two more amendments.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislation clerk proceeded to call the roll.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the present amendment that we are discussing, the Quayle amendment, be temporarily laid aside so that the Senator from Indiana can introduce one or maybe three amendments at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 150

(Purpose: To require a study by the Secretary of Defense to determine the impact that foreign export subsidies have had on the defense industrial base of the United States.)

Mr. QUAYLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Indiana [Mr. QUAYLE] proposes an amendment numbered 150.

Mr. QUAYLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title IX of division A of the bill, insert the following new section:

STUDY OF IMPACT OF FOREIGN EXPORT SUBSIDIES ON THE DEFENSE INDUSTRIAL BASE OF THE UNITED STATES

SEC. ——. The Secretary of Defense shall conduct a study regarding the effects that foreign export subsidies have had on the defense industrial base of the United States. The Secretary shall submit a report containing the results of the study to the Congress not later than April 1, 1986, and shall include in such report—

(1) a compilation of the number and type of contracts awarded by the Department of Defense in fiscal year 1984, fiscal year 1985, and the first six months of fiscal year 1986 on which United States firms bid but which were awarded by the Department of Defense to foreign firms;

(2) whether, in the case of each such contract, a subsidy (as defined in section 1677(5) of the Tariff Act of 1930) was provided in connection with the commodity purchased under the contract and, if so, a description of the subsidy, including the type and amount of the subsidy;

(3) identification of those segments of United States industry adversely affected by the loss of the contracts referred to in clause (1) and the consequences that the loss of such contracts has had on the defense industrial base of the United States; and

(4) such recommendations for legislative and administrative action as the Secretary considers necessary or appropriate to correct any detrimental impact that subsidized exports have on the defense industrial base of the United States, to include an evaluation of the impact of such recommendations on other U.S. foreign policy objectives such as to goal of improving cooperative weapons development and standardization in NATO.

Mr. QUAYLE. Mr. President, I rise to offer an amendment to the fiscal year 1986 Department of Defense authorization bill that speaks to the twin concerns of the need for fair trade and the need to ensure that the United States maintains an adequate defense industrial base in order to meet our essential defense and related strategic requirements in the event of a conflict.

In general terms, I find it very difficult to see how we can expect American industries to remain in business when they face many overseas competitors who are subsidized by their governments. While some may view this situation as simply a fact of life, I believe that we should at the very least be fully aware of the extent of the subsidized competition faced by our industries.

This is particularly true when we are dealing with items whose production affects our defense industrial base and national security. Because of our preference for free trade, and because of the agreements and Memorandums-of-Understanding [MOU's] we have with various countries, I am concerned that the United States may often find itself awarding contracts for defense procurements to foreign manufacturers whose competitive edge is due to subsidization. If sufficient numbers of these contracts are awarded to subsidized firms overseas, we could see a drastic impact on our industrial base and preparedness.

My amendment requires the Secretary of Defense to review the effect of subsidized foreign competition on our defense industrial base. It calls for a report to be issued next year that will compile the number of contracts in which domestic bidders lost to foreign contractors which were awarded by the Department of Defense during fiscal year 1984, fiscal year 1985, and the first half of fiscal year 1986; will determine whether the foreign manufacturer received subsidies from its government and what the extent of these subsidies were; will detail the segments of the U.S. industrial base affected by these lost contracts and their relation to our industrial defense preparedness; and will include recommendations on what steps, whether legislative or administrative, that can and should be taken to correct any detrimental impact that subsidized foreign competition has had on the U.S. industrial base.

Mr. President, this amendment is a very straightforward amendment that deals with the concern that I and others have on the whole idea of fair trade. I am a strong proponent of and support the two-way street in trade we presently have with NATO and our other allies around the world, with particular reference to military contracts.

But I also am acutely aware of the problem of subsidies by various governments, whether it be to defense contractors, to agriculture, or to whatever else the case may be.

This amendment simply asks the Secretary of Defense to report to Congress the nature of these subsidies so we can at least have them for a point of reference when we look and see what kind of trading practices are in fact going on.

At the request of the distinguished minority member of the committee, Senator NUNN, I added a section at the end of my amendment to make sure that this report also take into consideration our goals of improving cooperation in weapons development and standardization in NATO.

In no way do I want to detract from this, and I think it is a good addendum to this amendment. I think that we do have to have a good, strong two-way street relationship. But, I also think we have to have an understanding of what the trade issues are and what our relationships are going to be.

This whole issue of subsidies it one that is going to be with us for a long, long time. We are in a competitive world. We have international competition that is going on at a quickened pace, and I think that to make sure we compile all the information available to use in this report will certainly be worthwhile.

Mr. President, I believe this amendment is going to be accepted.

Mr. NUNN. Mr. President, I agree with this amendment. I have consulted with the Senator from Indiana. I have talked to the Senator from Arizona and I understand it is acceptable to the majority side.

The Senator added some words at the end of the amendment making it clear we also want the impact of any of these subsidies and any of these procedures outlined by the Senator from Indiana on the question of NATO's two-way street, which we have never completed but we continue to strive for because of the great importance of standardization in NATO. I think it is important that this be spelled out and we get the information on this subject, as well as on the subsidies. With that in the amendment, I support the amendment and congratulate the Senator from Indiana.

Mr. QUAYLE. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER (Mr. HEINZ). Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 150) was agreed to.

Mr. QUAYLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 151

(Purpose: To amend section 406(k) of title 37, United States Code, to allow credit for labor furnished by the member in connection with payment of allowances for the transportation of the member's baggage and household effects)

Mr. QUAYLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Indiana [Mr. QUAYLE] proposes an amendent numbered 151.

Mr. QUAYLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of part A title V of division A of the bill, insert the following new section:

ALLOWANCES FOR TRANSPORTATION OF BAGGAGE AND HOUSEHOLD EFFECTS

SEC. 510g. (a) Section 406(k) of title 37, United States Code, is amended—

(1) by inserting "(1)" after "(k)";

(2) in the first sentence, by inserting "or in which a member provides all or a part of the labor in connection with the transportation of the baggage and household effects of the member (including packing, crating, and loading)" after "rental vehicle"; and

(3) by adding at the end thereof a new paragraph as follows:

"(2) The Secretary concerned may prescribe in any regulations authorizing the payment of a monetary allowance to a member who participates in a program in which the member provides all or a part of the labor in connection with the transportation of the baggage and household effects of the member—

"(A) the extent to which payment to the member will be made for such labor, and

"(B) the manner in which liability will be allocated among the members the United States, and the common carriers involved in the event of loss of or damage to any baggage or household effects packed, crated, or loaded by the member.".

(b) No allowance may be paid to any member of a uniformed service by virture of the amendment made by subsection (a) in connection with the transportation of the baggage and household effects provided the member before the date of the enactment of this Act.

(c) The Secretary of Defense shall submit a report to the Congress not later than three years after the date of the enactment of this Act regarding the operation of any program carried out by the military departments under which payment of a monetary allowance is made to a member who provides all or a part of the labor in connection with the transportation of the baggage and

household effects of the member and shall include in such report such recommendations for legislative action the Secretary considers appropriate.

Mr. QUAYLE. Mr. President, I offer an amendment which is designed to save the Department of Defense money during the movement of a service member's household goods as part of a domestic change of station.

Currently, two options exist for a service member facing such a change of station. First, the service member can arrange for a commercial moving company to pack and move these household goods and effects. The Department of Defense is then billed for these services.

Alternatively, the service member can pack and move these household goods in a privately owned or rental vehicle and then drive himself to the new duty station. Under this option, the service member receives an allowance for his or her labor and the cost of the vehicle and transportation.

My amendment would allow the services to consider a third option. Some commercial moving companies are now offering to the public a service whereby the company's operators drive the moving van, but the customer provides the labor to pack, load, and unload the household goods. Such an option is often less expensive than those moves in which a commercial moving company provides all the labor.

I feel we should allow such a cost-saving opportunity to be available to service members. It is my understanding, however, that existing legislation may not be sufficient to allow the services to consider this option if they so wish. This amendment, therefore, authorizes the armed services to offer such an opportunity and to pay a monetary allowance to service members for the labor the service members may provide in connection with the movement of their household goods.

My amendment is strictly voluntary as regards the participation of the various armed services. The amendment simply grants explicitly to the services the authority to use such an option if they deem it worthwhile and cost-effective. I recognize that some difficult questions of assigning liability may arise in this situation, and the amendment therefore gives the services the authority to issue regulations on such questions.

Finally, my amendment also directs the Office of the Secretary of Defense to report on the actions taken under the authority of this amendment, and on any recommendations they may have for legislative changes, 3 years after the enactment of this bill. This will enable the Congress to determine whether to abolish, continue, or modify this program.

Mr. President, I do not believe there is any controversy over this amendment. I think it is acceptable. I know it is acceptable to our side, and I believe it is acceptable to the other side, as well.

Mr. NUNN. Mr. President, this amendment is acceptable on our side of the aisle. I have conversed on this amendment with the Senator from Arizona and it is acceptable to him and to the committee.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 151) was agreed to.

Mr. QUAYLE. Mr. President, I have a third amendment, but it is going to take me about 2 minutes to put together the particulars of it. It is an initiative we have dealt with before on DOD dependents schools.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. QUAYLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. QUAYLE. Mr. President, is the committee amendment set aside?

The PRESIDING OFFICER. The pending committee amendment has been set aside for up to three amendments to be offered by the Senator from Indiana.

AMENDMENT NO. 152

(Purpose: To make additional changes in the section of the bill relating to the continued operation by the Secretary of Defense of the Defense Department's education system)

Mr. QUAYLE. Mr. President, I send my third amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Indiana [Mr. QUAYLE], for himself, Mr. STAFFORD, and Mr. NUNN, proposes an amendment numbered 152.

Mr. QUAYLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out section 910 of the bill and insert in lieu thereof the following:

CONTINUED OPERATION BY THE SECRETARY OF DEFENSE OF THE DEFENSE DEPENDENTS' EDUCATION SYSTEM

SEC. 912. (e)(1) Subsection (e) of section 202, sections 208 and 302, and subsection (f) of section 401 of the Department of Education Organization Act (20 U.S.C. 3412(e), 3418, 3442, and 3461(f)) are repealed.

(2) Section 419(e) of such Act (20 U.S.C. 3479(a)) is amended—

(A) by striking out "(1)" after the subsection designation "(a)"; and

(B) by striking out paragraph (2).

(3) Section 503(a) of such Act (20 U.S.C. 3503(a)) is amended—

(A) by striking out "(1)" after the subsection designation "(a)"; and

(B) by striking out paragraph (2).

(4) The table of contents at the beginning of such Act is amended by striking out the items relating to sections 208 and 302.

(5) Section 414(b) of such Act (20 U.S.C. 3474(b)) is amended by striking out "302,".

(b)(1) Section 1402(b) of such Defense Dependents' Education Act of 1978 (20 U.S.C. 921) is amended by adding at the end thereof the following new subsection:

"(c) The Secretary of Defense shall consult with the Secretary of Education on the educational programs and practices of the defense dependents' education system.".

(2)(A) Paragraph (1) of section 1410(a) of such Act (20 U.S.C. 928(a)(1)) is amended by adding at the end thereof the following new sentences: "The membership of each such advisory committee shall also include one person to represent the interests of the organization recognized as the exclusive bargaining representative of the employees of the school. Such person shall be designated by the appropriate organization and shall be a nonvoting member of the committee.".

(B) Subsection (b) of section 1410 of such Act is amended by striking out "members" and inserting in lieu thereof "Except in the case of a nonvoting member provided for under subsection (a)(1), members".

(3) The second sentence of section 1410(b) of the Defense Dependents' Education Act of 1978 (20 U.S.C. 928(b)) is amended by striking out "The Secretary of Education, in consultation with the Secretary of Defense," and inserting in lieu thereof "The Secretary of Defense".

(4)(A) Subsection (a) of section 1411 of such Act (20 U.S.C. 929) is amended to read as follows:

"(a)(1) There is established in the Department of Defense an Advisory Council on Dependents' Education (hereinafter in this section referred to as the 'Council'). The Council shall be composed of—

"(A) the Secretary of Defense and the Secretary of Education, or their respective designees;

"(B) twelve individuals appointed jointly by the Secretary of Defense and the Secretary of Education who shall be individuals who have demonstrated an interest in the field of primary or secondary education and who shall include representatives of professional employee organizations, school administrators, and parents of students enrolled in the defense dependents' education system, and one student enrolled in such system; and

"(C) a representative of the Secretary of Defense and of the Secretary of Education.

"(2) Individuals appointed to the Council from professional employee organizations shall be individuals designated by such organizations.

"(3) The Secretary of Defense, or his designee, and the Secretary of Education, or his designee, shall serve as cochairmen of the Council.

"(4) The Director shall be the Executive Secretary of the Council.".

(5) Subsection (b)(1) of such section is amended by inserting "the Secretary of Defense and" before "the Secretary of Education".

(6) Subsection (c) of such section is amended—

(A) by striking out "at least four times each year" and inserting in lieu thereof "at least two times each year";

(B) by striking out clause (2);

(C) by redesignating clauses (3), (4), and (5) as clauses (2), (3), and (4), respectively; and

(D) by striking out "Secretary of Education" in clause (4) (as redesignated in clause (3) of this subsection) and inserting in lieu thereof "Secretary of Defense".

(c) Section 5316 of title 5, United States Code, is amended by striking out "Administrator of Education for Overseas Dependents, Department of Education.".

Mr. QUAYLE. Mr. President, this amendment is cosponsored by Senator STAFFORD and Senator NUNN.

Mr. President, I am happy today to be offering an amendment regarding the administration of the Department of Defense Dependents Schools [DODDS] that I believe will be strongly supported by all in this body, and by our colleagues in the House of Representatives. This amendment is supported by the National Education Association, and its overseas affiliate, the Overseas Education Association, as well as the American and Overseas Federation of Teachers. Additionally, I would like to point out that my very good friend from Vermont, Senator STAFFORD, chairman of the Education Subcommittee, is a cosponsor of this amendment.

This amendment represents a compromise struck between the members of the Armed Services Committee who support keeping the overseas schools under the administration of the Department of Defense, and the National Education Association/Overseas Education Association, which had supported the transfer of the schools to the Department of Education.

At the outset, let me say that I have been very impressed with the negotating that has been done by the NEA. We have had very forthright discussions of the issues, and the NEA representatives have been willing, frank, and professional partners in these discussions. After the many hours spent on this issue in years past, I am very pleased to report our success at reaching a compromise, which I will describe.

First, the compromise will repeal the transfer of the DODD schools to the Department of Education. The DODD schools will remain under the jurisdiction of the Department of Defense, as most of the teachers who teach overseas, and the parents, prefer. As many of you are aware, the overseas teachers were surveyed to determine their position on the transfer of the schools to the Department of Education. Of a total of 6,794 teachers responding to the survey, 5,130 or 75 percent indicated that they wanted the DODD schools to remain in the Defense Department.

Second, we make a number of changes to the Advisory Council on Dependents' Education. The Advisory Council on Dependents' Education, which is the national advisory board for the schools, will be returned to the Department of Defense. This Council has been under the jurisdiction of the Department of Education, but the retention of the schools at DOD, we felt, and the NEA agreed, that the Council should be under the same agency as the schools.

While in our earlier version of the authorization bill we had changed some of the membership requirements for the National Advisory Council, we have agreed basically to maintain the current composition of the Council. Under our compromise, we have agreed that the Secretary of Defense and the Secretary of Education, or their designees, will serve as cochairs of the Council. I strongly believe that the input from the Secretary of Education is essential to continuing to provide an excellent education to our students abroad and to encourage cooperation between the two Departments to the greatest extent possible.

The Council will also consist of 12 individuals appointed by the Secretaries of Defense and Education. These individuals shall have demonstrated an interest in the field of primary or secondary education and shall include representatives of professional employee organizations, school administrators, and parents of students enrolled in the DODD schools, and one student. We have also agreed to include language to ensure that the individuals who are appointed to the Council to represent professional employee organizations shall be designated to do so by such professional employee organizations. The Council will also consist of one representative appointed by the Secretary of Defense and one appointed by the Secretary of Education.

We have also modified the meeting requirements of the Council from "at least four times a year" to "at least two times a year." Because of difficulty in getting all the Council members to the meetings—some do have to come from overseas—four meetings are difficult to schedule.

Third, we have included language to require the Secretary of Defense to consult with the Secretary of Education on the educational programs and practices of the DODD schools. Consultation and communication between the two Departments is critical. I urge the Department of Defense to utilize the expertise at the Department of Education as often and as much as possible.

Fourth, the amendment would add a nonvoting member to the local advisory councils that represent each school. The local advisory councils are currently composed of an equal number of parents and teachers. The amendment would require that local advisory committees include one person to represent the interests of the organization recognized as the bargaining unit for the employees fo the school. This representative to the local advisory council shall be selected by the appropriate bargaining unit for each school. This will ensure better communication and representation between the advisory council and the bargaining unit.

Finally, and very importantly, the members of the Armed Services Committee and I want to express our concern about the budget and/or public documents relating to DODD schools being made available to those who request them. I am personally extremely distressed that budget documents, that are fully in the public domain, are withheld from interested persons. The Department of Defense budget request is, indeed, a massive one, and oftentimes very difficult to get through. The DODDS budget is a portion of the operation and maintenance budget request, and is difficult to break out. However, the information is available, and it should be made available to those citizens that request it. I do not believe that citizens should be refused such information or that they should have to go through complex and time-consuming procedures to obtain it. I have pledged my help in obtaining such public information in the future, should it be necessary.

There are many people who are interested in the overseas schools. As one of the largest and best American school systems, serving 140,000 students, we should be interested in the quality of education, facilities, and services offered, such as to the handicapped and disadvantaged students. Leaving the schools at the Department of Defense will not slake the appetite for information on the schools nor lessen the desire to see them provide an excellent education. It also does not mean that Congress, and this Senator in particular, will lose interest in what goes on in these schools.

Mr. President, this has been an emotional issue. Yet, I believe our compromise amendment will satisfy all involved with the DODD schools. I again want to commend the National Education Association and their staff who have been very helpful and cooperative in working out this agreement. In addition, let me mention the continued strong support I have received from the American Federation of Teachers. We have worked well together over years past, and I am personally grateful for their support. Finally, I also want to thank again my friend from Vermont [Mr. STAFFORD] as well as the Senator from Rhode Island [Mr. PELL] for their help and support in resolving this issue.

Mr. President, this is an amendment that I am gratified to be able to offer after a number of years of confrontation over this issue. The issue is where

the DODD schools are going to be located within the Federal Government. When we created the Department of Education, the DODD schools were to have transferred to the Department of Education from the Department of Defense, I believe, in 1981.

In 1981, the amendment that I offered not to have that transfer go forward was passed in the Senate and we worked out an agreement with the House of Representatives that there would be an extension that the overseas schools would remain in the Department of Defense.

We have fought that battle almost every year. As a matter of fact, it has been a battle that has been somewhat contentious, from time to time.

I am delighted that my chief adversary on this floor, Senator STAFFORD, has joined with me on this. It is never fun to have to argue against Senator STAFFORD. As a matter of fact, he is one of my dear friends and always has been my mentor on education matters, with the exception of this matter. We happen to disagree on this matter and it is never terribly fun for me to have to debate this issue. And now we will not have to debate the issue, Mr. President. The issue has, in fact, been resolved. We had all the principals involved that have come to an agreement over the course of the years. I think this agreement is certainly one that I wholeheartedly support. Basically, it repeals the scheduled transfer of the Department of Defense dependents schools [DODDS] to the Department of Education. They will remain in the Department of Defense. But we have made some changes. We do return the advisory council on the dependents' education to the Department of Defense, but we change slightly the membership of that advisory council. In particular, it allows professional employee organizations to select their own representatives to the council. This is something that was brought to our attention, and we certainly concede that their own selection will improve communications between council members.

Mr. President, we encourage the Secretary of Defense to consult with the Secretary of Education on educational programs or practices of Department of Defense dependents schools.

Mr. President, the issue that we have been discussing for these last years going back to 1981 has been quality education. The issue is how best can we provide quality education for the 140,000 students that are presently with Department of Defense dependents schools. The issue of how we can best provide that education to those students—was of some dispute from an organizational point of view but it was never disputed that we ought to try to find the best quality education for those students. That was always my contention—that we ought to think about the kids instead of some organization schematic approach that may look good on paper, particularly national security sensitivities, and the fact of better organization within the Department of Defense. That is really where it ought to be, and that is where it will continue.

I think we have had a lively debate. Believe me, I am delighted to see it come to an end. It is one that has in fact produced tie votes even in this Chamber—evenly divided. My dearest friends voted against me on this issue from time to time, and now that we have this behind us, I think we can all move forward. Those that represent the professional employee organizations I congratulate, and the Department of Defense, the Department of Education, and also those Senators who took this battle year in and year out not lightly, but on a substantive basis. I think we have finally reached a conclusion. It is one that certainly is satisfactory to me. Obviously, it is satisfactory to other principals. It only took us 4 years to get here, but that is better than not doing anything at all. I really look forward to having oversight and making sure that the Department of Defense dependents schools continue to provide a solid education. They have on a historic basis had a higher SAT test score average than the stateside students. They have had a very good education and this system has worked very, very well.

Mr. STAFFORD. Mr. President, I am pleased to cosponsor the amendment offered by my friend from Indiana [Mr. QUAYLE] relating to the repeal of the transfer of Department of Defense dependents schools [DODDS] to the Department of Education.

As many of my colleagues know, I have for several years led the fight to bring about the transfer of the DODD schools to the Department of Education. However, I believe that it is time to settle this issue, and I believe this compromise meets the concerns of all those involved.

The teachers overseas have indicated their support for keeping the schools with the Department of Defense, and the teacher representatives here have been willing to let the schools remain at DOD, with several changes.

Those changes include greater representation by professional employee organizations on the national advisory council, greater representation by bargaining units on the local school advisory councils, and a requirement for the Secretary of Defense to consult with the Secretary of Education on the educational programs and practices at the DODD schools.

The DODD schools have performed well over the last several years, and the students attending them have scored higher on standardized tests than our mainland students. Our prime concern is the continued excellence of the schools. I am hopeful that by resolving the issue of the location of the DODD schools we can focus on the quality of education and see that the students overseas continue to perform so well.

I am pleased to support this amendment to retain the DODD overseas schools within the Department of Defense, and I urge my colleagues to support it.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I am pleased to join Senator QUAYLE and Senator STAFFORD in cosponsoring this compromise under the Department of Defense dependents schools. As the Senator from Indiana has said, this has been an ongoing dispute here for 4 or 5 years, and with the overall scope of the legislative affairs, I would say 4 or 5 years to solve a problem is a pretty good record. The Senator from Indiana has been very persistent. He has looked into it in the Department. He and I have not always been on the same side of this issue, but I am pleased that he has now brought about by his persistency an oral settlement of the issue. I think it is a good settlement.

Essentially, as I understand the amendment, the operational control of the Department of Defense schools will remain in the Department of Defense, but the amendment recognizes and retains the legitimate role of the Department of Education in advising the Defense Department on the overall educational policies of the DOD dependents schools.

So I am hopeful not only that this amendment will put this agreement to rest, but that the whole subject, the stimulating debates and votes we have had in the Senate on this for several years—and also the House perhaps has brought more attention to the Department of Defense dependents schools—but that out of all of that maybe we can take some claim for improvement at least over the years. But the schools are operated I think well now. I believe this is a compromise that will have the DOD operate the schools but have the educational policy at least be consulted on with the Department of Education. So I am prepared to accept the amendment on this side. My understanding is that the Senator from Arizona is also supportive of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Indiana [Mr. QUAYLE].

The amendment (No. 152) was agreed to.

Mr. QUAYLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. QUAYLE. Mr. President, the pending business now, as I understand it, is the committee amendment. But I may have one other amendment. I have not conversed with the minority.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. QUAYLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. QUAYLE. Mr. President, I am going to offer an amendment that has been cleared on both sides. In order to do that, Mr. President, I ask unanimous consent that the committee amendment be temporarily laid aside in order to consider my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 153

(Purpose: To clarify authority of the Secretary of Defense to enroll the dependents of certain persons in overseas schools of the defense dependents' education system)

Mr. QUAYLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Indiana [Mr. QUAYLE] proposes an amendment numbered 153.

Mr. QUAYLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title IX of division A of the bill, insert the following new section:

AUTHORITY OF THE SECRETARY OF DEFENSE TO ENROLL CERTAIN PERSONS IN OVERSEAS SCHOOLS OF THE DEFENSE DEPENDENTS' EDUCATION SYSTEM

SEC. 917. (a) The Secretary of Defense may, under such regulations as he shall prescribe, permit to be enrolled in schools of the defense dependents' education system, in addition to children authorized to be enrolled in such system under the Defense Dependents' Education Act (20 U.S.C. 921 et seq.), children of employees of the Federal Government stationed outside the United States, children of employees of contractors employed in carrying out work for the Federal Government outside the United States, children of employees of nonappropriated fund activities of the Department of Defense, and, if the Secretary determines such action to be in the national interest, children of other citizens or nationals of the United States or of foreign nationals.

(b) Any child permitted to enroll in a school of the defense dependents' education system under this section shall be required to pay tuition at a rate determined by the Secretary of Defense, which shall not be less than the rate necessary to defray the average cost of the enrollment of children in the system under the Defense Dependents' Education Act of 1978 (20 U.S.C. 921 et seq.).

Mr. QUAYLE. Mr. President, I am offering a second amendment affecting the Department of Defense dependents schools [DODDS] that will clarify the authority of the Secretary of Defense to provide educational services to certain categories of tuition-paying students in the DODDS school system.

Currently, in addition to providing educational services to dependents of the Department of Defense, the DODDS school system provides education to tuition-paying students whose parents are connected with the U.S. Government, but not with the DOD. For example, DODDS schools enroll the dependents of employees of other U.S. Government agencies, dependents of U.S. Government contractors; dependents of employees of U.S. nonappropriated funds activities—for example, post exchanges, theaters—and dependents of other U.S. citizens and foreign nationals. The tuition that these students pay covers the actual cost of attendance, so that the Department of Defense is not subsidizing these students at all. As of November 30, 1984, there were 6000 tuition-paying students in the DODDS system.

Recently, the general counsel's office at the Department of Defense advised the DODDS schools that these tuition-paying students may not attend a school if that school would have to expand its capabilty in teachers, facilities, educational materials, and other resources to serve them. With such a limitation imposed on the DODDS schools, it is likely that a large number of the 6,000 tuition-paying students would be barred from attending American schools.

The amendment I am offering would clarify that the DODDS schools can continue to enroll these students, on a tuition-paying basis. In other words, we would simply continue current practice. The Department of Defense supports this amendment, as do my colleagues on both sides of the aisle. This amendment will ensure that 6,000 American students, who currently have access to American schools overseas, will continue to have that access, and will be able to attend American overseas schools with their fellow American students. This amendment will not add to the cost of administration of the DODDS schools.

I urge my colleagues to support this amendment.

Mr. President, this is really a clarifying and a technical amendment that I am offering. It is an amendment that deals with the Department of Defense dependents schools [DODDS] that will clarify the authority of the Secretary of Defense to provide educational services to certain categories of tuition-paying students in the DODDS school system.

Currently, there is a legal question whether the Secretary of Defense has this authority to provide services to those students. Presently, there are approximately 6,000 students who are tuition-paying, space-available students attending the DODD schools. This amendment simply says "Yes, you can do that." It clarifies any ambiguity in the statute that would prohibit that. We do not want to prohibit it.

However, Mr. President, we do not want to say by this amendment, and we will have report language in the conference that will deal with this subject, that the DODD schools ought to be expanded or their construction ought to take into account the tuition-paying, space-available students. This is not the intent of the amendment.

The intent of the amendment is simply to provide services already being provided. The intent of the amendment is to say yes to space-available tuition-paying students that we will be able to provide education for them, but any expansion, new construction, et cetera, should not take into consideration the number of space available students. This amendment will not allow for any consideration of space-available students in the calculation of what the actual space should be.

Therefore, Mr. President, I think this amendment is self-explanatory. It has been cleared with both Senator NUNN and Senator GOLDWATER.

I move the adoption of the amendment.

The PRESIDING OFFICER. Is there debate on the amendment?

Mr. LEVIN. Mr. President, just to ask one question of the sponsor of this amendment, I understand that space-available students may not be considered for the purpose of determining the size of any new DODD school which might need to be constructed. Is that correct?

Mr. QUAYLE. The Senator is correct.

Mr. LEVIN. So that, by doing this as the sponsor proposes, we are not going to be creating any need for additional schools?

Mr. QUAYLE. As a matter of fact, Mr. President, this amendment only authorizes us to do essentially what we are doing now. The issue the Senator from Michigan brings up will be clarified in report language at the conference committee. In no way should this amendment be interpreted as allowing a calculation of space-available, tui-

tion-paying students in any kind of construction estimate.

Mr. LEVIN. I thank my friend.

I have no objection, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 153) was agreed to.

Mr. QUAYLE. I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REVOLVING DOOR AMENDMENT

Mr. QUAYLE. Mr. President, with regard to the discussion on the pending Committee amendment, we have modifications to it by the Senator from Michigan which strengthens his revolving door provision. He made very good modifications to it, I might add. I have not been able to comment specifically on Senator LEVIN's amendment. I do at this time and congratulate him on the modifications that he made.

Basically, the revolving door provision is in the amendment, thanks to Senator LEVIN's involvement in the committee. I think his modifications today strengthen it, make it tougher. I think a lot of people want to make a tougher situation on this so-called revolving door. Now that the committee amendment has been strengthened, I shall have some other comments and have some further discussion on the Pryor amendment once it is offered and we debate it.

It is still my anticipation and hope that we shall be able to vote around 5 o'clock. That has not been cleared to my knowledge but it is still a target. We shall vote on the substitute to be followed by a vote on the committee amendment about that time.

I certainly encourage Senators to come over and talk about this at this particular time, come over and offer other amendments. If we do not have anything else to do—I know it is the chairman's desire to pass the defense bill sometime this week, maybe even Thursday, who knows?

Mr. PRYOR. Mr. President, I am not certain if the Senator anticipated having a quorum call. Before the Senator puts in that request, I have a statement I wish to make.

Mr. QUAYLE. If no Senator wants to speak on behalf of the chairman, I shall note the absence of a quorum but for now, I shall yield the floor and allow the Senator from Arkansas to gain the floor in his own right.

Mr. PRYOR. I thank the Senator from Indiana.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. Mr. President, the revolving-door issue is one that both the Pryor-Grassley and the Quayle amendments address. If I may, I would like to try to bring up a few distinctions between the two approaches to the revolving door issue in the Pryor-Grassley proposal versus that offered by the distinguished Senator from Indiana [Mr. QUAYLE] and members of the Armed Services Procurement Subcommittee.

I would like if I could, Mr. President, to read exactly what Senator PROXMIRE and I say about the revolving door issue in a summary of our provision that we have prepared.

"One, a defense procurement official must wait 3 years before taking a job with any defense contractor over whom he exercised significant contract responsibilities during the 3 years preceding his separation from Government employment.

"In addition, all defense contractors must agree in contracts for $25,000 or more not to hire such government employees."

What are the penalties under the Pryor-Proxmire amendment or the Committee approach? "One, both an individual and a contractor who violate this provision are subject to a $10,000 fine and 2 years imprisonment." "Contractors are also civilly liable for the greater of $250,000 or five times the annual salary of the employee so hired."

What are the reporting requirements? "In our provision, we say that the contractor must report annually to the Inspector General of the Department of Defense, to the Office of Government Ethics, and to Congress regarding employees who left Government service within the last 3 years. Failure to report subjects the contractor to a $10,000 fine."

"Implementation: The Office of Government Ethics will implement this act and will issue advisory opinion to any employee or contractor faced with potential violation of this act."

We feel, Mr. President, that Senator QUAYLE, in addressing the issue, ignores the commonsense reality of the procurement employee-contractor relationship because, under its language, an employee must disqualify himself from further dealing with a contractor once a "contact" regarding future employment with that contractor has taken place.

Unfortunately, in many cases, the harm to the Government has already taken place by the time a specific offer or contact is made and before the Congress is made aware of this relationship. That information comes to the Congress after the fact. We feel that we should cure this problem once and for all, find out about it before it happens, and most importantly, prohibit for 3 years after that individual retires whether he or she be military or civilian, goes to work for that contractor.

This is the basic distinction, Mr. President, that we have with the committee language. This is the basic argument that we have against it. This the basic reason that we feel that our proposal would be much stronger with regard to the revolving door dilemma.

Mr. President, the Boston Globe, dated January 15, 1984, page A-1, had a splendid article by Fred Kaplan, Globe correspondent, in that edition.

If I might, Mr. President, let me read just a paragraph or two from this article written by Mr. Kaplan. He stated in his story:

When Gen. Alton D. Slay retired from the Air Force on Feb. 1, 1981, his career in the defense business was far from finished. For the previous three years he had served as head of Air Force Systems Command, the agency that develops all Air Force aircraft, and in the three years before that he was deputy chief of staff for Air Force research, development and acquisition.

In short, he had been involved in top-level decisions on virtually every system that the major U.S. defense corporations had built for the Air Force.

Now, upon retirement, he established Slay Enterprises Inc., a one man consulting firm, and found as willing clients numerous defense contractors whose business he had once overseen on behalf of the government. They include three of the Pentagon's top 10 contractors—Lockheed, United Technologies Corp. and Raytheon—as well as several slightly lesser firms, including Westinghouse Electric, British Aerospace and Aerojet Ordnance.

Slay is hardly the only officer who has left the military and joined a defense corporation, stepping through what many have dubbed "the revolving door." During the fiscal years 1979–82, according to Pentagon files and those of the Senate Armed Services Committee, 1,437 officers with ranks of major (in the Navy, lieutenant commander) or above retired and went to work for defense corporations.

Of these officers, 510—or more than one-third—signed up with companies which during the period were consistently among the top 10 defense contractors.

Mr. President, I ask unanimous consent that the full article written by Mr. Kaplan appearing in the Boston Globe of January 15, 1984, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Boston Globe, Jan. 15, 1984]

MILITARY'S 'REVOLVING DOOR' WITH BUSINESS

(By Fred Kaplan)

WASHINGTON.—When Gen. Alton D. Slay retired from the Air Force on Feb. 1, 1981, his career in the defense business was far from finished. For the previous three years he had served as head of Air Force Systems Command, the agency that develops all Air Force aircraft, and in the three years before that he was deputy chief of staff for Air Force research, development and acquisition.

In short, he had been involved in top-level decisions on virtually every weapon system that the major US defense corporations had built for the Air Force.

Now, upon retirement, he established Slay Enterprises Inc., a one-man consulting firm,

and found as willing clients numerous defense contractors whose business he had once overseen on behalf of the government. They include three of the Pentagon's top 10 contractors—Lockheed, United Technologies Corp. and Raytheon—as well as several slightly lesser firms, including Westinghouse Electric, British Aerospace and Aerojet Ordnance.

Slay is hardly the only officer who has left the military and joined a defense corporation, stepping through what many have dubbed "the revolving door." During the fiscal years 1979-82, according to Pentagon files and those of the Senate Armed Services Committee, 1437 officers with ranks of major (in the Navy, lieutenant commander) or above retired and went to work for defense corporations.

Of these officers, 510—more than one-third—signed up with companies which during this period were consistently among the top 10 defense contractors.

Slay's personal history is particularly interesting. In 1969, while commander of the Air Force Flight Test Center, Slay declared tests on Lockheed's C5A cargo-transport aircraft successful even though all the plane's engines were clogged up and had to be shut down when idling on a dusty airstrip near Edwards Air Force Base in California.

In 1978, as head of Systems Command, Slay revived production of the U2 spyplane (now called the TR1), another boon for Lockheed, which makes the airframe, and for Pratt & Whitney, a subsidiary of United Technologies, which makes the engine.

Two years later, Slay devised a plan to save Pratt & Whitney's F100 engine, whose turbine blades kept failing inside Air Force F15 and F16 fighter planes and which was coming under heavy congressional attack. Slay proposed that Pratt & Whitney sign a warranty guaranteeing that the company would repair or replace failed equipment at its own cost up to a certain point after delivering an engine.

Yet one former Pratt & Whitney engineer recalls that the warranty was in effect for such a short period that it was practically meaningless. "Anybody in the engine business knew that any engine could satisfy that warranty," he says. "It was like a car company guaranteeing your car for 2,000 miles."

Still, the warranty arrangement satisfied the critics in Congress. "Slay saved Pratt a good chunk of business," says the engineer.

Now Slay advises these companies on management "on long-range plans and new business opportunities," as a spokesman for Raytheon puts it. Slay's former Pentagon colleagues say he skillfully uses his experience in the Air Force bureaucracy to help his new clients find their way to success and continued good fortune in the politics of selling weapons to the military.

Slay failed to return several phone calls made to him over the past three years.

NOT ONLY NEW CONSULTING FIRM

Slay was not the only Air Force general who set up his own consulting firm. That path also was tread by Vice Adm. James H. Doyle Jr., former deputy chief of naval operations for surface warfare, who left the Navy in September 1980 and became a consultant on matters concerning surface ships for Martin Marietta, Vought and RCA.

All three companies are intimately involved with the Navy's highly sophisticated and costly Aegis missile and radar system aboard Ticonderoga-class cruisers. RCA builds the Aegis weapon system, the largest defense contract in RCA history. Martin Marietta is developing a vertical-launch system designed for the cruisers. And according to a spokesman at Vought, Doyle advises that company mainly on a Vought-developed system that is to be used as a target in tests of the Aegis missile system.

Lt. Gen. Benjamin N. Bellis, vice commander-in-chief of the U.S. Air Force, Europe, retired Aug. 1, 1981, and became a consultant for Martin Marietta, Hughes Aircraft, Northrop, TRW and Aerojet, all major Air Force contractors.

Consulting is one way that top-level officers make a lucrative transition to civilian life, but most are hired by a single corporation.

For example, Maj. Gen. Henry B. Stelling Jr. had been vice commander of the Electronics Systems Division at Hanscom Field in Bedford, Mass. He retired in May 1980 and became a vice president of the Defense Electronics Operations branch of Rockwell International.

Brig. Gen. Tommy I. Bell, director of development and production for the Air Force deputy chief of staff for research, development and acquisition, retired in September 1982. A month earlier, he had lined up a job as a contract manager for Northrop.

NEW JOB AFTER 10 WEEKS

Rear Adm. Curtis B. Shellman Jr. was deputy chief of naval material for logistics. He retired May 1, 1980, and 10 weeks later was working for the Electric Boat division of General Dynamics in Groton, Ct., as the assistant general manager of operations, working on the construction of nuclear submarines.

Not just generals and admirals have shifted from the military to the industrial side of weapons procurement. The practice extends to all levels of decision-making—to those who while in the military were reponsible for testing weapons systems or supervising contract negotiations or purchasing equipment or conducting analysis that might convince those at a higher level whether to kill or approve a particular weapon system.

In many cases, officers have gone to work for a contractor with which they had no contact while in the military. Several say they did so explicitly to avoid the appearance of conflict of interest. In many other cases, however, it appears they simply have moved from one side of the table to the other.

Some of these officers had been involved in testing and evaluating the effectiveness of weapons made by their future employers.

Lt. Col. George F. Goodall was test director of the Maverick missile. He resigned Aug. 30, 1982. On Sept. 9 he was working for Hughes Aircraft, manufacturer of the Maverick, worth $5.8 billion.

Lt. Col. Wayne O. Mattson was systems project officer on the Maverick. On Jan. 15, 1979, he took a terminal leave—his actual retirement date was not until March 1—and also went to work for Hughes.

Col. James C. Crosby was president of the Army Defense Board, involved in testing the highly controversial Divad antiaircraft system. In August 1981 he retired and went to work for Ford Aerospace, chief contractor on the $4.1 billion Divad program.

Col. William E. Crouch Jr. was commander of Army Aviation Development Test Activity at Ft. Rucker, Ala. He retired July 1, 1981, and five days later became the Ft. Rucker branch manager of Hughes Helicopter Inc., whose equipment the Army development unit frequently tests.

WENT TO WORK FOR LOCKHEED

Col. Sherwin Arculis tested remotely piloted vehicles, target and reconnaissance drones, for the Army's Training and Doctrine Command. He retired in February 1980 and went to work for Lockheed Missiles & Space as manager of an office that provides logistical support to Army remotely piloted vehicles.

Maj. George E. Elliott was chief tester of space transportation systems at the Air Force Test and Evaluation Command. He retired Sept. 1, 1981, and two days later was working at Martin Marietta, first as a design engineer but later responsible for integrating test programs on the company's space transportation system. While Elliott was in the Air Force, Martin Marietta was one of the contractors whose systems he tested.

More than just weapon testers move to the other side of the defense business. John W. Ulmer Jr. was manager of instrumentation systems on the MX missile for the Air Force's Ballistic Missile Office. He retired in June 1980 and went to work for TRW Inc., which oversees development of the MX project.

Col. Harvey M. Paskin was chief of the avionics division in the project office supervising the F16 jet fighter at Wright Patterson Air Force Base. He left in July 1982 and went to work as an engineer at Westinghouse Electric, which makes the radar—the avionics—on the F16.

Lt. Col. John W. O'Neal was the operations officer for the Joint Chiefs of Staff in charge of a system called the Ground Mobile Command Center. He took a terminal leave of absence in August 1982 to work for TRW Inc. as senior principal engineer in charge of planning and testing the Ground Mobile Command Center.

NEGOTIATORS ALSO SWITCH

The practice of stepping to the other side of the table, from facing corporations on behalf of the government to facing the government on behalf of corporations, also has been embraced by those assigned to negotiate contracts that ensure the government the best deal possible.

For example, Lt. Col. Edward Cartwright was deputy director of contracting for the Computer Acquisition Center at Hanscom. He retired June 30, 1980, and seven days later went to work as a computer configuration manager at Sperry Univac in McLean, Va., one of the companies whose contracts he had supervised in the Air Force.

Maj. Walter D. Crafton was in the Air Force Plant Representative Office overseeing contracts at a TRW plant in Red Beach, Cal. He retired May 1, 1981, and a month later was working as a department manager on product assurance at the same TRW plant.

High-ranking civil servants also play the "revolving-door" game. Ernest R. Giardano was an auditor in the Defense Contract Audit Agency assigned to keep things honest at a Boeing Co. plant. On Dec. 31, 1979, he retired from the government and the next day went to work for Boeing.

Marvin H. Boodnick was a price-cost analyst for the same agency, auditing Hughes Aircraft. He quit March 14, 1981, and two days later started working for Hughes.

The list of military and civilian officials who have pushed the revolving door could go on for columns. For better or for worse, what President Dwight Eisenhower once called "the military-industrial complex" is very much alive.

In telephone interviews, many of these former officials say they were hired by the corporations they had once supervised because they were good at their jobs. Says a

former Defense Contract Audit Agency auditor who supervised Hughes helicopter contracts and then went to work for the company. "There's always room for both sides to have technically competent people," adding that the practice of switching sides "is common in the entire world of auditing, not just defense auditing."

Industry spokesmen generally say they hire retired officers for the same reasons—for their talent and experience. However, one unidentified public relations officer for a major defense firm, speaking on background, said they also are hired for their connections. "We need everything we can get. This is a very competitive business."

On this point, George Spanton, a recently retired audit agency official who has been offered corporate jobs for years but has turned them down, reflects, "You always like to feel [the offers are] legitimate, but you have to sit back and ask yourself, 'Would I be offered this job if I didn't have the job I have now?' [The corporation] just knows I know all the techniques on how to protect the government's interest, so I must also know all the techniques on how to get around the government's interests."

Mr. PRYOR. There is a table, Mr. President, which Mr. Kaplan includes in one of the articles that he writes in the Boston Globe. The table is entitled "Weapons Contractors Who Hired the Most Retired Military Officers, Fiscal Years 1979–82." In other words, these are those contractors that led the ticket in hiring the greatest number of retired military officers. Who were those companies, and how many former military officers then went to work with these companies? Martin Marietta, in that 3-year period, hired 100 former military officers; Boeing, 840; Lockheed, 800; Hughes Aircraft, 770; Northrop, 650; TRW, Inc., 450; Rockwell International, 420; General Dynamics, 420; McDonnell Douglas, 420; and Computer Science Corp., 34.

On another table Mr. Kaplan inserts in his article, Mr. President, the number of defense officers who retired to defense contractors. Mr. President, the Air Force had 942 officers during this 3-year period that went to the defense contracting establishment; the Navy had 425 officers; the Army, 181 officers who left; the Marine Corps, 66 officers who left and went to defense contractors—a total of 1,437 individuals from military ranks.

Mr. President, I think these figures bear witness to the fact that we have a tremendous problem on our hands. In the past we have not addressed this problem, and with all due respect to my friend from Indiana, Senator QUAYLE, and his subcommittee, it is my fear that the language in the revolving door section of his amendment that we seek to amend by our perfecting amendment does not go far enough.

Mr. President, the stories go on and on. In fact, just as recently as this Saturday, on May 18, 1985, we find a story by Mr. Howard Kurtz involving another revolving door case. This matter, Mr. President, I will not read in detail, but I submit it is one other reason for the adoption of the strongest possible language in the area of revolving door contracts. Mr. President, I ask unanimous consent that the article by Mr. Kurtz in the Washington Post of May 18, 1985, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PENTAGON LOOKING INTO "REVOLVING DOOR" CASE

(By Howard Kurtz)

Last May, when a Defense Department branch was moving to take a large audio-visual contract away from Dynalectron Corp., the branch chief supervised negotiations that allowed the company to hold on to the contract.

Weeks later, Dynalectron offered the branch chief a job as manager of the $23 million contract. He accepted the offer and joined the company in July.

The contract is now under investigation by the Pentagon's inspector general, Air Force investigators and Defense Criminal Investigative Service, one of numerous inquiries involving some of the 2,200 retired Pentagon officials who now work for defense contractors.

Many officers are hired by contractors to work on weapons they helped develop; Congress is considering legislation to restrict such "revolving door" hiring.

The inquiry involves Hal Albert, a former senior official with the six-year-old Defense Audio Visual Agency (DAVA), which provides training films and other materials to the military. Albert was chief of the agency's branch at Norton Air Force Base in California when the unit decided in 1983 to contract out most of its work to Dynalectron.

Last June, Albert announced that he was leaving the government to manage the contract for a new division set up by Dynalectron. Some of his fellow employes have told investigators that Albert continued to be involved in the Dynalectron contract in the weeks before he resigned, according to military sources. Albert said he withdrew from taking actions on the contract.

After Albert moved to Dynalectron's offices in the same building, he signed some contract documents submitted to DAVA. The papers were withdrawn after officals said it was improper for Albert to sign them.

Federal employes are legally barred for life from representing a company before the government on any particular matter that they handled as federal officials.

Albert said in a brief telephone interview that he had done nothing wrong and that he consulted with DAVA's general counsel before accepting the Dynalectron job. He said he was not aware of the Pentagon probe.

A spokesman for McLean-based Dynalectron said Albert has been questioned by Pentagon investigators and that the company is cooperating. "I think Hal has complied with the spirit and intent of the regulations and has not done anything improper under criminal law," he said.

"I don't have any problem," Albert said. "I know I'm within what's legal, what's right and what's morally correct." The Pentagon declined comment.

The Dynalectron spokesman said Albert was hired because "he knew the thing inside out. We felt that he was the most qualified to do the job."

The spokesman said it was hoped that Albert could provide smoother relations with his former unit. He said Albert had no significant inside information that would be of use to the firm on a fixed-price contract.

The DAVA branch in California decided in 1983 that it would be cheaper to hire a contractor for most of its audio-visual work. Following a study supervised by Albert, Dynalectron was awarded the three-year contract as the low bidder.

But DAVA was not satisfied with Dynalectron's performance, and announced in April 1984 that it was putting the contract up for bid again. In May, however, after negotiations supervised by Albert, the competition was canceled and agreement was reached to revise Dynalectron's contract.

At DAVA's request, the revisions included $1.2 million in incentive fees for the company if its future performance was highly rated. The company spokesman said no such payments have been made and that the revised contract was more unfavorable to the firm, which he blamed on friction resulting from its takeover of government work.

In mid-May, the spokesman said, Dynalectron began job discussions with Albert. On June 1, Albert announced he was resigning to join Dynalectron the following month and issued a memo disqualifying himself from involvement with the contract.

Pentagon sources said Albert continued to discuss the contract with DAVA subordinates and at staff meetings in the weeks before he resigned. Albert said he took himself "out of the channel" of decision-making on the contract. He declined to elaborate, saying, "You're getting into matters that are none of your concern."

A company spokesman said that Albert had talked to various DAVA staff members about the contract before leaving the government, but that Albert made no decisions involving Dynalectron.

After Albert joined Dynalectron July 2, he signed contract documents submitted to DAVA. One was a $30,000 bid by the firm to buy DAVA's surplus reels and cases, a matter that had been under discussion when Albert was still the branch chief.

The documents were withdrawn after DAVA refused to accept them and its general counsel said it would be a violation of law for Albert to sign papers involving matters he previously handled. Dynalectron arranged for someone else to sign future contract documents.

The Pentagon, which is proposing again to rebid the Dynalectron contract, has also announced plans to shut down DAVA and return its functions to the individual services.

Mr. PRYOR. I yield the floor at this time.

Mr. LEVIN. Mr. President, first let me again commend my friend from Arkansas for the effort he is putting into defense procurement reform. As I said a little earlier today, we need all the help we can get in this area. It is complicated. People who are willing to devote as much work as the Senator from Arkansas are performing a public service. I happen to agree with him that we need a very strong remedy for the revolving door problem. According to the reports that we reviewed over the weekend, 3,300 former employees

of the Department of Defense filed a form last month saying that they had left the Department of Defense within the last 3 years and are now working for a defense contractor.

That figure is up from 2,240 the year before. So there is actually about a 33-percent increase by that one statistic in the number of people who are going to work for defense contractors. We do not know how many of those 3,300 people went to work for a contractor over whom they had any supervisory authority or whose contracts they monitored. We have no way of knowing. The forms do not tell us. So we have a revolving door where we have thousands of folks leaving our employ and going to work in the private sector, but we do not know how many of those 3,300 in fact monitored the contracts of the people for whom they are working. That is a terrible flaw in the form. That is one flaw which this committee amendment, the so-called Quayle amendment, is going to cure. The new form is going to require the employee to say whether or not the company for whom he is now working in fact was a company over whom he had monitor responsibility.

So we do not know how many of the 3,300 in fact might have been involved with the company for whom they are now working.

That is the heart of the problem, Mr. President. The heart of the problem is a conflict of interest, and that is what this committee amendment, the Quayle amendment, goes after. It goes after the conflict of interest directly.

What it says is that there is going to be a 10-year ban on employment and up to a $20,000 fine if an employee fails to disqualify himself from involvement with a contractor with whom the employee is discussing employment.

This is a critical difference between our amendment and the Pryor amendment, because in our case the impact falls on the employee, regardless of how minimal the involvement of the employee is with the contractor.

My friend from Arkansas described his amendment and said that it applies to employees who exercised significant contract responsibilities with a defense contractor. That is a great deal narrower than ours. Ours is a lot stronger than the Pryor amendment in that regard; because in our case there is a requirement for disqualification or else a 10-year ban and a fine for employees of the Department of Defense, whether they had significant contract responsibilities with the contractor or nominal contract responsibilities with the contractor.

What difference does it make, relative to the conflict of interest and the ethical question here, whether or not an employee working for the Department of Defense has a small contract responsibility or a major contract responsibility? The ethical question is just as big. The contract responsibility may be smaller, but the ethical question is exactly the same.

What we are saying in this committee amendment is very straightforward: If you have any contract responsibility with a defense contractor, do not discuss employment for yourself with that contractor. You either disqualify yourself, recuse yourself, or if you fail to do so, you are banned from employment with that contractor for 10 years and you are subject to a fine.

So that we cover many more employees in that sense than does the amendment of the Senator from Arkansas, because we cover employees who exercised any contract responsibility with the contractors at issue. It does not have to be a significant contract responsibility, as is set forth in the amendment of my friend from Arkansas.

Our amendment is stronger in another respect. Our ban lasts 10 years. The ban in the amendment of the Senator from Arkansas is a 3-year ban following employment. Ours is a 10-year ban following the termination of employment. But, more important, the committee amendment goes after the heart of the matter. We go after the conflict of interest. The evil we address is the conflict of interest: When you have somebody who is monitoring a contract for the taxpayers, supervising a contract for the taxpayers, in the Defense Department on Friday, and discussing employment opportunities for himself with that contractor for the next Monday.

That is the evil we go after. We do it in a very rifle-shot way, because we go after the conflict of interest. That is what has created so much concern in the hearts and the minds of the citizenry of this country.

This is true also, by the way, in the nonmilitary area. Everything we pass here should be Government-wide. We talk a lot about DOD, but what is going on here can go on outside DOD, with Government procurement specialists.

This is a Government-wide problem, and I hope that Governmental Affairs Committee takes up this problem Government-wide, so that we do not just cast an aspersion on DOD employees. As a matter of fact, we have a bill ready which will do exactly that.

This amendment slams the door shut on the right people. This is the issue. The Pryor approach misses people it should hit and hits people it should miss. The Pryor approach misses people it should hit. Who are those people? These are the people who exercise less than significant contract responsibilities, but who still exercise contract responsibilities. We think they should be included, and we do include them. If you have any contract responsibility over a contractor, you are covered by this committee amendment, no matter how minor, because, again, the ethical issue is not minor. The ethical issue is major.

The perfecting amendment of the Senator from Arkansas also hits people it should miss. Those are people who have never discussed employment with anybody until after they left Government service. His amendment hits people, presumably, I think by the thousands, who have never discussed employment, who, for the first time after working for the Federal Government, then seek employment in their area of specialization and are prohibited from doing so, even though they never had any discussion relative to employment with that particular contractor.

So, in summary, the pending committee amendment slams this revolving door shut. It slams it on the right people, the people who are engaged in a conflict of interest, who are talking about their own future when they should be defending our Treasury. It does not hit people it should not hit. It hits the people whom it should hit, and that is the right balance.

It is tough. There is a $20,000 fine and a 10-year ban. It changes the form so that we can enforce it. It is a creative way, a fair way and a tough way of getting to the revolving-door amendment.

I should like to give some examples to the Senator from Arkansas of some of the people who would be hit by his amendment and those who would not be hit by ours, nor should they.

I have already indicated that many people are hit by our amendment who are not hit by his amendment but who should be hit. Let me give some examples for the RECORD of the kinds of people whom his amendment would affect, which we do not think would be proper.

Last year, the Senate approved an amendment to the spare parts procurement reform package, which was offered by Senator BYRD, me, and others, that created in each of the services a statutory competition advocate general. These positions, much like the competition advocates that were created the year before in the Competition in Contracting Act, which was submitted by Senator COHEN and me, have, as one of their primary duties, signing off and thus creating personal accountability on hundreds, and in some cases thousands, of contracts. This involvement is almost certainly "personal and substantial" within the meaning of my friend's amendment.

In fact, the regulatory definition of the term "personal and substantial" reads as follows, because those are key things in his amendment or in an earlier version. I do not know if those are the exact words used in the amend-

ment he will send to the desk, but I think that is the flavor of the amendment. The regulatory definition reads:

A finding of substantiality should not be based only on the effort devoted to a matter, but on the importance of the effort. While a series of peripheral involvements may be insubstantial, the single act of approving or participation in a critical step may be substantial.

This means that for these people—these competition advocates general—who were created by the Senate last year, the ban on employment would bar them from literally thousands of opportunities, if you look back on all the contracts they have approved in the 3 years prior to their departure. Those are thousands of companies with whom they could not take employment because they had a substantial contract within 3 years, without the right to recuse themselves, even though discussion might be taking place. It just hits people you do not want to hit, while missing people you really do not want to miss.

Let me give a second example:

There are thousands of administrative contract officers spread all over the country who have the job of managing contracts that are already awarded. These officials sign progress payment checks and approve the quality assurance compliance systems of every contractor sometimes in a large an area as a State.

Such an involvement would, we think, be considered personal and substantial, even though there are thousands of them which take place during the course of a year.

Those administrative contract officers could be barred from accepting employment from any company receiving defense business in that entire State, for instance. Again, it could be hundreds or thousands of companies.

I happen to share the concern of my friend from Arkansas. I think that his strong revulsion to some of the situations that we have seen where we know people have monitored contracts with company A during this week and end up on their payroll next week. That revulsion is a revulsion I happen to share and I think the American people share.

What the best solution to it is, we can argue here, and we have debated it.

There are some advantages and disadvantages to each approach, may I say. We happen to think our approach is better and indeed stronger.

But whichever approach we adopt, and, of course, we favor ours, we must address this issue because it is corrosive; it is corroding the credibility of the Pentagon. The national defense of this country is too important and too serious for us to allow the revolving door of a few or a few hundred to undermine that common goal.

Mr. President, I yield the floor.

Mr. QUAYLE. Mr. President, first, I congratulate the Senator from Michigan on an excellent statement, outlining the substantive differences between the committee position and Senator PRYOR's position. I again congratulate him for his design and being the architect of the revolving door provisions within the committee amendment.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. QUAYLE. What is the pending business?

The PRESIDING OFFICER. The pending question is amendment No. 147 offered by the Senator from Arizona on behalf of the committee.

Mr. QUAYLE. So the committee amendment is the pending business?

The PRESIDING OFFICER. The Senator is correct.

Mr. QUAYLE. I wonder if I might inquire from the distinguished Senator from Arkansas if he is going to offer this substitute at this point or thereabout, because if we are going to try to vote on his substitute at 5 p.m. and the committee amendment, this only gives us a couple of hours to really get down and debate the merits on a point-by-point discussion.

Mr. PRYOR. I am ready at this time to submit the amendment. That is, I would be glad to submit the amendment at this time and lay it before the Senate with the understanding that it be classified as a perfecting amendment to the committee amendment, and I do not think there is any problem there.

Does the Senator from Indiana wish me at this point to officially send the amendment to the desk?

Mr. QUAYLE. I think it might be appropriate, unless I get contrary word from our chairman of the Armed Services Committee, that the Senator from Arkansas send his amendment to the desk so we can have that amendment pending and discuss it with the anticipation that we are going to vote, I think, hopefully still around 5 p.m.

I do not think that has been cleared, but that would certainly be my desire to get to it.

I yield for a comment to the chairman of the committee.

Mr. GOLDWATER. Mr. President, I certainly hope as chairman that the Senator from Arkansas will send the amendment forward. We have 2 hours and then we are going to vote, and it would be very helpful to us to know what we are going to vote on.

So I suggest that the amendment be sent to the desk and then we can have a chance to take a look at it.

Mr. LEVIN of Michigan. Mr. President, if my friend will yield, I also hope that we will have a vote then, but I understand it has not been cleared for a 5 p.m. vote. I also hope we could vote at 5 p.m., but we have not cleared that on our side yet, that 5 p.m. vote.

Mr. GOLDWATER. I think it was cleared Friday.

Mr. LEVIN of Michigan. My understanding is, it has not been cleared yet. Perhaps we should put in a quorum call and check with the minority leader.

Mr. GOLDWATER. That is not too impossible, but I thought it was cleared Friday that we would vote on Monday at 5 p.m.

But we can talk with the Senator's leader and talk with mine.

Mr. LEVIN of Michigan. I thank the Senator.

Mr. PRYOR. Mr. President, if I may respond, I would be glad in just a moment or at the right time to send an amendment to the desk, but I wish to ask one question of the manager of the bill.

Is it anticipated that if the amendment is proposed at this time, there is no danger in a tabling motion against the amendment before other speakers who may be coming in on airplanes? There is no danger to this being subjected to a tabling motion, is there, before the time has been allocated?

Mr. GOLDWATER. Mr. President, I, as chairman, will not move to table the amendment and I do not think my friend from Indiana will. We want to get a vote up or down.

Mr. PRYOR. Up or down vote?

Mr. GOLDWATER. Yes.

AMENDMENT NO. 154

Mr. PRYOR. Mr. President, with that understanding, I do send an amendment to the desk, in the form of a perfecting amendment to the pending committee amendment, and I submit this amendment at this time on behalf of myself and Senators GRASSLEY, PROXMIRE, KERRY, DECONCINI, LEAHY, MELCHER, HART, and METZENBAUM. I send the amendment to the desk at this time.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arkansas [Mr. PRYOR], for himself, Mr. GRASSLEY, Mr. PROXMIRE, Mr. KERRY, Mr. DECONCINI, Mr. LEAHY, Mr. MELCHER, Mr. HART, and Mr. METZENBAUM, proposes an amendment numbered 154.

Mr. PRYOR. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the Committee amendment after the words "Title VI—Procurement Policy Reform and Other Procurement Matters.

"SHORT TITLE

"SEC. 601. This title may be cited as the", strike all that follows in the amendment and insert in lieu thereof the following: "Competition and Ethics Enforcement Act of 1985."

DEFINITIONS

SEC. 602. In this title:

(1) "Full scale development", when used with respect to a weapons system or other defense equipment, means all detail design of a weapon system or other defense equipment necessary for the production of that system or equipment to begin.

(2) "Major defense acquisition program" has the same meaning as provided in section 139(a)(1) of title 10, United States Code.

(3) "Acquisition plan" means the type of plan referred to in section 7.104 of the Federal Acquisition Regulation as in effect on April 1, 1985.

(4) "Competitive procedures" means, in connection with the award of a contract, procedures which provide for full and open competition as provided in section 2304(a) of title 10, United States Code.

(5) "Acquisition", when used with respect to a weapon system or other defense equipment, means the complete process associated with the development and procurement of the weapons system and other defense equipment, including identification of military requirements, research and testing.

(6) "System integration" means the development and administration, normally by a prime contractor, of the process of manufacturing a completed weapon system or other defense equipment for delivery to the United States, including the installation of all subsystems and components.

(7) "Sole source contract" means any contract for the procurement of a weapon system or other defense equipment awarded through procedures other than competitive procedures.

DUAL SOURCE COMPETITION AND SOLE SOURCE CONTRACTING FOR MAJOR DEFENSE ACQUISITION PROGRAMS

SEC. 603. Chapter 137 of title 10, United States Code, is amended by adding at the end thereof the following new section:

DUAL SOURCE COMPETITION AND SOLE SOURCE REQUIREMENTS FOR WEAPONS PROGRAMS.

"(a)(1) Before initiation of the full scale development of a weapon system or other defense equipment under a major defense acquisition program, the Secretary of Defense shall prepare an acquisition plan for such program.

"(2) The acquisition plan shall provide for the use of competitive procedures when required by title 10, United States Code section 2304, except as provided for in subsection (c) of this section.

"(3) The acquisition plan shall also provide for the establishment and maintenance throughout the duration of the program of two or more development sources of such program and of two or more production sources for system integration and for the production of major subsystems to be purchased by the United States under major defense acquisition programs so that each production contract, and any contract renewal for production, will result in a majority or plurality of the production under the contract being awarded to the bidder with the proposal most advantageous to the United States, considering only price and other factors included in the solicitation, and a minority of the production being awarded to the next such most advantageous bidder or bidders under the contract. The percentage of the contract for production awarded to the next most advantageous bidder or bidders under the contract shall be a percentage determined by the Secretary of Defense to be sufficient to allow each such bidder to compete effectively for a majority of the production when the contract is renewed: provided that the contract proposal of the next most advantageous bidder or bidders is competitive with the contract proposal of the most advantageous bidder.

"(b)(1) The Secretary of Defense may waive the requirements of subsection (a)(3) in the case of any contract if he determines and certifies in writing to the Congress that such requirement will materially increase total cost of the program or delay completion of the total program. Any waiver of the dual sourcing development requirement of subsection (a)(3) shall not be considered a waiver of such subsection's dual sourcing production requirement.

"(2) Except as provided in subsection (c), a contract described in subsection (c) with respect to which the Secretary has waived the requirements of subsection (a)(3) may only be awarded through the use of competitive procedures. If a contract described in subsection (c) with respect to which the Secretary has waived the requirements of subsection (a)(3) is renewed, the new contract must be awarded under competitive procedures or as provided in subsection (c).

"(c)(1) If the Secretary of Defense finds in the case of a prime contract to be awarded for a major defense acquisition program that the requirements of subsections (a)(3) and (b)(2) cannot be complied with and that procurement procedures other than competitive procedures are permitted under section 2304(c) of title 10, United States Code, in the award of such prime contract, the Secretary shall submit a report to the Congress containing his findings together with a request for specific statutory authorization to enter into a sole source prime contract for such program. The Secretary shall include in such report for each contract—

"(A) the total program cost information, total program unit cost information, and delivery schedule information under a competitive procedures contract and under a sole source contract used by the Secretary in his decision to select a sole source contract for such program;

"(B) the existing unit cost of a commercially available product that performs a function similar to the function to be performed by the product to be obtained under the contract to be awarded, if such a product is commercially available, or the existing unit cost of a foreign produced product that performs a function similar to that of the product to be obtained under the contract to be awarded, if such a product is commercially available in a foreign country, or, if such a product is not available from either such source, an independent cost estimate of the total program unit cost of the product to be obtained under the contract to be awarded;

"(C) the identity of any senior official of the Department of Defense at the equivalent level of GS-14 or above who recommended or caused to be initiated a recommendation that the contract be a sole source contract; and

"(D) such other information as the Secretary considers appropriate.

"(2) The report required by paragraph (1) shall be submitted to the Congress not later than the date on which the initial budget request for full scale development or production, whichever the case may be, of the major defense acquisition program is made to the Congress.

"(3) A sole source prime contract may not be awarded or renewed for any major defense acquisition program unless the Congress has specifically authorized such specific contract to be awarded in an annual Department of Defense authorization Act or in other appropriate legislation enacted into law. Such specific statutory authorization shall include the identity of such contract and its cost.

"(4) Whenever the Secretary requests authorization, pursuant to subsection (c)(1), for the awarding of a sole source prime contract, he shall also cause to be published in the Federal Register a notice of the request and shall include in the notice the noncompetitive nature of the contract to be awarded, the estimated cost of the contract, the name of the contractor to whom the contract is to be awarded, and the identity of any Department of Defense officials at the equivalent level of GS-14 or above, who recommended or caused to be initiated a recommendation that the contract be awarded as a sole source contract.

"(5) Nothing in this subsection shall be deemed to require the public release of classified information.

"(d) Each sole source contract for a major defense acquisition program awarded by the Department of Defense shall—

"(1) contain a provision that prohibits the contractor from employing for a period of 6 years after the expiration of the contract the services of any employee or former employee of the Department of Defense at the equivalent level of GS-14 or above who recommended or caused to be initiated a recommendation that the contract be awarded as a sole source contract;

"(2) provide for a comprehensive audit by the Comptroller General of the United States, including access by the Comptroller General to all accounting records of the contractor and subcontractors, including any classified records;

"(3) deny payment of any overhead costs under the contract until the appropriate representative of the contractor has certified to the Secretary in writing that the payment of the overhead costs will reimburse the contractor only for costs that benefit, directly or indirectly, the Department of Defense and that such costs are demonstrably related to or necessary for the performance of the contract for which the payment is requested; and

"(4) require the appropriate representative of the contractor to certify to the Secretary in writing that any claim or request for payment under the contract does not include any claim or request for general and administrative costs that are unallowable under regulation prescribed by the Secretary of Defense.

"(e) A claim or request for payment by a contractor for any overhead cost prohibited under subsection (d)(3) or for any unallowable general and administrative cost shall be subject to section 287 of title 18, United States Code, and shall be punishable as provided by law for offenses under that section.

"(f) The Comptroller General of the United States shall conduct a comprehensive audit of each prime sole source contract awarded by the Department of Defense for a major defense acquisition program and shall report the results of such audit to the Congress together with his opinion whether a new contrct for the program provided for in the audited contract can reasonably be awarded under competitive or dual sourcing procedures upon the expiration of the existing sole source contract.

"(g) The provisions of this section shall not require the suspension or termination of funding or approval for any defense program or defense contract during the fiscal year 1986."

TRAINING AND REQUIREMENTS FOR QUALITY CONTROL ENFORCEMENT

SEC. 604 Part II of subtitle A of title 10, United States Code, is amended by adding the following section 1621:

"(a) The Secretary of Defense shall develop and carry out an introductory training program which shall be mandatory for all personnel responsible for assuring quality standards for all personnel responsible for assuring quality standards for weapon systems or other defense equipment. Such program shall be not less than four weeks in duration. A person assigned to duties involving quality assurance shall be required to attend such training program within the first six months of the person's assignment to such duties.

"(b)(1) In any case in which it is determined that a weapon system, other defense equipment, or service provided to the Department of Defense fails to meet the quality standards provided for in the contract for such weapon system, other equipment, or service, whether such determination is made before or after delivery of the equipment or service, the cost of repair or replacement, including all labor costs, shall be borne by the contractor.

"(c) In any case in which a contractor fails to disclose to the appropriate officials of the Department of Defense any instance in which the contractor knows defense equipment or service provided to the Department of Defense by the contractor does not meet the quality standards prescribed in the contract for such equipment or service and submit a claim for the payment of such equipment or service, such claim shall be subject to section 287 of title 18, United States Code, and shall be punishable as provided by law for offenses under that section.

"(d) The provisions of this section shall apply in any case only to the extent that the provisions of section 2403 of title 10, United States Code, do not apply.

BURDEN OF PROOF IN GOVERNMENT CONTRACT DISPUTES

SEC. 605 (a) In any proceeding before the Armed Services Board of Contract Appeals, the United States Claims Court, or any other Federal court in which the reasonableness of any contract costs for which a contractor seeks reimbursement from the Department of Defense are in issue, the burden of proof shall be upon such contractor to establish that such costs are reasonable.

(b) "Reasonable" means a cost that does not exceed that which would be incurred by a prudent person in the conduct of competitive business.

LIMITATION ON EMPLOYMENT OF CERTAIN DEPARTMENT OF DEFENSE PERSONNEL BY DEFENSE CONTRACTORS

SEC. 606. (a)(1)(A) Chapter 141 of title 10, United States Code, is amended by inserting after section 2397 the following new section:

"§ 2397a. Limitation on employment of certain Department of Defense personnel by defense contractors

"(a) As used in this section:

"(1) 'Compensation' includes any payment, gift, benefit, reward, favor, gratuity, or employment valued in excess of $100 at prevailing market price, provided directly, indirectly, or through a third party.

"(2) 'Contractor' means any person, partnership, corporation, or agency thereof (other than the Federal Government, the independent agencies of the Federal Government, or the District of Columbia) that offers, negotiates, agrees, or otherwise contracts to furnish to the Federal Government property, services, or supplies, and any parent organization, subsidiary organization, or affiliated organization of any such person, partnership, corporation, or agency thereof.

"(3) 'Covered defense official' means an officer or employee of the Department of Defense or a member of the armed forces on active duty who is paid for service as an officer or employee of the Department or member of the armed forces at a rate of basic pay equal to or greater than the minimum rate of basic pay payable for grade GS-11 under the General Schedule.

"(4) 'Procurement function' means any acquisition activity relating to a contract awarded by the Department of Defense, including—

"(A) negotiating, awarding, or administering the contract;

"(B) approving contract changes;

"(C) approving payment under the contract;

"(D) selecting a contractor;

"(E) performing cost analysis, quality, assurance, operation and developmental testing, budgeting, or auditing functions relating to the contract;

"(F) providing technical advice or recommendations relating to the contract; or

"(G) managing a procurement program which includes the contract.

"(b)(1) A former officer or employee of the Department of Defense and a member or former member of the armed forces may not accept compensation from any contractor for the 3-year period beginning on the date the former officer or employee separates from Government service in the Department or the member or former member is discharged or released from active duty if, within 3 years before such date, the former officer of employee or the member or former member was a covered defense official who had significant responsibilities in the performance of a procurement function with resepect to that contractor.

"(2) Whoever violates paragraph (1) shall be fined not more than $10,000 or imprisoned for not more than 2 years, or both.

"(3) Whoever furnishes any compensation to a person who is prohibted by paragraph (1) from accepting the compensation shall be fined not more than $10,000 or imprisoned for not more than 2 years, or both.

"(c)(1) Each contract for the procurement of property or services awarded by the Department of Defense shall include a provision prohibiting the contractor from furnishing compensation to any person if the acceptance of such compensation by such person would be a violation of subsection (b)(1).

"(2) A contractor which violates a contract provision required by paragraph (1), as determined by the Secretary of Defense, shall be liable to the United States for the greater of $250,000 or the amount equal to five times the annual rate of compensation paid by the contractor in violation of such contract provision. The United States may collect the amount of such liability by withholding, as a forfeiture, any money payable by the United States to the contractor.

"(d)(1) Not later than March 1 of each year, each contractor which is subject to a contract provision required by subsection (c)(1) shall transmit to the Inspector General of the Department of Defense a report on persons to whom the contractor furnished compensation during the preceding year and who are covered by such contract provision. The report shall include—

"(A) the name of each person (together with other information adequate to identify the person) who, as a covered defense official, performed a Government procurement function within 3 years before the first day of the year covered by the report and who was compensated by that contractor during the year covered by the report;

"(B) the agency or agencies of the Federal Government which employed the person or the armed force in which the person served on active duty, as the case may be, during the 3 years referred to in clause (A);

"(C) the person's job titles during the 3 years referred to in clause (A);

"(D) a full and complete description of the duties of the person during the 3 years referred to in clause (A);

"(E) a full and complete description of any official responsibilities such person exercised with respect to any contract in which the contractor has or had an interest; and

"(F) a description of any duties that the person has performed on behalf of the contractor during the year covered by the report.

"(2) Not later than April 1 of the year in which the Inspector General of the Department of Defense receives a report under paragraph (1), the Inspector General shall transmit a copy of the report to the Congress.

"(3) The Inspector General of the Department of Defense shall assess the accuracy and completeness of each report received under paragraph (1) and shall identify any conduct punishable under subsection (b), any violation of a contract provision required by subsection (c)(1), and any failure of the report to meet the requirements of paragraph (1). The Inspector General shall report any such conduct, violations, and failures to the Attorney General of the United States for prosecution or other appropriate action without regard to whether the Secretary of Defense has taken or has declined to take action under subsection (c)(2).

"(4) A contractor who fails to transmit to the Inspector General of the Department of Defense a report required by paragraph (1) shall be liable to the Federal Government for an administrative penalty in the amount of $10,000. The Secretary of Defense shall assess the penalty required by the first sentence.

"(5) The Director of the Office of Government Ethics shall have access to the annual reports filed under paragraph (1) and shall review the reports for conduct punishable under subsection (b), any violation of a contract provision required by subsection (c)(1), and any failure of the report to meet the requirements of paragraph (1). The Director shall submit an annual report to the Congress on his actions under this paragraph and shall include in the report his findings relating to his review of the reports filed under paragraph (1).

"(e) Subsections (b), (c), and (d) do not apply with respect to a contract for an amount less than $25,000.

"(F)(1) The Director of the Office of Government Ethics shall coordinate and review the implementation and administration of this section. In consultation with the Secretary of Defense, the Secretaries of the military departments, the Attorney General, and the Administrator of the Office of Federal Procurement Policy, the Director of the Office of Government Ethics may issue regulations to implement and administer this section and may review agency regulations

issued to implement and administer this section.

"(2) For purposes of implementing and administering this section, the Secretary of Defense, the Secretaries of the military departments, the Attorney General of the United States, and the Administrator of the Office of Federal Procurement Policy shall cooperate with the Director of the Office of Government Ethics and shall furnish the Director such information, appropriate personnel (with or without reimbursement by the Director), and financial and other assistance as may be agreed upon between the Director of the Office of Government Ethics and such official.

"(g)(1) Any person who is offered compensation that, if accepted, might place the person in violation of subsection (b)(1) may, before accepting such compensation, request from the Office of Government Ethics advice on the applicability of this section to such compensation. The request shall be made jointly by the person and the contractor who offered such compensation to the person.

"(2) A request made under paragraph (1) by any person who has been offered compensation referred to in such paragraph shall include—

"(A) a full and complete description of the person's duties during the last 3 years the person was employed by the Department of Defense or served on active duty in the armed forces, as the case may be;

"(B) any official responsibilities the person exercised during those 3 years with respect to any procurement contract in which the contractor has or had an interest; and

"(C) the contractor's description of any services that the person will perform on behalf of the contractor.

"(3) Promptly upon receipt of any request made under paragraph (1), the Director of the Office of Government Ethics shall publish a notice of the request in the Federal Register. The notice shall include—

"(A) the name of the person making the request;

"(B) the contractor offering compensation to the person; and

"(C) the information included in the request under clauses (A), (B), and (C) of paragraph (2).

"(h)(1) Upon receiving a request for advice under subsection (g), the Director of the Office of Government Ethics shall determine whether the acceptance and payment of compensation referred to in the request is conduct punishable under subsection (b) or would be a violation of a contract provision required by subsection (c)(1).

"(2) Not later than 30 days after the date the Office of Government Ethics receives a request for advice under subsection (g), the Director of the Office shall issue an interim advisory opinion stating his determination under paragraph (1) based on an initial review of the request.

"(3) Not later than 60 days after the date the Office of Government Ethics receives a request under subsection (g), the Director of the Office shall issue a final advisory opinion stating his final determination under paragraph (1).

"(4)(A) Except as provided in subparagraph (B), if the Director of the Office of Government Ethics states in an interim advisory opinion issued under paragraph (2) that, based on the initial review, the Director concludes that the acceptance and payment of such compensation is not conduct punishable under subsection (b) and does not violate a contract provision required by subsection (c)(1), acceptance and payment of such compensation shall not be punishable under subsection (b) and shall not be considered a violation of such contract provision.

"(B) Subparagraph (A) shall not apply to an acceptance or payment of compensation which occurs after the date the Director of the Office of Government Ethics issues a final advisory opinion under paragraph (3) if the Director states in the final advisory opinion that acceptance and payment of the compensation is conduct punishable under subsection (b) or violates a contract provision required by subsection (c)(1).".

(B) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 2397 the following new item:

"2397a. Limitation on employment of certain Department of Defense personnel by defense contractors.".

(2) Not later than 180 days after the effective date of the amendments made by paragraph (1), the Secretary of Defense shall issue regulations specifying the procurement functions covered by the description of functions set out in section 2397a(a)(4) of title 10, United States Code (as added by paragraph (1)).

(b)(1) The amendments made by subsection (a)(1) shall take effect January 1, 1986.

(2) The amendments made by subsection (a)(1)—

(A) do not prohibit—

(i) the continuation of employment which commenced before the effective date of the amendments; or

(ii) the receipt of compensation for such employment; and

(B) do not apply with respect to any procurement function performed before such effective date by a former officer or employee of the Department of Defense whose employment by the Federal Government terminated before such effective date or by a member or former member of the Armed Forces who was discharged or released from active duty in the Armed Forces before such effective date.

IMPROVED REQUIREMENTS AND PENALTIES RELATING TO DISCLOSURES OF EMPLOYMENT OF FORMER PERSONNEL OF DEFENSE CONTRACTORS BY THE DEPARTMENT OF DEFENSE

SEC. 607. (a) Section 2397 of title 10, United States Code, is amended—

(1) by striking out subsection (b);

(2) by redesignating subsections (c), (d), (e), and (f) as subsections (b), (c), (d), and (e), respectively;

(3) in subsection (b)(1) (as redesignated by clause (2))—

(A) by striking out "minimum rate for GS-13" and inserting in lieu thereof "minimum rate of basic pay payable for grade GS-11 under the General Schedule";

(B) by striking out "of at least $15,000" and inserting in lieu thereof "equal to or greater than the minimum rate of basic pay payable for grade GS-11 under the General Schedule"; and

(C) by striking out "contracts by the Department during the fiscal year that total at least $10,000,000" and inserting in lieu thereof "any contract during the fiscal year in an amount equal to or greater than $25,000"; and

(4) in subsection (d) (as redesignated by clause (2)), by striking out "$1,000, or imprisoned not more than 6 months, or both" and inserting in lieu thereof "$10,000".

(b) The amendments made by subsection (a) shall take effect January 1, 1986.

SEC. 608. There are authorized to be appropriated $3,000,000 for each of the fiscal years 1986 and 1987 to be available for the purpose of carrying out the provisions of title 15, United States Code, section 644(K).

EFFECTIVE DATE

SEC. 609. This title shall become effective on October 1, 1985, except as may be provided in sections 606 and 607.

(Mr. CHAFEE assumed the chair.)

Mr. PRYOR. Mr. President, I have just heard a very good discussion of the revolving door issue, and I wish to make certain that my colleagues in the Senate know that there is a great deal more to this entire package than just the revolving door issue.

It seems as though we have sort of glued in and narrowed on that particular issue because, one, it is an issue that is abused. I think my friend from Indiana, Senator QUAYLE, understands this so well as my friend from Michigan, Senator LEVIN, understands this so well.

We have spent hours and hours in attempting in quiet deliberation and discussion, in one case at least a 2-hour period or possibly even 3 hours with Senator LEVIN and his staff.

We have talked in detail about the issue of the revolving door and how we best might approach a solution to this tremendous dilemma that we find ourselves in.

I think, Mr. President, that all of the parties involved, Senator QUAYLE, Senator LEVIN, Senator GRASSLEY, and myself, all of the parties involved in this procurement issue this afternoon see a great problem.

Now the question is: How do we best, in the most practical way, find a solution to the problem?@

As I stated in my opening statement, men and women are going to disagree in good faith about how we pursue a solution to this entire procurement dilemma.

As I look at the revolving door issue, Mr. President, I first say that it is not all that complicated when you really get down to it. There is nothing complicated about the dubious, questionable ethics of arranging for employment with someone you are supposed to be supervising.

Second, it is fine and wonderful to revise forms and to create new forms and to clean up the paperwork. Revise the paperwork, if you want, increase the reporting requirements, if you must, but this is not going to solve the problem that we are attempting to solve with this particular amendment.

It is perfectly easy under the proposal offered by the distinguished Senators from Indiana and Michigan, under their revolving door proposal, to cover any employment discussions because this particular amendment which we are trying to change does not bar nor prohibit post-retirement

employment unless, and this is key, and this is the difference, this is the distinction, unless that employee fails to report a job offer to the Department of Defense or the proper authorities and gets caught.

Mr. President, the amendment that we attempt to replace, we think, does not go far enough because the committee amendment does not slam the door on anyone who takes a job with a contractor he was supposed to supervise as long as the job offer does not come until after retirement. If he retired at midnight after 20 or 30 years with the military, civilian, whatever, and at 1 minute after midnight McDonnell Douglas or Hughes or any other of the major contracting firms could get word to this individual:

Look, we know that you have supervised us. We know that you have been the contracting officer that granted us $1 billion or $2 billion for this or that weapons system. So you are now no longer employed, and we would like to offer you a job opportunity with our company.

Now, that may not be exactly how those things work. But we feel that a strict restriction of at least 3 years is an absolute necessity—in fact, in my original amendment that I started circulating about 6 or 8 weeks ago, in the original amendment that I was going to propose, I was going to have a 5-year period whereby that particular worker, military or civilian, could not go to work for the contractor. However, through the process of negotiation and in talking to Senator LEVIN and talking to dozens of different people about this matter, and also in working very closely with colleagues of ours in the House of Representatives, it was decided to amend the 5 years and go down to the 3-year period.

We think that this approach is fair. We think it has teeth in it, certainly, and I hope the legislative intent will be established this afternoon to demonstrate clearly that it is not our intention to penalize those who we should not penalize. We are not after those employees. I think the Senator from Michigan understands that.

I just want to state, Mr. President, that the Senator from Michigan, the Senator from Indiana, and just about all of us, I think, in this body see a tremendous problem. And we think, or at least Senator GRASSLEY and I and the cosponsors of our amendment feel that this approach is fair, that it is reasonable to prohibit work within 3 years after that individual has quit the Government, and we think that the necessary protections are embodied in our language and are very hopeful we will get favorable consideration for our proposal.

Finally, Mr. President, on the subject of the revolving door, Mr. President, Ompal S. Chauman, gave this statement in testimony this month to a House subcommittee of the Armed Services Committee:

I and many of my co-workers have observed that when a manager is ready to retire, he doesn't just retire and go the work for the contractor. There is planning involved. The process begins at least two or three years prior to the separation from government service and the manager becomes increasingly soft on the contractor. To get the job, he must know someone in the contractor's heirarchy. He must do things which his future employers like and prove his worthiness for his new job. Consciously or unconsciously the thought of future security begins to affect him. He begins to think more about his future employer than his current one. Loyalties become confused.

In order for us to remove this temptation, our laws must restrict certain post-government employment activities with sanctions and penalties.

Mr. President, we think this once again demonstrates the need for language like Senator GRASSLEY, Senator PROXMIRE, myself and others have worked out and have embodied in this particular amendment, the perfecting amendment to the amendment offered by the Senator from Indiana.

I thank the Chair.

Mr. GOLDWATER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Iowa.

Mr. GRASSLEY. Mr. President, the purpose of my speaking at this point is in support of the Pryor amendment. Mr. President, I would like to tell you how much I commend at this time my friend from Arkansas for the fine work that he has done in constructing this substitute. Should this amendment pass—particularly if it becomes law—I think we in the Senate can sleep better at night knowing true reform is taking hold at the Department of Defense. It is apparent that the defense budget will be frozen in fiscal year 1986 because Congress in its responsibility has finally risen to the challenge of matching Defense Department performance with an appropriate budget level.

A defense budget freeze did not happen by chance. It took 2½ years of horror stories and environment shaping before Congress could assure itself that the Defense Department can, and should, live with a freeze. Despite a doubling of the procurement budget in the last 5 years—I stated in my debate on the budget resolution that—the Department of Defense has bought less than during the previous 4 years, and those previous 4 years marked a time when our defense became conspicuously weak. It has become obvious that more money has not solved our procurement problem. It is equally obvious, Mr. President, that fundamentally improved management will yield far greater returns than merely, and easily, increasing the defense budget. That, Mr. President, is why the Congress has frozen the defense budget as a necessary first step, and now must follow up with true management reforms such as are represented by the substitute presented by the Senator from Arkansas.

I would like to commend my colleague from Indiana, Mr. QUAYLE, for identifying and acknowledging the various areas needing reform in the defense budget, and yet, I would like to caution all of my colleagues on one thing. That is that there is a right way to perform surgery, and there is a wrong way.

Do we really want, in the case of the revolving door language, that to be merely a reporting requirement? Do we want to continue to pay unreasonable costs, like lavish parties, trips to Pago Pago, and trips to Danish massage parlors? Those are all instances where auditors have uncovered those expenses being paid.

Despite a perception to the contrary these costs would still be allowable under the committee language. Of course, the burden would be shifted—and it would be shifted rightly so from the taxpayers to the contractor—but the definition of what reasonable costs are would not be changed under the committee's language. In other words, Mr. President, all the contractor would have to do under the committee language is a little upfront paperwork, charge it to the taxpayers, and then get reimbursed for the same outrageous costs that we are hearing about now. I do not think this is enough of a reform. That will be awfully difficult to explain to the folks back home. It will be awfully difficult to say that we have solved the revolving-door policy by creating an honor system.

Mr. President, we do have a choice. That choice is between cosmetic reform and real reform. If we want cosmetic reform and something to put in a press release, then we should vote against the Pryor substitute. If we want our constituents banging down our doors in 2 years asking why we have not fixed the outrageous cost problems in the Defense Department, then also vote against the Pryor substitute. But contrarywise, Mr. President, if we want to have a clear conscience of having voted for true defense procurement reform for a package you can rest easy with knowing that reform is on the way, then I urge that we pass this Pryor substitute. If we truly want to lock shut or nail shut the revolving door, truly want to shift the burden of proof from the taxpayer to the contractor, and truly want to compete on military goods and serv-

ices, then we should support the substitute.

Mr. President, if this substitute passes, I really feel there will be less and less pressure in the future for defense budget increases. There are sufficient reforms in this package to increase our national defense for those fewer dollars we are going to appropriate this year.

On the other hand, if this substitute fails, and the committee language passes, and eventually becomes law, we can expect business as usual, with the usual demand for higher defense budgets, but procuring less for those higher budgets. It will be on our record, and obviously have to be on our conscience, that we had an opportunity for true reform, and we blew it.

Mr. President, I urge my colleagues to support this substitute, and once again I commend my colleague from Arkansas for his excellent work and leadership on this amendment.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arizona.

Mr. GOLDWATER. Mr. President, I want to make a comment. I have been sitting here today listening to the discussion. I want to say first I am going to vote to do away with the so-called revolving door. I think the important part of this whole thing is the correction we hope to achieve in the procedure. I have been sitting here mentally trying to figure out if there are 3,300 people who have achieved their jobs through the revolving door, I think we are talking about something you can hardly measure percentagewise, maybe less than a tenth of 1 percent of the people working in the defense industry. I think we should and probably could properly close that. But I do not think that is the big issue.

The issue is to close the avenues that some manufacturers have used in order to achieve benefits to themselves that were not included or intended to be included in the contract when it was let. I know as many men working in the industry who formerly wore the uniform as anybody. I have been sitting here trying to think. I can think of two of them who regularly come to call on me relative to any business. The thing that bothers me is the fact that people can get their poodles cleaned up and deduct that, take out country club dues and dine out and all of that. That to me is the important thing to correct. I hope we will concentrate more on that than upon the seemingly very small problem of the revolving door.

I admit that it is a problem. I keep thinking, though, if I were a manufacturer of anything—let us say I was a manufacturer of an M-1 tank and I ran into a problem and I want to get somebody to help me with this problem. About the only place I can go is to the military or former military. They certainly do not teach that in colleges. There might be some academic solution to some of the problems but I do not see anything, frankly, unusual in the idea that you go to the source to get some help.

I am not going to argue the point. I am going to vote against the revolving door. I just want to remind my colleagues that the big issue, the important thing here, is to close the procedures that manufacturers have been allowed to get away with. For example, our bill has provisions to contract costs that I do not think the other bill has in it. They are very specific on this. In fact, when we get down to the Gramm amendment, it spells out ingreat detail what cannot be done. For example:

That portion of the cost of the use of company furnished automobiles which is of personal benefit to the user.

That portion of the cost of the use of company furnished aircraft which is of personal benefit to the user.

Contributions or donations, regardless of the recipient, including political contributions.

Entertainment costs.

Fines and penalties.

Lobbying costs.

First-class air travel unless lower priced air travel is not reasonably available.

Gifts.

Hotel expenses in excess of limits prescribed in regulations.

Meal expenses in excess of limits prescribed in regulations.

Transportation to and from work except as specifically provided for in regulations or in the contract.

Those are the type of things that I think we have to close.

Mind you, Mr. President, the Internal Revenue Service may say a deduction for all these is perfectly all right. What I want to see is a flatout statement that you cannot do it and charge it to the Federal Government. If you want to deduct it from Internal Revenue, that is fine and dandy, but do not try to saddle the military contract with expenses like that. I just wanted to make those comments, Mr. President, because I think they are pertinent.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. GOLDWATER. Yes, I yield to the leader.

Mr. DOLE. Mr. President, it is my understanding that we may have a couple of votes at 5 or thereabouts—hopefully more during the evening. I visited with the distinguished chairman of the committee. He has informed me he would like to continue fairly late this evening and start again early in the morning. Apparently, he has made a lot of progress so far, disposing of a number of amendments. We are ready now for a couple of important votes on procurement. I have asked other Members to bring their amendments to the floor. I assume we are ready for another one now.

Mr. GOLDWATER. If the Senator will yield, we are a little bit confused about an agreement we reached last Friday. I thought the agreement was we would not vote before 5 p.m.

Mr. DOLE. That is correct.

Mr. GOLDWATER. The order No. 142 is:

Ordered, That during the consideration of S. 1160, the Department of Defense authorization bill, no amendments be in order during the session of the Senate on Friday, May 17, 1985, or until 5 p.m. during the session of the Senate on Monday, May 20, 1985, that have not been authorized by the majority and minority leaders.

So there is no unanimous consent that we will start voting at 5 o'clock.

Mr. DOLE. That portion of the agreement was to try to head off nongermane amendments which the distinguished chairman does not want on his bill. I do not fault him for that. The minority leader was not in a position to give me consent that we would start voting at 5 o'clock, but I think maybe shortly thereafter start voting. I hope we will have some votes today. Otherwise, we will continue to pile them up.

Mr. GOLDWATER. We shall be ready to vote at 5 p.m. I do not like to suggest anything to my leader; he is the boss. But if he would touch base with the minority leader and get some agreement, which we are trying to do, but the minority leader is busy.

Mr. DOLE. As I understand it, Mr. President, if amendments are in order, the Senator is open for business?

Mr. GOLDWATER. We are open for business anytime. We want to vote at 5 o'clock, though. Then we want to go on all night.

Mr. LEVIN. Mr. President, I am glad the majority leader is not withholding any unanimous-consent request. The minority leader is on his way to the floor, and he is not withholding any unanimous-consent request?

Mr. DOLE. No.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader.

Mr. BYRD. I was just listening over the squawk box, and I heard my good friend from Arizona, the chairman of the committee, say that, "We had been trying to get some agreement with the minority leader but the minority leader is busy."

Nobody has approached me, Mr. President, with any agreement or with any proposal for an agreement. And

may I say I have not been too busy to listen.

Mr. GOLDWATER. I guess I have to apologize to the minority leader because the question did come up, and I remember some discussion on Friday, about 5 o'clock. I read the order No. 142, and it did not provide for voting, and so the Senator from Michigan and I just figured we would wait until the two leaders got in the room and then let them agree, if they wanted, to vote at 5 o'clock.

Mr. BYRD. I just wanted to say for the record I have not impeded progress toward any agreement.

Mr. GOLDWATER. No. We did not infer that.

Mr. BYRD. That is what I inferred.

Mr. GOLDWATER. No. The Senator from Michigan asked me the question was I sure that we had a vote at 5 o'clock. And I said, "Yes, I was." Then I found out I was wrong, which is not unusual.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. The Senator from Arizona made a suggestion to me that I visit with the distinguished minority leader, so it was not any indication that we had been in discussion. The last discussion we had about votes at 5 o'clock was on Friday. We could not reach that agreement because there was a lot of uncertainty about who would be here. As I understand, a group of Senators has now returned and another group is due to return about 4:38, so maybe we can reach some agreement. Apparently a couple amendments will be ready for disposition at 5 o'clock. They are ready now, but they will still be ready for disposition at 5 o'clock, and maybe one or two others. But certainly the minority leader has been most helpful in trying to expedite the passage of this legislation.

Mr. BYRD. Mr. President, I will check on my side and see what the prospects are for any vote or votes today. I will be happy to come back to the distinguished majority leader and the chairman and ranking member, if we are able to do that.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I rise to support Senator PRYOR's amendment to close the revolving door through which defense procurement officials pass to take lucrative jobs with contractors they previously supervised. The revolving door is spinning ever faster at increasing cost to the taxpayers and to our Nation's security. In 1983, defense contractors employed over 2,100 Defense Department employees who had left Government within the last 3 years. This is three times the number employed in 1976. Last year, the number soared to over 3,000.

This amendment, which I offer on behalf of my colleague from Arkansas, Senator PRYOR, and numerous cosponsors, would impose a cooling-off period on Government procurement officials at the GS-11 level and above. It would force them to wait 3 years after leaving Government before taking a job with any contractor over whom they exercised significant responsibilities during the last 3 years of their government employment. Both the individual and the contractor would be subject to criminal penalties of up to 2 years imprisonment and a $10,000 fine for violating the act. The contractor would suffer an additional civil penalty of the greater of $250,000 or five times the annual rate of compensation of the employee. Contractors would be required to file annual reports and the Office of Government Ethics would oversee the act and advise individuals and contractors in cases involving potential violations of the act.

The committee is to be commended for recognizing that this problem must be addressed. Before discussing the inadequacies of the committee's approach, however, it is necessary to explore why the revolving door poses such severe problems for our Nation.

The first problem is the obvious temptation for an employee to go soft on a contractor he views as a potential employer. This laxness can take many forms. A negotiator may understand the problems of the contractor too well and not drive a hard bargain. A weapons tester may overlook flaws. An auditor may not press a contractor on inconsistencies in financial data. The list could go on.

Of course, not every employee succumbs to temptation, but whether consciously or unconsciously some do. If the temptation is removed, none will succumb.

The effects when employees give in to temptation are severe. The cost of procuring the instruments of our national defense increases, while their quality declines.

A second problem arises from the appearance of conflicts of interest spawned by the revolving door. It is essential that we eliminate this appearance. Public trust in government depends on it. Obviously many people who appear to have conflicts of interest do not actually engage in corrupt behavior. Unfortunately, some do. It is often impossible for trained investigators, much less for the general public to know which do and which do not.

The impact of this appearance of impropriety is devastating. It contributes to the public's view that defense procurement is riddled with waste and, as we are now seeing, leads to public unwillingness to support defense expenditures. How can the public not become cynical when it hears about generals and admirals taking lucrative positions with defense contractors? And, the problem is much more extensive than that. The press has recently been full of stories of even lower ranking officials using the revolving door. Let me offer a few examples that appeared recently in the Boston Globe.

Lt. Col. George F. Goodall was test director of the Maverick missile. He resigned August 30, 1982. On September 9 he was working for Hughes Aircraft, manufacturer of the Maverick, worth $4.8 billion.

Lt. Col. Wayne O. Mattson was systems project officer on the Maverick. On January 15, 1979, he took a terminal leave—his actual retirement date was not until March 1—and also went to work for Hughes.

Col. James C. Crosby was president of the Army Defense Board, involved in testing the highly controversial Divad antiaircraft system. In August 1981 he retired and went to work for Ford Aerospace, chief contractor on the $4.1 billion Divad Program.

Col. William E. Crouch, Jr. was commander of Army Aviation Development Test Activity at Fort Rucker, AL. He retired July 1, 1981, and 5 days later became the Fort Rucker branch manager of Hughes Helicopter, Inc., whose equipment the Army development unit frequently tests.

Col. Sherwin Arculis tested remotely piloted vehicles, target and reconnaissance drones, for the Army's Training and Doctrine Command. He retired in February 1980 and went to work for Lockheed Missile & Space as manager for an office that provides logistical support to Army remotely piloted vehicles.

Maj. George E. Elliott was chief tester of space transportation systems at the Air Force Test and Evaluation Command. He retired September 1, 1980, and 2 days later was working at Martin Marietta, first as a design engineer but later responsible for integrating test programs on the company's space transportation system. While Elliott was in the Air Force, Martin Marietta was one of the contractors whose systems he tested.

John W. Ulmer, Jr. was manager of instrumentation systems on the MX missile for the Air Force's Ballistic Missile Office. He retired in June 1980 and went to work for TRW Inc., which oversees development of the MX project.

Col. Harvey M. Paskin was chief of the avionics division in the project office supervising the F-16 jet fighter

at Wright Patterson Air Force Base. He left in July 1982 and went to work as an engineer at Westinghouse Electric, which makes the radar—the avionics—on the F-16.

Lt. Col. John W. O'Neal was the operations officer for the Joint Chiefs of Staff in charge of a system called the Ground Mobile Command Center. He took a terminal leave of absence in August 1982 to work for TRW Inc. as senior principal engineer in charge of planning and testing the Ground Mobile Command Center.

Lt. Col. Edward Cartwright was deputy director of contracting for the Computer Acquisition Center at Hanscom. He retired June 20, 1980, and 7 days later went to work as a computer configuration manager at Sperry Univac in McLean, VA,, one of the companies whose contracts he had supervised in the Air Force.

Maj. Walter D. Craften was in the Air Force Plant Representative Office overseeing contracts at a TRW plant in Red Beach, CA. He retired May 1, 1981, and a month later was working as a department manager on product assurance at the same TRW plant.

Ernest R. Giardano was an aduitor in the Defense Contract Audit Agency assigned to keep things honest at a Boeing Co. plant. On December 31, 1979, he retired from the Government and the next day went to work for Boeing.

Marvin H. Boodnick was a price-cost analyst for the same agency, auditing Hughes Aircraft. He quit March 14, 1981, and 2 days later started working for Hughes.

This list could go on and on. The appearance of conflict of interest is powerful. And, as we all know from reading our mail, the American people are angry. Unfortunately, because of inadequate reporting requirements, we do not know the extent of the actual conflicts of interest.

But, there is another group that is equally outraged. These are DOD employees who watch their bosses switch, sometimes overnight, from supervising contractors to working for those very same contractors, at higher pay. Employees are left wondering what their supervisors have done to curry favor with their new employers. As one such employee recently testified, they wonder whether they have been working for the Government or the contractor. These concerns inevitably lead to cynical disrespect for supervisors and less diligent performance.

In yet another way, the revolving door undermines the integrity of the procurement process. Former military officers and civilian officials are able to exploit their government contacts on behalf of their new employers within the first 2 to 3 years after they leave the Government. Such contacts undoubtedly give employers who lure away the right officials unwarranted advantage in what should be a competitive process. This advantage skews the results, producing business for contractors who make shrewd hiring decisions, rather than those who earn the Government's business by producing a superior product. Unfortunately, this exploitation of contacts cannot be prevented entirely, but its most direct effects can be curbed by preventing government employees from working for contractors with which they had significant involvement while in government.

A related problem is the official who uses his last days in office to gain knowledge or contacts that will help him after he leaves. A particularly glaring example is that of Lt. Gen. Oren DeHaven, who retired as director of the Joint Chiefs of Staff's logistics branch in June 1983. Toward the end of his tenure, he specifically requested that he be allowed to attend a briefing by junior officers who had analyzed the Air Force's need for cargo planes. Their study favored the McDonnell-Douglas C-17 and recommended that the Air Force should buy no more than the 50 Lockheed C-5B's already under contract.

According to the Boston Globe, DeHaven told the officers that he wanted to attend the briefing because he would soon be retiring and going to work for Lockheed. DeHaven did become a consultant for Lockheed, presumably using the fruits of his official briefing in Lockheed's effort to convince the Air Force to buy more C-5B's.

I commend the Armed Services Committee for recognizing that these abuses are out of control. Unfortunately, the committee's response is inadequate. The committee bill would only be activated when a contractor actually discusses a job with a government employee who has involvement with the contractor's contract. What happens then? The answer is nothing. If the employee "terminates the contact immediately," he is entitled to continue supervising the contractor as if nothing had happened.

If the contractor comes back again, the employee must report the contact within his agency and, for as long as he considers the offer, he may not supervise the contractor. If he fails to report such a contact, he will be prevented from working for the contractor for 10 years from the date of the contact.

The committee bill simply fails to address many of the problems caused by the revolving door. It does nothing to remove the temptation of a procurement official to overlook defects or otherwise go soft on a contractor in the hope of eliciting that first job offer. It does nothing to forestall the subtle stroking of an official that contractors may enagage in that sends the message that the employee should contact the contractor after he leaves government. As Col. Robert Bowman recently said, "Some of the overtures (made by contractors) were not so obvious. They just wanted to give you the impression that you had a home when you got out so you'd treat them favorably in the meantime."

The committee bill does little to prevent the appearance of conflicts of interest and reassure the public that defense procurement officials are not cozying up to defense contractors. Only a bar on post-government employment with contractors that employees have worked closely with can do that.

The committee bill will do little to boost employee morale. Employees will still watch their bosses switch overnight from supervising contractors to working for the very same contractors. This activity will barely be curtailed.

Finally, the committee bill will prove unenforceable. A principal defect of existing conflict of interest laws is that they are vague and unenforceable. Indeed, the Justice Department has a virtual hands-off attitude toward prosecutions under these laws. The committee bill would simply add another unenforceable provision. It depends entirely on either the employee or the contractor coming forward to admit that they have discussed employment. Obviously, neither has an interest in making this disclosure. And it will be virtually impossible to establish this type of contract through circumstantial evidence. Therefore, we will be left with an unenforceable law that addresses only a very small part of the problem.

The amendment that we offer today suffers from none of these deficiencies. It eliminates the temptation for a government procurement official to go soft on a contractor. It eliminates the appearance of conflicts of interest by preventing quick switches from supervising a contractor to working for the same contractor. And our bill would boost employee morale by ensuring that they know they have been working for the Government and not the contractor. By prohibiting conduct that is clearly observable—going to work for a contractor—it would be easily enforceable. It accomplishes all this by placing a reasonable limitation on the employment options of those who leave government. The Congressional Research Service has issued an opinion that such a limitation is clearly legal.

I, therefore, urge the Senate to support this amendment to close the revolving door. This is a measure that helps the taxpayers of this country, who stand to save billions of dollars by removing conflicts of interest from the procurement process. It also promises to restore a measure of public confi-

dence in government. The time has come to shut the revolving door.

Mr. President, I yield the floor.

Mr. PRYOR. Mr. President, I wish to compliment the Senator from Wisconsin, Senator PROXMIRE. I also wish to thank him for being a cosponsor of this legislation that is pending before the Senate at this time.

I know of no other Member of this body, Mr. President, who has more knowledge or expertise, wisdom, or courage in dealing with the issue of defense procurement than the Senator from Wisconsin, Senator PROXMIRE.

Looking back, just a little bit in the history of Senator PROXMIRE on this issue, he is not a Johnny-come-lately, I say to the President, to my colleagues. Senator PROXMIRE, for example, was probably the first Member of the Senate in modern times to bring to the attention of the Senate the issue of the revolving door and the pervasive problems that the revolving door issue presents, morally, ethically, militarily, and certainly financially.

Mr. President, also in 1977, Senator PROXMIRE proposed and passed in this body the first major defense procurement reform in a long time. Unfortunately, the House of Representatives did not exercise its wisdom in supporting Senator PROXMIRE's proposal that had cleared this body.

Had the House of Representatives supported that proposal, I think without question we would not see today defense procurement in the chaotic situation, the morass that we find today.

Senator PROXMIRE and his very able staffer Richard Kaufman have been investigating certain defense contractors for years; General Dynamics, for example. All of this scandal that comes out about General Dynamics and some of the major defense contractors that have been abusing the system is no news to Senator PROXMIRE.

In the past, had we listened to him more, I think our troubles would be far fewer at this time.

Senator PROXMIRE, as we might recall, Mr. President, and the occupant of the chair, certainly would recognize this as a very important issue in our defense system. He was the first Member of this body to hold extensive shipbuilding hearings to find out what the problems were in acquiring the Navy ships to secure the defense of this country.

Once again, the very first Member of our body of colleagues to bring this matter of the revolving door to our attention, to the best of my knowledge, was the Senator from Wisconsin, and I am very, very proud to have him as a cosponsor of this legislation that we are looking at today that is before the Senate.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. PRYOR. I yield.

Mr. PROXMIRE. I cannot thank my good friend from Arkansas enough. I tell the Senate I have never listened to a speech with more pleasure than the speech he just delivered. It is far more than I deserve, but I still enjoy it very much.

I thank my good friend.

Mr. PRYOR. Mr. President, this Senator has long been an admirer of the Senator from Wisconsin, long before I came to this body, and I have certainly enjoyed working with him and his capable staff during the development of this issue.

Mr. President, we are, it looks like, not too far away from a vote on this issue. I do not know whether we will vote at 5 p.m., 5:30 p.m., 6 p.m., 7 p.m., 8 p.m., or whatever.

Whatever the case may be, in the last hour or two, in the last several hours during the luncheon break, I have been approached by several of my colleagues who have come up and said, "Look, very simply explain to us the difference in the two amendments that are now before the Senate."

With all the issues that we deal with, the farm crisis, the trade issues, and what is happening in the United Nations, and what we are going to do about this and that, sometimes it is necessary to boil down simply the difference in the issues that face us as Members of this body. I'll try to do the same for procurement reform.

Let me say, and I hope I am not being too cute when I say it, that I might describe the difference very simply between what Senator QUAYLE and the Armed Services Committee are presenting to the Senate today and what Senators PRYOR, GRASSLEY, PROXMIRE, and others are presenting to the Senate today. They are two different approaches on how we deal with the procurement mess that faces this country. One approach is softball and one approach is hardball.

The approach of Senators PRYOR, GRASSLEY, PROXMIRE, and others is a hardball approach, attempting to deal with the issue of procurement that is zapping defense dollars, destroying the morale of our Defense Department, and is causing the public to very quickly lose faith and confidence in our Department of Defense and its capability of dealing with procuring for our armed services and our national security.

Mr. President, I daresay that there is not one Member of this body who has not been home in the last several weeks or months when people would not come up on the street or the sales barn or the cafes or restaurants or Rotary Clubs, or labor unions, or whatever, and say, "What in the world is the matter with you people in Washington? Why don't you do something about this procurement problem? How is it that every day, day after day, and week after week, and month after month, we are forced to read these horror stories where our tax dollars are being sent down a rathole because they are not going to the right purpose?"

Mr. President, I do not know if you have a good answer to that complaint from our citizenry out there, from our constituents.

I myself do not have a good short explanation as to why we have allowed this to occur.

Mr. President, in very brief terms, in a side-by-side comparison, and I hope my interpretation is accurate, I would like, if I might for the next few moments, rise and state what I find to be the differences between Senator QUAYLE's amendment and the Pryor-Grassley amendment.

One, Senator QUAYLE's amendment provides no requirement that is necessary for dual-sourcing of contracts to actually be competitive. On the other side of the ledger, we are offering a proposal under Pryor-Grassley-Proxmire saying that competition between dual-sourcers is required; it is mandated.

Senator QUAYLE and the committee say the Secretary of Defense can waive competition requirements for "national security reasons." Mr. President, this is a loophole large enough to drive a Mack truck through. Any time, under the Quayle proposal or present day law, the Secretary of Defense can say:

> Well, I don't know that I want to give this contract to this particular company. Let's give it to this one and we will just do it and say for "national security reasons, we will give it to contractor B rather than A, or X rather than Y."

Our proposal differs in another way, Mr. President. It says that the Secretary of Defense can go sole source—in other words no competition—only when competition is more costly or takes too much time. However, he cannot get by with that explanation alone because we require in the case of sole sourcing, in that contract where there is no competition, that the Congress approve those particular sole-source noncompetitive contracts. That approval would probably come as part of the defense authorization bill.

There is nothing in Senator QUAYLE's bill—and I am sorry he is not here. I have sent a message for him that I was going to make these few statements and I hope that he is on the way to the Senate floor. He may want to argue or rebut some of my conclusions—there is nothing in the committee amendment, Mr. President, that inhibits noncompetitive sole-source contracting. On the other hand, the whole thrust of our amendment establishes a mechanism to strongly discourage sole-source or noncompetitive contracting. Ninety-four

percent of all of the Department of Defense procurement dollars today are spent without competition. No wonder we are in the mess that we find ourselves in in this year of 1985.

There is another section, Mr. President, that we have discussed already at some length. That is the question of the revolving door. Very simply put, I think we could state that the committee amendment has no real bar to the revolving door. The Pryor-Grassley-Proxmire legislation requires that a Government employee is barred for 3 years from working for a contractor that individual supervised while on the giving end.

Also, Mr. President, we find another provision in Senator QUAYLE'S amendment, the committee amendment, based on very sincere motivation. Here, Senator QUAYLE and the committee say that we need more training for program managers.

Well, to be honest, Mr. President, we eliminate this provision because it only asks for more of the same type of instructions on what has enabled us to get into this precarious and, I must say, awful position that we find ourselves in at this time.

In the committee amendment, once again as a comparison, we find that the committee says that the Department of Defense or the contractors can prepare "should cost" reports on weapons. Let us take the example of the $436 hammer—actually, it would not be all that applicable here because our proposal does apply only to the major purchase of major defense acquisition programs. But let us say we have the $436 hammer. We declare that the Congress must have objective information on commercially or foreign available equivalent systems, or an independent estimate prepared by DOD when the above is not available. We think the contractor should not have the opportunity to establish an arbitrary base price for an item he would be supplying.

Mr. President, we have another major difference in this bill between the committee version and the version of Senators PRYOR, GRASSLEY, and PROXMIRE. This is a major difference in the area of quality controls. To the quality control training for DOD employees, we should add contractor employees, because we feel that the contractor himself must be involved in this training period.

As a major difference that we have with the Quayle proposal or the committee proposal, we find—and respectfully submit, that no longer should the taxpayers of this country be responsible for paying for defective work—defective parts and weapons that do not work. We find that the taxpayers have paid for that long enough. Defective equipment should be paid for and replaced solely by the contractor who performed that work.

Today there is not enough incentive for the contractor to do it right in the first place. Because if the contractor does not do it right in the first place, he gets paid on the front end and may get paid once again to fix it.

Furthermore, we put the burden upon the contractor to prove that costs are reasonable, and we also provide a strong definition of what is and what is not reasonable.

Mr. President, let me respectfully submit on behalf of the cosponsors of this amendment, with all due respect on the committee's amendment, we as a Government will spend hundreds of billions more defense dollars before the committee amendment is implemented. Up until the 1990, the Quayle amendment, the committee amendment, will be taking effect piecemeal, where our amendment would take effect immediately, the major portions of that amendment taking place on October 1, 1985, and in subsequent years running until 1987.

Mr. President, these are basically the differences between these two proposals. They are not minor differences. We see the problems as the same. But, Mr. President, what we have maintained, respectfully, is that we must have a stronger approach to curing these problems that face us at this particular time.

Mr. President, finally, we are going to utilize the criminal penalties under the False Claims Act to apply to any contractor who knowingly certifies defective equipment or services from a quality control point of view which are delivered to the Department of Defense.

The False Claims Act and the risk of perjury would also be applied if a contractor knowingly falsified any report to the Department of Defense or to the Congress of the United States. I think Senator GOLDWATER raised this question well a while ago. I only assure the distinguished chairman of the Armed Services Committee that under our proposal if a contractor did those things that Senator GOLDWATER mentioned only a few moments ago, that contractor would be running the risk of perjury just as a taxpayer is on April 15 if he files a fraudulent income tax return.

I yield back the remainder of my time.

Mr. GOLDWATER addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. I ask unanimous consent that the discussion of the present amendment be temporarily laid aside, and that recognition be given to the Senator from New Mexico who will offer an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 155

(Purpose: To require certain additional information in annual Selected Acquisition Reports)

Mr. BINGAMAN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. BINGAMAN] proposes an amendment numbered 155.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 100, between lines 2 and 3, insert the following new section:

ANNUAL SELECTED ACQUISITION REPORTS

SEC. . (a) Subsection (c) of section 139a of title 10, United States Code, is amended to read as follows:

"(c)(1) Each Selected Acquisition Report for the first quarter for a fiscal year shall include—

"(A) the same information, in detailed and summarized form, as is provided in reports submitted under section 139 of this title;

"(3) the current program acquisition unit cost for each major defense acquisition program included in the report and the history of that cost from the date the program was first included in a Selected Acquisition Report to the end of the quarter for which the current report is submitted; and

"(C) such other information as the Secretary of Defense considers appropriate.

"(2) Each Selected Acquisition Report for the first quarter of a fiscal year shall be prepared and submitted in the same format and with the same content as was used for the Selected Acquisition Report for the first quarter of fiscal year 1984.

"(3) In addition to the material required by paragraphs (1) and (2), each Selected Acquisition Report for the first quarter of a fiscal year shall include—

"(A) a full life-cycle cost analysis for each major defense acquisition program included in the report which is in or has completed full-scale engineering development and which was first included in a Selected Acquisition Report for a quarter after the first quarter of fiscal year 1985;

"(B) if the system that is included in a major defense acquisition program described in clause (A) has an antecedent system, a full life-cycle cost analysis for that antecedent system; and

"(C) production information, including but not limited to—

"(i) a baseline annual production rate planned for the system through the projected termination of the procurement;

"(ii) cost and schedule variances caused by departure from the annual baseline production if the annual budget submission varies from the baseline;

"(iii) the annual production capacity provided with the facilities and tooling programmed for procurement in the program or otherwise provided by Government funds;

"(iv) the annual production rates assumed in the cost-effectiveness analysis presented at the time the Secretary of Defense authorized the military service component to proceed with full-scale development of the program; and

"(v) the cost savings projected to be available if the program submitted in the annual budget submission was procured at the annual production rate identified at the time the Secretary of Defense authorized the military service component to proceed with full-scale development of the program.

"(4) Selected Acquisition Reports for the first quarter of a fiscal year shall be known as comprehensive annual Selected Acquisition Reports.".

(b)(1) The Secretary of Defense shall resubmit to Congress the Selected Acquisition Reports required by section 139a of title 10, United States Code, for the first quarter of fiscal year 1985. The reports as resubmitted shall be in the format and with the content required by paragraph (2) of section 139a(c) of such title, as added by subsection (a).

(2) Such reports shall be submitted not later than 30 days after the date of the enactment of this Act.

Mr. BINGAMAN. Mr. President, I have sent to the desk an amendment that is designed to improve the quality of information in one of the most important oversight documents provided to the Congress on Defense Department programs, the selected acquisition reports, or SAR's.

The SAR's are one of the most comprehensive sources of data on the costs and progress of major defense weapon systems. The SAR's provide for each system the current best estimate of the key performance, schedule and cost goals for the total program. That best estimate is compared to a baseline estimate for the program. That baseline estimate provides a yardstick to measure progress, and highlight problems.

The SAR's originated in the Laird Defense Department in the early 1970's. David Packard, then Deputy Secretary of Defense, and Robert Moot, then Defense Comptroller, were committed to having a tool which could highlight cost, schedule, and technical variances in major defense acquisition programs. With the help of McKinsey & Co. and the Harvard Business School, what we now call selected acquisition reports were developed. I might add that then Senator Richard Schweiker played a significant role in encouraging the development of these reports. As my House colleague, Representative JOHN SPRATT, who was then working for Mr. Moot, has told me, the SAR was an attempt to institutionalize honesty in the defense acquisition process and was and remains an essential management tool.

The selected acquisition reports have become one of the most important tools available to the Congress for defense oversight. The SAR's are the documents which provide the basis for annual review of cost growth in weapons programs. Three years ago the Congress adopted the Nunn-McCurdy amendment on cost growth. That amendment, now incorporated in section 139b of title 10 the United States Code, stipulates specific reporting criteria if SAR weapons systems exceed certain cost growth thresholds. The Nunn-McCurdy amendment has become a powerful tool for controlling costs in programs.

The primary purpose of the Nunn-McCurdy amendment is to force senior managers in the Defense Department to confront troubled programs. At least one program, the low-level-laser-guided bomb, this year was terminated by the Air Force because it breached the Nunn-McCurdy amendment cost threshold. Because the SAR's provide comprehensive and consistent data, they are crucial to the functioning of the Nunn-McCurdy amendment.

This year the Defense Department chose unilaterally to scale back the detail provided in the annual comprehensive SAR reports, which we received in April. Major portions of cost data were dropped. Much of the cost variance analysis was removed. Contractor costs were deleted. Footnotes explaining important changes were dropped. In short, Mr. President, DOD decided to cut back severely on the data provided in the SAR's.

The Defense Department has argued that this information is already provided in other ways to the Congress and that no one looks at the SAR's anyway. That is just not true. Our staffs review them in detail. More importantly, the congressional support agencies, notably the Congressional Budget Office and the General Accounting Office, rely on the SAR reports. The independent cost estimates from the Congressional Budget Office that we have all come to depend on, rely on the SAR reports, and particularly on the data that was dropped in the most recent SAR report.

But beyond this immediate impact, there is a more fundamental issue at stake. The Defense Department, by choosing to unilaterally limit the data provided in the SAR reports, is signaling to the Congress that it is prepared to abandon this most important management tool, a tool put in place, I would repeat, by recognized management experts such as David Packard and Robert Moot. I think we must in turn signal to DOD that we require that information and that it shall continue to be provided.

My amendment, which at Congressman JOHN SPRATT's initiative is incorporated in a parallel form in the fiscal year 1986 defense authorization bill which the House Armed Services Committee has reported, specifies that the information which had been provided routinely in the past shall be continued in future SAR reports. It also calls on DOD to resubmit the current SAR with that data restored within 30 days of the enactment of this act.

My amendment also adds two new elements of information to the SAR reports starting next year. First, the amendment requires DOD to provide operating and support costs for future SAR systems by providing a comprehensive life cycle cost estimate for the systems. Congressman SPRATT's amendment has a similar requirement.

Let me reassure my colleagues that my amendment is not asking DOD to do anything that it is not already doing. Every major acquisition program must have a life cycle cost analysis completed before the Secretary of Defense will authorize full scale engineering development of the system. My amendment merely requires that the SAR reports include that information in the future once the Secretary has authorized the SAR system to proceed with full-scale engineering development. The amendment also directs DOD to compare those life cycle costs with antecedent systems, if they exist. For example, the Air Force will have to compare the life cycle cost of the advanced technology fighter with the F-15 in future SAR reports on the ATF and the Navy will have to compare the life cycle cost of the new SSN-21 attack submarine with the SSN-688 attack submarine.

The primary reason this information should be included is to bring greater attention early in the acquisition process to the total costs of a new weapon system. At the early stages of program development too little attention is devoted to operating and support costs. The program manager is under all kinds of pressure, but he is primarily evaluated on meeting the performance and investment cost objectives identified for the system.

But there is too little attention to long-term ownership costs. It costs $18 million to buy an F-16 fighter. But that fighter costs $1.8 million per year to own and operate. Over a 20-year period, the ownership costs will be twice as great as the investment costs. We need to pay greater attention to those long-term ownership costs early in the acquisition process. My amendment will bring those costs to the attention of senior managers in DOD. If they know that those costs are going to be required in the SAR's for future systems once they pass the full-scale engineering development milestone, they will devote more attention to these critical questions during internal DOD review.

My amendment also requires DOD to provide production rate information in the SAR's. This part of my amendment goes beyond Congressman SPRATT's language in the House bill, but I have discussed it with him and he believes that it would be a useful addition. All of my colleagues have

heard that we have too many weapon systems in production at inefficient production rates. Senator NUNN has taken the lead in attempting to deal with this problem. Senator GOLDWATER, from my first days on the Armed Services Committee, has pointed out the inefficiencies in buying only three or four or six of a weapon system in a given year. Too much of our defense investment is going to pay for contractor overhead because we buy more systems than we can afford to buy at efficient production rates.

My amendment requires the Defense Department to identify for each SAR system the minimum economic production rate for the system and the desired production rate. DOD will have to indicate in the SAR how much more the system costs because we fail to procure it at the desired production rate. The cost impact of inefficient production will be included in the cost variance analysis, so we can see the cost of inefficiency more directly in procurement. The production rate data will be submitted starting with next year's SAR's.

I am convinced these changes will further improve the SAR reports. I ask my colleagues to support this amendment aimed at improving the management of the Department of Defense.

(Mr. DOMENICI assumed the chair.)

Mr. GOLDWATER. Mr. President, I believe the minority has cleared this.

Mr. LEVIN. Mr. President, not only have we cleared it, but we commend the Senator from New Mexico for a really creative and powerful improvement to the SAR statutes. We have been going over this and it is a very important addition to the current law. We commend him on it. We have cleared it.

Mr. GOLDWATER. Mr. President, I include myself in the remarks made by my friend from Michigan.

I have a great deal of admiration for the Senator from New Mexico for the way he attacks these problems and sticks with them.

Mr. President, we will accept this amendment.

The PRESIDING OFFICER. Is there further debate? If there be no further debate, the question is on agreeing to the amendment.

The amendment (No. 155) was agreed to.

Mr. GOLDWATER. I move to reconsider the vote by which the amendment was agreed to.

Mr. QUAYLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 154

Mr. GOLDWATER. Mr. President, I ask unanimous consent that we now return to consideration of the amendment offered by the distinguished Senator from Arkansas, to the amendment of the distinguished Senator from Indiana [Mr. QUAYLE].

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. QUAYLE. Mr. President, I am going to yield the floor so the Senator from Michigan can make a statement. Then, after he speaks, I intend to speak concerning some statements that have been made today about the committee amendment.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I thank my friend from Indiana. I am going to respond very briefly to a few of the points the Senator from Arkansas made comparing the two amendments. I am only going to focus on the revolving door aspects of it. Most of this amendment is other than that but the revolving door is the part I have had the most connection with.

I do not know if my friend from Arkansas is here. I hope he is within earshot in any event.

Mr. President, at least as far as the revolving door aspect of the committee amendment is concerned, I think the fairest characterization is that the committee amendment plays hardball and the perfecting amendment plays hardball, but they play it in two different ways. In two significant aspects, the committee amendment is stronger than the perfecting amendment. The perfecting amendment only covers DOD employees who have significant responsibilities with a particular Government contract. If you have less than significant responsibilities, if your job with the DOD relative to a contract is not major but is minor, you are off the hook under the Pryor amendment. You can have discussions about a job for yourself. If your responsibilities relative to a contract are not significant as defined by law, you can go ahead with that defense contractor and discuss employment for yourself after you leave the DOD. That is wrong. It is unethical, and we are going to stop it. The committee amendment does stop it.

In other words, there is a multitude of employees who have contract responsibility which do not rise to the level of major significance, but the ethical question is major and significant. The ethical question is whether or not we want DOD employees, regardless of the significance of their supervisory responsibilities—if they have any supervisory responsibilities, do we want those employees discussing jobs for themselves? The committee amendment says no. That is an important difference between this amendment and the Pryor amendment. In this respect, our amendment is significantly stronger than the Pryor amendment.

We also have a 10-year ban—not a 3-year ban but a 10-year ban—for employees who have not disqualified themselves who are pursuing discussions about employment at the same time that they are monitoring contracts with the contractors with whom they are discussing employment. In that respect also, the committee amendment is a lot stronger than the perfecting amendment which is being offered. Again, I am only addressing myself to the revolving door aspects of the particular perfecting amendment which we are debating now.

My friend from Indiana, I know, has been kind enough to yield to me and I am going to yield the floor so he can address the other aspects of the perfecting amendment vis-a-vis the committee amendment which we are supporting here this afternoon.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. QUAYLE. Mr. President, we have had an interesting debate this afternoon. I shall have to admit that I do not think it has been as intense as I had anticipated. I guess I had anticipated a number of people really coming over and hammering away at what the Armed Services Committee had done. That simply has not happened.

I think perhaps what the vote will show is that the Armed Services Committee has very diligently provided a thoughtful, detailed, substantive procurement reform and has done that on a bipartisan basis. I really believe that, in our heart of hearts, with the work that we put into this committee amendment and the work that we have done, our deliberation will in fact prove to be the contribution that the full Senate wants to accept.

Mr. President, what I am going to do now is outline some of the actual false statements that have been made this afternoon about the committee amendment. I am going to point out some of the real fallacies of the Pryor amendment. Then I shall conclude by again talking about the merits of the committee amendment that I hope the Senate will adopt. But I do believe we have to set the record straight, because there have been a number of erroneous statements that have been made.

It was said this afternoon, Mr. President, that this committee amendment does not require competition between two contractors. False. That is simply not the case, because the committee amendment in fact does recognize and pay attention to CICA, the Competition in Contracting Act. Perhaps the statement was in reference to dual sourcing. I do not know what the reference was, but a direct quote is, "doesn't require competition between two contractors." That is simply a false statement.

Another statement was made that the "should cost" analysis would be

done by defense contractors. That is absurd. Why would we hire a defense contractor to do a should cost analysis? As a matter of fact, we say that the Department of Defense ought to do the should cost analysis.

In the report language, we make very certain in fact if they want to contract out to the private sector that is doing something, they could do that, but not to a defense contractor. Again, that is a statement that is simply erroneous. It is wrong on its face.

The statement was made this afternoon, concerning the warranty provisions that was worked out last year, that on the first 10 percent to come off the production line, there is absolutely no control on the quality that comes off. In other words, nothing is under warranty. Again, erroneous. The first 10 percent applies to production warranty, but we have a warranty on workmanship and materials for all items, whether it is the first 10 percent or the last 10 percent. So again, Mr. President, that is an erroneous statement, a false statement concerning the committee amendment.

Another statement was made that $1 trillion will be spent before the effects of this committee amendment take place—$1 trillion. It sounds good. Maybe everybody up there in the gallery caught it, $1, trillion before the committee amendment takes effect. Again, Mr. President, an erroneous statement. The things that do not take effect immediately refer to the education and training of the program managers and the professional personnel. Dual-sourcing, revolving door, and other elements of the bill take effect immediately. But it sounds good to stand up and talk about $1 trillion is going to be spent before any of the committee reforms take place.

Well, Mr. President, it is just not true, absolutely not true.

Another statement was made that 96 percent of the funds are not competitive—96 percent of the funds are not competitive.

Now, that may have been true under the earlier definition of the amendment offered by the Senator from Arkansas on sealed bids but now that he has gone back to adopting the competition itinerary in CICA, that 96 percent does not apply. It is 40 percent. Four percent compared to 40 percent is a big difference. So to stand up and say 96 percent are not competitive just simply is not true, Mr. President—simply not true.

Then we have a letter that went out on May 17, 1985, signed by the Senator from Arkansas and the Senator from Iowa. It says, "There is an incentive for contractors to provide poor equipment since the replacement of that equipment can mean more business for the contractor."

Mr. President, that is really in the category of almost being outrageous, I mean the idea that somehow we are going to put in incentives for contractors to provide poor equipment it is wrong. Furthermore, I point out that we have a warranty provision which would be an incentive to the contractors to have good equipment, to provide the best quality, but yet this statement goes out.

I say there is also an incentive to provide good equipment and good quality; if we have a fixed-price incentive contract, that those would be incentives to the defense contractors to perform in a good way. To make reference that somehow we are going to provide incentives to have shoddy equipment, bad materials, bad contracting, Mr. President, hardly deserves an answer. I am a little bit surprised it is even put in the letter, but when these things are put in there and challenges what we are doing, the Senator from Indiana has to get up and speak to that point. I cannot idly sit back and let this type of nonsense continue.

So, Mr. President, those are some of the things that have been stated throughout the day, throughout the discussion of this amendment which are simply wrong. They are simply in error, and I want the RECORD to so show.

Now, then, what are some of the objections to the Pryor amendment as such?

Well, I would say that one of the objections—I think probably the most important objection, Mr. President—is that you have a 22-page amendment that is just thrust out here, saying this is better than what the Committee on Armed Services could do. And yet, when we narrow it down, you go back and correct the RECORD, at least we have defined the areas of concern, but there seems to be a disagreement on what ought to be the remedy. That is the main objection, running in here and doing it in this manner.

Another concern I have is that if you take any kind of a claim that is submitted but not granted, then there are criminal penalties. Well, this goes to the gray area, Mr. President, and I think to say that there could not be an arguable debate on what is public relations versus advertising or what would be employee morale versus entertainment avoids the question, because there can be a discussion of these issues. It has been going on for years. As the chairman of the Armed Services Committee has said so many times, this debate has been going on for years as to what is an allowable expense. It is going to continue. Now we take some provisions that itemize and say these things in another part of the bill should be presumed to be reimbursable, but what this says is that any claim that is not granted but submitted, automatically criminal sanctions apply.

Well, now, Mr. President, if we want this legislation to mean something and be enforceable, obviously we are not going to go overboard and overkill. I hardly think that is the right thing to do.

Then we have the requirement by the Pryor amendment that sole source contract has to be authorized by the Congress each and every year. Each and every year Congress is going to have to authorize it. Whether it is the F-15 or an aircraft carrier, you name it, any sole source is going to have to be authorized. This is simply going to be a costly and in my opinion a very unworkable situation.

We have already gone through the revolving door issue. I think the Senator from Michigan has pointed out, quite properly, that his provision in many respects is tougher on the so-called revolving-door employee than the substitute that is going to be offered. But I am concerned particularly on the revolving-door amendment as a substitute for the amendment that is offered that it would prohibit those who work on mini contracts from going to work for anybody in the defense industry.

Now, I can see maybe the idea that if you want to narrow it down and say this person should not go to work for that particular industry, you may have an arguable case. But when you put it in the context of a person who works on mini contracts being prohibited from all the defense industry, I can only say that we are really going to be in a world of hurt to try and recruit people into the Government and provide a service. You talk about incentives and disincentives. This would be one of the bigger disincentives to getting quality people.

Also, Mr. President, under the substitute amendment they drop a provision of our bill that I think is very important, and that provision deals with the training and education we would like to see of our program managers and the people who are in the major weapons development systems in the area of procurement. I read from the same letter dated May 17, and it says:

> Quayle addresses a very serious problem, but unfortunately sending managers to the sort of training now offered is no improvement. Some of the best people at DOD have no formal training, just good judgment. Therefore, Pryor-Grassley eliminates these two sections.

Well, now, Mr. President, somebody having an education in this background certainly will help their judgment. They might just be a better judge and be able to call the shots a little bit better if they have this kind of background.

But, no, the Pryor-Grassley amendment cuts that. It says, "Oh, we really don't care, I guess, about what their background is just as long as they have good judgment."

I wish I could really believe that. Maybe the Congress would get out of a lot of this micromanagement business. Just let them have good judgment. Let the President exercise his judgment. Let the Secretary of Defense exercise his judgment. Do not you try to get in there and specify what this ought to be. I mean to tell you, I am going to read that one back a lot of times—just let them use their own judgment. We are going to allow them to use their own judgment. We also want to give them some guidance in what we think education and training requirements should be.

When we look at the Hughes plant with respect to the problem they had in soldering, some of the people in quality control had no background in quality control.

Just leave it up to judgment? Some reform measure? You had better rename this substitute. I do not know what kind of reform that is, but it is not what the Senate wants to adopt. Just leave it up to their judgment, just good judgment. I am going to get a plaque on that.

Mr. GOLDWATER. Mr. President, will the Senator yield for a comment?

Mr. QUAYLE. I yield to the chairman, without losing my right to the floor.

Mr. GOLDWATER. This item in the other measure bothered me. As the Senator from Indiana knows, we had been advocating competition in the armed services for years.

The Navy, for example, had competition advocates who had become so successful that they rebuilt a battleship last year, and two other ships, without 1 cent of the taxpayers' money. Those men were schooled. They were taught how to go out and get competition.

The Army is now conducting a school where they are going to train young officers to go into this type of position. The Air Force is doing it. I think it is the most important thing that the Pentagon has ever engaged in.

As for common sense, I am a great believer in common, horse sense.

The Senator described the situation at the Hughes plant, where they did not even know how to solder, and they were making $1 million Phoenix rockets. Yet, the man who was supervising had common sense. If a guy cannot look at a solder joint and tell it is no good, he does not even have any sense, not only common sense.

I am glad that the Senator is stressing this very important point, one of the major differences between the amendments we are going to vote on, and I compliment him.

Mr. QUAYLE. I thank the chairman. He is absolutely right.

The very fact that there is no formal training, just let them go out—we will get them out of some tank or some plane or pick them out of somewhere and put them in there and they will exercise good judgment. What the Armed Services Committee worked so hard on was to try to get them into training and into having some education.

Furthermore, what we have tried to do, which the Pryor-Grassley amendment totally debunks, is to get a career path established, so that once these people get into the acquisition situation, they know that they can become a general or an admiral without being on the ship or in the plane or on the tanks.

In peacetime or wartime, we have to have a professional acquisition corps in the armed services. That is what the committee amendment does.

However, for some reason, we are just going to leave it up to judgment with the Pryor-Grassley amendment. I leave it up to the Senate to answer that question in a short time.

Finally, Mr. President, I should like to reiterate what the committee amendment does. It deals with competition, continuation of competition. We encourage dual sourcing where appropriate. Where you have dual sourcing, you have two contractors, whether it is engines, where you save billions of dollars, or something else. Dual sourcing can save money.

Another main component is cost. We are trying to figure out how much a particular weapons system should cost. We ought to have an understanding of that, and we can get that understanding and that appreciation within the Department of Defense and find out what the cost should be.

Third, we do encourage a more professional procurement personal staff. That is the section that the Pryor-Grassley amendment guts. That amendment takes it out and says it is no good; leave it up to judgment; do not worry about education; do not worry about training; do not worry about these people knowing anything about soldering or accounting.

As to quality assurance, it is a major component of this bill.

The Senator from Michigan has explained the revolving door eloquently and in detail. We also have the procurement technical assistance, the outreach programs. In this bill, we have the outreach programs, where we try to get more small businesses into the defense-industrial base. There is nothing wrong with that. The more you have in it, the more competition there is.

Finally, we changed the burden of proof in a court case, that the contractor has to show why the cost should be allowable, not the Government. The burden falls on him if the Government questions it. Many Members of the Senate are lawyers, and they know that, in a court of law, an important point is where the burden of proof rests.

Mr. President, I hope that the Pryor-Grassley amendment is rejected overwhelmingly. The committee, with strong bipartisan support, voted unanimously to report this procurement reform that is pending.

I dare say that it may be good politics to stand up and say all these things and to do all these things in the area of procurement, but some of us take this matter very seriously.

No matter what happens with this amendment, I look forward to working with the authors of this amendment. I hope they offer some testimony before our subcommittee, because this is not the first time we are going to be dealing with this issue, nor is it the last time. This issue will be around. We will have the dialog, the testimony, and the witnesses, and we will do this at a committee level and a subcommittee level, where we can get bipartisan support and understanding.

This is a 22-page amendment, highly technical. I have outlined some of the deficiencies I find in the amendment. I have corrected many of the misstatements that have been made.

I hope the Senate will support the Armed Services Committee, which has done a lot of work on a very important piece of legislation that will be before the Senate very soon for a vote.

Mr. PRYOR. Mr. President, the Senator from Indiana and the Senator from Arkansas started off this debate on this issue, I thought, on a very high level. I complimented the Senator from Indiana. I complimented the members of the procurement subcommittee of the Armed Services Committee. I complimented the chairman and the ranking minority member of the Armed Services Committee. I thanked them for recognizing the issues we are looking at today in this debate on the floor of the Senate.

Never once, by implication—and I hope not on the other side by inference—did the Senator from Arkansas ever suggest that there was one iota of misrepresentation or one reason to be wrongly motivated in bringing before the Senate these issues of defense procurement.

Truly, I think the Senator from Indiana, the Senator from Arkansas, and all other parties in the Senate are equally concerned and equally disturbed and equally frustrated about what is going on in this country and about the relationship of the Department of Defense to the defense contracting establishment.

Let me pass that by for the moment and say once again that I compliment the Senator from Indiana for his diligence, and I compliment the staff of the subcommittee and all those involved on that side in bringing this effort to the floor this afternoon.

Let me respond by saying, also, I do not know exactly what the Senator's

accusation was, or what the Senator from Indiana called the statements I made about what was in or not in his proposal.

Let us put all that beside us. Let us get to the point of what this issue is truly about.

This issue is about which one of these proposals is harder or softer. It is about which will bring us the best weapons system at the best price for the protection of our own national security and for the protection of our own taxpayers of this country.

I said earlier when I opened up the debate this morning—it seems like a long time ago—I stated then and I restate now that it seems that we spend too such time in this Chamber talking about how we are going to control our own Defense Department and the defense contractors of America and spend too little time, it seems, on trying to figure out what the Russians are going to be doing or what they are building or what they are saying. I am worried about that, Mr. President, because once again, this whole area has deflected our attention away from the concerns of the protection of our national security.

Mr. President, I am going to make three or four points here, and once again I am not questioning the motives of the Senator from Indiana, but I wish very much for the Senator from Indiana to rise on the floor of the Senate and show me one area of this particular bill, or his particular amendment, which is going to encourage and provide the incentive for more competition in defense contracting.

Mr. QUAYLE. Mr. President, will the Senator yield?

Mr. PRYOR. I am glad to yield.

Mr. QUAYLE. The very first provision where we say the dual sourcing ought to be part of a norm rather than exception will encourage competition.

Mr. PRYOR. How much effect have the words "ought to be"? What effect does that have on the Department of Defense and the defense contracting establishment—"ought to be"?

Mr. QUAYLE. I guess I will restate it.

I presume the Senator understands the dual sourcing. Once a contract is let you try to keep two contractors in the actual production of it. And if we encourage dual sourcing and we have two contractors out, the most classic example is the re-engine contract, where we have GE and Pratt & Whitney involved in that. We have competition and also savings, and we think this ought to be much more of the rule rather than exception.

Mr. PRYOR. I respectfully submit that the Senator's amendment says, "ought to be," and even let us just make the presumption, if I might say to the Senator from Indiana, even if the Senator said "shall be dual source," "shall" being a mandatory work, then he comes right back and says a few sentences later that if the Secretary of Defense does not want to do this, then all the Secretary of Defense has to do is to sign a waiver and say it is in the interest of national security. The very distinguished Senator from Indiana refers often and fondly to CICA. The Competition in Contracting Act, as the Senator knows, closed that loophole on "national security interest," and I respectfully submit that the committee language does nothing but open that loophole up once again.

Mr. QUAYLE. Mr. President, will the Senator yield?

Mr. PRYOR. I am glad to yield.

Mr. QUAYLE. Let me reiterate on page 4 of our bill the acquisition plan shall provide for the use of competitive procedures when required, and it does use the word "shall acquire," and furthermore on the waiver provision there are always going to be waivers. Perhaps the Senator thinks that our waiver situation ought to be tightened up. I can tell the Senator it does not take 22 pages of an amendment to tighten up that provision if that is what he is concerned about.

Mr. PRYOR. I thank the Senator for yielding.

I also wish to know if there is an incentive in his amendment to force competitive dual source contracting. What incentive do we find in the committee amendment to force competitive dual source contracting.

Mr. QUAYLE. The legislation requires dual sourcing. Let me read it again. "The acquisition plan shall provide for the use of competitive procedures," shall referring back to dual sourcing. This is not a kind of incentive. It is a requirement we are putting in there, much stronger than any kind of incentive that we could write.

Mr. PRYOR. The Senator also took great issue about the language that we have requiring Congress to approve sole-source contracting in major acquisition programs, and I guess there are somewhere around 80 of these programs each year.

I wish to ask the Senator from Indiana what is wrong, when a sole source contract has been granted with no competition that is going to spend billions and billions of dollars on a particular system when there is no competition whatsoever, what is wrong with bringing that issue to Congress? What is so wrong about that?

Mr. QUAYLE. Mr. President, will the Senator yield?

Mr. PRYOR. I am glad to yield.

Mr. QUAYLE. In some cases, some situations, there is only one contractor who can manufacture the system. For example, the F-15. They do not have two contractors making the F-15. We do not have two contractors making the F-16. We do not have two contractors making the Trident submarine. Once we sign off on that, I do not know why we have to do it year in and year out. It becomes very burdensome. It becomes a lot of paperwork, and we can allow their own good judgment on that particular point if in fact they are going to use sole source.

Mr. PRYOR. I wish to talk about good judgment in a moment, but if the Senator says it is going to take a lot of paperwork, I would just point out that we have over 100,000 people, I think who purchase for the Pentagon. If we talk about good judgment and if we talk about paperwork and if we talk about costs to come up here to the Hill, I say this sincerely to the Senator from Indiana, I think that would be time and money well spent. I think we then put Congress once and for all back in the oversight function that somehow or other we have delegated to the Defense Department, and I think it is a proper function of Congress to look at these huge expenditures, especially when there is no competition whatsoever. I think that is the proper approach.

Mr. QUAYLE. Mr. President, will the Senator yield?

Mr. PRYOR. I am glad to yield.

Mr. QUAYLE. I would think that we do in fact have oversight, and I think we do have authorization of these sole-source contracts when in fact we approve a defense budget. If the Senator wants to put in an amendment that says that we ought to dual source the F-15 or Trident submarine, I suggest that the Senator do that and then we can have a debate on that.

I do not think the Senator will do that. If he wants to we can. We are going to have oversight this whole week on the defense budget and every single item in that. Therefore, we can have a discussion on each item, whatever item the Senator wants to get into.

Mr. PRYOR. I say to my friend from Indiana, yes, we are going to have oversight. We are going to have oversight by telling the Department of Defense how much money can be authorized for a particular program and the Appropriations Committee is going to come back and appropriate those dollars and then, I say to my friend, Congress is out of it. We are out of it until it is too late, until after the Congress finally wakes up some morning and we find, oh my goodness, what has happened to this contract? Why did this tank cost so much more than we were told it was going to cost? Why did this airplane cost so much more? Why is it that today we are now buying gas masks at $6,500 apiece or whatever?

I say to my friend from Indiana, sole-source contracting, big overruns, these have got to be monitored much more closely. I say to my friend very respectfully that we are finding out

too late about what is going wrong. We have got to start finding out before the fact rather than after the fact and after it is too late.

The Senator from Indiana has had some great fun talking about his section on quality assurance and our section deleting the program managers school that these program managers should go to. I would be glad to concede this at this particular point. We could do it by division or any way you want to on that particular section of the Senator's legislation. I would be very happy to concede that amendment and say, "You know, maybe this is not going to be too bad."

But it is things like what happened to Col. Robert Dilger that make me wonder about whether a school is the right to way to go. Col. Robert Dilger was the program manager for the GAU-8 ammunition program. The Senator from Indiana probably knows that the Air Force was prepared to spend some $85 per round on those shells. Because of competitive dual sourcing, however, we are now purchasing that same round of ammunition for $13.

Well, this was all the suggestion of Col. Robert Dilger. He got this round of ammunition down from $85 to $13—and he had no training. Do you know what he had? He had good judgment. And do you know what happened to him? The Air Force rewarded Colonel Dilger. How did they reward him? By promotion? By an award? By a medal? No, they hounded Colonel Dilger out of the Air Force.

This is what is happening today to people like this who want to try to bring some sense into what we are doing.

Now, Mr. President, once again I would be glad to concede and I would be willing to try, I would certainly applaud the Senator if these so-called schools that he has in mind could teach these people how to contract.

(Mr. DANFORTH assumed the chair.)

Mr. QUAYLE. Will the Senator yield?

Mr. PRYOR. I am glad to yield.

Mr. QUAYLE. Actually, the schools are important, but the most important thing in there that we require is the experience, the 8 years experience. Because what has happened in the procurement area, to get people into the program management so they can see their way to the top, they are simply taking people out of operations that have very little procurement background and putting them into procurement.

We had a debate last year, I believe it was Senator NUNN, Senator BYRD, and Senator LEVIN and others, where we talked about putting in a 4-year requirement for a program manager because we wanted some sense of stability of these people to get into the program management and to get into the procurement.

So beyond the schools, which I personally think are an important requisite, the 8-year experience—and that is one of the things the Department of Defense, quite frankly, fought very hard and I think that is one of the things that I know I am interested in and I think you would be interested in, too, to try to establish that experience factor. Because if we can get people that have more of a background and more experience in this, then I think they are going to be able to go out there and have more parity, have a broader background and better understanding of how these things work.

So it is not just the schools, it is the very experience factor that is a very important factor that has been deleted.

Mr. PRYOR. Mr. President, I would like to say this, and I hope it does not sound facetious. I think one of the problems now in our whole defense procurement system is that there is too much experience already. They have learned how to find every loophole. They have learned how to abuse the system terribly. And I do not know who is going to be teaching all of our people how to write contracts. I hope it will not be General Dynamics or Hughes Aircraft. I am not implying that they would. I do not know who is teaching at these schools.

But whatever the situation is right now, I think we all concede that it is a mess. I am certainly willing to concede that if the Senator from Indiana and the Armed Services Committee thinks this is a good idea, I am willing to try it. But right now I am inclined to believe we have too much experience. What I think we need is some toughness in requiring competition. Because in requiring competition and requiring contractors to compete to a dual source nature, we would achieve the greatest reform ever.

Mr. President, I do not have a lot more to say about this whole proposal. It is extremely complex, as the Senator from Indiana knows. As reasonable men and women do, I think we disagree on how we can achieve the result that we want. I want the Senator to be assured, notwithstanding what he has said, that I in no way attempted to mislead one individual in this Chamber.

I would like to conclude by saying that it has been a pleasure working with the chairman of the Armed Services Committee and others in allocating this amount of time this afternoon. Frankly, I wish we could debate this section for a whole week because I think it needs that much time. I think it needs that much attention.

I just think that we have got to find a positive and constructive way to make the necessary reforms. We just think that our approach is stronger. It may be that yours is stronger, but we think that ours is stronger. I hope that you will allow us the opportunity, even though neither of the principal authors is on the Armed Services Committee, to come forward and make some sense of a chaotic and, in my opinion, a very, very dangerous situation.

So we think ours is the way to play hardball. We think yours is the way to play softball. We are going to give the folks an opportunity in this Chamber to cast their vote and see which is the best route. That is how the system works. I thank the distinguished Senator from Indiana.

Mr. HART. Will the Senator from Arkansas yield?

Mr. PRYOR. I am glad to yield to the Senator from Colorado.

Mr. HART. Let me just say for one moment that the Senator from Colorado is on the Armed Services Committee. The amendment offered by the Senator from Arkansas and his other cosponsors, in the judgment of this Senator, is in fact real procurement reform. Those of us who have been trying to bring reforms to the military institutions for a number of years, many of us very strongly support this amendment. We feel that, unlike its counterpart, it does not just offer a slim hope for promise of reform, but it is a fundamental reform in the procurement system. I hope those who genuinely feel that we have go to do business differently in the largest bureaucracy of the Federal Government, indeed perhaps one of the largest in the world, will support this amendment.

Mr. President, I strongly support the amendment offered by the Senator from Iowa and the Senator from Arkansas and supported by the congressional military reform caucus.

The issue before the Senate is a simple one: Do we want the reality of reform of defense contracting or merely the appearance of reform? The Procurement Subcommittee of the Senate Armed Services Committee has offered a committee amendment to this bill that, while it is well intentioned and does a good job of identifying procurement problems, has few teeth. The Pentagon has already said it can live with the committee amendment, which is to say, the amendment will not bring any real changes to business as usual.

In contrast, the amendment supported by the military reform caucus would bring real change.

It would replace the defense industry's business-as-usual procurement process with real free enterprise by demanding that most contracts be let on a competitive basis. And this competition would not be of the kind most common now, where a company can buy in to a program with an unrealisti-

cally low bid then raise the price once it has obtained the contract. Instead, two contractors would produce the product, with annual rebidding. The loser would get just enough of the contract to keep him in business until the next year's bidding. Time would bring added pressure to lower prices, not to raise them, as is the case today.

This is just the way the rest of our free enterprise economy works. It is the reason American consumers get a large variety of good products at reasonable prices. In contrast, the current Pentagon contracting system works like the economy of the Soviet Union. The Wall Street Journal recently referred to the current system as "The Pentagon's Gosplan." Thanks to our capitalistic economy, we do not have to buy weapons the way the Russians do. But that is exactly how we buy them today.

The Senator from Iowa has referred in the past to the need to get welfare out of the Pentagon procurement system. I would add, we need to put Adam Smith in the Pentagon. The amendment supported by the military reform caucus, unlike the proposed committee amendment, would do exactly that.

The caucus' amendment would also require that cumbersome, time-consuming procedures be followed to award a contract on a sole-source basis. I think this is a creative and useful approach. If we do not want sole-sourcing, which is to say monopoly, then we should make it difficult, obvious, and somewhat embarrassing. We should make the Defense Department shout from the housetops, "We are awarding this contract without the money-saving benefits of competition." We should make those who propose sole-sourcing parade before the Congress and the public wearing a sandwich sign reading, "We believe in monopoly. We like the way the Soviet economy works." That is, in effect, what this section of the amendment does.

The amendment also takes tough action on shoddy workmanship in defense contracts. Here we are not just dealing with money, but with lives. Weapons with manufacturing defects fail in combat, and when they fail, our soldiers die.

The committee amendment proposes nothing more than a 4 week training course for quality control personnel. In contrast, the caucus amendment requires the manufacturer to bear the full financial liability for quality control problems. He must pay all costs, including installation and labor costs, involved in fixing the defective weapon he supplied or replacing it. The defense contractors will just laugh off a 4 week training course. But if they know they have to pick up the full costs of any defects, they will have a strong incentive to get serious about quality control. We owe our soldiers that kind of seriousness.

Another major reason why we get so many poorly designed, ineffective and overpriced weapons is the revolving door. In the absence of both design and production competition, getting a contract can depend on making friends in the Pentagon. There is no better way for a contractor to make useful friends than by hiring those Pentagon officials, military or civilian, who oversaw his own program. As one Pentagon official said:

> Everyone here knows that if you play the game and keep the money flowing to the contractor, when you retire, a nice man will come around and offer you a well-paying job. If you make waves, if you raise objections to what the contractor is doing, when you retire there is no nice man.

The committee amendment merely requires a report when a DOD employee goes to work for the contractor he was supposed to be overseeing. The only penalties occur if the employee does not make a report. In contrast, the Grassley-Pryor amendment prohibits a DOD official from taking a job from any contractor he oversaw for 3 years after he leaves Government service.

Mr. President, on all three points—competition, quality control, and the revolving door—the committee amendment offers only an appearance of reform. The caucus' amendment offers real reform. I believe our constituents are tired of Government by appearance. They want reality, substance, not nice words that really change nothing.

This amendment offers a litmus test the public can use to see who is for real change and who wants to preserve business as usual in the Pentagon. That is what the committee amendment does—preserves business as usual. The Pentagon has said so itself, when it said it could live with the amendment. Anything the Pentagon can live with will not bring real reform. And without real reform, we will stay on the treadmill of declining numbers of weapons and increasing costs.

Substances or appearance—that is the issue before the Senate. I urge my colleagues to look at this amendment in that light.

Mr. PRYOR. I thank the Senator from Colorado very much.

Mr. GOLDWATER. Will the Senator from Indiana yield?

Mr. QUAYLE. I yield to the distinguished chairman of the committee.

Mr. GOLDWATER. I just wanted to respond very briefly to a comment that my friend from Arkansas made about having too much experience. You can never get enough experience.

Let me cite you the B-1 bomber program which started out at around $220 million and, because of proper supervision by one trained man, it is now down to about $175 million. The Apache helicopter started at $16.5 million and is down to under $10 million today only because of the proper supervision, watching by the Air Force.

Now there has been one source of overexpending in this that we have not talked about today, and that is the Congress. And I am going to give you one instance. I think for about 15 years I have been fighting for competition on a small carrier aircraft. In fact, Senator METZENBAUM and I took them to court 1 year and got beat. But over $400 million has been spent by the actions of the House committee without ever having one bit of competition.

Now, I would like to find something in this bill or somebody's bill that would tell the committees of Congress that they have to have competition, but we have never been able to do anything about it. And yet when it comes over here, we point out the mistakes that are being made in approving it. It has always been approved.

I am going to try it once again this year. I do not know what is going to happen but we are going to try.

I thank my friend from Indiana for yielding.

Mr. QUAYLE. Mr. President, just in brief conclusion, I also want to add my personal congratulations to the Senator from Arkansas for the way that he has conducted himself on this amendment, and the way that he conducts himself as a Senator. I do believe quite strongly that this is not a very good way to legislate. We are not trying to exclude anybody from offering amendments even though they are not on the Armed Services Committee, but we have had this discussion privately as well as publicly. We talked about this issue. This is not going to be the only time this issue is going to be discussed. I look forward to working with the Senator from Arkansas on this issue, and other issues in the future.

I in no way wanted to infer any kind of accusatory stigma to the Senator from Arkansas for any statements that he made that I in fact perceived as being misleading. I know the Senator personally has always dealt forthrightly and honestly, but I did want to take exception with some statements that were not made just by him but others that I made note of over the course of 4 or 5 hours of debate that I felt were simply erroneous and wanted to correct the RECORD on that—no implication whatsoever, and it should not be inferred as such. I am sure the Senator from Arkansas knows the Senator from Indiana would not infer that. But to clear up any kind of confusion I want to make sure the RECORD is loud and clear because I think this has been a little bit spirited in the last hour. It was not terribly spirited in the first 3 or 4 hours. But it is, as the Senator from Arkansas has pointed

out, an exceedingly complicated issue. It is one that takes a lot of time. I know of the Senator's personal involvement, and he has worked hard on this, but I can only tell you that each one of these issues the Senator has talked about we have gone over with hours and hours of testimony. Knowing of the Senator's interest, I look forward to working with him at this subcommittee level as we begin pursuing other measures in the procurement effort notwithstanding the outcome which I hope will be an overwhelming rejection of the Pryor amendment and acceptance of the committee amendment when the Senate finally gets down to voting on this which hopefully will be in a very short period of time.

Mr. GOLDWATER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

STEALTH TECHNOLOGY PROGRAMS

Mr. BYRD. Mr. President, I shall shortly offer an amendment to protect two of our most sensitive and critical national security programs: The advanced technology bomber, the so-called Stealth bomber; and the advanced cruise missile, the Stealth cruise missile. These programs represent a technological edge over Soviet defenses and countermeasures; they not only keep the air-breathing leg of our strategic triad viable, but force the Soviets to expend considerable resources to attempt to counter them. I believe it is more important to keep the Soviets busy attempting to counter the forces we would have at our disposal in the event of a confrontation, than to passively permit them to pour their resources into new generations of offensive systems in order to intimidate the West.

As in the past, Mr. President, the extremely sensitive and highly classified nature of these programs prohibits a discussion of their details. Nevertheless, it is my understanding that the situation regarding vigorous support for their development this year is somewhat analogous to the situation which existed when we considered the fiscal year 1985 defense authorization measure last year. That is, as I understand it, the Senate Armed Services Committee has fully funded a program which is basically on track and on budget. Unfortunately, again, the other body may not be fully funding this program. The purpose of the amendment which I shall offer, therefore, is to establish a crystal clear Senate record on its position regarding the progress of and Senate support for these programs at the fullest appropriate funding level.

It is my intention to provide the Senate conferees, in their meeting with the House conferees, with a clear record so as to impress upon the other body the importance which the Senate attaches to these programs.

The first part of my amendment indicates that the Senate regards the Stealth bomber and cruise missile programs as a critical national security asset and that they be developed as rapidly as feasible in order to deploy them as soon as is possible in accord with sound management and planning. It states that it is the sense of the Senate that these technologies should be funded at the levels authorized in the pending measure, and that all funds appropriated for these programs be fully utilized.

The second part of the amendment is designed to protect the money which is appropriated, pursuant to this authorization bill, from being reprogrammed by the Department of Defense or the Air Force into any other program or for any other purpose.

The question of how the Pentagon manages the money which is appropriated by the Congress is very much an open one. There has been a great deal of waste, as has been obvious to all of us. Furthermore, there was a last-minute discovery of over $4 billion spread around the Pentagon budget which was offered up to the Armed Services Committee last week in an effort to forestall the elimination of any weapons procurement resulting from the decision to fund DOD at a zero real growth level for 1986. That is a lot of discovery. The overall question of Pentagon management practices is an open one. The manipulations apparently made in the budget accounts do not imbue me with a high level of confidence and trust in that management. This part of my amendment intends to head off any attempt to manipulate the Stealth budget for purposes not directly related to those programs.

The mix of technologies associated with the Stealth programs, integrated into very advanced weapons systems, will enhance America's posture of credible deterrence against Soviet adventurism.

I commend the committee for protecting these programs at a time when budget constraints require belt-tightening across the board.

There have been some questions in the past concerning the attitude of the Air Force regarding the Stealth bomber, and that there may have been some in the administration who intended to divert funding from Stealth in order to extend the production line of the B-1 bomber beyond the 100 aircraft which are planned for that program. I note, Mr. President, that the 48 B-1 aircraft which are procured in this committee bill constitute the last of that fleet of 100. I do not expect any request to extend the B-1 production line beyond the procurement authorized in this legislation, and I would oppose such a request.

The third part of my amendment, Mr. President, does go beyond the language which the Senate adopted last year, and does put us on record opposing any plan for an extension of the B-1 line beyond the 100 operation aircraft now planned. I do not know of any Senator who has proposed that we go beyond that number. I do not mean to imply that. The provision capping the B-1 at 100 aircraft is simply a message, in terms as clear as I can make them, to Pentagon and Air Force planners that we will not make funds available for any future bomber procurement except the Stealth bomber.

I have had my questions about the B-1. There have been indications that it will be unable to penetrate Soviet defense much beyond the early 1990's. The Stealth can perform that mission, and we need to insure the assured penetration of Soviet defenses as a factor in our strategic capability is maintained. Given this situation, it is not logical to me that we should allow room for doubt that any bombers procured beyond the 100 B-1's which will be authorized after this measure is signed into law will be Stealth bombers and not B-1 bombers.

Mr. President, I ask unanimous consent that I may submit the amendment; that the pending amendment be set aside for the consideration of this amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 156

(Purpose: To prohibit use of funds appropriated for the advanced technology bomber and the advanced cruise missile programs from being used for any other purpose and to limit procurement of the B-13 bomber)

Mr. BYRD. Mr. President, I send the amendment to the desk and ask that it be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD] proposes an amendment numbered 156.

Mr. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title IX of division A of the bill, insert the following new section:

PROHIBITION AGAINST USING FUNDS APPROPRIATED FOR THE ADVANCED TECHNOLOGY BOMBER AND THE ADVANCED CRUISE MISSILE PROGRAMS FOR ANY OTHER PURPOSE

SEC. 917. (a) It is the sense of Congress that—

(1) the capabilities inherent in the technologies associated with the Advanced Technology Bomber program and the Advanced Cruise Missile program are a critical national security asset for maintaining an adequate and credible deterrent posture;

(2) Such technologies and programs should be developed as rapidly as feasible in order to produce and deploy advanced systems which will complicate the military planning of the Soviet Union and as a consequence enhance the deterrent posture of the United States;

(3) such technologies and programs should be funded at the levels authorized in this Act; and

(4) all the funds appropriated for such programs should be fully used for such programs.

(b) None of the funds appropriated pursuant to an authorization of appropriations in this Act to carry out the Advanced Technology Bomber program or the Advanced Cruise Missile program may be used for any other purpose.

(c) It is the sense of the Congress that, consistent with the stated policy of the Department of Defense, the B-1B bomber aircraft procurement program should be terminated after acquisition under such program of 100 aircraft.

Mr. BYRD. Mr. President, I have discussed this amendment with the very distinguished chairman of the Armed Services Committee, Mr. GOLDWATER, and the equally very distinguished ranking member, Mr. NUNN. I hope that they will consider it favorably.

Mr. NUNN. Mr. President, I might say to the Senator from West Virginia, I think this is a very important amendment. We are going to face a very tough conference. The Senator's leadership in this area over the last 3 years has, time after time, helped us immensely in conference in terms of preserving these very, very important programs. So I not only will be, from this side's point of view, glad to accept the amendment, but I will strongly recommend it to my colleagues.

Mr. GOLDWATER. Mr. President, the majority will be very happy to accept this amendment. I thank the distinguished minority leader for bringing this to our attention. It has come up every year that I can remember, and I can say that never in any consideration of the Senate Armed Services Committee have we even discussed manufacturing more than 100 B-1's, and we have never had any question about the ATB. If it ever comes up, I know that Senator NUNN will join me in being just as vociferous in our objection as is the minority leader. So we will accept the amendment.

Mr. BYRD. Mr. President, I thank the chairman and the ranking manager. Is it felt that there is any need for a rollcall vote in order to demonstrate to the House the strength of the Senate's position? I do not imply that we need one.

Mr. NUNN. I will defer to the judgment of the Senator from West Virginia. I think the chairman and I will stand together on this amendment in conference either way. I understand we are going to begin rollcall votes at 5:30.

Is my understanding correct that the debate is complete and we are ready to vote on two amendments?

Mr. GOLDWATER. Yes. We are ready to vote on the Pryor amendment——

Mr. CHAFEE. Mr. President, I have a couple questions on the Pryor amendment, if I might.

Mr. GOLDWATER. I say we are ready, but we will certainly allow the Senator to ask questions.

I do not think a rollcall vote will be needed because we have been very, very strong on this. I think the House understands our position without question.

Mr. BYRD. Mr. President, I am reminded of Fitzjames in the "Lady of the Lake" who said, when he stood alone before the forces that rose up before him:

Come one, come all! This rock shall fly
From its firm base as soon as I.

And so with the distinguished chairman and the distinguished ranking member assuring the Senate that they will stand together, I have no concern as to the House's being misled as to the strength of the Senate on this matter, so a voice vote is in line.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from West Virginia.

So the amendment (No. 156) was agreed to.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the amendment was adopted.

Mr. GOLDWATER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, I again thank Mr. GOLDWATER and Mr. NUNN.

AMENDMENT NO. 154

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I have a question for the sponsor of the Pryor amendment. I listened to the description of it, and I am not sure whether I understood it correctly.

Mr. President, in the description of his amendment, the distinguished Senator from Arkansas was talking about sole-source procurement. I heard him say something about coming to the Congress. I must confess I cannot find in this 24-page amendment exactly where that is. Will the Senator be good enough to tell me about the part that deals with going to Congress?

Mr. PRYOR. Mr. President, I will be very happy to answer my friend from Rhode Island. Basically, in a sole-source situation of major procurement systems—over $1 billion in production or $200 million in development funding—if there was no competition, if there was no competitive bid, then the Congress, in the defense authorization bill, would have to approve that particular sole-source contract. If there was no competition. In other words, the Congress would find itself back in the oversight area in those sole-source areas where there was no competition.

Mr. CHAFEE. Mr. President, I get very nervous about Congress getting into this business. It seems to me that, yes, we have had problems in the Defense Department, but I will never forget that when I was over there, the Chief of Naval Operations once said to me, "When things go wrong, you don't always change the rules and regulations. Sometimes you ought to change the people."

I think there is a great danger in having every sole-source contract, whether it is for aircraft or ship procurement or whatever, that is worked out in very complicated fashion and indeed quite frequently, as the Senator knows, there is only one provider—and that is true, for example, in the Trident submarine and certain aircraft—come up for review by the Congress. And, indeed, it is approval by the Congress? If that is so, I think we are opening our way to all kinds of shenanigans and we get all kinds of political pressures: "Oh, no, the decisions are going to be made not by those who have the authority and who we have to trust. And if they are not good, let's fire them."

But I think we are geting into heavy weather if we are sending it up here in this political maelstrom to consider who is going to get what contract. I urge my distinguished colleague to drop that particular vision or to modify it in some sense just to keep it out of this body.

Mr. PRYOR. Mr. President, first let me say to my distinguished colleague from Rhode Island—and as a former Secretary of the Navy, he is very knowledgeable—we are not trying to create any additional avenues for shenanigans. What we are trying to do, I say to my friend, is to close the door to the shenanigans that are happening—shenanigans that are being perpetrated on the taxpayers of this country, shenanigans that are being perpetrated on the Department of Defense, which result in our not getting what we are paying for.

Second, I would say to my friend from Rhode Island that under this proposal it will not be the Congress making a decision as to whether Hughes Aircraft or McDonnell Douglas or ABC contracting firm gets the

contract. That is not the issue. But if there is a contract with no competition, then the Congress must approve or disapprove that contract. It is that simple.

Third, I say to my friend from Rhode Island, in talking about the Trident submarine, the Trident submarine is on the eve of finally, at long last, having a competitive dual-source bid, as I understand it. I think we have to have a lot more.

Mr. CHAFEE. Mr. President, certain things are ascribed with virtue automatically—for instance, like motherhood, competitive procurement in weapons systems is looked on as good.

Well, that is not always necessarily so. You have two bidders two providers. Neither have enough work to carry the massive overhead that is involved.

As I read this provision:

3. A sole source prime contract may not be awarded or renewed for any major defense acquisition program—

I assume that is the billion-dollar program—

unless the Congress has specifically authorized such specific contracts to be awarded in an annual Department of Defense Authorization Act or other appropriate legislation enacted into law.

Let us say we appropriate x millon dollars for the procurement of an aircraft, and the Air Force goes through a fly-off and they decide that McDonnell Douglas is going to get it.

What happens when that comes up here? The California delegation decides that Northrup should get a piece of that action. Somebody says that General Dynamics ought to get a piece of that action.

By the way, where are the engines going to come from—from General Electric or United Techology?

I think this is opening the way to a lot of political interference that is not good for the country. I hope there can be some modification of that. I find it very disturbing.

Mr. BUMPERS. Mr. President, will the Senator from Rhode Island yield?

Mr. CHAFEE. Mr. President, may we have some order?

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Rhode Island.

Mr. CHAFEE. The Senator from Arkansas had a question.

Mr. BUMPERS. I just wanted to make an observation.

The Senator from Rhode Island and I team up quite often on these issues and others, and I certainly am not in a position to disagree with his nervousness. The Senator started off by saying that getting Congress involved in this makes him nervous. It makes me nervous, too, when every day I read of some kind of new procurement scandal at the Pentagon.

There is probably no perfect way to procure weapons, to guarantee the taxpayers that we are going to have what we all want—namely, a lean, mean, efficient, nonwasteful Defense Department. But ever since I have been in the Senate, a little over 10 years, I do not believe we have ever considered a defense authorization bill in which this issue was not presented. Yet, after 10 years of endless, tedious, laborious debate on it—and it certainly is a complicated issue—we find that, so far as procurement is concerned, the waste is much more dramatic now than it has been since anybody in this body first came to the Senate.

I am not saying that Senator PRYOR's amendment is perfect. It is a little complicated, and perhaps if he were offering it to something besides a committee amendment, it would have more support. All I am saying is that it is like a fellow who used to work for me would say: "Let's do something, even if it's not perfect."

Nothing can be much worse than the erosion of confidence in the procurement of weapons in this country.

I told the story a while back that they accused the Democrats of never having a new idea. I had a great idea the other day. I decided to pay my income tax by just sending the Defense Department several hammers. It would not hurt the country, considering what they pay for hammers, and even with that, I would be entitled to a refund of three toilet seats. [Laughter.]

So all the Senator from Arkansas is doing is trying to point out that there is something egregiously wrong with the procurement policy of the Defense Department. I hate for us to have to deal with this, because it gives the people the impression that perhaps we are antipatriotic and do not appreciate our people in uniform. Nothing could be further from the truth.

Obviously, something will have to be done that, so far, the Defense Department has been unwilling to do if we are going to get our procurement policy back on track.

I am sure the Senator from Rhode Island has read a five-article series in the New York Times, one of which says that we procure our weapons in a way that absolutely guarantees that we pay the highest price for them, and that is the cost plus fixed fee procurement.

If you tell me that I can have a contract for my cost plus 10 percent, I promise you that I will buy every $500 hammer I can lay my hands on. I will buy every $7,400 coffee pot I can lay my hands on, because at 10 percent I am going to make $740 profit.

All I am saying is that something needs to be done.

I highly commend the New York Times article to the Senator from Rhode Island, who, as a former Secretary of the Navy, obviously has knowledge in this matter, and I appreciate his wisdom. But I am going to vote for this amendment, to show that I am tired of reading about the scandals, tired of having to go home and apologize, for the first time since I have been in the Senate, about scandalous waste in the Defense Department.

I intend to support this amendment, and I recommend it to everybody else. Take it to the House and see if you can work something out that will result in efficiency in the procurement of weapons for this country.

Mr. CHAFEE. I thought that was in the form of a question.

I appreciate the thoughts of my distinguished colleague. As he said, he and I have worked together, and we will work on other issues. We have battled here against battleships, and we are going to team up on some other items.

Mr. President, the part that really bothers me is that now we have Congress in the middle of contracting, and that is not good. I do not think it is sufficient to say that the situation is bad, so we have to do something, even though it is going to make it worse.

Clearly, as the distinguished senior Senator from Arkansas has said, there has been a series of articles in the newspaper, and one of those articles pointed out that these contractors come up and deal with Congress; how they went to Rockwell and saw a picture of the B-1; and how from there went a string to every State in the Union, because every State had some part in the B-1. Thus, the future of the B-1 was assured.

Now we have a situation where it is deemed by the Defense Department to go sole source, and there are all sorts of requirements they have to go through before going sole source, under Senator PRYOR's amendment.

They have to go through all these hurdles, and it goes on for a number of pages—publishing in the Federal Register, and a whole series of things. Then, when they decide the contract is to be awarded, let us say they decide it is going to be awarded in November or December, then what do they have to do? It may not be awarded unless Congress has specifically authorized such specific contract to be awarded. So back they come here to get the OK from Congress to go through this sole sourcing.

What is Congress going to do? Everyone who is from a State that does not get the sole source is going to demand that they get a piece of the action. That is the last you will see of our sole sourcing, even though it may be in the best interest of the Nation.

Again, Mr. President, it seems to me if we do not like who is running the place over there then let us get someone else, but let us not get Congress into the contracting business.

I was rather inclined toward the Senator's amendment, but with this provision in it I find it is distasteful.

Mr. PRYOR. Mr. President, if the Senator will yield, let me just as simply as I can state that Congress does not involve itself in the contracting unless it is for over $1 billion and unless there is no competition. At that point it is the view of the Senator from Arkansas that Congress should become involved.

Nor does Congress at any step, under the procedure that I proposed with Senator GRASSLEY, never does Congress take a position on which company or which State should be the beneficiary of the contract. All we do is disapprove or approve the contract.

What it does, I say to my friend from Rhode Island, it once again puts us, Congress, in our oversight function that frankly we have abdicated in the last 30 years. We are going to be involved in the oversight function at least, and this is the least we can do concerning those contracts over $1 billion where there is no competition.

We passed the Competition in Contracting Act last year. It took effect April 1, 1985, and this particular contracting act sponsored by Senator COHEN, Senator LEVIN, Senator QUAYLE, and many others in this Chamber, including myself, will take care of those items under the $1 billion mark. That is a fairly simplistic explanation, but I repeat that the Pryor-Grassley Act addresses itself to increasing competition, and that is what we think needs to be done.

Mr. CHAFEE. I said my piece. I understand that there are some 93 Defense Department contracts that are sole source and at some time there was competition. I do not know what competition is required under here, how far do you have to go to have it competitive? Each time you go out for bid for a new purchase, does that have to be competitive? I do not know.

I think that this is not a good provision, Mr. President.

Mr. NUNN. Mr. President, if I may ask the Senator from Arkansas one question, I understand what the Senator is trying to foster here, and I agree with the purpose of the amendment. I have reservations about the workings of it, but the purpose I think is in the right direction.

Would the Senator explain how his amendment would work, though, once a prime contract had been let with competition and then there are major change orders? The change order is negotiated with the contractor. Does the Senator's amendment cover that change order?

Mr. PRYOR. There is no change in the existing procedures from present statutes. I must be honest in answering my friend from Georgia. We thought about including such orders, but we had already taken on as much as we could handle, and maybe a little bit more, with this amendment. Maybe we can get to that issue another time, but we did not change the current provision of law.

Mr. NUNN. That is where actually an enormous lack of competition is to the taxpayer.

Mr. PRYOR. That is right.

Mr. NUNN. That is a source of great difficulty because that is in a posture where a contract has already been let, there is a contract, and the military comes in and usually makes about 100 to 1,000 to 10,000 change orders.

Mr. PRYOR. Every time I pick up any publication on an airplane or the New York Times or the Washington Post, or whatever, they have something in their word processor down there that says, "Senator SAM NUNN, Democrat of Georgia, foremost authority on defense in the United States of America." Now I am going to challenge that authority to come up with an answer to that particular point, and I will support him.

I thank the Senator.

Mr. NUNN. Mr. President, I am glad to have the Senator yield some more time if he wishes to continue along that line.

Mr. PRYOR. I think I have taken enough time.

I thank the Senator very much.

AMENDMENT NO. 157

Mr. BYRD. Mr. President, I send an amendment to the desk and ask that it be stated by the clerk, but let me read it first of all here.

Mr. President, this amendment would read as follows:

In section 915 of the bill, after the parens on line 18 of page 99 insert a period and then, beginning with the word "unless", strike out all down through the words "that purpose".

Mr. President, the Senate has just a little while ago adopted a clear policy statement that the B-1B bomber program shall be capped at 100 aircraft. The considerable testimony presented to the Armed Services Committee by the administration on the success of its two-bomber program, and the smooth progress of the Stealth bomber indicate that the B-1B procurement should end with the 100th aircraft.

I do not think there should be any question in anyone's mind about this policy. There is a prohibition in section 915 of the pending measure on the reprogramming of any funds appropriated pursuant to this authorization for additional B-1B's. The prohibition reads as follows:

None of the funds appropriated pursuant to an authorization contained in this act may be obligated or expended for the conduct of research, design, demonstration, development, or procurement of more than 100 B-1B bomber aircraft (including any derivative or modified version of such aircraft) . . .

And the rest of that paragraph would be stricken by my amendment.

That prohibition is clear on its face when the words that follow the parens on line 18 are stricken.

However, a question does arise about a clause that follows that statement, and that clause would be stricken by my amendment. The clause could imply the prohibition does not apply if the:

Secretary of Defense first notifies the Committees on Armed Servcies of the specific purpose for which the funds are proposed to be used and the amount proposed to be expended for that purpose.

Mr. President, this final clause could be interpreted to invite the possibility that the Secretary consider expending funds for additional B-1B or B-1C bombers. I do not believe we should invite the Secretary to do any thinking along those lines. Therefore, in order to conform to what must be the clear Senate sentiment on this program, I believe the latter clause—starting on line 18 of page 99—should be stricken. This would leave the clear prohibition on reprogramming any funds in this measure for a follow-on B-1 intact.

Regardless of the intent of the clause to keep Congress informed of the Department's proposals regarding the B-1 program, I do not think it is wise to leave any ambiguity about the 100 aircraft policy regarding the B-1.

Mr. JOHNSTON. Mr. President, will the Senator yield for a question?

Mr. BYRD. I yield.

Mr. JOHNSTON. Is the Senator aware that questions have been asked of both the Air Force and the Department of Defense in hearings this year on the question of their intention with respect to building more than 100 B-1's and both clearly stated that it is against their policy to go beyond the 100 B-1 bombers? So this would simply be consistent with existing policy, would it not?

Mr. BYRD. It would be, yes, and I thank the distinguished Senator from Louisiana for the question.

I yield to the chairman.

Mr. GOLDWATER. Mr. President, if the Senator will yield, I think this is a very wise amendment, and I will repeat for the benefit of the Senator from Louisiana that I have never heard in the Armed Services Committee of the Senate any suggestion about the deletion of funds for the ATB or the addition of more than 100 B-1 bombers. I would oppose both very violently.

So, Mr. President, I am sure that amendment is agreeable to Senator NUNN.

Mr. NUNN. Yes; I am very much in favor of this amendment.

Mr. BYRD. Mr. President, will the distinguished Senator say why? I want it on the record.

Mr. NUNN. The reason is that in spite of what the Senator from Arizona has said, and he is eminently correct—we have not talked about and I have heard no one urging that in committee—in spite of that, about every month or so there is a real move on out there in the complex to begin talking about going beyond the 100 and obviously the contractors involved have a real stake in that, obviously an awful lot of jobs are involved, obviously the Stealth bomber is going to have a higher per unit cost to begin with because the learning curve on production will take some time and the last B-1 is going to be an awful lot cheaper than the first Stealth, so that is an argument in favor from those who would like to continue the B-1 production line, and it is just something you feel more than you hear in explicit terms.

And the Senator's amendment I think is right on target because we are dedicated to going forward with the advanced technical bomber and there are numerous people who would like to move in a different direction with continuation of B-1. I felt for some time and I was even worried about the top leadership in the Air Force, but I no longer am.

I believe the Senator from Arizona and the Senator from Louisiana have described their position correctly as to their intentions now.

I give them full credit for being very forthright and candid with us on that point. But there are those in the Air Force at lower levels that I think have different intentions, and certainly a number in the contracting community that do.

It is going to be a tough decision for the Congress when that production line shuts down because there are an enormous number of jobs involved. But I think that is precisely the direction the Senator is warning us with the amendment.

Mr. GOLDWATER. Mr. President, we will accept the amendment.

Mr. BYRD. Mr. President, I thank both Senators who are managing the bill for their support of the amendment.

AMENDMENT NO. 157

(Purpose: To restrict the programming of funds for procurement of any B-1B bomber aircraft)

Mr. BYRD. Mr. President, I ask unanimous consent that the pending amendment be temporarily set aside so that the Senate may act on the amendment which I have just sent to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD] proposes an amendment numbered 157.

Mr. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In section 915 of the bill, beginning with "unless" strike out all down through "that purpose.", and insert a period.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from West Virginia [Mr. BYRD].

The amendment (No. 157) was agreed to.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, I again thank the chairman and ranking member for their support.

Mr. GOLDWATER. Mr. President, on the Pryor amendment, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. LEVIN. Mr. President, I wonder if my friend from Arkansas might answer a question for me. It relates to the question which Senator CHAFEE asked, and that is on the involvement of the Congress in the contracting and in the contracts with the numbers of contracts involved.

As I understand it, it is prime contracts that the Senator is referring to that relate to these major systems.

Mr. PRYOR. The Senator is correct.

Mr. LEVIN. Is it not correct that many major systems have more than one prime contract involved in the program, and that the Senator's amendment would apply to all prime contracts in those SAR programs?

Mr. PRYOR. The Senator is correct.

Mr. LEVIN. Can the Senator tell us how many prime contracts would be covered, approximately, by his amendment?

Mr. PRYOR. I say to my friend from Michigan that I do not know exactly, but I understand it is something around 70 to 90.

Mr. LEVIN. Those are SAR programs, but with each program there could be more than one prime contract?

Mr. PRYOR. That is conceivable; that could happen.

Mr. LEVIN. Could the Senator tell us approximately? Would it be 200, 300?

Mr. PRYOR. I would say about 80 contracts, if I might just guess.

Mr. LEVIN. Mr. President, if I could press the Senator for a moment. Assume with me for a moment that there are 93 SAR programs and if many of those programs have more than one prime contract, would it not then follow it would be more than 93 prime contracts covered by the Senator's amendment?

Mr. PRYOR. The Senator may well be correct. I do think that it would be worth the time that we would expend on reviewing those contracts and asking the simple questions of those prime contractors: "Sir, why has this contract not been competitively bid? Why is there only one bid for this contract?" I think those are questions to which the Congress needs to know answers and certainly the American people would appreciate us inquiring about it.

I think that is why I would say these contracts should be put before the oversight committee before the fact rather than after the fact and after we have heard about all of the things that have gone wrong when it it too late to correct them.

Mr. LEVIN. Would the Senator agree not only does he want the Congress to know that we now have the capability of knowing that but he wants Congress to affirmatively approach that?

Mr. PRYOR. That is correct. That is the purpose of the Pryor-Grassley proposal.

Mr. LEVIN. Let me say to my friend from Arkansas that we do have two choices, both of which address competition, both of which address dual-sourcing and revolving door. We have differences as to which is stronger, but we do have two options in front of us tonight and not just one.

I again wish to thank my friend from Arkansas, Senator PRYOR, for the leadership he has shown. While I do not agree with him that his approach is the better of the two that we have, it is a very valuable contribution.

Mr. PRYOR. Mr. President, that is why we have votes in this Chamber. I thank my friend from Michigan. I enjoyed working with him on this particular package.

Mr. MATHIAS. Mr. President, will the Senator from Arkansas yield for a question?

Mr. PRYOR. I am glad to yield to my friend from Maryland.

Mr. MATHIAS. Following the line of questioning of the Senator from Rhode Island, let me ask the Senator from Arkansas if he has any concern that this amendment raises a problem of separation of powers; whether bringing the Congress into the contracting role does not, in fact, breach the separation of powers between the executive and legislative branches. In other words, is the Senator convinced that this is a constitutional proposal?

Mr. PRYOR. It does not disturb this Senator. We are approving dollars in this bill, in the authorization bill, today. I would say to my friend from Maryland that when this measure comes before the Congress on sole-

source contracting and there is no competition on $1 billion or more, we are not saying which contractor gets the business, so to speak, we are simply saying that we approve or disapprove. And that is after we have asked the question: "Why is it there was no competition in this concern?"

Mr. MATHIAS. So what the Senator is looking to is a completed contract which will be executed and then the Congress simply gives it a ratification so that the executive branch fulfills its normal constitutional function?

Mr. PRYOR. I say that nothing would abrogate the responsibility of the executive branch of Government.

Mr. MATHIAS. And this is really, in effect, a congressional ratification of an executive act?

Mr. PRYOR. It would be effecting the ratification of an act by the executive branch of Government that dealth with contracts of $1 billion or more with no competition. If there was competition in that contract, if there were two or more sealed bids like we are trying to get, then it would never come before the Congress.

Mr. MATHIAS. But what comes before the Congress is a fully executed contract?

Mr. PRYOR. If there was no competition, that is correct.

Mr. MATHIAS. I thank the Senator.

VOTE ON AMENDMENT NO 154

The PRESIDING OFFICER (Mr. GRAMM). The question is on agreeing to the amendment of the Senator from Arkansas [Mr. PRYOR]. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

VOTE ON AMENDMENT NO. 154

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arkansas. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Oregon [Mr. HATFIELD], the Senator from Alaska [Mr. MURKOWSKI], and the Senator from Connecticut [Mr. WEICKER] are necessarily absent.

I also announce that the Senator from North Carolina [Mr. EAST] is absent due to Illness.

I further announce that, if present and voting, the Senator from Oregon [Mr. HATFIELD] would vote "yea."

Mr. BYRD. I announce that the Senator from Delaware [Mr. BIDEN], the Senator from New Jersey [Mr. BRADLEY], the Senator from Florida [Mr. CHILES], the Senator from California [Mr. CRANSTON], the Senator from Illinois [Mr. DIXON], the Senator from Massachusetts [Mr. KENNEDY], and the Senator from New York [Mr. MOYNIHAN] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 22, nays 67, as follows:

[Rollcall Vote No. 83 Leg.]

YEAS—22

Baucus	Harkin	Proxmire
Bumpers	Hart	Pryor
Burdick	Kerry	Riegle
Byrd	Lautenberg	Rockefeller
DeConcini	Leahy	Sasser
Eagleton	Melcher	Simon
Ford	Metzenbaum	
Grassley	Mitchell	

NAYS—67

Abdnor	Gorton	Nickles
Andrews	Gramm	Nunn
Armstrong	Hatch	Packwood
Bentsen	Hawkins	Pell
Bingaman	Hecht	Pressler
Boren	Heflin	Quayle
Boschwitz	Heinz	Roth
Chafee	Helms	Rudman
Cochran	Hollings	Sarbanes
Cohen	Humphrey	Simpson
D'Amato	Inouye	Specter
Danforth	Johnston	Stafford
Denton	Kassebaum	Stennis
Dodd	Kasten	Stevens
Dole	Laxalt	Symms
Domenici	Levin	Thurmond
Durenberger	Long	Trible
Evans	Lugar	Wallop
Exon	Mathias	Warner
Garn	Matsunaga	Wilson
Glenn	Mattingly	Zorinsky
Goldwater	McClure	
Gore	McConnell	

NOT VOTING—11

Biden	Dixon	Moynihan
Bradley	East	Murkowski
Chiles	Hatfield	Weicker
Cranston	Kennedy	

So the amendment (No. 154) was rejected.

ORDER OF BUSINESS

Mr. DOLE. Mr. President, as I understand the wishes of the managers, there will be one additional vote on the so-called committee amendment. Then I understand that, as hard as they have been trying all day to get another amendment up that we can take care of tonight, so far, no one has come forth to volunteer to debate one and have another vote later tonight. But I understand the distinguished Senator from Colorado [Mr. HART] has agreed to lay down his MX amendment, which would be the pending amendment tomorrow.

I hope we can work out a time limitation agreement, an hour on each side tomorrow, and have a vote before we go into the policy luncheons. Is that agreeable with the manager and the Senator from Colorado?

Mr. GOLDWATER. I agree if the Senator from Colorado will agree, if that is what he wants.

Mr. HART. Mr. President, I yield to the minority leader.

Mr. BYRD. Mr. President, I have no problem with having the amendment laid down. I do not think we can agree at this point to vote at a given time tomorrow until we see how that comes up tomorrow.

Mr. DOLE. I shall check with the minority leader in the morning.

May I ask the manager if there is any other amendment? Is it the manager's wish, after this vote, that we lay down the MX amendment and move off this bill this evening?

Mr. GOLDWATER. That is not exactly my wish, but I am forced into it because nobody has an amendment to lay down except Senator HART. We shall take that up tomorrow morning. We have about 30-odd amendments left, not counting those that have come up.

So if we want to get out of here Thursday night, I hope the leader will go very, very late tomorrow night, Wednesday night, and Thursday night and, if need be, come back next Wednesday if we want to finish it.

Mr. DOLE. I hope Members who have amendments will be available tomorrow. Many of these issues we have been over. We go over them every year. It seems to me we could debate them sharply and have a vote. There is still a pretty good chance of completing action on this bill this Thursday night. The distinguished manager of the bill suggests if we do not finish this week, if we do not finish Wednesday, we come back next Wednesday and work Wednesday, Thursday, and Friday since the House will be in session those 3 days. But it is my hope we can continue. We have done very well today. I think we have disposed of eight or nine amendments.

Mr. DECONCINI. Will the majority leader yield?

Mr. DOLE. I will be happy to yield.

Mr. DECONCINI. Is the majority leader sure the House is going to be in all week? I was told earlier, just about an hour ago, they will be out next week.

Mr. DOLE. We may be in and they will be out.

Mr. BUMPERS. Will the majority leader yield further? I know the majority leader would like to have amendments rolling on, the minute one vote is taken another one offered. Senator CHAFEE, Senator HEINZ, Senator LEAHY, and I have the SALT II sense-of-the-Senate amendment. As far as I know, we would be happy to go immediately after the rollcall vote on the Hart amendment, if the majority leader wants to get a unanimous-consent agreement.

Mr. GOLDWATER. We would be very happy to have it.

Mr. NUNN. Mr. President, there will be another MX amendment, if the Hart MX amendment does not pass. I think it would be more logical to take that one up in sequence. I will have an MX amendment if the Hart amendment does not pass.

Mr. GOLDWATER. I agree with that.

Mr. DOLE. I think we can assure the distinguished Senator from Arkansas

that he will be on the list very early tomorrow.

Mr. BUMPERS. We will be ready to go at the conclusion of the Nunn amendment then, which will follow the Hart amendment.

Mr. GOLDWATER. That is fine.

Mr. DOLE. This will be the last vote of the evening.

VOTE ON AMENDMENT NO. 147

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arizona. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Oregon [Mr. HATFIELD], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Alaska [Mr. MURKOWSKI], and the Senator from Connecticut [Mr. WEICKER] are necessarily absent.

I also announce that the Senator from North Carolina [Mr. EAST] is absent due to illness.

I further announce that, if present and voting, the Senator from Oregon [Mr. HATIFIELD] would vote "yea."

Mr. BYRD. I announce that the Senator from Delaware [Mr. BIDEN], the Senator from New Jersey [Mr. BRADLEY], the Senator from California [Mr. CRANSTON], the Senator from Illinois [Mr. DIXON], the Senator from Massachusetts [Mr. KENNEDY], and the Senator from New York [Mr. MOYNIHAN] are necessarily absent.

The PRESIDING OFFICER (Mr. BOSCHWITZ). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 89, nays 0, as follows:

[Rollcall Vote No. 84 Leg.]

YEAS—89

Abdnor	Gore	Metzenbaum
Andrews	Gorton	Mitchell
Armstrong	Gramm	Nickles
Baucus	Grassley	Nunn
Bentsen	Harkin	Packwood
Bingaman	Hart	Pell
Boren	Hatch	Pressler
Boschwitz	Hawkins	Proxmire
Bumpers	Hecht	Pryor
Burdick	Heflin	Quayle
Byrd	Heinz	Riegle
Chafee	Helms	Rockefeller
Chiles	Hollings	Roth
Cochran	Humphrey	Rudman
Cohen	Inouye	Sarbanes
D'Amato	Johnston	Sasser
Danforth	Kasten	Simon
DeConcini	Kerry	Simpson
Denton	Lautenberg	Specter
Dodd	Laxalt	Stafford
Dole	Leahy	Stennis
Domenici	Levin	Stevens
Durenberger	Long	Symms
Eagleton	Lugar	Thurmond
Evans	Mathias	Trible
Exon	Matsunaga	Wallop
Ford	Mattingly	Warner
Garn	McClure	Wilson
Glenn	McConnell	Zorinsky
Goldwater	Melcher	

NAYS—0

NOT VOTING—11

Biden	East	Moynihan
Bradley	Hatfield	Murkowski
Cranston	Kassebaum	Weicker
Dixon	Kennedy	

So the amendment (No. 147), as amended, was agreed to.

Mr. GOLDWATER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 158

(Purpose: To delete certain funds for the MX missile program)

Mr. HART. Mr. President, I have an amendment at the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Colorado [Mr. HART] proposes an amendment numbered 158.

Mr. HART. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 90, after line 24, insert the following new section:

PROHIBITION ON USE OF FUNDS FOR PROCUREMENT OF MX MISSILES OR FOR CONSTRUCTION OF MX MISSILE RELATED FACILITIES

SEC. 916. (a) Notwithstanding section 103, the total amount authorized to be appropriated for fiscal year 1986 for the procurement of missiles for the Air Force, as specified in such section, is reduced by $2,081,600,000.

(b) Funds appropriated pursuant to an authorization contained in this or any other Act for fiscal year 1986 may not be obligated or expended for the procurement or deployment of any MX missile or for the construction, conversion, or renovation of any facility for the deployment of the MX missile.

Mr. HART. Mr. President, it is my understanding with the managers of the bill that this amendment will be the pending business when we leave morning business and enter the bill in the morning roughly at 10 a.m. Is that correct?

Mr. GOLDWATER. That is correct. The Senator is right.

Mr. HART. Mr. President, the amendment quite simply is to strike all funds from further procurement of MX missiles, and I think we will be able in the morning, if the minority leader is agreeable, to reach a reasonable time agreement on this and maybe not even use all this time.

So it is not out of the question that we might end debate early. This is a well-known issue and I think many Senators have stated their views before. They may want to restate them. I do not think it is going to take lengthy debate and if possible we could vote on this in the morning, but I think it will take agreement on the part of the managers and the leader.

Mr. GOLDWATER. Mr. President, will the Senator be agreeable to 2 hours?

Mr. HART. The Senator from Colorado is perfectly agreeable.

I understand the minority leader had some hesitation about that.

Mr. GOLDWATER. We can talk with him.

Mr. NUNN. Mr. President, I believe that the best procedure is to talk to the minority leader in the morning.

Mr. HART. I yield the floor.

Mr. NUNN. Mr. President, just for the information of Senators, if the Hart amendment striking funds for the MX does not pass, I will have an amendment that will be introduced following that that will put a cap on the number of MX missiles that can be deployed in the existing Minuteman silos at 40 and the amendment will provide for 12 missiles to be authorized for fiscal year 1986 in lieu of 21 now in the bill.

ROUTINE MORNING BUSINESS

(During the day routine morning business was transacted and additional statements were submitted, as follows:)

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

At 12:35 p.m., a message from the House of Representatives delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bill and joint resolution:

H.R. 1869. An act to amend the Internal Revenue Code of 1954 to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes.

S.J. Res. 103. Joint resolution to designate the month of May 1985, as "Very Special Arts U.S.A. Month".

The enrolled bill and joint resolution were subsequently signed by the President pro tempore [Mr. THURMOND].

MEASURE PLACED ON THE CALENDAR

The previous action of the Senate agreeing to the following resolution was vitiated by unanimous consent, and the resolution placed on the calendar:

S. Res. 159. Resolution to establish a select committee to study and make recommendations with respect to a two-year budget process.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, May 20, 1985, she had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 103. Joint resolution to designate the month of May 1985, as "Very Special Arts U.S.A. Month".

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1144. A communication from the Secretary of Agriculture transmitting a draft of proposed legislation to recover costs of export inspection and certification programs for apples, pears, grapes, and plums; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1145. A communication from the Secretary of Agriculture transmitting a draft of proposed legislation to recover costs of federal marketing agreements and orders; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1146. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to recover costs of standards and specifications for agricultural products; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1147. A communication from the General Counsel of the General Accounting Office transmitting, pursuant to law, a report on the status of budget authority proposed for rescission, but for which a rescission bill has not been passed; jointly, pursuant to the order of January 30, 1975, to the Committee on Appropriations and the Committee on the Budget.

EC-1148. A communication from the Executive Associate Director of the Office of Management and Budget transmitting, pursuant to law, a report on a reapportionment of an appropriation necessitating the need for a supplemental appropriation; to the Committee on Appropriations.

EC-1149. A communication from the Treasurer of the United States transmitting, pursuant to law, a report on activities under the Olympic Commemorative Coin Act of 1982; to the Committee on Banking, Housing, and Urban Affairs.

EC-1150. A communication from the Secretary of Transportation transmitting a draft of proposed legislation to require tonnage measurement of vessels engaged on international voyages and within the jurisdiction of the United States; to the Committee on Commerce, Science, and Transportation.

EC-1151. A communication from the Secretary of Energy transmitting, pursuant to law, the quarterly report on the Strategic Petroleum Reserve; to the Committee on Energy and Natural Resources.

EC-1152. A communication from the Acting General Counsel of the Department of Energy transmitting, pursuant to law, a notice of meetings related to the International Energy Program; to the Committee on Energy and Natural Resources..

EC-1153. A communication from the Secretary of Energy transmitting, pursuant to law, the annual report on the Industrial Energy Efficiency Improvement Program; to the Committee on Energy and Natural Resources.

EC-1154. A communication from the Secretary of Transportation transmitting, pursuant to law the sixth annual Report on the Highway Bridge Replacement and Rehabilitation Program; to the Committee on Environment and Public Works.

EC-1155. A communication from the Administrator of the Environmental Protection Agency transmitting, pursuant to law, the report on the Injection of Hazardous Waste; to the Committee on Environment and Public Works.

EC-1156. A communication from the Chairman of the National Advisory Committee on Oceans and Atmosphere transmitting, pursuant to law, a report on problems and opportunities in management and conservation of North Pacific Fur Seals; to the Committee on Environment and Public Works.

EC-1157. A communication from the Special Counsel of the Merit Systems Protection Board transmitting, pursuant to law, a report on findings and conclusions in an investigation into allegations of widespread travel fraud and violations of law and regulations in the Corps of Army Engineers; to the Committee on Environment and Public Works.

EC-1158. A communication from the Assistant Secretary of State transmitting a draft of proposed legislation entitled the Educational, Scientific, and Cultural Materials Importation Act of 1985; to the Committee on Finance.

EC-1159. A communication from the General Counsel of the Department of Defense transmitting a draft of proposed legislation to require that medicare providers of hospital services also participate in the Civilian Health and Medical Program of the Uniformed Services and of the Veterans Administration; to the Committee on Finance.

EC-1160. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report for April 1985 on GAO Reports issued; to the Committee on Governmental Affairs.

EC-1161. A communication from the Director of the American Legion transmitting, pursuant to law, the report on the financial condition of the American Legion as of December 31, 1983; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation, with an amendment in the nature of a substitute and an amendment to the title:

S. 679. A bill to authorize the appropriation of funds for certain maritime programs for fiscal year 1986 (Rept. No. 99-64).

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, with an amendment in the nature of a substitute and an amendment to the title:

S. 721. A bill to amend the Commodity Credit Corporation Charter Act regarding the export of agricultural commodities (Rept. No. 99-65).

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, with an amendment in the nature of a substitute:

S. 1040. A bill to provide emergency assistance to promote the marketing and sales of agricultural commodities, and for other purposes (Rept. No. 99-66).

By Mr. THURMOND, from the Committee on Judiciary, without amendment and with a preamble:

S.J. Res. 127. Joint resolution to grant the consent of Congress to certain additional powers conferred upon the Bi-State Development Agency by the State of Missouri and Illinois.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GARN (for himself and Mr. HECHT) (by request):

S. 1168. A bill to amend certain Federal laws relating to public housing to deregulate the program, returning it to local control, and to provide reliability for funding for capital improvements through use of formula funding, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. DURENBERGER (for himself, Mr. HATFIELD, Mr. HART, Mr. CRANSTON, Mr. KENNEDY, Mr. MOYNIHAN, Mr. RIEGLE, Mr. EVANS, Mr. HEINZ, Mr. BURDICK, Mr. MATSUNAGA, Mr. BOSCHWITZ, Mr. MELCHER, and Mr. KERRY):

S. 1169. A bill to ensure economic equity for American women by providing retirement security for women as workers and as divorced or surviving spouses, making quality dependent care available to all working families, ending discrimination in insurance on the basis of race, color, religion, national origin, or sex, providing equal employment opportunity and pay equity for women, treating women and low-income families more equitably under the tax laws and tax reform proposals, and improving the health care coverage of displaced homemakers and Medicare recipients; to the Committee on Finance.

By Mr. RIEGLE:

S. 1170. A bill to amend title II of the Social Security Act to provide that the combined earnings of a husband and wife during the period of their marriage shall be divided equally and shared between them for benefit purposes if they become divorced and either of them so elects; to the Committee on Finance.

By Mr. McCLURE (for himself, Mr. WILSON, Mr. CRANSTON, Mr. DECONCINI and Mr. ABDNOR):

S. 1171. A bill to amend the Small Reclamation Projects Act of 1956, as amended; to the Committee on Energy and Natural Resources.

By Mr. HELMS (for himself, Mr. EAST, Mr. DOLE, Mr. STENNIS, Mr. LONG, Mr. LAXALT, Mr. DOMENICI, Mr.

HATCH, Mr. MCCLURE, Mr. HUMPHREY and Mr. WARNER):

S. 1172. A bill to provide financial assistance for the Sam J. Ervin, Jr., Program in Public Affairs at the North Carolina State University; to the Committee on Labor and Human Resources.

By Mr. SPECTER (for himself and Mr. HEINZ):

S. 1173. A bill to forgive certain loan repayments by the Southeastern Pennsylvania Transportation Authority to the Secretary of Transportation, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. DURENBERGER (for himself and Mr. LEAHY):

S.J. Res. 138. Joint resolution to designate the week of June 2, 1985, through June 8, 1985, as "National Intelligence Community Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. SIMPSON (for Mr. DOLE (for himself and Mr. BYRD)):

S. Res. 171. Resolution to authorize the representation by the Senate Legal Counsel of a former Senate employee in the case of Donald M. Zahn v. National Right to Work Committee; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GARN (for himself and Mr. HECHT) (by request):

S. 1168. A bill to amend certain Federal laws relating to public housing to deregulate the program, returning it to local control, and to provide reliability for funding for capital improvements through use of formula funding and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

PUBLIC HOUSING COMPREHENSIVE GRANT ACT

● Mr. GARN. Mr. President, Senator HECHT and I are submitting by request a bill received from the Department of Housing and Urban Development [HUD] which seeks to reform the Public and Indian Housing Programs.

I ask unanimous consent that the bill, along with a letter from the Secretary of Housing and Urban Development and a section-by-section analysis, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1168

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Public Housing Comprehensive Grant Act".

SEC. 2. Section 9(a)(1) of the United States Housing Act of 1937 is amended by adding after the first sentence the following new sentence: "A public housing agency may also use any available amounts provided under this section in accordance with the purpose and requirements of section 14 of this Act.".

SEC. 3. Section 14 of such Act and its heading are amended to read as follows:

COMPREHENSIVE GRANT PROGRAM

"SEC. 14. (a) PURPOSE AND AUTHORITY.—(1) The purpose of this section is to provide assistance to improve the physical condition of existing public housing projects and to upgrade their management and operation, in order to contribute to their long-term physical and social viability and their continued availability to provide decent, safe, and sanitary living conditions for lower income families.

"(2) The Secretary may make available and contract to make available financial assistance to carry out the purpose of this section to public housing agencies with respect to public housing (as defined in section 3(b)(1) of this Act) owned or operated by such agencies. There are authorized to be appropriated, for the purpose of providing financial assistance under this section, not to exceed $760,900,000 for fiscal year 1987 and such sums as may be necessary for fiscal year 1988.

"(b) DEFINITIONS.—As used in this section—

"(1) the term 'larger public housing agency' shall mean a public housing agency with 500 or more units in projects eligible for assistance under this section; and

"(2) the term 'smaller public housing agency' shall mean a public housing agency with fewer than 500 units in projects eligible for assistance under this section and any Indian housing authority.

"(c) ALLOCATIONS.—(1) From the amount approved in an appropriation Act for any year for financial assistance under this section, the Secretary shall determine the amount necessary to fund the annual accrual of capital improvement needs of public housing agencies, based on available data concerning these needs. The Secretary shall allocate this amount to each public housing agency on the basis of a formula, which is based on objectively measurable criteria which reflect the annual accrual of capital improvement needs of each public housing agency.

"(2) The Secretary shall divide the amount that remains after the allocation referred to in paragraph (1) into two parts, one for larger public housing agencies and one for smaller public housing agencies, based on the relative needs of the agencies in each category for capital improvements, as determined by the Secretary. The Secretary shall allocate amounts from the portion available for larger public housing agencies to each agency on the basis of a formula, which is based on objectively measurable criteria which reflect the relative amount of needs of each larger public housing agency for capital improvements. The Secretary shall make amounts available from the portion available for smaller public housing agencies to provide financial assistance in connection with applications from smaller public housing agencies submitted and approved by HUD in accordance with subsection (f).

"(d) COMPREHENSIVE PLAN.—No financial assistance may be made available under this section unless the Secretary has approved a five-year comprehensive plan submitted by the public housing agency at a time determined by the Secretary. However, notwithstanding the limitation in the preceding sentence, the Secretary may provide such assistance where necessary to correct conditions which constitute an immediate threat to the health or safety of tenants. The plan shall contain—

"(1) a comprehensive assessment of (A) the current physical condition of each project owned or operated by the agency, (B) the physical improvements necessary for each such project, and (C) the replacement needs of equipment systems and structural elements which will be required to be met (assuming routine and timely maintenance is performed) during the five-year period covered by the plan;

"(2) a comprehensive assessment of the improvements needed to upgrade the management and operation of the public housing agency and of each such project so that decent, safe, and sanitary living conditions will be provided in the projects; such assessment shall include at least an identification of needs related to—

"(A) the management, financial, and accounting control systems of the public housing agency which are related to the projects;

"(B) the adequacy and qualifications of personnel employed by the public housing agency (in the management and operation of the projects) for each category of employment; and

"(C) the adequacy and efficacy of—

"(i) tenant programs and services in the projects;

"(ii) the security of each project and its tenants;

"(iii) policies and procedures of the public housing agency for the selection and eviction of tenants in the projects; and

"(iv) other policies and procedures of the agency relating to the projects, as specified under regulations issued by the Secretary pursuant to subsection (j);

"(3) an analysis, made on a project-by-project basis, in accordance with standards and criteria prescribed by the Secretary, demonstrating that completion of the improvements and replacements identified pursuant to paragraphs (1) and (2) will reasonably assure the long-term physical and social viability of the project at a reasonable cost;

"(4) an action plan for making the improvements and replacements identified pursuant to paragraph (1) and (2) which are determined pursuant to the analysis described in paragraph (3) to reasonably assure the long-term viability of projects at a reasonable cost; such plan shall include at least a schedule, in order of priority, of those actions which are to be completed, over a period of not greater than five years from the date of approval of the plan by the Secretary, and which are necessary—

"(A) to make the improvements and replacements identified pursuant to paragraph (1) for each project expected to receive capital improvements or replacements; and

"(B) to upgrade the management and operation of the agency and its projects as identified pursuant to paragraph (2);

"(5) a statement, to be signed by the appropriate local government official (or Indian tribe official, where appropriate), certifying that:

"(A) the plan was developed by the public housing agency in consultation with appropriate local government officials (or Indian tribal officials, where appropriate) and with tenants of the housing projects eligible for assistance under this section; and

"(B) the plan is consistent with the community's assessment of its lower income housing needs and that the unit of general local government (or Indian tribe, where appropriate) will cooperate in the provision of tenant programs and services (as defined in section 3(c)(2) of this Act);

"(6) a statement to be signed by the appropriate public housing agency official,

certifying that the plan will be implemented in conformance with Title VI of the Civil Rights Act of 1964, Title VIII of the Civil Rights Act of 1968, and section 504 of the Rehabilitation Act of 1973; and

"(7) such other information as the Secretary may require under regulations issued by the Secretary pursuant to subsection (j).

"(e) HUD REVIEW OF COMPREHENSIVE PLANS.—(1) The Secretary shall approve a comprehensive plan unless:

"(A) the plan is incomplete;

"(B) on the basis of available significant facts and data pertaining to the physical and operational condition of the public housing agency's projects or the management and operations of the agency, the Secretary determines that the agency's identification of needs pertaining thereto is plainly inconsistent with such facts and data;

"(C) on the basis of the plan, the Secretary determines that the action plan described pursuant to subsection (d)(4) is plainly inappropriate to meeting the needs identified in the plan, or that the agency has failed to demonstrate that completion of the improvements and replacements identified pursuant to subsections (d) (1) and (2) will reasonably assure the long-term viability of one or more projects to which they relate at a reasonable cost; or

"(D) there is evidence available to the Secretary which tends to challenge in a substantial manner any certification contained in the plan.

"(2) The comprehensive plan shall be considered to be approved, unless the Secretary notifies the public housing agency in writing within 75 calendar days of submission that the Secretary has disapproved the plan as submitted, indicating the reasons for disapproval and the modifications required to make the plan approvable.

"(f) APPLICATIONS FROM SMALLER PUBLIC HOUSING AGENCIES; HUD REVIEW.—(1) A smaller public housing agency may submit an application to the Secretary for a grant from amounts available to fund such applications under subsection (c)(2) to meet the agency's needs for one or more of its projects which cannot be addressed with other available resources. The application shall be submitted at such time and in such manner as the Secretary shall prescribe and shall—

"(A) except where necessary to correct conditions which constitute an immediate threat to the health or safety of tenants, be consistent with the agency's approved five-year comprehensive plan;

"(B) specify the needs to be addressed and the work proposed to meet the needs;

"(C) include an estimate of the cost of the proposed work; and

"(D) include such other information as the Secretary may require.

"(2) In making assistance available under this subsection, the Secretary shall give preference to public housing agencies—

"(A) which request assistance for projects (i) having conditions which constitute an immediate threat to the health or safety of tenants, or (ii) having the most severe need for completion of improvements and replacements; and

"(B) which have demonstrated the capability of carrying out the work proposed in the application submitted by the agency.

"(g) ELIGIBLE COSTS.—A public housing agency may use financial assistance received under subsection (c) only—

"(1) to undertake activities described in the agency's approved action plan pursuant to subsection (d)(4);

"(2) to correct conditions which constitute an immediate threat to the health or safety of tenants, whether or not the need therefor is indicated in its comprehensive plan;

"(3) to prepare a comprehensive plan under subsection (d), an application under subsection (f), an annual statement under subsection (h), or an annual performance report under subsection (i); and

"(4) except in the case of grants under subsection (f), for the operation of projects consistent with the requirements which apply to amounts provided under section 9 of this Act.

Financial assistance received under subsection (c) may be expended only for allowable costs as determined in accordance with cost determination policies of the Office of Management and Budget applicable to grants to local and federally recognized Indian tribal governments, as appropriately modified for application to public housing agencies.

"(h) ANNUAL STATEMENT.—(1) Each public housing agency receiving assistance under this section shall submit to the Secretary, at a time determined by the Secretary, an annual statement of the activities and expenditures projected to be funded, in whole or in part, by such assistance during the immediately following fiscal year of the public housing agency. The annual statement shall include a certification by the public housing agency that the proposed activities and expenditures are consistent with the agency's approved comprehensive plan.

"(2) A public housing agency may propose an amendment to its comprehensive plan under subsection (d) in any annual statement. Any such proposed amendment shall be reviewed in accordance with subsection (e).

"(3) The Secretary shall approve the annual statement unless the Secretary determines that it is inconsistent with the comprehensive plan. The annual statement shall be considered to be approved unless the Secretary notifies the public housing agency in writing within 75 calendar days of submission that the Secretary has disapproved the statement as submitted, indicating the reasons for disapproval and the modifications required to make the statement approvable. The statement shall be approved before the public housing agency receives any assistance pursuant to that section for the fiscal year to which the statement relates.

"(i) ANNUAL PERFORMANCE REPORT; REVIEW AND AUDIT—(1) Each public housing agency receiving assistance under this section shall submit to the Secretary, at a time determined by the Secretary, a performance and evaluation report concerning its activities under this section. The agency's report shall include an assessment by the agency of the relationship of the use of funds made available under this section, as well as the use of other funds, to the needs identified in the agency's comprehensive plan and to the purpose of this section.

"(2) The Secretary shall, at least on an annual basis, make such reviews as may be necessary or appropriate to determine whether the public housing agency (A) has carried out its activities under this section in a timely manner, and in accordance with its comprehensive plan; (B) has a continuing capacity to carry out its comprehensive plan in a timely manner; (C) has satisfied, or made reasonable progress towards satisfying, such performance standards as shall be prescribed by the Secretary, which shall include at least that the public housing agency shall—

"(i) maintain all occupied dwelling units in projects eligible for assistance under this section at levels at least equal to the housing quality standards established by the Secretary pursuant to section 8(o)(6) of this Act;

"(ii) maintain at least a 97 percent occupancy rate for all dwelling units in such projects; and

"(iii) maintain an operating reserve, as authorized under section 9(a) of this Act, equal to at least 20 percent of each year's operating budget; and

(D) has made reasonable progress in carrying out modernization projects approved under the provisions of this section as they existed immediately before October 1, 1986. The Secretary shall make the determination under clause (D) of the preceding sentence before providing financial assistance under subsection (c) with respect to fiscal year 1987.

"(3) The Secretary may withhold assistance under this section, require the public housing agency to take corrective action, or take other action as appropriate in accordance with the Secretary's reviews under this subsection.

"(4) Recipients shall have an audit made in accordance with the Single Audit Act of 1984 (Public Law 98-502). The Secretary, the Inspector General of the Department of Housing and Urban Development, and the Comptroller General of the United States shall have access to all books, documents, papers, or other records which are pertinent to the activities carried out under this section in order to make audit examinations, excerpts, and transcripts.

"(j) AUTHORITY TO ISSUE RULES AND REGULATIONS.—The Secretary shall prescribe by regulation (1) the formula for determining the annual accrual of capital improvement needs of each agency referred to in subsection (c)(1), (2) the formula for allocating assistance among larger public housing agencies pursuant to subsection (c)(2), (3) standards and criteria for determining whether proposed improvements will reasonably assure the long-term physical and social viability of a project at a reasonable cost pursuant to subsection (d)(3), and (4) performance standards to be applied in the Secretary's reviews and audits pursuant to subsection (i)(2). The Secretary also may issue such additional rules and regulations as may be necessary to carry out the provisions and purpose of this section.

"(k) TRANSITION PROVISIONS.—Amounts that the Secretary has obligated to smaller public housing agencies under the provisions of this section, as such provisions existed immediately before October 1, 1986, shall continue to be governed by such provisions. Amounts that the Secretary has obligated to larger public housing agencies under the provisions of this section, as such provisions existed immediately before October 1, 1986, shall be subject to this section. However, larger public housing agencies shall also have the right to use such amounts for the purposes approved by the Secretary under the provisions of this section, as they existed immediately before October 1, 1986.".

SEC. 4. This Act shall become effective on October 1, 1986 with respect to amounts appropriated for Federal fiscal years beginning on and after October 1, 1986.

THE SECRETARY OF HOUSING AND URBAN DEVELOPMENT,
Washington, DC, May 3, 1985.

Subject: Proposed "Public and Indian Housing Comprehensive Grant Act."

Hon. GEORGE BUSH,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: I am enclosing proposed legislation to reform the Public and Indian Housing program. This legislation has two basic objectives. First, it would significantly deregulate this program, returning it to local control by public housing agencies, including Indian housing authorities. Second, it provides greater reliability of funding for capital improvements through use of formula funding for accrual of capital improvement needs and for current needs. The new program would replace the current, unwieldy Comprehensive Improvement Assistance Program under section 14 of the United States Housing Act of 1937.

Although the program would become effective with respect to amounts appropriated beginning with Federal fiscal year 1987, we urge its adoption during this Session of Congress. A significant lead time will be necessary to make the necessary administrative and program design changes and to provide PHAs with adequate opportunity to undertake the comprehensive planning required by the proposal. Accordingly, we believe it should be adopted in 1985 in connection with HUD's fiscal year 1986 legislation.

An explanation and justification accompanies this letter and more fully describes the contents of the bill. Timely enactment of this proposal would provide the Department with the necessary tools to make the Public and Indian Housing Program more effective and efficient, with benefits for the Federal government, public housing agencies, and assisted tenants. I request that the bill be referred to the appropriate Committee and urge its early enactment.

The Office of Management and Budget has advised that enactment of this legislation would be in accord with the program of the President.

Very sincerely yours,

SAMUEL R. PIERCE, Jr.

(Enclosure: Identical letter sent to the Speaker of the House).

SECTION-BY-SECTION EXPLANATION AND JUSTIFICATION

PUBLIC AND INDIAN HOUSING COMPREHENSIVE GRANT PROGRAM

The Public and Indian Housing Comprehensive Grant Program has two basic objectives: (1) significant deregulation of the public housing program, returning it to local control and (2) reliability of funding for capital improvements through use of formula funding for accrual of capital improvement needs and for current needs.

Under the new program, PHAs will receive funds for capital improvements on a formula basis. Subsidy for operating costs will be provided as it is now under the Performance Funding System. Funds from the two sources will be fully fungible with the PHA.

Funds will be granted based on 5-year comprehensive plans and annual statements of work. HUD review will be extremely limited. Close monitoring will be limited to PHAs which fail to meet, or make reasonable progress toward meeting, three performance standards: maintaining decent, safe, and sanitary housing, maintaining 97 percent occupancy; and maintaining an operating reserve of at least 20 percent of the expenses contained in one-year's operating budget.

The current modernization program is an inefficient way to distribute resources for the capital improvement needs of the public housing inventory. It denies PHAs the flexibility and responsibility essential for setting priorities for capital improvement expenditures, weighing the needs of all projects against each other and the options of repair and major maintenance against capital replacement. Because HUD decides what to fund and when to fund it, PHAs cannot do rational multi-year planning for the capital improvement needs of real estate now estimated to be worth $60 billion.

The program now imposes rigorous application requirements and applies them to all PHAs, regardless of management capablity or the size of the PHA. The program requires HUD scrutiny of the application and intensive HUD monitoring of the modernization activities. This overregulation creates unnecessary paperwork and delays, which in turn can drive up the costs of the rehabilitation work.

Under the new program, the freedom from pervasive regulation, the full fungibility of operating and capital funds provided by formula allocation and the increased reliablity of funding will provide the opportunity and incentives for efficient management. PHAs will be able to set their own priorities, to choose among projects, to determine whether maintenance or capital improvements is most cost-effective in a particular instance and to plan realistically on a multi-year basis knowing that they will have substantial control in carrying out the plan. Section 3 of the bill contains the revised section 14 of the U.S. Housing Act of 1937 which authorize the new program.

As provided in proposed section 14(a), the purpose of the Comprehensive Grant Program for Public and Indian Housing is to impove the physical condition of existing public and Indian housing projects and to upgrade their management and operation. Upgrading the management and operation of these projects will contribute to their long-term physical and social viability and assure their continued availability to provide decent, safe and sanitary living conditions for lower income families.

There are two components to the Comprehensive Grant Program, operating subsidies and capital improvement funds. Each component will be allocated separately. The opearting subsidy will be calculated as it is now under the Performance Funding System. For capital improvements, proposed subsection (c) provides for three segments of the allocation—one based on the ongoing accrual of future needs of all PHAs for replacement and major repairs, one based on the current needs of larger PHAs (PHAs having 500 or more units), and one based on the current needs of all Indian Housing Authorities (IHAs) and smaller PHAs (PHAs having less than 500 units). First, from the sum appropriated by Congress each year, the amount needed to fund the ongoing accrual of future replacement and major repair needs will be allocated by formula to each PHA under proposed subsection (c)(1). Under proposed subsection (c)(2), the remaining funds will be divided, into two "pots", one for larger PHAs and one for smaller PHAs and IHAs. The amount available for larger PHAs will be allocated by formula. The amount available for smaller PHAs and IHAs will be available on an application basis.

The funds allocated by formula—operating subsidy, accrual, and current capital improvement needs of larger PHAs—will be fungible, that is the funds can be used interchangeably. This gives PHAs the flexibility to exercise management discretion, making the appropriate trade-offs between maintenance and capital improvements. The discretionary funds available by application for smaller PHAs and all IHAs will not be fungible. Section 2 of the bill amends section 9 to make the operating subsidy amounts fungible. Proposed section 14(g)(4) makes amounts provided under section 14 (other than those available by application) fungible. Factors for the capital improvements formulas will be based on analysis of data regarding modernizaiton needs, including data from the modernization needs study, which will be available in draft form in the summer of 1986.

This allocation approach is significant in a number of ways. For the first time, recognition is given and regular annual allocations provided to all PHAs for future needs. For current needs, larger PHAs are allocated funds on a formula basis. Under this proposal they are assured of regular annual allocations for that purpose, to the extent that funds are appropriated instead of having to compete for available funds with other PHAs.

Availability of a discretionary "pot" for smaller PHAs and all IHAs under proposed subsection (f) will make it possible to get the funds to those smaller PHAs which have relatively large current modernization needs. Under a formula allocation to the PHA level, those small PHAs which have substantial current modernization needs would not receive adequate funding to accomplish this work even if they attempted to accumulate funds over several years. Further, sufficient data will not be available to determine formula allocations for smaller PHAs.

A five year comprehensive plan will be submitted to HUD by the PHA, as required by proposed subsection (d). This plan will include a comprehensive assessment of the current physical condition of each project, the physical improvements necessary for each project, and the future replacement needs. The comprehensive plan will also include a comprehensive assessment of the improvements needed to upgrade the management and operation of the PHA and the PHA's projects. This management assessment will include identification of needs related to mangement systems, PHA personnel, tenant programs and services, security, and tenant selection and eviction policies. The comprehensive plan will also include an analysis of how the physical and management improvements will reasonably assure long-term physical and social viability of each project at a reasonable cost. The comprehensive plan will include an action plan for making identified improvements and a priority schedule for such actions.

Two statements will accompany the plans, as required by subsections (d) (5) and (6). The local government will certify that (1) the plan was developed by the PHA in consultation with appropriate local government officials (or Indian tribal officials, where appropriate) and with tenants of the public housing projects, and (2) the plan is consistent with the community's assessment of its lower income housing needs and that the unit of general local government (or Indian tribe, where appropriate) will cooperate in the provision of tenant programs and services. The PHA will certify that the plan will be implemented in conformance with the Civil Rights Acts of 1964 and 1968 and with

section 504 of the Rehabilitation Act of 1973, concerning accessibility to the physically handicapped.

The level of HUD oversight and review of the comprehensive plans under proposed subsection (e) will be limited to permit PHAs maximum autonomy in ranking and responding to their own needs. HUD must approve the comprehensive plans within 75 days, unless the PHA is notified of disapproval, the reasons for the disapproval, and the required modification to the plan to make it acceptable. The plans will be approved unless anyone of the following four conditions are present. First, the plan may be disapproved if it is incomplete. Second, the plan may be disapproved if HUD determines that the PHA's identification of needs is plainly inconsistent with available, significant facts and data pertaining to the physical and operational condition of the projects or management and operations of the PHA. Third, the plan may be disapproved if HUD determines that the action plan is plainly inappropriate to meeting the needs identified in the plan or the PHA has failed to demonstrated how completion of identified improvements will reasonably assure the long-term viability of one or more projects at a reasonable cost. Finally, the plan may be disapproved if HUD determines there is evidence which tends to challenge in a substantial manner any certification contained in the plan.

Under proposed subsection (f), smaller PHAs and IHAs will submit applications to HUD to fund current modernization needs which cannot be addressed with other available resources. The application will specify the needs to be addressed and the work proposed to meet the needs and include an estimate of the cost of the proposed work. The application must be consistent with the PHA's approved five year comprehensive plan, except where necessary to correct emergency conditions. HUD will give preferenc to PHAs which have projects with emergency conditions or having the most severe need for modernization and which have demonstrated the capability to carry out the proposed work.

Under proposed subsection (h), PHAs will be required to submit an annual statement of the activities and expenditures projected to be funded. In any annual statement, a PHA may propose an amendment to its comprehensive plan. HUD will approve the annual statement unless it is inconsistent with the comprehensive plan. The annual statement will be considered approved unless HUD notifies the PHA is writing within 75 calendar days of submission that the statement has been disapproved, the reasons for disapproval and the modifications required to make the statement approvable.

PHAs will be required to submit to HUD a performance and evaluation report concerning the use of funds, as required by proposed subsection (i)(1). The PHA's report will include an assessment by the PHA of the relationship of such use of funds made available under this section, as well as the use of other funds, to the identified needs in the comprehensive plan and to the purposes of this program.

Under proposed subsection (g) of the Comprehensive Grant Program PHAs will be able to use funds to: undertake activities decribed in the approved action plan; to correct emergency conditions, whether or not the need is indicated in the comprehensive plan; to prepare a comprehensive plan, a smaller PHA application, an annual statement or an annual performance report, and for day-to-day operations of the PHA consistent with the operating subsidy statutory provisions. These eligible activities are consistent with what is now permitted under modernization or operating subsidy funding. Assistance under the program could be used only for allowable costs as determined in accordance with cost determination policies of the Office of Management and Budget under Circular A-87 applicable to grants to local and federally-recognized Indian tribal governments, as appropriately modified for application to PHAs.

The five-year comprehensive plan, annual statements and performance reports will replace the current extensive submissions required for each modernization project. These submissions include preliminary applications, additional documentation required when HUD and the PHA jointly review the proposal, final applications, construction and bid documents (where HUD-established dollar thresholds are exceeded), change orders (where HUD-established thresholds are exceeded), quarterly progress reports, budget revisions, final reports, and actual modernization costs certificates. Each submission includes numerous items, each of which is subject to HUD review and approval, except for submissions during the implementation phase for which many PHAs currently can certify compliance. Currently, HUD also determines modernization standards, which set maximum levels to which projects may be improved. By virtue of the major reduction in submission requirements, the elimination of the modernization standards, as well as strict limitation on the level of HUD review, PHAs will gain control over the amount and kind of work to be done at each project.

Provision of capital improvement funds largely by formula will replace the current competitive, discretionary program in which HUD decides which projects are to be funded—setting priorities, establishing a ranking system, and reviewing and approving individual applications. Through the Performance Funding System, HUD also constrains the amounts that may be spent each year for PHA program operations. Under the new program, although the funding amounts are determined on the basis of operating subsidy need, accrual and current capital improvements needs, PHAs are not required to establish a replacement reserve nor to spend the funds for the purposes on which each allocation is based. The entire comprehensive grant is to be spent to make physical and management improvements and to operate the PHA, according to the needs and priorities locally set by the PHA. This local management flexibility will permit efficiency in the use of funds which cannot be achieved under a system dictated in detail from Washington.

Program monitoring will be designed to determine whether PHAs are meeting program objectives, rather than procedural details, and close monitoring will be limited to those PHAs which are not making reasonable progress.

HUD will make reviews, as necessary, under proposed subsection (i)(2), to determine whether the PHA: 1) has carried out its activities under this section in a timely manner, in accordance with its comprehensive plan; 2) has a continuing capacity to carry out its comprehensive plan in a timely manner; 3) has satisfied, or made reasonable progress towards satisfying, the performance standards; and 4) has made reasonable progress in carrying out modernization projects approved under the provisions of this section as they existed immediately before October 1, 1986. The determination under clause (4) would occur before any assistance is provided under the new program.

PHAs will be expected to meet or make reasonable progress toward performance standards which represent characteristics of well-managed PHAs. These standards are: maintaining all occupied dwelling units in projects eligible for assistance at levels equal to the housing quality standards established by HUD for the Voucher program; maintaining at least a 97 percent occupancy rate for all dwelling units; and maintaining an operating reserve equal to at least 20 percent of the expenses contained in each year's operating budget.

As provided in proposed subsection (i)(3), HUD may withhold assistance, require the PHA to take corrective action, or take other appropriate action, in response to HUD reviews. The intent of the Comprehensive Grant Program is to permit PHAs the maximum possible freedom to operate in any way they believe best to meet the statutory objectives of the public housing program. However, PHAs which do not use their resources effectively to provide decent, safe and sanitary housing for lower income families, or do not maintain financial stability, including PHAs now designated as financially or operationally troubled, will be funded subject to conditions specified by HUD designed to assure that there is continuing progress toward meeting the performance standards. HUD staff resources will be freed from detailed review of PHAs that are performing well and redirected to provide assistance to troubled PHAs.

The financial transactions of PHAs may be audited in accordance with the Single Audit Act of 1984 as provided in proposed subsection (i)(4). HUD, HUD's Inspector General, and the representatives of the General Accounting Office will have access to all books, documents, papers, or other records pertinent to the activities carried out under the new program to make audit examinations, excerpts, and transcripts.

Under proposed subsection (j), HUD will prescribe by regulation: the formula for determining the annual accrual of capital improvement needs of each PHA; the formula for allocating assistance among larger PHAs; standards and criteria for determining whether proposed improvements will reasonably assure the long-term physical and social viability of a project at a reasonable cost; and performance standards. HUD may issue additional rules and regulations as may be necessary to carry out the provisions and purpose of this section.

Under proposed subsection (k), for smaller PHAs, funds previously approved for modernization will continue to be governed by the provisions which existed immediately before October 1, 1986. For larger PHAs, funds previously approved for modernization will come under this section. However, larger PHAs also will be allowed to use previously approved funds for the activities for which also they were originally approved.

Section 4 of the bill provides that the amendments will become effective October 1, 1986 with respect to amounts appropriated for Federal fiscal year 1987 and thereafter.●

By Mr. DURENBERGER (for himself, Mr. HATFIELD, Mr. HART, Mr. CRANSTON, Mr. KENNEDY, Mr. MOYNIHAN, Mr.

RIEGLE, Mr. EVANS, Mr. HEINZ, Mr. BURDICK, Mr. MATSUNAGA, Mr. BOSCHWITZ, Mr. MELCHER, and Mr. KERRY):

S. 1169. A bill to ensure economic equity for American women by providing retirement security for women as workers and as divorced or surviving spouses, making quality dependent care available to all working families, ending discrimination in insurance on the basis of race, color, religion, national origin, or sex, providing equal employment opportunity and pay equity for women, treating women and low-income families more equitably under the tax laws and tax reform proposals, and improving the health care coverage of displaced homemakers and medicare recipients; to the Committee on Finance.

ECONOMIC EQUITY ACT

● Mr. DURENBERGER. Mr. President, I am pleased to introduce the Economic Equity Act of 1985 along with my colleagues, Mr. HATFIELD, Mr. HART, Mr. CRANSTON, Mr. KENNEDY, Mr. MOYNIHAN, Mr. EVANS, Mr. BURDICK, Mr. MATSUNAGA, Mr. RIEGLE, Mr. BOSCHWITZ, Mr. HEINZ, Mr. MELCHER, and Mr. KERRY.

The Economic Equity Act of 1985 is a major bipartisan effort designed to eradicate some of the economic roots of discrimination against women and to address those economic barriers to women's full participation in our society.

The Economic Equity Act was originally introduced in the 97th Congress along with my colleagues BOB PACKWOOD and MARK HATFIELD. The bill drew endorsement from 23 cosponsors and virtually all of the organizations advocating equal access for women. Agricultural credit, child and dependent care tax credit reform, repeal of the widows estate tax, and military/foreign service pension reform all became public law.

In the 98th Congress we strengthened the enforcement of child support payments and made our public and private pension systems more equitable. The Deficit Reduction Act of 1984 enacted two provisions of the Economic Equity Act. It clarified nonprofit dependent care facilities as eligible for tax exempt status and it allowed alimony to be treated as income for the purposes of individual retirement accounts. The head start reauthorization bill enacted dependent care information and referral.

Despite the progress which we have made in getting major provisions of the Economic Equity Act adopted over the past 5 years, women still face disproportionate treatment under the law. Additional work needs to be done in order to secure full equity for women. Each title of the Economic Equity Act, retirement security, dependent care, insurance, employment and tax reform address areas where reforms, either by law or by practice are needed. I would like to summarize the provisions under each of the five titles of the act.

Statistics show that women have been less likely to receive pensions than men, and when they receive them, their benefits have been considerably lower than those of men. This disparity has many implications for women particularly lower paid workers. This is of particular concern due to the increased mobility of the workforce. Title I under retirement equity addresses these needs.

TITLE 1 RETIREMENT SECURITY

The Retirement Equity Act of 1983 (P.L. 98-397) reformed the Employee Retirement Income Security Act [ERISA] and the Internal Revenue Code in the following ways:

It (1) lowers from 25 to 21 the minimum age for participation in private pension plans and the minimum age at which service must be counted toward vesting (entitlement to receive benefits); (2) allows employees to leave a job for up to 5 years without losing any time accrued for pension participation and vesting; (3) allows employees on maternity or paternity leave to earn limited pension credits so that they do not incur a break-in-service; (4) requires pension plans paying annuities to pay to married participants a joint (or two-person) annuity while both persons survive and a survivor annuity after one person dies, unless both spouses sign a wiver of the joint and survivor annuity; (5) allows a spouse to receive pension benefits if a wage earner dies before retirement age but after he reaches age 45 and has 10 years on the job; (6) provides that pension benefits may be assigned to an exspouse in case of divorce, (7) assumes that employees who have accrued retirement benefits will not lose those benefits when an employer terminates or changes a pension plan.

VESTING, INTEGRATION AND PORTABILITY

Vesting. This years bill reduces, from 10 to 5 years, the number of years of service a pension plan participant must complete in order to earn a 100 percent, nonforfeitable right to a retirement benefit. It would permit multiemployer pension plans to retain 10 years vesting, on condition that there is complete reciprocity for workers who move from one regional pension plan to another within the same industry.

Integration. Integration is the practice of offsetting a pension plan participant's earned benefit by the amount of Social Security benefits the workers will receive upon retirement. Some 45 percent of medium and large plans use integration in calculating retirement benefits. The impact on the lowest paid workers is important because integration can wipe out their entire pension, leaving them totally dependent on Social Security.

This legislation requires all integrated pension plans to provide a munimum benefit, above and beyond the Social Security benefit. For integrated defined benefit plans, this minimum would be 1.5 percent of the employee's compensation over a 10-year period. For integrated defined contribution plans, the minimum would be 2.5 percent of compensation for all years of service.

Portability. Under the portability modification, small vested pension benefits accumulated over short time periods could be rolled over into portable pension accounts. These accounts could not be drawn upon before retirement without penalty nor added to with new earnings. This ensures that retirement money is kept for retirement, but allows the employee some control over investment.

Earnings sharing. Under earnings sharing plans, a couple's annual earnings would be divided equally between them for the years they were married for purposes of computing benefits. The couple's aggregate earnings would be split on a year-by-year basis only for those years of the marriage in order to assure that each spouse will have Social Security protection in his or her own right.

Disabled widows. The disabled widow(ers) amends title II of the Social Security Act to provide full benefits for disabled widows and widowers without regard to age, and without regard to any previous reduction in their benefits.

Transition of benefits. Under the transition of benefits bill, title II of the Social Security Act would be amended to provide for the payment of a transition benefit to the spouse of an insured individual upon such individual's death if such spouse has attained age 50 and is not otherwise immediately eligible for benefits.

Disability definition. The disability definition provision amends title II of the Social Security Act to repeal the separate definition of disability presently applicable to widows and widowers, and to provide in turn that the months of a widow's or widower's entitlement to SSI benefits on the basis of disability may be used in establishing his or her entitlement to Medicare benefits on that basis

MILITARY SPOUSE PENSION REFORM

The fiscal year 1985 Department of Defense authorization bill extends health benefits to certain former spouses of military personnel. In 1982, legislation was passed to authorize State courts to order division of retirement pay as part of community property distribution upon divorce. This law also provided for medical benefits and commissary privileges to former spouses married at least 20 years during periods of active service.

Current law allows courts to consider the division of retired or retirees pay subject to certain restrictions. Because these restrictions allow the member to withhold taxes and other liabilities from the annuity before divi-

sion, the spouse often does not receive a fair share of the retirement benefits. In addition, there has been difficulty interpreting some of the formulas created by the courts to divide military retired pay.

Many military spouses find themselves without retirement benefits after a divorce. Although current law allows courts to consider the military retirement pay in divorce settlements, many courts fail to recognize the contributions and sacrifices of the spouse to a military career. Due to frequent moves, a military spouse is unable to establish a pension based on years worked with a singe employer. In addition, it is usually the spouse who resettles the family in a new neighborhood with each assignment.

The proposed EEA, would establish a pro rata presumption to the retirement pay for former spouses, the same as it establishes a pro rata presumption to the retirement pay for former spouses, the same as available to the CIA and Foreign Service spouses. The division would be subject to court review and would simplify annuity division.

DEPENDENT CARE SECTION, TITLE XX

This bill increases the title XX social services block grant authorization levels for title XX. The bill provides the following:

A set aside for child care and other services such as child abuse and neglect prevention, the promotion of cost-effective alternatives to institutionalization; funding for child care training and training for other human services staff; incentive grants to states to encourage implementation and enforcement of day care regulations and the establishment of a national resource center on child care.

The Senate bill provides for the establishment of a National Advisory Committee to develop new recommended model child care standards and the appointment of State Advisory Committees on Child Care Standards to examine the state's child care laws and procedures relating to the quality of child care standards.

CHILD CARE UNDER THE HIGHER EDUCATION ACT

This provision of the EEA amends the Higher Education Act to address the need for special child care services for economically disadvantaged college students and to improve child care training opportunities. This bill establishes a grant program to make child care available to low-income, first generation college students.

This is a positive attempt to assist young women with children to enter college. This provision could be interpreted as a duplication of services to this population. It could also be inerpreted as a luxury item in this economic environment.

CHILD CARE IN PUBLIC HOUSING

This section of the EEA establishes grants for child care services in public housing projects. Under the bill, public housing agencies would contract with nonprofit organizations within their communities to provide child care services to low-income families. The bill would also encourage direct involvement of public housing residents by employing these residents, especially elderly individuals, in the child care programs.

This provision passed last year as a part of the large housing authorization. However, it was not funded. KASSEBAUM has agreed to take the lead on the separate introduction of this measure.

HEALTH INSURANCE CONTINUATION FOR WIDOWED AND DIVORCED WOMEN AND DEPENDENT CHILDREN AND MEDICARE GAP WOMEN

This provision would cover widows and widowers and dependent children of employed spouses who have been covered under the group contract for at least the 30 days prior to the death, divorced persons of employed spouses who have been covered under the group contract for at least 30 days prior to the separation or divorce, the dependent minor children of the employed spouse and finally, spouses whose covered spouse has retired and is on Medicare but the other spouse is not old enough to qualify for Medicare.

This provision amends the Internal Revenue Code section 162(i)—to deny the business tax deduction from any employer who fails to include continuation rights to a widow and dependent children, divorced spouse and dependent children or women whose husband has retired and is on Medicare, reference to section 401—qualified pension plans, ERISA title I—new section, and Federal regulation title 42 part 110.108(e) for HMO's.

FAIR INSURANCE PRACTICES ACT

The proposed Fair Insurance Practices Act would prohibit distinctions based on race, color, religion, sex, or national origin in pension plans and insurance contracts.

Nondiscrimination in insurance is the original H.R. 100 November 1983 amendments. The bill avoids retroactivity. There is no requirement to increase benefits for current beneficiaries. Current beneficiaries would be ensured equal benefits when payment begins.

It allows insurers to equalize future benefits in whatever manner they choose. There is no requirement for them to top up all benefits. The effective date is one year after enactment.

PAY EQUITY COMPARABLE WORTH

The debate on pay equity/comparable worth is a timely and germane agenda which should be acknowledged and objectively examined. It is an issue in which we as a nation find ourselves challenged to identify the contributing factors for the large disparities between women's wages and men's wages. We should neither bury our heads in the sand, denying that these disparities exist, nor should we make it a foregone conclusion that these disparities are a product of wage based discrimination. We should squarely face this challenge, identifying these disparities using the best minds and resources at our command.

Mr. President, I offer an article recently published by "Minnesota Corporate Report," which I believe conveys a provocative view of pay equity/comparable worth from the State business perspective. I request that the article be placed in the RECORD following the remarks of my colleagues.

PAY EQUITY

The House proposal on pay equity/comparable worth would require the Equal Employment Opportunity Commission [EEOC] to develop an education program on eliminating sex-based wage discrimination from private sector pay systems. The bill would also mandate periodic reports by the Chair of the Equal Employment Opportunity Commission, the Secretary of Labor, and the Attorney General to the President and Congress describing the activity each agency has taken to enforce current laws which prohibit sex-based wage discrimination.

FEDERAL STUDY

The Federal Pay Equity and Management Improvement Act of 1985 allows for an independent consultant to conduct a study of the Federal civil service pay classification system. The report would conclude with recommendations for correcting any discriminatory wage practices identified.

LEGISLATIVE STUDY

This provision establishes a commission that would in turn select a private contractor to conduct a study of the pay practices of the Library of Congress. The commission would make recommendations to implement pay equity throughout the legislative branch.

Under the Senate pay equity provision, a commission would be established to hire a consultant to provide for a study of representative executive agencies' wage-setting practices and wage differentials. The study is to determine, by using both job content and economic analysis, whether female occupations are paid lower than male occupations. Within 18 months the commission is to transmit to the appropriated committees of Congress a report on its findings and recommendations for such administrative or legislative actions as it considers appropriate. The Director of the Office of Personnel Management shall comment on the report and specify the Director's plan and timetable to carry out any corrective measures if so indicated.

AFDC MOTHERS

The problems associated with teen pregnancy are well documented. In 1981, nearly half of all births to women under 20 were out of wedlock—

a 58-percent increase over 1970, when 31.5 percent of all births to teenagers were out of wedlock.

The United States is the only developed country where the teenage pregnancy has been increasing in recent years, with the U.S. rate for 15- to 19-year-olds standing at 96 per 1,000—83 per 1,000 for whites—compared to 14 per 1,000 in the Netherlands, 35 in Sweden, 43 in France, 44 in Canada, and 45 in England and Wales. It is notable that the teenage abortion rate alone in the United States is as high as or higher than the combined abortion and birthrates of any of these countries.

The Senate and House have different measures to address the issues of long term AFDC dependency.

The bill being introduced in the Senate would provide assistance and services to help young women remain in school or find employment. The bill would provide support services—child care, employment training, job placement, and academic and vocational education, in an effort to avoid the predictable cycle of poverty and long term welfare dependency. The bill provides Federal grants to support States' efforts to provide the services teenage parents need to complete their education and prepare themselves for employment. States applying for these funds would identify areas with a high incidence of teenage pregnancy, and funds would be targeted to low-income areas. States would be directed to better coordinate the administration of Federal funds currently directed to teenage mothers, funds from social services block grants, the Job Training and Partnership Act, the Work Incentive Program, and the maternal and child care block grant.

In its application for these funds, a State would produce a plan to target a specified core of services to teen mothers, to help them achieve greater self-sufficiency, for example, day care services, so teen mothers can attend school or work; and employment training and job placement services, so teen mothers can gain the skills to support their children.

The purpose of the Commission on Women's Small Business Ownership will be to study ways to improve the business climate for women business owners; the Commission would be appointed for 2 years, report its findings, and then expire. The Commission will help fill the void in statistics since 1980 by not only collecting available data but also reviewing data collecting procedures and identifying gaps and discrepancies. The Commission will also review all existing Federal initiatives relating to women-owned businesses and Federal roles in aiding and promoting women-owned small businesses.

This bill directs the Commission to focus on the special problems of socially and economically disadvantaged women in owning small businesses. The Commission would be required to make recommendations based upon its findings. The recommendations should include private sector and Federal initiatives to assist women in small business ownership. This Commission will help to identify barriers and assist both Government and the private sector in eliminating specific roadblocks to women's full participation in the free enterprise system.

WOMEN IN BUSINESS-EQUAL CREDIT

This bill amends the Equal Credit Opportunity Act of 1972; to require the Federal Reserve Board to extend all enforcement provisions of the Equal Credit Opportunity Act of 1974 to commercial lenders.

Although the Equal Credit Opportunity Act requires financial credit institutions to make credit available equally to all credit worthy customers without regard to sex or marital status, many of its provisions have been interpreted not to apply to business transactions. The Federal Reserve Board was given the authority to prescribe regulations to carry out the purposes of the act. Their main regulation, regulation B amplifies the basic requirements of the act. Regulation B prohibits a creditor from asking about an applicant's sex, race, color, and national origin. Despite the existence of potential safeguards, the Federal Reserve Board's rules generally exempt business credit transactions from the rules requiring notification, retention of records and inquiries about marital status.

Exempting business credit transactions from the requirements of the act hampers the ability of enforcement agencies and women entrepreneurs to detect illegal discrimination, eliminates incentives for financial institutions to monitor their own practices, and make it difficult for lawmakers to detect discriminatory practices or other types of barriers to full access to credit.

TAX REFORM: HEAD OF HOUSEHOLD ZBA

This proposal would raise the ZBA for single heads-of households to that of married couples filing jointly.

EARNED INCOME TAX CREDIT

The earned income tax credit is a refundable tax credit that was enacted in 1975 exclusively for low-income workers with children. The purpose of the EITC is to provide an incentive for low-income families to work rather than to recieve public assistance and to offset the Social Security taxes paid by low-income earners. The enactment of the EITC brought the income tax threshold above the proverty line ensuring that most poor working families would pay little or no Federal income tax. The EITC is a credit against the tax liability of families earning $11,000 per year or less, and it is refundable for a family whose credit exceeds its liability. In this way, the EITC resembles a negative income tax.

The EEA bill would index the EITC and increases it from 11 percent to 16 percent of the first $5,000 of earned income. It would phase out the maximum credit of $800 between $11,000 and $16,000 of earnings at a 16 percent rate.

Note: Bradley-Gephardt proposal maintains the current EITC; the Treasury proposal indexes it, the Kemp-Kasten plans indexes and reduces the tax credit. All three proposal raise the tax threshold through other mechanisms.

DEPENDENT CARE TAX CREDIT

The dependent care tax credit bill would expand and index the dependent care tax credit. It would expand the current sliding scale to 50 percent for those earning $10,000 or less, decreasing to 20 percent for those earning $40,000 or more.

It would index the income thresholds and make the credit refundable for low-income families who owe not income tax. The bill also provides a tax credit for respite care of disabled children and adult dependents who are physically or mentally unable to care for themselves. This credit would be available for the applicable percentage of up to $1,200 in respite care expenses.

SPOUSAL INDIVIDUAL RETIREMENT ACCOUNTS

This bill would gradually increase the allowable IRA contribution for a nonworking spouse based on the working spouse's income. The allowable contribution for a joint return with a nonworking spouse would be increased from the current $2,250 to $2,750 for fiscal year 1986 and 1987, $3,250 for fiscal year 1988 and 1989, $3,750 for fiscal year 1990 and 1991, and $4,000 thereafter.

NONDISCRIMINATION IN BUSINESS EXPENSE DEDUCTION

This bill would disallow the business deduction for entertainment and travel-related lodging when such activity takes place in a private club that discriminates on the basis of race, color, religion, national origin, or sex.

The alternative provision in no way prohibits anyone from joining the club of his or her choice. It simply puts an end to the practice of conducting tax deductible business in a discriminatory establishment. To the extent that these are business clubs, they would not be allowed to discriminate; to the extent that they are social clubs, expenses incurred therein should not be tax deductible.

The tax issues have been packaged separately in order to provide a platform to discuss the following items during the debate on tax reform.

The 1985 Economic Equity Act represents a comprehensive, forward-looking approach to improving the

economic well-being of American women and their families.

The Economic Equity Act achievements of the past 4 years were important reforms, reflecting the growing awareness of the rights and needs of American women.

We can no longer allow the law to routinely treat women as second-class citizens, dependent and devoid of the choice to contribute to their women economic future.

I would like to acknowledge my colleagues and those who have worked diligently over the past several months on specific provisions contained with the package. I would also like to acknowledge my colleagues in the House of Representatives where the Economic Equity Act was introduced earlier last week and where the bill currently enjoys the support of 82 cosponsors.

I want to offer special gratitude to the groups who have endorsed the bill prior to its introduction. These groups include: American Association of Retired Persons, American Association of University Women, American Nurses' Association American Women in Radio and Television, American Women's Clergy Association, Association of Junior Leagues, Inc., B'nai B'rith Women, Children's Defense Fund, Congressional Black Caucus, Displaced Homemakers Network, Inc., Federally Employed Women, Leadership Conference on Civil Rights, League of Women Voters of the United States, National Black Child Development Institute, National Commission on Working Women, National Council of Catholic Women, National Education Association, National Federation of Business and Professional Women's Clubs, National Organization for Women, National Women's Party, National Women's Political Caucus, Older Women's League, Organization of Chinese American Women, Pioneer Women, Pension Rights Center, Wider Opportunities for Women, Women's Equity Action League, Women, U.S.A.

Mr. President, I ask unanimous consent that the bill and an article from "Corporate Report" be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1169

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Economic Equity Act of 1985".

(b) TABLE OF CONTENTS.—

Section 1. Short title and table of contents.

TITLE I—RETIREMENT

PART A—PRIVATE PENSIONS

Sec. 100. Short title.

Subpart 1—Amendments to the Employee Retirement Income Security Act of 1974

Sec. 101. Continued coverage for certain workers over the normal retirement age.

Sec. 102. Minimum vesting standard reduced from 10 years to 5 years.

Sec. 103. Coverage for part-time workers.

Sec. 104. Minimum benefit rules for integrated plans.

Sec. 105. Distributions of accrued benefits to portable pension accounts.

Subpart 2—Amendments to the Internal Revenue Code of 1954

Sec. 111. Continued coverage for certain workers over the normal retirement age.

Sec. 112. Minimum vesting standard reduced from 10 years to 5 years.

Sec. 113. Coverage for part-time workers.

Sec. 114. Minimum benefit rules for integrated plans.

Sec. 115. Distributions of accrued benefits to portable pension accounts.

Subpart 3—Additional Provisions

Sec. 121. Study on cost-of-living adjustments under private pension plans.

Sec. 122. Effective date.

PART B—SOCIAL SECURITY

Sec. 130. Short title.

Subpart 1—Earnings Sharing

Sec. 131. Combined earnings of husband and wife during their marriage to be divided equally and shared between them for benefit purposes.

Subpart 2—Other Reforms

Sec. 141. Full benefits for disabled widows and widowers without regard to age.

Sec. 142. Payment of transition benefits to certain surviving spouses.

Sec. 143. Repeal of separate definition of disability presently applicable to widows and widowers.

PART C—FORMER MILITARY SPOUSES

Sec. 151. Short title.

Sec. 152. Former spouse share of retired or retainer pay.

Sec. 153. Former spouse share of survivor annuity.

Sec. 154. Survivor annuities in cases of divorce before the effective date.

Sec. 155. Former spouse share of retired or retainer pay in compliance with court order.

Sec. 156. Effective dates.

TITLE II—DEPENDENT CARE

PART A—SOCIAL SERVICES PROGRAM (TITLE XX)

Sec. 200. Short title.

Sec. 201. Increase in total amount of title XX funds available for allotment.

Sec. 202. Allotment and use of funds for specific purposes.

Sec. 203. Improvement of child care standards.

PART B—HIGHER EDUCATION ACT

Sec. 211. Child care program for postsecondary students.

PART C—PUBLIC HOUSING CHILD CARE DEMONSTRATION PROGRAM

Sec. 221. Public housing child care grants.

TITLE III—INSURANCE

PART A—NONDISCRIMINATION IN INSURANCE

Sec. 300. Short title.

Sec. 301. Findings and policy.

Sec. 302. Definitions.

Sec. 303. Discriminatory actions.

Sec. 304. State enforcement prior to judicial enforcement under this part.

Sec. 305. Civil action by or on behalf of aggrieved person.

Sec. 306. Civil action by the Attorney General involving issues of general public importance.

Sec. 307. Jurisdiction.

Sec. 308. Judicial relief.

Sec. 309. Inapplicability.

Sec. 310. Effective date.

PART B—HEALTH INSURANCE CONTINUATION

Sec. 320. Short title.

Sec. 321. Continuation coverage requirement for allowance of deduction for employer contributions to group health plans.

Sec. 322. Requirements under ERISA relating to continuation coverage under group health plans.

Sec. 323. Effective date and special rules.

TITLE IV—EMPLOYMENT

PART A—PAY EQUITY IN THE FEDERAL CIVIL SERVICE

Sec. 401. Definitions.

Sec. 402. Establishment of commission on compensation equity.

Sec. 403. Study and reporting requirements.

Sec. 404. Appointment of commission.

Sec. 405. Administrative provisions.

Sec. 406. Termination.

Sec. 407. Consultant.

Sec. 408. Construction.

Sec. 409. Funding.

Sec. 410. Effective date.

PART B—SERVICE PROGRAMS FOR PREGNANT TEENAGERS AND TEENAGE MOTHERS

Sec. 411. Grants to States for programs to assist pregnant teenagers and teenage mothers who might otherwise become long-term recipients of AFDC.

PART C—WOMEN IN BUSINESS

Subpart 1—National Commission on Women's Business Ownership

Sec. 420. Short title.

Sec. 421. Establishment.

Sec. 422. Duties of the Commission.

Sec. 423. Membership.

Sec. 424. Director and staff of the Commission.

Sec. 425. Powers of the Commission.

Sec. 426. Reports.

Sec. 427. Termination.

Sec. 428. Authorization of appropriations.

Sec. 429. Effective date.

Subpart 2—Equal Credit
Sec. 431. Amendment to Equal Credit Opportunity Act.
TITLE V—TAX REFORM
Sec. 501. Zero bracket amount for heads of households.
Sec. 502. Increase in earned income credit; treatment of certain payments.
Sec. 503. Credit for dependent care services.
Sec. 504. Retirement savings of individuals.
Sec. 505. Deduction for certain expenses for food, beverages, lodging, and entertainment disallowed if incurred in connection with a facility to which access is limited on the basis of race, color, sex, religion, or national origin.

TITLE I—RETIREMENT

PART A—PRIVATE PENSIONS

SEC. 100. SHORT TITLE.

This title may be cited as the "Pension Vesting, Integration, and Portability Act of 1985".

Subpart 1—Amendments to the Employee Retirement Income Security Act of 1974

SEC. 101. CONTINUED COVERAGE FOR CERTAIN WORKERS OVER THE NORMAL RETIREMENT AGE.

(a) IN GENERAL.—Section 202(a)(2) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1052(a)(2)) (relating to maximum age conditions) is amended to read as follows:

"(2)(A) Except as provided in subparagraph (B), no pension plan may exclude from participation (on the basis of age) employees who have attained a specified age.

"(B) A pension plan may exclude from participation (on the basis of age) an employee who has attained the normal retirement age under the plan if—

"(i) the plan is—

"(I) a defined benefit plan, or

"(II) a target benefit plan (as defined in regulations prescribed by the Secretary of the Treasury), and

"(ii) the employee's accrued benefit under the plan is greater than the normal retirement benefit to which the employee would be entitled at the normal retirement age if the employee commenced participation at the earliest possible entry age under the plan and served continuously until attaining the normal retirement age under the plan.".

(b) RULE OF APPLICATION.—The amendment made by subsection (a) shall apply with respect to service performed on or after the effective date under section 122.

SEC. 102. MINIMUM VESTING STANDARD REDUCED FROM 10 YEARS TO 5 YEARS.

(a) IN GENERAL.—Paragraph (2) of section 203(a) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1053(a)(2)) (relating to minimum vesting standards) is amended to read as follows:

"(2) A plan satisfies the requirements of this paragraph if it satisfies the requirements of subparagraph (A) or (B).

"(A) A plan satisfies the requirements of this subparagraph if, under the plan, a participant who has completed at least 5 years of service has a nonforfeitable right to 100 percent of the participant's accrued benefit derived from employer contributions.

"(B)(i) A plan satisfies the requirements of this subparagraph if—

"(I) the plan is a multiemployer plan (as defined in section 3(37)),

"(II) the plan is maintained pursuant to a collective bargaining agreement to which a national or international employee organization is a party and provides for participation in the plan by all members of such organization, or the plan provides for reciprocity between itself and each other related multiemployer plan, and

"(III) under the plan a participant who has completed at least 10 years of service has a nonforfeitable right to 100 percent of the participant's accrued benefit derived from employer contributions.

"(ii) For purposes of this subparagraph—

"(I) a multiemployer plan is related to any other multiemployer plan if either plan is maintained pursuant to a collective bargaining agreement to which an employee organization subordinate to a national or international employee organization is a party, and any other employee organization which is subordinate to such national or international employee organization is a party to a collective bargaining agreement pursuant to which the other multiemployer plan is maintained, and

"(II) a multiemployer plan provides for reciprocity between itself and any other multiemployer plan if each such plan recognizes, for purposes of determining nonforfeitability of benefits of a participant under such plan, years of service of such participant which are recognized under the other multiemployer plan for purposes of determining nonforfeitability of benefits of such participant under such other plan.".

(b) REPEAL OF CLASS YEAR PLAN RULE.—Section 203(c) of such Act is amended by striking out paragraph (3).

(c) PROTECTION FOR PARTICIPANTS WITH 3 YEARS OF SERVICE FROM CHANGES IN VESTING SCHEDULE.—Subparagraph (B) of section 203(c)(1) of such Act (relating to changes in vesting schedules) is amended by striking out "5" and inserting in lieu thereof "3".

(d) RULE OF APPLICATION.—The amendments made by subsections (a) and (c), upon taking effect as provided in section 122, shall apply with respect to participants who have completed at least one hour of service on or after the date of the enactment of this Act.

SEC. 103. COVERAGE FOR PART-TIME WORKERS.

(a) AMENDMENT OF MINIMUM PARTICIPATION STANDARDS.—

(1) LATEST DATE UNTIL WHICH PARTICIPATION OF EMPLOYEE MAY BE DELAYED.—Section 202(a)(1)(A) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1052(a)(1)(A)) (relating to minimum age and service conditions for participation) is amended—

(A) by striking out "or" at the end of clause (i);

(B) by striking out "service." in clause (ii) and inserting in lieu thereof "service; or"; and

(C) by adding at the end thereof the following new clause:

"(iii) in the case of an employee described in paragraph (3)(E), the date on which the employee completes one-half of 1 year of service as provided in such paragraph.".

(2) 500 HOURS OF SERVICE PER YEAR BY PART-TIME EMPLOYEE TREATED AS ONE-HALF OF 1 YEAR OF SERVICE.—Section 202(a)(3) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1052) (relating to definition of year of service) is amended by adding at the end thereof the following new subparagraph:

"(E) For purposes of this section, in the case of an employee who customarily completes as part-time employment more than 500 hours of service and less than 1,000 hours of service within the 12-month period specified in subparagraph (A), such hours of service so completed shall be treated as one-half of a 'year of service'.".

(b) AMENDMENT OF MINIMUM VESTING STANDARDS TO TREAT 500 HOURS OF SERVICE PER YEAR BY PART-TIME EMPLOYEE AS ONE-HALF OF 1 YEAR OF SERVICE.—Section 203(b)(2) of such Act (29 U.S.C. 1053) (relating to definition of year of service) is amended by adding at the end thereof the following new subparagraph:

"(E) For purposes of this section, in the case of an employee who customarily completes as part-time employment more than 500 hours of service and less than 1,000 hours of service within the 12-consecutive-month period designated by the plan under subparagraph (A), such hours of service so completed shall be treated as one-half of a 'year of service'.".

(c) AMENDMENT OF BENEFIT ACCRUAL REQUIREMENTS TO INCLUDE SERVICE OF AT LEAST 500 HOURS PER YEAR IN DETERMINATIONS OF YEARS OF PARTICIPATION.—Section 204(b)(3)(C) of such Act (29 U.S.C. 1054(b)(3)(C)) (relating to treatment of less than 1,000 hours of service during year) is amended by striking out "1000 hours" and inserting in lieu thereof "500 hours".

(d) RULE OF APPLICATION.—The amendments made by this section, upon taking effect as provided in section 122, shall apply with respect to participants who have completed at least one hour of service on or after the date of the enactment of this Act.

SEC. 104. MINIMUM BENEFIT RULES FOR INTEGRATED PLANS.

Section 206 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1056) (relating to other provisions relating to form and payment of benefits) is amended by adding at the end thereof the following new subsection:

"(e)(1) In the case of an integrated defined benefit plan, the accrued benefit derived from employer contributions on behalf of each participant, when expressed as an annual retirement benefit, shall not be less than the applicable percentage of the participant's average annual compensation.

"(2)(A) In the case of an integrated defined contribution plan or an integrated simplified employee pension (within the meaning of section 408(k) of the Internal Revenue Code of 1954), the employer contribution for the year for each participant shall not be less than 2.5 percent of such participant's compensation (within the meaning of section 415 of such Code).

"(B) The percentage referred to in subparagraph (A) for any year shall not exceed the percentage at which contributions are made (or required to be made) under the plan or simplified employee pension for the year for the participant for whom such percentage is the highest for the year.

"(C) For purposes of this paragraph, any employer contribution attributable to a salary reduction or similar arrangement shall not be taken into account.

"(3) A defined benefit plan, defined contribution plan, or simplified employee pension shall not be treated as meeting the requirements of this subsection unless it meets such requirements without taking into account contributions or benefits under chapter 2 of the Internal Revenue Code of 1954 (relating to tax on self-employment income), chapter 21 of such Code (relating to Federal Insurance Contribution Act), title II of the Social Security Act, or any other Federal or State law.

"(4) For purposes of this subsection—

"(A) a plan or simplified employee pension is integrated if the plan or pension meets the requirements of section 401(a) or 408(k) (as applicable) of the Internal Revenue Code of 1954 but would not meet such requirements if contributions or benefits under chapter 2 of such Code (relating to tax on self-employment income), chapter 21 of such Code (relating to Federal Insurance Contributions Act), title II of the Social Security Act, or any other Federal or State law were not taken into account,

"(B) the term 'applicable percentage' means the lesser of—

"(i) 1.5 percent, multiplied by the number of the participant's years of participation under the plan, or

"(ii) 15 percent,

"(C) the term 'year of participation' means, in connection with any participant, a year of service taken into account for purposes of determining whether the requirements of section 202 of this Act or section 401(a)(4) of the Internal Revenue Code of 1954 are met by the plan with respect to such participant,

"(D) the term 'annual retirement benefit' means the amount which would be payable annually under the plan as the participant's benefit if the benefit under the plan were expressed as an equivalent benefit payable in the form of a single life annuity (with no ancillary benefits) commencing at the normal retirement age under the plan, and

"(E) the term 'average annual compensation' means, in connection with a participant, the participant's annual compensation (within the meaning of section 415 of the Internal Revenue Code of 1954), averaged under a uniform rule which is applied to all participants, over—

"(i) the period of 5 consecutive years of service of the participant under the plan (disregarding any break in such service) for which the participant's compensation was the highest, or

"(ii) if the participant has less than 5 years of service under the plan, the participant's total period of service.

"(5) The Secretary of the Treasury shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of this subsection in any case in which the employer has two or more plans, including (but not limited to) regulations to prevent inappropriate omissions or require duplication of minimum benefits or contributions.".

SEC. 105. DISTRIBUTIONS OF ACCRUED BENEFITS TO PORTABLE PENSION ACCOUNTS.

(a) ELECTION OF QUALIFIED ROLLOVER UPON SEPARATION FROM SERVICE IF ACCRUED BENEFIT LESS THAN $7,000.—Section 206 of the Employee Retirement Income Security Act of 1974 (as amended by section 104 of this Act) is further amended by adding at the end thereof the following new subsection:

"(f)(1) A pension plan shall distribute a participant's nonforfeitable benefit to a portable pension account if—

"(A) the plan is—

"(i) a defined benefit plan, or

"(ii) an individual account plan which is subject to the funding standards of section 302,

"(B) the present value, as of the date of separation from service, of such benefit is less than $7,000, and

"(C) the participant elects in writing, after receiving the notice required in paragraph (2), to have such benefit distributed to such portable pension account in a distribution which is excluded from gross income under section 402(a)(5)(A) of the Internal Revenue Code of 1954.

The Secretary shall prescribe by regulation the manner and form in which an election under subparagraph (C) is to be made.

"(2) Upon being informed by a participant that the participant wishes to make an election pursuant to paragraph (1)(C), the plan administrator shall provide notice to the participant of—

"(A) the present value, as of the date of separation from service, of the participant's nonforfeitable benefit,

"(B) the amount of the participant's benefit on the date of the participant's retirement payable under the pension plan at normal retirement age, expressed—

"(i) if the plan is a defined benefit plan, in the form of a single life annuity, or

"(ii) if the plan is an individual account plan described in paragraph (1)(A)(ii), in the normal form of payment under the plan, and

"(C) the additional tax under section 408(f) of the Internal Revenue Code of 1954 on distributions from, or disqualification of, the portable pension account before the date on which the participant attains age 59½.

"(3) For purposes of this subsection—

"(A) the term 'portable pension account' means an individual retirement account (within the meaning of section 408(a) of the Internal Revenue Code of 1954) or an individual retirement annuity (within the meaning of section 408(b) of such Code) under which contributions may consist only of distributions made to such account or annuity pursuant to this subsection, and

"(B) the present value, as of the date of separation from service, of a participant's nonforfeitable benefit under a plan shall be deemed to be equal to the actuarial equivalent, as of such date, of the normal form of benefit under the plan.".

(b) PROSPECTIVE APPLICATION.—The amendment made by subsection (a), upon taking effect as provided in section 122, shall apply only with respect to participants separated from service under the pension plan after the effective date set forth in such section.

Subpart 2—Amendments to the Internal Revenue Code of 1954

SEC. 111. CONTINUED COVERAGE FOR CERTAIN WORKERS OVER THE NORMAL RETIREMENT AGE.

(a) IN GENERAL.—Section 410(a)(2) of the Internal Revenue Code of 1954 (relating to maximum age conditions) is amended to read as follows:

"(2) MAXIMUM AGE CONDITIONS—

"(A) GENERAL RULE.—Except as provided in subparagraph (B), a trust shall not constitute a qualified trust under section 401(a) if the plan of which it is a part excludes from participation (on the basis of age) employees who have attained a specified age.

"(B) DEFINED BENEFIT PLANS AND TARGET BENEFIT PLANS.—Subparagraph (A) shall not apply if—

"(i) the plan is—

"(I) a defined benefit plan, or

"(II) a target benefit plan (as defined in regulations prescribed by the Secretary), and

"(ii) the employee's accrued benefit under the plan is greater than the normal retirement benefit to which the employee would be entitled at the normal retirement age if the employee commenced participation at the earliest possible entry age under the plan and served continuously until attaining the normal retirement age under the plan.".

(b) RULE OF APPLICATION.—The amendment made by subsection (a) shall apply with respect to service performed on or after the effective date under section 122.

SEC. 112. MINIMUM VESTING STANDARD REDUCED FROM 10 YEARS TO 5 YEARS.

(a) IN GENERAL.—Paragraph (2) of section 411(a) of the Internal Revenue Code of 1954 (relating to minimum vesting standards) is amended to read as follows:

"(2) EMPLOYER CONTRIBUTIONS.—A plan satisfies the requirements of this paragraph if it satisfies the requirements of subparagraph (A) or (B).

"(A) 5-YEAR VESTING.—A plan satisfies the requirements of this subparagraph if, under the plan, a participant who has completed at least 5 years of service has a nonforfeitable right to 100 percent of the participant's accrued benefit derived from employer contributions.

"(B) 10-YEAR VESTING FOR CERTAIN MULTIEMPLOYER PLANS.—

"(i) IN GENERAL.—A plan satisfies the requirements of this subparagraph if—

"(I) the plan is a multiemployer plan,

"(II) the plan is maintained pursuant to a collective bargaining agreement to which a national or international employee organization is a party and provides for participation in the plan by all members of such organization, or the plan provides for reciprocity between itself and each other related multiemployer plan, and

"(III) under the plan a participant who has completed at least 10 years of service has a nonforfeitable right to 100 percent of the participant's accrued benefit derived from employer contributions.

"(ii) DEFINITIONS.—For purposes of this subparagraph—

"(I) RELATED MULTIEMPLOYER PLAN.—A multiemployer plan is related to any other multiemployer plan if either plan is maintained pursuant to a collective bargaining agreement to which an employee organization subordinate to a national or international employee organization is a party, and any other employee organization which is subordinate to such national or international employee organization is a party to a collective bargaining agreement pursuant to which the other multiemployer plan is maintained.

"(II) RECIPROCITY.—A multiemployer plan provides for reciprocity between itself and any other multiemployer plan if each such plan recognizes, for purposes of determining nonforfeitability of benefits of a participant under such plan, years of service of such participant which are recognized under the other multiemployer plan for purposes of determining nonforfeitability of benefits of such participant under such other plan.".

(b) REPEAL OF CLASS YEAR PLAN RULE.—Subsection (d) of section 411 of such Code (relating to special rules) is amended by striking out paragraph (4).

(c) PROTECTION FOR PARTICIPANTS WITH 3 YEARS OF SERVICE FROM CHANGES IN VESTING SCHEDULE.—Subparagraph (B) of section 411(a)(10) of such Code (relating to changes in vesting schedule) is amended by striking out "5" and inserting in lieu thereof "3".

(d) RULE OF APPLICATION.—The amendments made by subsections (a) and (c), upon taking effect as provided in section 122, shall apply with respect to participants who have completed at least one hour of service on or after the date of the enactment of this Act.

SEC. 113. COVERAGE FOR PART-TIME WORKERS.

(a) AMENDMENT OF MINIMUM PARTICIPATION STANDARDS.—

(1) LATEST DATE UNTIL WHICH PARTICIPATION OF EMPLOYEE MAY BE DELAYED.—Section 410(a)(1)(A) of the Internal Revenue Code of 1954 (relating to minimum age and service conditions for participation) is amended—

(A) by striking out "or" at the end of clause (i);

(B) by striking out "service." in clause (ii) and inserting in lieu thereof "service; or"; and

(C) by adding at the end thereof the following new clause:

"(iii) in the case of an employee described in paragraph (3)(E), the date on which the employee completes one-half of 1 year of service as provided in such paragraph.".

(2) 500 HOURS OF SERVICE PER YEAR BY PART-TIME EMPLOYEE TREATED AS ONE-HALF OF 1 YEAR OF SERVICE.—Section 410(a)(3) of such Code (relating to definition of year of service) is amended by adding at the end thereof the following new subparagraph:

"(E) PART-TIME EMPLOYMENT.—For purposes of this subsection, in the case of an employee who customarily completes as part-time employment more than 500 hours of service and less than 1,000 hours of service within the 12-month period specified in subparagraph (A), such hours of service so completed shall be treated as one-half of a 'year of service'.".

(b) AMENDMENT OF MINIMUM VESTING STANDARDS TO TREAT 500 HOURS OF SERVICE PER YEAR BY PART-TIME EMPLOYEE AS ONE-HALF OF 1 YEAR OF SERVICE.—Section 411(a)(5) of such Code (relating to definition of year of service) is amended by adding at the end thereof the following new subparagraph:

"(E) PART-TIME EMPLOYMENT.—For purposes of this subsection, in the case of an employee who customarily completes as part-time employment more than 500 hours of service and less than 1,000 hours of service within the 12-consecutive-month period designated by the plan under subparagraph (A), such hours of service so completed shall be treated as one-half of a 'year of service'.".

(c) AMENDMENT OF BENEFIT ACCRUAL REQUIREMENTS TO INCLUDE SERVICE OF AT LEAST 500 HOURS PER YEAR IN DETERMINATIONS OF YEARS OF PARTICIPATION.—Section 411(b)(3)(C) of such Code (relating to treatment of less than 1,000 hours of service during year) is amended by striking out "1,000 hours" each place it appears and inserting in lieu thereof "500 hours".

(d) RULE OF APPLICATION.—The amendments made by this section, upon taking effect as provided in section 122, shall apply with respect to participants who have completed at least one hour of service on or after the date of the enactment of this Act.

SEC. 114. MINIMUM BENEFIT RULES FOR INTEGRATED PLANS.

(a) IN GENERAL.—Subpart B of part I of subchapter D of chapter 1 of the Internal Revenue Code of 1954 (relating to special rules for pension, profit-sharing, stock bonus plans, etc.) is amended by adding at the end thereof the following new section:

"SEC. 417A. MINIMUM BENEFIT RULES FOR INTEGRATED PLANS.

"(a) DEFINED BENEFIT PLANS.—In the case of an integrated defined benefit plan, the accrued benefit derived from employer contributions on behalf of each participant, when expressed as an annual retirement benefit, shall not be less than the applicable percentage of the participant's average annual compensation.

"(b) DEFINED CONTRIBUTION PLANS AND SIMPLIFIED EMPLOYEE PENSIONS.—

"(1) GENERAL RULE.—In the case of an integrated defined contribution plan or an integrated simplified employee pension, the employer contribution for the year for each participant shall not be less than 2.5 percent of such participant's compensation (within the meaning of section 415).

"(2) SPECIAL RULE WHERE MAXIMUM CONTRIBUTION LESS THAN 2.5 PERCENT.—The percentage referred to in paragraph (1) for any year shall not exceed the percentage at which contributions are made (or required to be made) under the plan or simplified employee pension for the year for the participant for whom such percentage is the highest for the year.

"(3) CERTAIN AMOUNTS NOT TAKEN INTO ACCOUNT.—For purposes of this subsection, any employer contribution attributable to a salary reduction or similar arrangement shall not be taken into account.

"(c) PLAN OR PENSION MUST MEET REQUIREMENTS WITHOUT TAKING INTO ACCOUNT SOCIAL SECURITY AND SIMILAR CONTRIBUTIONS AND BENEFITS.—A defined benefit plan, defined contribution plan, or simplified employee pension shall not be treated as meeting the requirements of this section unless it meets such requirements without taking into account contributions or benefits under chapter 2 (relating to tax on self-employment income), chapter 21 (relating to Federal Insurance Contribution Act), title II of the Social Security Act, or any other Federal or State law.

"(d) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) INTEGRATED PLAN OR PENSION.—A plan or simplified employee pension is integrated if the plan or pension meets the requirements of section 401(a) or 408(k) (as applicable) but would not meet such requirements if contributions or benefits under chapter 2 (relating to tax on self-employment income), chapter 21 (relating to Federal Insurance Contributions Act), title II of the Social Security Act, or any other Federal or State law were not taken into account.

"(2) APPLICABLE PERCENTAGE.—The term 'applicable percentage' means the lesser of—

"(A) 1.5 percent, multiplied by the number of the participant's years of participation under the plan, or

"(B) 15 percent.

"(3) YEAR OF PARTICIPATION.—The term 'year of participation' means, in connection with any participant, a year of service taken into account for purposes of determining whether the requirements of section 401(a)(4) or 410 are met by the plan with respect to such participant.

"(4) ANNUAL RETIREMENT BENEFIT.—The term 'annual retirement benefit' means the amount which would be payable annually under the plan as the participant's benefit if the benefit under the plan were expressed as an equivalent benefit payable in the form of a single life annuity (with no ancillary benefits) commencing at the normal retirement age under the plan.

"(5) AVERAGE ANNUAL COMPENSATION.—The term 'average annual compensation' means, in connection with a participant, the participant's annual compensation (within the meaning of section 415), averaged under a uniform rule which is applied to all participants, over—

"(A) the period of 5 consecutive years of service of the participant under the plan (disregarding any break in such service) for which the participant's compensation was the highest, or

"(B) if the participant has less than 5 years of service under the plan, the participant's total period of service.

"(f) EMPLOYER WITH 2 OR MORE PLANS.—The Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of this section in any case in which the employer has two or more plans, including (but not limited to) regulations to prevent inappropriate omissions or require duplication of minimum benefits or contributions.".

(b) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) REQUIREMENTS FOR QUALIFICATION.—Paragraph (10) of section 401(a) of such Code (relating to other requirements for qualification) is amended by inserting after subparagraph (B) the following new subparagraph:

"(C) INTEGRATED PLANS.—In the case of an integrated plan (within the meaning of section 417A(d)(1)), a trust forming a part of such plan shall constitute a qualified trust under this section only if such plan satisfies the requirements of section 417A.".

(2) NONDISCRIMINATION REQUIREMENT FOR SIMPLIFIED EMPLOYEE PENSIONS.—Paragraph (3) of section 408(k) of such Code (relating to nondiscrimination requirements for simplified employee pensions) is amended by adding at the end thereof the following new subparagraph:

"(F) APPLICATION OF MINIMUM BENEFITS RULES TO INTEGRATED PENSIONS.—In the case of an integrated simplified employee pension (within the meaning of section 417A(d)(1)), employer contributions to such pension do not meet the requirements of this paragraph unless such contributions meet the requirements of section 417A.".

(3) CLERICAL AMENDMENT.—The table of sections for subpart B of part 1 of subchapter D of chapter 1 of such Code is amended by adding at the end thereof the following new item:

"Sec. 417A. Minimum benefit rules for integrated plans.".

SEC. 115. DISTRIBUTIONS OF ACCRUED BENEFITS TO PORTABLE PENSION ACCOUNTS.

(a) ELECTION OF QUALIFIED ROLLOVER UPON SEPARATION FROM SERVICE IF ACCRUED BENEFIT LESS THAN $7,000.—Section 401(a) of the Internal Revenue Code of 1954 (relating to requirement for qualification) is amended by adding at the end thereof the following new paragraph:

"(26) ELECTION OF QUALIFIED ROLLOVER UPON SEPARATION FROM SERVICE IF ACCRUED BENEFIT LESS THAN $7,000.—

"(A) IN GENERAL.—A trust shall not constitute a qualified trust under this section unless the plan of which such trust is a part provides that a participant's nonforfeitable benefit shall be distributed to a portable pension account if—

"(i) the plan is—

"(I) a defined benefit plan, or

"(II) a defined contribution plan which is subject to the funding standards of section 412,

"(ii) the present value, as of the date of separation from service, of such benefit is less than $7,000, and

"(iii) the participant elects, in writing, after receiving the notice required in subparagraph (B), to have such benefit distributed to such portable pension account in a distribution which is excluded from gross income under section 402(a)(5)(A).

The Secretary shall prescribe by regulation the manner and form in which an election under clause (iii) is to be made.

"(B) NOTICE REQUIREMENT.—Upon being informed by a participant that the participant

wishes to make an election pursuant to subparagraph (A)(iii), the plan administrator shall provide notice to the participant of—

"(i) the present value, as of the date of separation from service, of the participant's nonforfeitable benefit,

"(ii) the amount of the participant's benefit on the date of the participant's retirement payable under the pension plan at normal retirement age, expressed—

"(I) if the plan is a defined benefit plan, in the form of a single life annuity, or

"(II) if the plan is a defined contribution plan described in subparagraph (A)(i)(II), in the normal form of payment under the plan, and

"(iii) the additional tax under section 408(f) on distributions from, or disqualifications of, the portable pension account before the date on which the participant attains age 59½.

"(C) DEFINITION AND SPECIAL RULE.—For purposes of this paragraph—

"(i) PORTABLE PENSION ACCOUNT.—The term 'portable pension account' means an individual retirement account (within the meaning of section 408(a)) or an individual retirement annuity (within the meaning of section 408(b)) under which contributions may consist only of distributions made to such account or annuity pursuant to this paragraph.

"(ii) PRESENT VALUE.—The present value, as of the date of separation from service, of a participant's nonforfeitable benefit under a plan shall be deemed to be equal to the actuarial equivalent, as of such date, of the normal form of benefit under the plan.".

(b) ADDITIONAL TAX ON EARLY DISTRIBUTIONS FROM PORTABLE PENSION ACCOUNTS BEFORE AGE 59½ AND IN DISQUALIFICATION CASES.—Subsection (f) of section 408 of such Code (relating to additional tax on certain amounts included in gross income before age 59½) is amended—

(1) by redesignating paragraph (3) as paragraph (4); and

(2) by inserting after paragraph (2) the following new paragraph:

"(3) PORTABLE PENSION ACCOUNTS.—In the case of a portable pension account (as defined in section 401(a)(26)(C)), paragraphs (1) and (2) shall be applied by substituting '100 percent' for '10 percent' each place it appears in such paragraphs.".

(b) PROSPECTIVE APPLICATION.—The amendment made by subsection (a), upon taking effect as provided in section 123, shall apply with respect to participants separated from service under the pension plan after the effective date set forth in such section.

Subpart 3—Additional Provisions

SEC. 121. STUDY ON COST-OF-LIVING ADJUSTMENTS UNDER PRIVATE PENSION PLANS.

The Secretary of Labor shall conduct a study of the feasibility and ramifications of requiring employee pension benefit plans to provide cost-of-living adjustments to benefits payable under such plans. The Secretary shall compile data and analyze the effect inflation is having and may be expected to have on retirement benefits provided under such plans. The Secretary shall submit the results of the study required by this section, together with any recommendations, not later than two years after the date of the enactment of this Act.

SEC. 122. EFFECTIVE DATE.

(a) IN GENERAL.—Subject to subsection (b), the amendments made by this title shall apply to plan years beginning after December 31, 1985.

(b) SPECIAL RULE FOR COLLECTIVE-BARGAINING AGREEMENTS.—In the case of a plan maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers ratified before the date of the enactment of this Act, the amendments made by this title shall not apply to plan years beginning before the earlier of—

(1) the date on which the last of the collective bargaining agreements relating to the plan terminates (determined without regard to any extension thereof agreed to after the date of the enactment of this Act), or

(2) January 1, 1988.

For purposes of paragraph (1), any plan amendment made pursuant to a collective bargaining agreement relating to the plan which amends the plan solely to conform to any requirement added by this title shall not be treated as a termination of such collective bargaining agreement.

PART B—SOCIAL SECURITY

SEC. 130 SHORT TITLE.

This part may be cited as the "Social Security Modernization Act".

Subpart 1—Earnings Sharing

SEC. 131. COMBINED EARNINGS OF HUSBAND AND WIFE DURING THEIR MARRIAGE TO BE DIVIDED EQUALLY AND SHARED BETWEEN THEM FOR BENEFIT PURPOSES.

Title II of the Social Security Act is amended by adding at the end thereof the following new section:

"SHARING OF EARNINGS BY MARRIED COUPLES

"SEC. 234. (a)(1) For purposes of determining the eligibility of an individual and the spouse of such individual for old-age and disability benefits and the amount of such benefits to which each is or may become separately entitled, the combined earnings of such individual and such spouse shall, to the extent that such earnings are attributable to the marriage period of such individual and such spouse (as determined under paragraph (2)), be divided equally between them and shared in accordance with this section.

"(2)(A) Except as provided in subparagraph (B), for purposes of this section, the term 'marriage period' means the period—

"(i) beginning with the first day of the calendar year in which the marriage of an individual and the spouse of such individual occurs, and

"(ii) ending with the last day of the calendar year preceding the earliest calendar year in which such individual or such spouse dies, they are divorced, or one of them files application for old-age or disability insurance benefits.

"(B)(i) No marriage period shall begin for any individual and the spouse of such individual if their marriage occurs after such individual or such spouse has filed an application for old-age insurance benefits.

"(ii) No marriage period shall include a period for which such individual or such spouse is entitled to disability insurance benefits or the waiting period (as defined in section 223(c)(2)) with respect to such benefits.

"(iii) A marriage period shall include the 'earliest calendar year' referred to in clause (ii) of subparagraph (A) for purposes of recomputations for that year under section 215(f)(2), in any case where an individual or the spouse of such individual dies or they are divorced, unless the survivor (where one of them dies) or either of them (where they are divorced) is remarried later in the same year.

"(b)(1) Except to the extent otherwise provided in subsections (c), (d), and (e), an individual and the spouse of such individual shall each be credited for all of the purposes of this title with wages and self-employment income, for each calendar year for which either of them is credited with any wages and self-employment income without regard to this section during their marriage period, in an amount equal to—

"(A) 50 percent of the combined total of the wages and self-employment income otherwise credited to both of them for that year if (at the close of the month for which the benefit determinations involved are being made) they are both still living, or

"(B) 100 percent of such combined total, up to but not exceeding the maximum amount that may be counted for that year without exceeding the ceiling imposed for that year under section 215(e), if (at the close of such month) one of them has died.

"(2) Nothing in this section shall affect the crediting of wages and self-employment income to any individual for any calendar year not included in a marriage period of such individual; but to the extent that wages and self-employment income are credited pursuant to this section the other provisions of this title specifying the manner in which wages and self-employment income are to be credited shall (to the extent inconsistent with this section) not apply.

"(3) Except where the context requires otherwise, for purposes of this section, the term 'spouse' includes a divorced spouse, a surviving spouse, and a surviving divorced spouse.

"(c) Subsections (a) and (b) shall not apply with respect to the crediting of wages and self-employment income for any calendar year, in the case of any individual and the spouse of such individual, if—

"(1) as a result of the application of such subsections with respect to that year such individual or such spouse would cease to be a fully insured individual (as defined in section 214(a)); or

"(2) such individual or such spouse is applying for disability insurance benefits (or for the establishment of a period of disability) and as a result of the application of such subsections with respect to that year would cease to be insured for such benefits under section 223(c)(1) (or for such a period under section 216(i)(3)).

"(d) Subsections (a) and (b) shall not apply for purposes of determining the amount of the benefit payable to any individual for any month if—

"(1) the total amount of the wages and self-employment income credited to such individual for a marriage period, as determined without regard to this section, is higher than the total amount of the wages and self-employment income credited to such individual's spouse for that period, as so determined; and

"(2) such individual's spouse (taking subsections (a) and (b) into account) has not filed application for old-age or disability insurance benefits by the close of such month.

"(e) Notwithstanding any of the preceding provisions of this section—

"(1) benefits payable under subsection (d) or (h) of section 202 on the basis of the wages and self-employment income of any individual, and benefits payable under subsection (b), (c), (e), (f), or (g) of such section 202 (on the basis of such wages and self-employment income) to any person other than a spouse who has shared in or been credited with a part of such individual's earnings under subsections (a) and (b) of this section,

shall be determined as though this section had not been enacted if—

"(A) the application of this section has changed such individual's primary insurance amount from what it would otherwise have been; and

"(B) the crediting of wages and self-employment income to such individual and the spouse of such individual without regard to this section would increase the amount of such benefits; and

"(2) in the application of section 203(a) (relating to maximum family benefits) with respect to benefits payable on the basis of the wages and self-employment income of any individual, where all or any part of the wages and self-employment income of such individual and the spouse of such individual was credited to them in accordance with this section, the primary insurance amount of such individual (and the crediting of such wages and self-employment income) shall be determined in accordance with this section but the benefits payable to any other person on the basis of the wages and self-employment income of such individual shall be determined without regard to this section.

"(f) Notwithstanding any other provision of this title, no wife's, husband's, widow's, or widower's insurance benefit shall be paid to any individual for any month under subsection (b), (c), (e), or (f) of section 202, and no individual shall be entitled to any such benefit, unless—

"(1) the period of such individual's marriage (to the spouse or former spouse on the basis of whose wages and self-employment income such benefit is payable) ended before the effective date of this section;

"(2) such individual is under the age of 62 (and is otherwise entitled to such benefit);

"(3) such benefit is payable without regard to age and solely by reason of such individual's having a child in his or her care; or

"(4) the application of this section to such individual is prevented by subsection (c) or (d) (or by clause (i) or (ii) of subsection (a)(2)(B)).

"(g) For purposes of subsections (a)(2) and (d), an individual's application for old-age or disability insurance benefits shall be deemed to have been filed on the first day of the first month for which (by reason of the operation of section 202(j) or 223(b)) such individual is entitled to such benefits.".

SEC. 132. CONFORMING AMENDMENTS.

(a) WIFE'S, HUSBAND'S, WIDOW'S, AND WIDOWER'S BENEFITS.—(1) Section 202(b)(1) of the Social Security Act is amended by striking out "The wife" and inserting in lieu thereof "To the extent permitted by section 234(g), the wife".

(2) Section 202(c)(1) of such Act is amended by striking out "The husband" and inserting in lieu thereof "To the extent permitted by section 234(g), the husband".

(3) Section 202(e)(1) of such Act is amended by striking out "The widow" and inserting in lieu thereof "To the extent permitted by section 234(g), the widow".

(4) Section 202(f)(1) of such Act is amended by striking out "The widower" and inserting in lieu thereof "To the extent permitted by section 234(g), the widower".

(b) MISCELLANEOUS.—(1) Section 205(c)(5) of such Act is amended—

(A) by striking out "or" at the end of subparagraph (I);

(B) by striking out the period at the end of subparagraph (J) and inserting in lieu thereof "; or"; and

(C) by adding at the end thereof the following new subparagraph:

"(K) to reflect any changes in the crediting of wages and self-employment income which may be necessitated by section 234.".

(2) Section 215(b) of such Act is amended by adding at the end thereof the following new paragraph:

"(5) The determination of the wages and self-employment income to be credited to an individual under this subsection shall in all cases be made after the application of section 234.".

SEC. 133. EFFECTIVE DATES.

(a) IN GENERAL.—Except as provided in subsection (b), the amendments made by this part shall apply only to wages and self-employment income payable after December 31, 1986, to an individual who has not attained age 50 on or before such date, and only if—

(1) the spouse of such individual has not attained age 50 on or before such date; and

(2)(A) in the case of a benefit based upon the attainment by the wage earner of age 62, such individual and such spouse attain age 62;

(B) in the case of a benefit based upon the death of the wage earner, such death occurs after December 31, 1986, and the individual claiming such benefit attains age 62; and

(C) in the case of a benefit described in subparagraph (A) or (B) with respect to a divorced individual and spouse, the divorce occurs after December 31, 1999.

(b) DISABILITY.—In the case of a disability insurance benefit, and a widow's or widower's insurance benefit based upon disability—

(1) if an individual is entitled to such benefit before January 1, 1987, the provisions of this Act shall not apply—

(A) for the period for which such individual continues to be entitled to such benefit, and

(B) in the case of an individual who continues to be entitled to such benefit until age 62, for the period such individual is entitled to an old-age insurance benefit; and

(2) if—

(A) an individual becomes entitled to such benefit after December 31, 1986, and before January 1, 1999; and

(B) the total benefits payable to all individuals on the basis of the wages and self-employment income of the individual upon whose disability such entitlement is based (determined without regard to the provisions of this part) exceeds the total of benefits payable to all individuals on the basis of the wages and self-employment income of the individual upon whose disability such entitlement is based, and to the spouse of such individual, under the provisions of this part,

the provisions of this part shall not apply for the period during which the conditions of subparagraph (B) continue to be met and during which such individual (i) continues to be eligible for such benefit, or (ii) in the case of such an individual who continued to be eligible for such benefit until age 62, is entitled to an old-age insurance benefit.

Subpart 2—Other Reforms

SEC. 141. FULL BENEFITS FOR DISABLED WIDOWS AND WIDOWERS WITHOUT REGARD TO AGE.

(a) IN GENERAL.—(1) Section 202(e)(1)(B) of the Social Security Act is amended by striking out "has attained age 50 but has not attained age 60 and".

(2) Section 202(f)(1)(B) of such Act is amended by striking out "has attained age 50 but has not attained age 60 and".

(b) ACTUARIAL REDUCTION.—(1) Section 202(q)(3)(A) of such Act is amended by striking out "age 50" and inserting in lieu thereof "age 60".

(2) Section 202(q) of such Act is further amended by adding at the end thereof the following new paragraph:

"(12) Notwithstanding any other provision of this section, there shall be no reduction under this subsection in the widow's or widower's insurance benefit of an individual for any month in which such individual is under a disability (as defined in section 223(d)); and none of the provisions of this subsection shall apply with respect to such benefit even though such benefit may have been so reduced prior to the onset of such disability.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to monthly insurance benefits payable under title II of the Social Security Act for months after the month in which this Act is enacted. The Secretary of Health and Human Services (without the necessity of any application therefor) shall redetermine the amount of any widow's or widower's insurance benefit which is payable for the month in which this Act is enacted in order to reflect such amendments as provided in the preceding sentence.

SEC. 142. PAYMENT OF TRANSITION BENEFITS TO CERTAIN SURVIVING SPOUSES.

(a) IN GENERAL.—Section 202 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"Transition Benefits for Surviving Spouses

"(y)(1) The widow or widower of a fully insured individual (within the meaning of section 216 (c) or (g)), if such widow or widower—

"(A) has attained age 50 at the time of such individual's death,

"(B) is not entitled (and would not upon application be entitled) to a monthly insurance benefit under any other provision of this section or under section 223 for the month in which such death occurs, and

"(C) has filed application for benefits under this subsection,

shall be entitled to a transition benefit for each month beginning with the month in which such death occurs and ending with the fourth month thereafter (or, if earlier, with the month preceding the first month thereafter in which such widow or widower remarries, dies, or becomes entitled to a monthly insurance benefit under any other provision of this section or under section 223).

"(2) The transition benefit of a widow or widower for any month under this subsection shall be equal to 71½ percent of the primary insurance amount of the insured individual, or (if it is larger and if such widow or widower is also a fully insured individual) to 71½ percent of the primary insurance amount of such widow or widower.

"(3) For purposes of this subsection, the determination of the primary insurance amount of a living individual under the age of 62, and the determination of whether or not such an individual is fully insured, with respect to any month, shall be made as though such individual had attained age 62 in that month.

"(4) The entitlement of an individual to transition benefits under this subsection shall not (after such entitlement has ended) affect the eligibility of such individual for any other monthly insurance benefits under this section or section 223, or be taken into account in determining the amount of any other benefits under this section or section

223 to which such individual may become entitled.

"(5) Transition benefits payable to an individual under this subsection shall not be considered monthly benefits to which such individual is entitled under this section for purposes of section 203(a), or for purposes of section 226(a).".

(b) CONFORMING AMENDMENTS.—(1) Section 202(j)(1) of such Act is amended by striking out "or (h)" and inserting in lieu thereof "(h), or (y)".

(2) Section 202(m)(1) of such Act (as in effect pursuant to section 2(j)(3)(D) of Public Law 97-123 (95 Stat. 1661)) is amended by inserting "(other than a transition benefit under subsection (y))" after "this section" where it first appears.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to deaths occurring on or after January 1, 1986.

SEC. 143. REPEAL OF SEPARATE DEFINITION OF DISABILITY PRESENTLY APPLICABLE TO WIDOWS AND WIDOWERS.

(a) IN GENERAL.—(1) Section 223(d)(2) of the Social Security Act is amended—

(A) by striking out "(except a widow, surviving divorced wife, widower, or surviving divorced husband for purposes of section 202 (e) or (f))" in subparagraph (A);

(B) by striking out subparagraph (B); and

(C) by redesignating subparagraph (C) as subparagraph (B).

(2) The third sentence of section 216(i)(1) of such Act is amended by striking out "(2)(C)" and inserting in lieu thereof "(2)(B)".

(b) ENTITLEMENT TO HOSPITAL INSURANCE BENEFITS.—(1) Section 226(e) of the Social Security Act is amended by adding at the end thereof the following new paragraph:

"(5) For purposes of determining entitlement to hospital insurance benefits under subsection (b) in the case of an individual described in clause (iii) of subsection (b)(2)(A), any month which occurred before the repeal in 1985 of section 223(d)(2)(B) (providing a separate definition of disability for widows, surviving divorced wives, widowers, and surviving divorced husbands), and for which such individual—

"(A) was paid a supplemental security income benefit under title XVI on the basis of disability, and

"(B) met all of the requirements for entitlement to widow's insurance benefits under section 202(e) or widower's insurance benefits under section 202(f) on the basis of disability except the requirement of a disability determined under the separate definition contained in such section 223(d)(2)(B) (and the requirement of application),

may at such individual's election (made in such manner and form as the Secretary shall prescribe) be included as one of the 24 months for which such individual must have been entitled to widow's or widower's insurance benefits on the basis of disability in order to become entitled to hospital insurance benefits on that basis.".

(2) Section 223(f) of such Act is amended by inserting after "shall not include any month" in the matter following paragraph (2) the following: "(other than a month described in subsection (e)(5))".

(c) EFFECTIVE DATES.—(1) The amendments made by subsection (a) shall apply with respect to monthly insurance benefits under title II of the Social Security Act for months after the month in which this Act is enacted.

(2) The amendments made by subsection (b) shall apply with respect to entitlement to hospital insurance benefits under part A of title XVIII of the Social Security Act for months after the month in which this Act is enacted.

PART C—FORMER MILITARY SPOUSES

SEC. 151. SHORT TITLE.

This part may be cited as the "Uniformed Services Former Spouses' Equity Act".

SEC. 152. FORMER SPOUSE SHARE OF RETIRED OR RETAINER PAY.

(a) IN GENERAL.—Chapter 73 of title 10, United States Code, relating to annuities based on retired or retainer pay, is amended by adding at the end thereof the following new subchapter:

"SUBCHAPTER III—FORMER SPOUSE SHARE OF RETIRED OR RETAINER PAY

"Sec.
"1456. Definitions.
"1457. Former spouse share of retired or retainer pay.
"1458. Reduction in retired or retainer pay.

"§ 1456. Definitions

"In this subchapter:

"(1) 'Former spouse' means a former wife or husband of a member who was married to that member for not less than 10 years during which that member performed creditable service.

"(2) 'Court' has the meaning given such term in section 1408(a)(1) of this title.

"(3) 'Court order' means a court decree of divorce or annulment, or a court order or court approved property settlement agreement incident to a final court decree of divorce or annulment.

"(4) 'Pro rata share', in the case of a former spouse of a member eligible for retired or retainer pay, means the percentage which is equal to the percentage that (A) the number of years during which the former spouse was married to the member during the creditable service of that member is of (B) the total number of years of such creditable service.

"(5) 'Spousal agreement' means any written agreement between a member and that member's former spouse which is in writing and acknowledged before a notary public.

"(6) 'Creditable service' means service credited to a member for the purpose of determining the eligibility of that member for retired or retainer pay.

"(7) 'Member' includes a former member eligible for retired or retainer pay.

"§ 1457. Former spouse share of retired or retainer pay

"(a) Unless otherwise expressly provided by a spousal agreement or court order, a former spouse of a member who is entitled to retired or retainer pay is entitled to an annuity—

"(1) if married to the member throughout the creditable service of the member, equal to 50 percent of the retired or retainer pay of the member; or

"(2) if not married to the member throughout the creditable service of the member, equal to the former spouse's pro rata share of 50 percent of the retired or retainer pay of the member.

"(b)(1) Except as provided in paragraph (2), the amount of retired or retainer pay used for the computation of an annuity under this section shall be determined after any reduction in such retired or retainer pay required under section 1452 of this title.

"(2) The reduction required under paragraph (1) shall not apply to the computation of an annuity under this section for a former spouse who is not provided with a survivor annuity under subchapter II of this chapter.

"(c)(1) An annuity of a former spouse under this section commences on the later of—

"(A) the day on which the member upon whose service the annuity is based becomes entitled to retired or retainer pay; or

"(B) the first day of the month in which the divorce, annulment, or legal separation involved becomes final.

"(2) Such annuity and the right to such annuity terminate—

"(A) on the last day of the month before the month in which the former spouse dies; or

"(B) on the date the retired or retainer pay of the member upon whose service the annuity is based terminates.

"(3) If a member elects to combine creditable military service with creditable civilian service for the purpose of computing an annuity under subchapter III of chapter 83 of title 5, any annuity provided under this subchapter to a former spouse of that member shall not terminate or be reduced as a result of any such election.

"(4) If a member entitled to retired or retainer pay is recalled to active duty, any annuity provided under this subchapter to a former spouse shall not terminate or be reduced as a result of such recall.

"(b) A former spouse is not entitled to an annuity under this subchapter based upon the service of a member unless the former spouse elects to receive it instead of any other annuity to which the former spouse may be entitled under this chapter or any retirement system for Government employees on the basis of a marriage to someone other than the member.

"§ 1458. Reduction in retired or retainer pay

"The retired or retainer pay payable to a member shall be reduced by the amount of an annuity under this subchapter paid to any former spouse of that member based on the service of that member. Such reduction shall be disregarded in calculating any annuity under subchapter II of this chapter and in calculating any reduction in the retired or retainer pay of the member to provide survivor benefits under such subchapter.".

(b) CLERICAL AMENDMENT.—The table of subchapters at the beginning of chapter 73 of title 10, United States Code, is amended by adding at the end thereof the following new item:

"III. Former Spouse Share of Retired or Retainer Pay ..... 1456".

SEC. 153. FORMER SPOUSE SHARE OF SURVIVOR ANNUITY.

(a) APPLICATION OF SURVIVOR BENEFIT PLAN.—(1) Subsection (a) of section 1448 of title 10, United States Code, relating to the application of the Survivor Benefit Plan, is amended—

(A) in paragraph (2)—

(i) by inserting "except to the extent otherwise provided under paragraph (3)," in clause (A) before "to a person";

(ii) by striking out "is married" both places it appears and inserting in lieu thereof "is married, has a former spouse,"; and

(iii) by striking out ", unless he elects" in clause (A) and all that follows through "that pay"; and

(B) by striking out paragraphs (3) and (4) and inserting in lieu thereof the following:

"(3)(A) A married person eligible under paragraph (1)(A) to participate in the Plan and such person's spouse may jointly elect not to participate in the Plan, to participate in the Plan at reduced level, or to provide an annuity for a dependent child but not for

such spouse. Any such election shall be in writing and shall be acknowledged before a notary public.

"(B) A married person eligible under paragraph (1)(B) to participate in the Plan may not make an election under subclause (iii) of paragraph (2)(B) to participate in the Plan at a reduced level or to provide an annuity for a dependent child but not for the spouse without the agreement of the spouse. Any such agreement shall be in writing and shall be acknowledged before a notary public. An election under this subparagraph is irrevocable if not revoked before the end of the 90-day period referred to in paragraph (2)(B)(iii).

"(C) A person who has a former spouse when such person becomes eligible to participate in the Plan and that former spouse may jointly elect by a spousal agreement or as provided under a court order to provide a survivor annuity to the former spouse under clause (1) of section 1450(a) or, alternatively, under clause (4) of such section, or to waive any such annuity.".

(2) Subsection (b) of such section is amended—

(A) by striking out "(1)" after "(b)"; and

(B) by striking out paragraphs (2), (3), and (4).

(b) TREATMENT OF BENEFICIARIES UNDER SURVIVOR BENEFIT PLAN.—(1) Subsection (a) of section 1450 of title 10, United States Code, relating to beneficiaries under the Survivor Benefit Plan, is amended—

(A) in clause (1), by inserting "and any eligible former spouse, as provided under section 1448(a)(3)(C) of this title" after "or widower";

(B) in clause (2), by striking out "if the eligible widow or widower is dead, dies, or otherwise becomes ineligible" and inserting in lieu thereof "if the eligible widow, widower, and any former spouse are dead, die, or otherwise become ineligible";

(C) in clause (3)—

(i) by inserting "the spouse or any former spouse and" after "if"; and

(ii) by inserting "or any former spouse" after "spouse"; and

(D) in clause (4) by inserting ", as provided under section 1448(a)(3)(C) of this title," after "former spouse" the first place it appears.

(2) Subsection (b) of such section is amended—

(A) by striking out "widow or widower" each place it appears and inserting in lieu thereof "widow, widower, or former spouse"; and

(B) by striking out "age 60" each place it appears and inserting in lieu thereof "age 55".

(3) Subsection (f) of such section is amended—

(A) in paragraph (1)—

(i) by striking out "subject to paragraph (2)";

(ii) by striking out "former spouse or other"; and

(iii) by striking out "(1) after "(f)"; and

(B) by striking out paragraphs (2) and (3).

(4) Subsection (k) of such section is amended by striking out "60 years of age" and inserting in lieu thereof "55 years of age".

(c) COMPUTATION OF ANNUITIES PAYABLE UNDER SURVIVOR BENEFIT PLAN.—(1) Paragraph (1) of subsection (a) of section 1451 of title 10, United States Code, relating to the computation of the amount of any annuity payable under the Survivor Benefit Plan, is amended by inserting "former spouse," after "widower,".

(2) Paragraph (2) of such subsection is amended by inserting "or former spouse" after "widow" both places it appears.

(3) Paragraph (3) of such subsection is amended by striking out "widow or widower" each place it appears and inserting in lieu thereof "widow, widower, or former spouse".

(4) Subsection (c) of such section is amended by striking out "section, or section 1448(d) of this title," and inserting in lieu thereof "subchapter".

(5) Such section is further amended by adding at the end thereof the following new subsection:

"(f) The maximum annuity or combination of annuities under this subchapter with respect to any person to whom section 1448 applies may not exceed 55 percent of the full amount of such person's retired or retainer pay.".

(d) REDUCTIONS IN RETIRED OR RETAINER PAY.—Section 1452 of title 10, United States Code, relating to reductions in retired or retainer pay, is amended—

(1) in subsection (a)—

(A) by inserting "or former spouse" after "spouse" in the first sentence each place it appears except the place referred to in subclause (B);

(B) by inserting "and former spouse (if any)" in such sentence after "in favor of his spouse";

(C) by inserting "or an eligible former spouse and a dependent child" in the second sentence after "an eligible spouse and a dependent child"; and

(D) by inserting "or former spouse" in the third sentence after "eligible spouse"; and

(2) in subsection (b), by inserting "or former spouse" after "spouse" each place it appears.

(e) DEFINITIONS APPLICABLE TO SURVIVOR BENEFIT PLAN.—Section 1447 of title 10, United States Code, relating to definitions applicable to the Survivor Benefit Plan, is amended—

(1) by striking out "by the person providing the annuity" in paragraph (2)(C) and inserting in lieu thereof "in accordance with section 1448(a)(3) of this title"; and

(2) by striking out "he" in paragraph (2)(C) the first place it appears and inserting in lieu thereof "the person providing the annuity".

(f) REGULATIONS.—Section 1455 of title 10, United States Code, relating to regulations prescribed to carry out the Survivor Benefit Plan, is amended by striking out clause (1) and inserting in lieu thereof the following:

"(1) provide that the member and the spouse and former spouse (if any) of the member shall, before the date on which the member becomes entitled to retired or retainer pay, be informed of the elections available under section 1448(a) of this title and the effects of such elections; and".

SEC. 154. SURVIVOR ANNUITIES IN CASES OF DIVORCE BEFORE THE EFFECTIVE DATE.

(a) DIVORCES MADE FINAL BEFORE THE DATE OF ENACTMENT.—(1) Any member of the uniformed services who, before the date of the enactment of this Act, participated in the Survivor Benefit Plan under subchapter II of chapter 73 of title 10, United States Code, and had elected to provide a survivor annuity to a former spouse under section 1450(a)(4) of such subchapter shall, if provided for under a spousal agreement or court order, terminate such annuity and provide an annuity to such former spouse under section 1450(a)(1). Any such election shall be made before the end of the 24-month period beginning after the date of the enactment of this Act.

(2) Any member of the uniformed services who, before the date of the enactment of this Act, was eligible to participate in the Survivor Benefit Plan referred to in paragraph (1) and elected not to provide a survivor annuity to a former spouse shall, if provided for under a spousal agreement or court order, elect to provide any such annuity under clause (1) or clause (4) of section 1450(a) to such former spouse. Any such election shall be made before the end of the 24-month period beginning after the date of the enactment of this Act.

(b) MEMBER DECEASED BEFORE EFFECTIVE DATE.—In the case of a member who dies before the effective date of this Act after becoming entitled to retired or retainer pay and who—

(1) at the time the member became entitled to retired or retainer pay was married and did not elect to participate in the Survivor Benefit Plan;

(2) subsequently was divorced from the spouse who was the member's beneficiary under the Survivor Benefit Plan at such time; and

(3) died without a beneficiary under the Survivor Benefit Plan,

the individual to whom the member was married at the time the member became entitled to retired or retainer pay shall be entitled to an annuity under the Survivor Benefit Plan as if married to the member at the time of death if the individual qualifies as a former spouse.

(c) DEFINITIONS.—For purposes of this section:

(1) The terms "former spouse" and "court order" have the meanings given such terms in section 1447 of title 10, United States Code.

(2) The term "spousal agreement" has the meaning given such term in section 1456(5) of title 10, United States Code.

(3) The term "uniformed services" has the meaning given such term in section 101 of title 37, United States Code.

(4) The term "member" includes a former member entitled to retired or retainer pay.

SEC. 155. FORMER SPOUSE SHARE OF RETIRED OR RETAINER PAY IN COMPLIANCE WITH COURT ORDER.

(a) ELIMINATION OF CERTAIN REDUCTIONS FROM RETIRED OR RETAINER PAY.—Section 1408 of title 10, United States Code, is amended—

(1) in subsection (a)(4)—

(A) by striking out "Disposable retired" and inserting in lieu thereof "Retired"; and

(B) by striking out "less amounts which—" and all that follows and inserting in lieu thereof a period; and

(2) by striking out "disposable" each place it appears.

(b) ELIMINATION OF 10-YEAR REQUIREMENT; PROVISION OF PRO RATA SHARE.—Subsection (d)(2) of such section is amended to read as follows:

"(d)(2) Any court order described in paragraph (1) may provide a pro rata share (as defined in section 1456(4) of this title) of the retired or retainer pay of such member to such spouse or former spouse.".

SEC. 156. EFFECTIVE DATES.

(a) IN GENERAL.—This part shall become effective on the first day of the first month which begins no earlier than 60 days after the date of the enactment of this Act.

(b) FORMER SPOUSE SHARE OF RETIRED OR RETAINER PAY.—Subchapter III of chapter 73 of title 10, United States Code (relating

to former spouses' pro rata share of the retired or retainer pay of a member of the uniformed services), shall apply in the case of any individual who on or after the effective date of this Act becomes a former spouse (as defined in section 1456(1) of such title) of an individual entitled to retired or retainer pay on or after that date.

(c) SURVIVOR ANNUITIES.—Except as provided in section 154, the amendments made by section 153 (relating to the Survivor Benefit Plan) shall apply in the case of any individual who on or after the effective date of this Act becomes a former spouse (as defined in section 1456(1) of such title) of a member or former member of the uniformed services.

(d) COMPLIANCE WITH COURT ORDERS.—The amendments made by section 155 (relating to former spouses' share of or retired or retainer pay in compliance with court orders) shall apply with respect to payments of retired or retainer pay payable for any month which begins after the date of the enactment of this Act.

TITLE II—DEPENDENT CARE

PART A—SOCIAL SERVICES PROGRAM (TITLE XX)

SEC. 200. SHORT TITLE.

This part may be cited as the "Social Services and Child Care Assistance Act of 1985".

SEC. 201. INCREASE IN TOTAL AMOUNT OF TITLE XX FUNDS AVAILABLE FOR ALLOTMENT.

Section 2003(c) of the Social Security Act is amended—

(1) by striking out "and" after the semicolon at the end of paragraph (2); and

(2) by striking out paragraph (3) and inserting in lieu thereof the following:

"(3) $2,700,000,000 for the fiscal year 1984;

"(4) $2,725,000,000 for the fiscal year 1985; and

"(5) $3,370,250,000 for the fiscal year 1986 and for each succeeding fiscal year.".

SEC. 202. ALLOTMENT AND USE OF FUNDS FOR SPECIFIC PURPOSES.

(a) IN GENERAL.—Title XX of the Social Security Act is further amended by redesignating sections 2004 through 2007 as sections 2005 through 2008, respectively, and by inserting after section 2003 the following new section:

"ALLOCATION AND USE FOR SPECIFIC PURPOSES

"SEC. 2004. (a) The amount specified in section 2003(c)(5) and available for any fiscal year shall be allocated by the Secretary, and used, in accordance with this section.

"(b) $250,000 shall be reserved by the Secretary to fund a National Resource Center on Family Day Care which shall be operated on a regional basis, either directly or through grant or contract, to—

"(1) offer training to individuals involved in training family day care providers;

"(2) serve as a clearinghouse for resource materials on family day care; and

"(3) provide technical assistance to family day care sponsors, family day care providers, and individuals involved in training family day care providers on laws and regulations applicable to the provision of family day care services, including but not limited to zoning, tax, liability, and other issues of particular concern to family day care.

"(c) The remaining amount shall be allotted to the States in accordance with section 2003 and used by them for the provision of services (including, as appropriate, training and child care services both of the types described in paragraphs (1) and (2) and otherwise) in accordance with this title; except that of such amount—

"(1) $70,000,000 (allotted among the States in the same proportions as their regular allotments determined under section 2003(a) or (b)) shall be used only for training as follows:

"(A) 50 percent shall be used for the training and retraining of human services personnel generally authorized under this title (including, as appropriate, those training activities described in subparagraph (B)), and

"(B) 50 percent shall be used only for purposes of providing training and retraining (including training in the prevention of child abuse in child care settings) to providers of licensed or registered child care services, operators and staffs (including those receiving in-service training) of facilities where licensed or registered child care services are provided, State licensing and enforcement officials, and parents; and

"(2) $300,000,000 (allotted among the States in the same proportions as their regular allotments determined under section 2003(a) or (b)) shall be used only for the provision of child day care services—

"(A) to children who are abused or neglected, or are at risk of being abused or neglected, and who are in families receiving child protective services,

"(B) to children of eligible families who are recipients of aid to families with dependent children, and

"(C) to children of low-income (i) adolescent parents, (ii) working parents, (iii) parents enrolled in education or training programs, or (iv) parents seeking employment.

"(d) The funds made available under subsections (c)(1) and (c)(2)—

"(1) shall be expended only to supplement the level of any funds that would, in the absence of the additional funds appropriated for the training, child day care services, and licensing, regulations, and monitoring described in those subsections, be available from other sources (including any amounts available under this title without regard to such subsections) for those purposes;

"(2) shall be separately accounted for in the reports and audits provided for in section 2007; and

"(3) shall not be subject to the provisions of section 2002(d) (permitting a State to transfer up to 10 percent of its title XX funds for purposes authorized under other Federal block grant programs).".

(b) CONFORMING AMENDMENTS.—(1) Section 2003(b) of such Act is amended—

(A) by adding "and further reduced by" after the comma at the end of paragraph (2); and

(B) by inserting immediately after paragraph (2) the following new paragraph:

"(3) the amounts reserved by the Secretary for that fiscal year under section 2004(b),".

(2) Subsection (a) of section 2007 of such Act (as redesignated by subsection (a) of this section) is amended by striking out "section 2004" and inserting in lieu thereof "section 2005".

SEC. 203. IMPROVEMENT OF CHILD CARE STANDARDS.

Title XX of the Social Security Act is further amended by adding at the end thereof the following new sections:

"STATE REVIEW OF CHILD CARE LICENSING AND REGULATORY SYSTEMS

"SEC. 2009. (a) As a condition of the State's eligibility for receiving Federal payments under this title for any fiscal year after fiscal year 1985, the Governor of each State shall establish or designate a State Advisory Committee on Child Care Standards (hereinafter referred to as the 'State Advisory Committee') which shall be composed of not less than fifteen members, of which not less than one-third shall be parents of children who are currently enrolled in child care programs (including both center-based and family day care home programs) and not less than one-third shall be either representatives of different types of child care programs (including both center-based and family day care home programs) or individuals who are professionals in the field of child development.

"(b)(1) It shall be the function of each such State Advisory Committee to examine, investigate, and study the State's laws, regulations, and procedures for licensing, regulating, and monitoring child care services and programs within the State, to prepare the report described in paragraph (2), and, if requested by the Governor, to monitor such licensing, regulating, and monitoring activities on a regular basis.

"(2) Each State Advisory Committee shall prepare a report outlining the committee's findings and recommendations resulting from its examination, investigation, and study under this section, including a description of the current status of child care licensing, regulating, or monitoring within the State, the deficiencies, if any, in the existing licensing, regulating, or monitoring programs (including an assessment of the adequacy of staff to carry out effectively the State program), and recommendations to correct such deficiencies, if any, or to improve such licensing, regulating, or monitoring programs. The report shall set forth separately such information and recommendations with respect to center-based programs and family day care programs. The committee shall submit the report to the Governor not later than June 1, 1986, and the Governor of each State shall, not later than September 30, 1986, transmit it to the Secretary along with the Governor's comments and the State's plan, as provided for under section 2011, for correcting deficiencies in or improving its licensing, regulating, or monitoring programs.

"(c) In carrying out its activities under subsection (b), each State Advisory Committee shall review and take into consideration the final 1980 HEW Day Care Regulations, volume 45, page 17870 of the Federal Register (March 19, 1980), and the options for child care standards published by the Department of Health and Human Services in January 1985 pursuant to Public Law 98-473, including the standards set forth in the appendices to that document.

"NATIONAL ADVISORY COMMITTEE ON CHILD CARE STANDARDS

"SEC. 2010. (a)(1) In order to assist and provide guidance to the States in improving the quality of child care services, there is established a National Advisory Committee on Child Care Standards (hereinafter referred to as the 'National Advisory Committee').

"(2) The National Advisory Committee shall be composed of fifteen members who shall be individuals with expertise in the area of child care services selected from among persons who are representatives of child care providers, professionals in the field of child development, or parents who have been actively involved in community child care programs. The members shall be appointed as follows:

"(A) Seven by the President of the United States;

"(B) Two by the majority leader of the Senate;

"(C) Two by the minority leader of the Senate;

"(D) Two by the Speaker of the House of Representatives; and

"(E) Two by the minority leader of the House of Representatives.

Not more than four of the members described in clause (A) shall be members of the same political party.

"(3) All appointments under this subsection shall be made not later than sixty days after the date of the enactment of this section.

"(4) A vacancy in the membership of the National Advisory Committee shall be filled in the same manner in which the original appointment was made. Any such vacancy shall not affect the powers of the National Advisory Committee except with respect to satisfaction of the quorum requirements specified in paragraph (7).

"(5) The President shall designate a Chairman of the National Advisory Committee.

"(6) The National Advisory Committee shall adopt such rules and regulations as it considers necessary to establish its procedures and to govern the manner of its operations, its organization, and its personnel.

"(7) Eight members of the National Advisory Committee shall constitute a quorum.

"(b)(1) The National Advisory Committee shall review the options for child care standards published by the Department of Health and Human Services in January 1985 pursuant to Public Law 98-473, including the standards set forth in the appendices to that document, the standards set forth in the final 1980 HEW Day Care Regulations, volume 45, page 17870 of the Federal Register (March 19, 1980), and such other materials as the National Advisory Committee may deem appropriate and shall, not later than fourteen months after the date of the enactment of this section, submit to the Secretary proposed recommended standards for child care programs (setting forth separate recommended standards for center-based programs and for family day care programs). Such recommended standards shall cover factors having a demonstrated impact on the quality of child care including, but not limited to—

"(A) group size and composition in terms of the number of teachers and the number and age of children;

"(B) qualifications, training, and background of child care personnel, including provision for background checks;

"(C) health and safety requirements;

"(D) parental rights and opportunities for involvement; and

"(E) necessary support services (including, but not limited to, health, nutrition, and social services).

"(2) The National Advisory Committee may submit to the Secretary and to the Congress such additional comments on the final recommended standards published pursuant to subsection (c) as the National Advisory Committee considers appropriate and may provide to a State Advisory Committee (established or designated pursuant to section 2009), upon its request, such information and advice as the National Advisory Committee considers appropriate.

"(c) Not later than thirty days after the National Advisory Committee submits such proposed recommended standards, the Secretary shall publish them in the Federal Register, along with any comments or modifications proposed by the Secretary and, not later than one hundred and eighty days after such publication and, after completion of a process of not less than sixty days for notice and opportunity for public comment and after consulting further with the National Advisory Committee, shall issue final recommended standards and publish them in the Federal Register along with any additional comments that the National Advisory Committee considers appropriate.

"(d) The National Advisory Committee shall cease to exist ninety days after the date of publication by the Secretary of the final recommended standards.

"(e) Each member of the National Advisory Committee who is not an officer or employee of the United States Government shall be paid compensation at a rate equal to the daily equivalent of the rate of basic pay in effect for level IV of the Executive Schedule for each day the member is engaged in the performance of the duties of such Committee and, while so serving away from his or her home or regular place of business, be paid per diem, travel, and transportation expenses in the same manner as provided for under subchapter I of chapter 57 of title 5, United States Code.

"(f) The Secretary shall make available to the National Advisory Committee such personnel, technical assistance, and funds as are necessary for it to carry out effectively its functions under this section.

"GRANTS FOR IMPROVING STATE CHILD CARE LICENSING AND REGULATORY SYSTEMS

"SEC. 2011. (a)(1) In addition to any other amounts authorized to be appropriated for carrying out this title and in order to further the activities begun with funds appropriated for fiscal year 1985 by section 401(a)(2) of Public Law 98-473, making continuing appropriations for the fiscal year 1985, there are authorized to be appropriated an additional $50,000,000 for each of fiscal years 1986, 1987, and 1988 for the purpose of making grants to the States as provided for in subsection (b).

"(2) Funds appropriated under this subsection shall remain available for expenditure until the end of the fiscal year following the fiscal year in which such funds became available.

"(b)(1) From the funds made available under subsection (a), the Secretary shall make grants, upon application and submission by a State of a plan which meets the requirements of subsection (b)(2), for the purpose of assisting the State in carrying out such plan.

"(2)(A) Except as provided in subparagraph (B), any State desiring to receive a grant under this section shall submit to the Secretary a plan to carry out the recommendations, for correcting the deficiencies in or improving the State's licensing, regulating, or monitoring of child care programs, contained in the report submitted under section 2009.

"(B) A State's plan submitted under this paragraph may include carrying out less than all of such recommendations, but in the event that a plan omits carrying out any recommendation the plan shall include a detailed explanation of the reasons for the State not planning to carry out any such omitted recommendation.

"(3) No grant may be made under this section unless the State submits an application to the Secretary therefor at such time, in such manner, and containing or accompanied by such information as the Secretary considers necessary.

"(c) In making grants under this section, the Secretary shall initially allocate funds among the States in the same proportions as their regular allotments as determined under section 2003 (a) or (b); except that if any part of the amount made available under this section remains after all grants have been made in accordance with the preceding provisions of this sentence, the Secretary shall use the remaining part for making further grants to States which require additional assistance to carry out their plans submitted under subsection (b), but for years after fiscal year 1986 priority shall be given in distributing such additional funds to those States which have developed a plan which will lead to such States meeting or exceeding the recommended standards established by the National Advisory Committee pursuant to section 2010.

"(d) Each State which submits an application for a grant under this section must provide satisfactory assurances that the funds therefrom will be used solely for improving the State's licensing, regulating, or monitoring of child care programs or otherwise improving the quality of child care programs within the State.".

PART B—HIGHER EDUCATION ACT

SEC. 211. CHILD CARE PROGRAM FOR POSTSECONDARY STUDENTS.

Title IV of the Higher Education Act of 1965 is amended by inserting after part C the following new part:

"PART D—SCHOOL-BASED CHILD CARE PROGRAMS

"GENERAL PURPOSES

"SEC. 451. It is the purpose of this part to expand the availability of child care services for college students, particularly low-income college students, to expand their access to institutions of higher education.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 452. (a) There are authorized to be appropriated to carry out the purposes of section 453, $10,000,000 for fiscal year 1986 and such sums as may be necessary for the fiscal years 1987, 1988, 1989, and 1990.

"(b) There are authorized to be appropriated to carry out the purposes of section 454, $15,000,000 for the fiscal year 1986 and such sums as may be necessary for the fiscal years 1987, 1988, 1989, and 1990.

"CHILD CARE PERSONNEL WORK-EXPERIENCE PROGRAM

"SEC. 453. (a) Funds appropriated pursuant to section 452(a) shall be used by the Secretary to make grants to institutions of higher education to operate programs which provide practical experience to students studying child care by arranging part-time employment in child care programs.

"(b) Any institution wishing to receive a grant under this section shall submit an application to the Secretary. Such application shall include—

"(1) information on the number of students attending the institution who receive student aid;

"(2) a description of the child care programs which have agreed to employ the students;

"(3) assurances by the applicant to the Secretary that—

"(A) the program will not result in the displacement of employed workers but will expand the child care services available;

"(B) the institution will not discriminate on the basis of race, religion, sex or national origin in the selection of students to participate in the program;

"(C) the institution will use the funds from the grant to provide a stipend to students participating in the program; and

"(D) the program will not pay a stipend that is less than the current Federal minimum wage as mandated by section 6(a) of the Fair Labor Standards Act of 1938; and

"(4) such information (and meet such conditions) as may be required by the Secretary.

"(c) In making the grants under this section, the Secretary shall give a preference to any applicant which—

"(1) serves large numbers of students receiving student asisstance under this title; and

"(2) participates in the special child care services program pursuant to section 454.

"SPECIAL CHILD CARE SERVICES FOR DISADVANTAGED COLLEGE STUDENTS

"SEC. 454. (a) Funds appropriated pursuant to section 452(b) shall be used by the Secretary to make grants to institutions of higher education to provide special child care services to disadvantaged college students.

"(b) Any institution wishing to receive a grant under this section shall submit an application to the Secretary. Such application shall include—

"(1) a description of the program to be established;

"(2) assurances by the applicant to the Secretary that—

"(A) not less than two-thirds of the participants in the program are low-income individuals who are first generation college students;

"(B) the remaining participants in the program are either low-income individuals or first generation college students;

"(C) the participants require the services to pursue a successful program of education beyond high school;

"(D) the participants are enrolled at the institution which is the recipient of the grant;

"(E) all participants will receive sufficient financial assistance to meet that student's full financial need for child care services; and

"(F) the institution will meet such full financial need of participants by providing child care through vouchers, contracted services, or direct provision of services; and

"(3) such information (and meet such conditions) as may be required by the Secretary.

"DEFINITIONS

"SEC. 455. For the purposes of this part—

"(1) the term 'first generation college student' means a person neither of whose parents completed a baccalaureate degree; and

"(2) the term 'low-income individual' means an individual from a family whose taxable income for the preceding year did not exceed 150 percent of an amount equal to the poverty level determined by using criteria of poverty established by the Bureau of the Census.".

PART C—PUBLIC HOUSING CHILD CARE DEMONSTRATION PROGRAM

SEC. 221. PUBLIC HOUSING CHILD CARE GRANTS.

(a) GENERAL AUTHORITY.—The Secretary of Housing and Urban Development shall, to the extent approved in appropriation Acts, carry out a demonstration program of making grants to public housing agencies to assist such agencies in providing child care services for lower income families who reside in public housing and are headed by eligible persons. The Secretary shall design such program to determine the extent to which the availability of child care services in lower income housing projects facilitates the employability of eligible persons who head such families.

(b) ELIGIBILITY.—The Secretary may make a grant to any public housing agency under this section only if—

(1) such public housing agency does not have a child care services program in operation prior to receipt of assistance under this section;

(2) such public housing agency agrees to provide suitable facilities for the provision of child care services;

(3) the child care services program of such public housing agency will serve preschool children during the day, elementary school children after school, or both, in order to permit eligible persons who head the families of such children to obtain, retain, or train for employment;

(4) the child care services program of such public housing agency is designed, to the extent practicable, to involve the participation of the parents of children benefiting from such program, with such participation including, but not limited to, employment with the child care program;

(5) the child care services program of such public housing agency is designed, to the extent practicable, to employ in part-time positions elderly individuals who reside in the lower income housing project involved; and

(6) the child care services program of such public housing agency complies with all applicable State and local laws, regulations, and ordinances.

(c) ALLOCATION.—In providing grants under this section, the Secretary shall—

(1) give priority to lower income housing projects in which reside the largest number of preschool and elementary school children of lower income families headed by eligible persons;

(2) seek to ensure a reasonable distribution of such grants between urban and rural areas and among lower income housing projects of varying sizes; and

(3) seek to provide such grants to the largest number of lower income housing projects practicable, considering the amount of funds available under this section and the financial requirements of the particular child care services programs to be developed by the applicant public housing agencies.

(d) APPLICATIONS AND USE OF GRANT.—

(1) Applications for grants under this section shall be made by public housing agencies in such form, and according to such procedures as the Secretary may prescribe.

(2) Any public housing agency receiving a grant under this section may use such grant only for operating expenses and minor renovations of facilities necessary to the provision of child care services under this section.

(e) EVALUATIONS AND LIMITATION.—

(1) The Secretary shall conduct periodic evaluations of each child care services program assisted under this section for purposes of—

(A) determining the effectiveness of such program in providing child care services and permitting eligible persons who head lower income families residing in public housing to obtain, retain, or train for employment; and

(B) ensuring compliance with the provisions of this section.

(2) Nothing in this section may be construed as authorizing the Secretary to establish any health, safety, educational, or other standards with respect to child care services or facilities assisted with grants received under this section.

(f) DEFINITIONS.—For the purposes of this section:

(1) The term "eligible person" means an individual who is the head of a household and (A) is unmarried; (B) is legally separated from his or her spouse under a decree of divorce or separate maintenance; (C) maintains a separate place of residence from his or her spouse and such spouse is not a member of such household; or (D) whose spouse is a person described in section 3(b)(3)(A) of the United States Housing Act of 1937.

(2) The term "lower income families" has the meaning given such term in section 3(b)(2) of the United States Housing Act of 1937.

(3) The terms "lower income housing project" and "public housing" have the meanings given such terms in section 3(b)(1) of the United States Housing Act of 1937.

(4) The term "public housing agency" has the meaning given such term in section 3(b)(6) of the United States Housing Act of 1937.

(5) The term "Secretary" means the Secretary of Housing and Urban Development.

(g) REPORT.—Not later than the expiration of the two-year period following the date of the enactment of this Act, the Secretary shall prepare and submit to the Congress a detailed report setting forth the findings and conclusions of the Secretary as a result of carrying out the demonstration program established in this section. Such report shall include any recommendations of the Secretary with respect to the establishment of a permanent program of assisting child care services in lower income housing projects.

(h) AUTHORIZATION.—There is authorized to be appropriated to carry out the provisions of this section not to exceed $3,000,000 for fiscal year 1986. Any amount appropriated under this subsection shall remain available until expended.

TITLE III—INSURANCE

PART A—NONDISCRIMINATION IN INSURANCE

SEC. 300. SHORT TITLE.

This part may be cited as the "Nondiscrimination in Insurance Act".

SEC. 301. FINDINGS AND POLICY.

(a) FINDINGS.—The Congress finds that—

(1) discrimination based on race, color, religion, sex, or national origin is contrary to the established policy of the United States;

(2) the business of insurance is interstate commerce;

(3) the business of insurance includes the terms, conditions, rates, benefits, and requirements of insurance policies and contracts, including annuity or pension contracts;

(4) discrimination in insurance is prevalent;

(5) insurance coverage is an essential element of modern life;

(6) discrimination in insurance unduly burdens the commerce of the country;

(7) discrimination in insurance places an unfair burden on consumers; and

(8) discrimination in insurance can be eliminated without unduly burdening those engaged in the business of providing insurance.

(b) POLICY.—The Congress therefore declares that it is the policy of the United States—

(1) to eliminate discrimination in insurance on the basis of race, color, religion, sex, or national origin;

(2) that no insurer may refuse to make insurance available to any applicant or treat any applicant or insured differently than any other applicant or insured with respect to the terms, conditions, rates, benefits, or

requirements of any contract of insurance on the basis of race, color, religion, sex, or national origin;

(3) to eliminate the use of statistical tables (whether of mortality, life expectancy, morbidity, disability, disability termination, losses, or any other subject) or other statistical compilations as a basis for action which is contrary to this part;

(4) to provide adequate remedies against those who fail to comply with the policy of eliminating discrimination under this part; and

(5) not to affect the existing responsibility and authority of States to regulate the business of insurance, if such regulation is consistent with and does not prevent compliance with this part.

SEC. 302. DEFINITIONS.

For purposes of this part, the term—

(1) "aggrieved person" means an insured or a beneficiary under any contract of insurance with respect to which an alleged discriminatory action has occurred;

(2) "discriminatory action" means action by an insurer which is unlawful under this part;

(3) "insurance" and "contract of insurance" mean any arrangement (whether by contract, policy, binder, reinsurance, employee benefit plan, or otherwise), including annuity and pension arrangements, whereby a person agrees to provide benefits (whether by reimbursement, periodic or lump-sum payments, provision of services, or otherwise) in case specified events occur in connection with death, disability, medical conditions, attainment of specified age, retirement from employment, accident and casualty, economic loss, theft, liability, or other similar circumstances;

(4) "insured" means any person—

(A) with respect to whose circumstances the terms of a contract of insurance apply,

(B) who is the owner of a contract of insurance, or

(C) who is an applicant or has attempted to become an applicant for a contract of insurance issued or offered to be issued by an insurer;

(5) "insurer" means any person—

(A) who provides insurance to others or otherwise engages in the business of insurance, and

(B) whose activities—

(i) affect interstate commerce,

(ii) utilize facilities of the United States Postal Service,

(iii) utilize any facilities used in interstate commerce by any person, or

(iv) result in a discriminatory action which is carried on under color of any law, statute, ordinance, or regulation, or which is required, permitted, or sanctioned by, or supported with funds provided by, the United States, any State, any political subdivision of any State, or any agency or officer of the United States or of any State or of any political subdivision of any State;

and includes such person's agent;

(6) "person" includes one or more individuals, governments, agencies of the United States or of any State or of any political subdivision of any State, labor unions, partnerships, associations, corporations, legal representatives, mutual companies, joint ventures, joint stock companies, societies, trusts, unincorporated organizations, trustees, trustees in bankruptcy, receivers, or fiduciaries;

(7) "sex" means gender, and discrimination on the basis of sex includes discrimination on the basis of pregnancy, childbirth, or related medical conditions of a female; and

(8) "State" includes any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.

SEC. 303. DISCRIMINATORY ACTIONS.

(a) IN GENERAL.—No insurer may, because of or on the basis of the race, color, religion, sex, or national origin of any person, whether through the use of any statistical table or other statistical compilation or not—

(1) refuse to make, refuse to negotiate, otherwise make unavailable or deny, or delay receiving and processing an application for, a contract of insurance of the type ordinarily made or offered by such insurer;

(2) treat any insured or beneficiary differently than the insurer treats or would treat any other insured or beneficiary with respect to the terms, conditions, rates, benefits, or requirements of any contract of insurance;

(3) make, print, or publish, or cause to be made, printed, or published, any notice, statement, or advertisement relating to any insurance coverage that such insurer provides or offers to provide, indicating any preference, limitation, specification, or discrimination based on the race, color, religion, sex, or national origin of any person;

(4) address, or fail to address, any particular person or group of persons in any effort to market contracts of insurance;

(5) charge or collect any premium payment or contribution which becomes due with respect to any contract of insurance after the effective date of this part; or

(6) determine the amount of, or provide to any insured or other beneficiary under a contract of insurance, any benefit after the effective date of this part.

(b) INSURANCE BENEFITS.—Nothing in this part shall affect the amount or type of benefits due under a contract of insurance the terms of which provide for regularly recurring periodic benefits if such regularly recurring periodic benefits have begun to be paid before the effective date of this part.

(c) LIFE INSURANCE BENEFITS.—Nothing in this part shall affect the amount or type of premium payments or contributions or benefits due under an individual contract of life insurance which was entered into before the effective date of this part.

(d) ANNUITY BENEFITS.—Nothing in this part shall affect the amount or type of premium payments or contributions or benefits due under an individual annuity contract which was entered into before the effective date of this part to the extent that the amount of benefits under such contract is fixed before the effective date of this part by the terms of such contract.

(e) INSURANCE COVERAGE TO RELIGIOUS AFFILIATION.—Nothing in this title prohibits an insurer who, before the effective date of this part regularly provided insurance coverage solely to persons of a single religious affiliation from continuing to provide insurance solely to persons of that religious affiliation.

(f) NONDISCRIMINATORY AUTO INSURANCE.—No insurer may charge rates for auto insurance applicable after the effective date of this part which are higher or lower for women or any particular group of women than for men or any similarly situated particular group of men, except for nongender related risk-based reasons.

(g) METHOD OF ACHIEVING GOAL.—Except as provided in section 308, nothing in this part shall require an insurer to use any particular method of achieving the goal of providing equal and nondiscriminatory benefits under any contract of insurance.

SEC. 304. STATE ENFORCEMENT PRIOR TO JUDICIAL ENFORCEMENT UNDER THIS PART.

(a) STATE ENFORCEMENT MUST BE PRIOR TO JUDICIAL ENFORCEMENT.—If an alleged discriminatory action occurs which falls under the jurisdictional reach of a State law—

(1) which prohibits such discriminatory action; and

(2) which establishes or authorizes a State administrative authority to grant or seek relief from such discriminatory action upon the filing of written notice of such discriminatory action within a specified period of not less than one hundred and eighty days after the alleged discriminatory action occurs,

an aggrieved person must seek relief under such State law in order to preserve the right to seek relief under section 306 of this part.

(b) FILING OF NOTICE.—For the purposes of this part, depositing a written statement of notice of an alleged discriminatory action in the United States mails by certified or registered mail addressed to the relevant State authority shall constitute filing of such notice.

(c) DEADLINE FOR FILING.—Where the alleged discriminatory action is continuing in character, any deadline for the filing of written notice of the alleged discriminatory action shall be computed for the purposes of this part from the last day on which such continuing discriminatory action occurred.

SEC. 305. CIVIL ACTION BY OR ON BEHALF OF AGGRIEVED PERSON.

(a) IN GENERAL.—(1) If no State law described in section 305(a) confers jurisdiction over an alleged discriminatory action, a civil action against the insurer may be brought by or on behalf of an aggrieved person for violation of this part under this section.

(2) If a State law described in section 304(a) exists which confers jurisdiction over an alleged discriminatory action and the aggrieved person has sought relief under such State law, a civil action against the insurer may be brought by or on behalf of the aggrieved person for violation of this part under this section after the expiration of one hundred and eighty days after the filing of written notice referred to in section 305(a), or after all administrative proceedings under such State law with respect to such alleged discriminatory action have terminated, whichever occurs sooner.

(b) TIME OF FILING.—Any civil action brought under this section must be instituted within one hundred and eighty days after the date on which it may first be brought under subsection (a) of this section, and may be instituted in any State court having jurisdiction to entertain such action under State law or in a United States district court having jurisdiction under section 307.

(c) APPOINTMENT OF ATTORNEY; PAYMENT OF FEES, COSTS, OR SECURITY.—Upon the plaintiff's application and in such circumstances as the court may deem just, the court before which a civil action is brought under this section may appoint an attorney for such plaintiff and may authorize the commencement of the civil action without the payment of fees, costs, or security.

(d) COURT MAY STAY FURTHER PROCEEDINGS.—Upon request of the relevant State authority or any party to a civil action brought under this section, the court may stay further proceedings for not more than sixty days pending the termination of State proceedings described in section 304.

SEC. 306. CIVIL ACTION BY THE ATTORNEY GENERAL INVOLVING ISSUES OF GENERAL PUBLIC IMPORTANCE.

Whenever the Attorney General of the United States has reasonable cause to believe that any person is engaged in a pattern or practice of violation of this part, or that any person is an aggrieved person with respect to any discriminatory action under this part, and an issue of general public importance is raised, the Attorney General may bring a civil action in any United States district court having jurisdiction under section 307 by filing with such court a complaint setting forth the facts and requesting such relief as the Attorney General considers necessary to ensure that the provisions and policies of this part are not violated.

SEC. 307. JURISDICTION.

Any civil action under section 305 or 306 instituted in a United States district court may be brought, without regard to the amount in controversy, in the United States district court of any judicial district in a State in which (1) the alleged discriminatory action occurred, (2) the defendant's principal office is located, (3) the defendant maintains and administers records relevant to the alleged discriminatory action, (4) the defendant resides or is located, (5) the defendant is incorporated or has a designated agent for service of process, or (6) the defendant transacts business. The case shall be heard at the earliest practicable time and expedited in every way.

SEC. 308. JUDICIAL RELIEF.

(a) IN GENERAL.—If the court in any civil action brought under section 305 or 306 determines that a defendant has committed a discriminatory action under this part, the court, in addition to any other powers which it may otherwise exercise—

(1) shall order the defendant to amend any relevant contract of insurance to comply with the provisions of this part;

(2) shall award actual damages for the period of noncompliance with this part equal to the difference between the value of premium payments or contributions and benefits paid or received by the aggrieved person and the value of premium payments or contributions and benefits which would have been paid or received by the aggrieved person with respect to such period of noncompliance if the defendant had on the effective date of this part equalized all premium payments or contributions and benefits to comply with this title without increasing the premium payments or contributions of, or reducing the benefits of, any insured;

(3) may require the defendant to pay punitive damages, in addition to any actual damages, of not more than $25,000 for each individual plaintiff and not more than a total of $800,000 in the case of a class action; and

(4) shall award the aggrieved person reasonable attorney fees as part of any costs assessed against the defendant, as the court deems proper.

(b) DETERMINATION OF DAMAGES.—In determining the amount of punitive damages under subsection (a)(3) of this section, the court shall consider, among other relevant factors, the amount of actual damages awarded, the frequency and persistence of the defendant's failure to comply with provisions of this title, the defendant's resources, the number of persons affected by the discriminatory action, the extent to which the defendant was enriched through its discriminatory action, and the extent to which the defendant's failure to comply with this part was intentional.

SEC. 309. INAPPLICABILITY.

Nothing in this part shall be construed to—

(1) amend or modify the rights, liabilities, or duties of, the remedies available to, or the penalties or punishments imposed upon any employer, insurer, or any other person under any law or Executive order prohibiting discrimination in employment on the basis of an individual's race, color, religion, sex, or national origin, or under any rule, regulation, order, or agreement under such law or Executive order;

(2) exempt or relieve any person from any liability, duty, penalty, or punishment under any State or local law, other than any such law which purports to require or permit the doing of any act which would be a discriminatory action under this part; or

(3) modify the Act of March 9, 1945, entitled "An Act to express the intent of the Congress with reference to the regulation of the business of insurance." (commonly known as the McCarran-Ferguson Act; 15 U.S.C. 1011 et seq.), except to the extent required by this part.

SEC. 310. EFFECTIVE DATE.

This part shall take effect on the first day of the first month which begins after the expiration of twelve calendar months after the date of the enactment of this Act.

PART B—HEALTH INSURANCE CONTINUATION

SEC. 320. SHORT TITLE.

This part may be cited as the "Continued Access to Group Health Insurance Act of 1985".

SEC. 321. CONTINUATION COVERAGE REQUIREMENT FOR ALLOWANCE OF DEDUCTION FOR EMPLOYER CONTRIBUTIONS TO GROUP HEALTH PLANS.

(a) IN GENERAL.—Subsection (i) of section 162 of the Internal Revenue Code of 1954 (relating to deduction for trade or business expenses with respect to group health plans) is amended—

(1) by redesignating paragraph (2) as paragraph (3); and

(2) by inserting after paragraph (1) the following new paragraph:

"(2) CONTINUATION COVERAGE.—

"(A) GENERAL RULE.—The expenses paid or incurred by an employer for a group health plan shall not be allowed as a deduction under this section if, in the case of an applicable change in the coverage status of any qualified secondary beneficiary, the plan does not provide to such beneficiary a continuation option meeting the requirements of this paragraph. A plan provides to a qualified secondary beneficiary a continuation option meeting the requirements of this paragraph only if the plan meets the following requirements:

"(i) PLAN MUST ALLOW FOR ELECTION OF CONTINUATION COVERAGE.—During an election period meeting the requirements of subparagraph (D), the plan shall, as provided in this paragraph, permit each qualified secondary beneficiary with respect to whom an applicable change in coverage status under the plan has occurred to elect continuation coverage under the plan. Unless otherwise specified in the election, any such election by an individual who was a qualified secondary beneficiary as the spouse of the insured employee shall also constitute under the plan an election of continuation coverage on behalf of any other qualified secondary beneficiary whose coverage would, but for continuation coverage provided in accordance with this paragraph, be affected by such applicable change in coverage status.

"(ii) DELAY IN PLAN'S RECOGNITION OF APPLICABLE CHANGE IN COVERAGE STATUS.—An applicable change in coverage status under the plan with respect to a qualified secondary beneficiary shall not be deemed by the plan to have occurred until the end of the election period provided by the plan.

"(iii) TERMS OF CONTINUATION COVERAGE.—Any continuation coverage so elected by or on behalf of a qualified secondary beneficiary—

"(I) shall not be conditional upon any evidence of insurability, and

"(II) shall consist of coverage which is identical to the coverage provided under the plan to similarly situated beneficiaries under the plan with respect to whom an applicable change in coverage status has not occurred.

"(iv) PERIOD OF COVERAGE.—Any continuation coverage which is so elected by or on behalf of a qualified secondary beneficiary under the plan shall be for a period commencing upon expiration of the election period and ending not earlier than the earlier of—

"(I) 5 years after the expiration of the election period,

"(II) the date on which the employer ceases to provide any group health plan to employees,

"(III) the date on which there is a failure in making timely payment of any premium required under the plan with respect to the qualified secondary beneficiary,

"(IV) the date on which the qualified secondary beneficiary first becomes, after the date of the election, an insured employee under any other group health plan providing equivalent or greater coverage or becomes entitled to benefits under title XVIII of the Social Security Act,

"(V) in the case of any individual who is a qualified secondary beneficiary by reason of having been the spouse of the insured employee, the date on which the qualified secondary beneficiary remarries, or

"(VI) in the case of any individual who is a qualified secondary beneficiary by reason of having been a covered dependent child with respect to the insured employee, the date on which the individual ceases to be a covered dependent child with respect to the insured employee.

"(v) DETERMINATION OF CONTINUATION COVERAGE PREMIUMS.—The plan shall provide for computation and payment of premiums for continuation coverage in a manner meeting the requirements of subparagraph (E).

"(vi) CONVERSION OPTION.—The plan shall provide that, upon the qualified secondary beneficiary's election within 180 days before expiration of the qualified secondary beneficiary's continuation coverage, the insurer is required to offer to the qualified secondary beneficiary coverage under a conversion health plan otherwise generally available to beneficiaries under the plan.

"(B) QUALIFIED SECONDARY BENEFICIARY.—For purposes of this paragraph, the term 'qualified secondary beneficiary' means, with respect to an insured employee under a group health plan, an individual (other than the insured employee) who, as of immediately before the occurrence of an applicable change in coverage status with respect to the individual—

"(i) is a beneficiary under the plan as the spouse of the insured employee and has been married to the insured employee for at least the immediately preceding 30-day period, or

"(ii) is a beneficiary under the plan as a covered dependent child with respect to the insured employee.

"(C) APPLICABLE CHANGE IN COVERAGE STATUS.—

"(i) DEFINITION.—For purposes of this paragraph, an 'applicable change in coverage status' under a group health plan, with respect to an individual described in clause (i) or (ii) of subparagraph (B), consists of an event described in clause (ii) if the coverage of the individual under the plan would, but for continuation coverage provided in compliance with this paragraph, be affected by the occurrence of such event.

"(ii) DESCRIBED EVENTS.—An event described in this clause is any of the following:

"(I) the insured employee dies,

"(II) the insured employee and his or her spouse become separated or divorced, or

"(III) the insured employee becomes entitled to benefits under title XVIII of the Social Security Act.

"(D) ELECTION PERIOD.—An election period under a group health plan meets the requirements of this subparagraph if, under the plan, the period begins with the date on which the applicable change in coverage status with respect to the qualified secondary beneficiary occurs and ends not earlier than 90 days after the qualified secondary beneficiary is notified of such applicable change in coverage status in accordance with subparagraph (F)(iii).

"(E) COMPUTATION AND PAYMENT OF PREMIUMS FOR PLANS PROVIDING CONTINUATION COVERAGE.—The total premium charged by a group health plan with respect to any qualified secondary beneficiary for continuation coverage under the plan shall not exceed the sum of employer premiums and employee premiums generally charged with respect to coverage under the plan of similarly situated beneficiaries with respect to whom an applicable change in coverage status has not occurred. The plan may provide for payment of the total premium by the qualified secondary beneficiary receiving such coverage, or for payment of all or part of such premium by the employer and payment of the remainder of such premium by such beneficiary. The plan shall provide for payment of any premium by the qualified secondary beneficiary in monthly installments if so elected by such beneficiary. The total of all premiums charged by the plan in any plan year may be based upon reasonably anticipated community costs for such plan year of the entire pool of insured employees and other beneficiaries under the plan, including qualified secondary beneficiaries receiving continuation coverage under the plan pursuant to this paragraph.

"(F) NOTIFICATION REQUIREMENTS.—A group health plan shall be treated as not meeting the requirements of subparagraph (A) unless the plan meets the following requirements:

"(i) INITIAL NOTIFICATION TO BENEFICIARIES UPON COMMENCEMENT OF COVERAGE.—The plan shall provide that, upon the commencement of coverage of each insured employee under a group health plan, the insurer shall, by first class mail, notify each beneficiary under the plan of the continuation option provided under the plan pursuant to this paragraph. The plan shall provide that such notification shall include the following statement:

" 'Notification of Continued Access to Group Health Plan

" 'The spouse and dependent child or children of an insured employee may be entitled to five years of continuation coverage under this group health plan if (1) the insured employee dies, (2) the insured employee and his or her spouse become separated or divorced, or (3) the insured employee becomes entitled to Medicare.

" 'This coverage is available only if it is elected by or on behalf of the spouse or child to be covered. If any of these changes takes place, a beneficiary wishing to make such an election based on the change has ninety days after being notified by the plan of the change in which to make the election.

" 'This continuation coverage elected under the plan is not conditional upon any evidence of insurability and consists of coverage identical to coverage otherwise provided under the plan to similarly situated beneficiaries.

" 'Both the insured employee and the employee's spouse must sign the attached form, indicating that they have read and understand the provisions of this group health plan governing the continuation coverage option, and return the form to the insurer.'

The plan shall require submission to the insurer of the form referred to in the statement within a reasonable time after receipt of the notification.

"(ii) NOTIFICATION OF PLAN BY INSURED EMPLOYEE OF OCCURRENCE OF APPLICABLE CHANGE IN COVERAGE STATUS.—The plan shall provide—

"(I) that the employer of an insured employee must notify the plan of the occurrence of any applicable change in coverage status described in subclause (I) of subparagraph (C)(ii) with respect to any individual who is a qualified secondary beneficiary under the plan with respect to such insured employee, and

"(II) that the insured employee must notify the plan of the occurrence of any applicable change in coverage status described in subclause (II) or (III) of subparagraph (C)(ii) with respect to any individual who is a qualified secondary beneficiary under the plan with respect to such insured employee.

The plan shall provide that such notification must be made, by first class mail, within 30 days after the date of the occurrence of the applicable change in coverage status.

"(iii) NOTIFICATION OF CONTINUATION OPTION PROVIDED TO QUALIFIED SECONDARY BENEFICIARIES UPON DETERMINATION OF APPLICABLE CHANGE IN COVERAGE STATUS.—The plan shall provide that, within 14 days after determining the occurrence of an applicable change in coverage status with respect to a qualified secondary beneficiary under the plan, the insurer shall, by first class mail, notify such beneficiary of the occurrence of the change and of the continuation option provided under the plan pursuant to this paragraph, and that such notification shall include the following statement:

" 'Notification of Continued Access to Group Health Plan

" 'The spouse and dependent child or children of an insured employee may be entitled to five years of continuation coverage under this group health plan if (1) the insured employee dies, (2) the insured employee and his or her spouse become separated or divorced, or (3) the insured employee becomes entitled to Medicare.

" 'This coverage is available only if it is elected by or on behalf of the spouse or child to be covered. If any of these changes takes place, a beneficiary wishing to make such an election based on the change has ninety days after being notified by the plan of the change in which to and make the election.

" 'This continuation coverage elected under the plan is not conditional upon any evidence of insurability and consists of coverage identical to coverage otherwise provided under the plan to similarly situated beneficiaries.'

"(G) COVERED DEPENDENT CHILD.—For purposes of this paragraph, the term 'covered dependent child' means, with respect to an insured employee, an individual who meets the generally applicable requirements of the plan for treatment as a dependent child covered under the plan by reason of the coverage of the insured employee under the plan.

"(H) INSURER.—For purposes of this paragraph, the term 'insurer' means, in connection with a group health plan, any person who, under such plan, provides to others medical care (as defined in section 213(d)). For purposes of this subparagraph, the term 'person' includes one or more individuals, governments or agencies of the United States or any State or political subdivision thereof, labor unions, partnerships, associations, corporations, legal representatives, mutual companies, joint ventures, joint stock companies, societies, trusts, unincorporated organizations, trustees, trustees in bankruptcy, receivers, and fiduciaries."

(b) CONFORMING AMENDMENT.—Paragraph (1) of section 162(i) of such Code is amended by striking out "GENERAL RULE" and inserting in lieu thereof "COVERAGE RELATING TO END STAGE RENAL DISEASE".

SEC. 322. REQUIREMENTS UNDER ERISA RELATING TO CONTINUATION COVERAGE UNDER GROUP HEALTH PLANS.

(a) IN GENERAL.—Part 2 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 is amended—

(1) by redesignating section 211 as section 212, and

(2) by inserting after section 210 the following new section:

"CONTINUATION COVERAGE UNDER GROUP HEALTH PLANS

"SEC. 211. (a) Each group health plan shall, in the case of an applicable change in the coverage status with respect to any qualified secondary beneficiary, provide to such beneficiary a continuation option meeting the requirements of this section. For purposes of this section, the term 'group health plan' has the meaning provided in section 162(i)(3) of the Internal Revenue Code of 1954.

"(b) A plan provides to a qualified secondary beneficiary a continuation option meeting the requirements of this section only if the plan meets the following requirements:

"(1) During an election period meeting the requirements of subsection (e), the plan shall, as provided in this section, permit each qualified secondary beneficiary with respect to whom an applicable change in coverage status under the plan has occurred to elect continuation coverage under the

plan. Unless otherwise specified in the election, any such election by an individual who is a qualified secondary beneficiary as the spouse of the insured employee shall also constitute under the plan an election of continuation coverage on behalf of any other qualified secondary beneficiary whose coverage would, but for continuation coverage provided in accordance with this section, be affected by such applicable change in coverage status.

"(2) An applicable change in coverage status under the plan with respect to a qualified secondary beneficary shall not be deemed by the plan to have occurred until the end of the election period provided by the plan.

"(3) Any continuation coverage so elected by or on behalf of a qualified secondary beneficiary—

"(A) shall not be conditional upon any evidence of insurability, and

"(B) shall consist of coverage which is identical to the coverage provided under the plan to similarly situated beneficiaries under the plan with respect to whom an applicable change in coverage status has not occurred.

"(4) Any continuation coverage which is so elected by or on behalf of a qualified secondary beneficiary under the plan shall be for a period commencing upon termination of the election period and ending not earlier than the earlier of—

"(A) 5 years after the expiration of the election period,

"(B) the date on which the employer ceases to provide any group health plan to employees,

"(C) the date on which there is a failure in making timely payment of any premium required under the plan with respect to the qualified secondary beneficiary,

"(D) the date on which the qualified secondary beneficiary first becomes, after the date of the election, an insured employee under any other group health plan providing equivalent or greater coverage or becomes entitled to benefits under title XVIII of the Social Security Act,

"(E) in the case of any individual who is a qualified secondary beneficiary by reason of having been the spouse of the insured employee, the date on which the qualified secondary beneficiary remarries, or

"(F) in the case of any individual who is a qualified secondary beneficiary by reason of having been a covered dependent child with respect to the insured employee, the date on which the individual ceases to be a covered dependent child with respect to the insured employee.

"(5) The plan shall provide for computation and payment of premiums for continuation coverage in a manner meeting the requirements of subsection (f).

"(6) The plan shall provide that, upon the qualified beneficiary's election within 180 days before expiration of the qualified secondary beneficiary's continuation coverage, the insurer is required to offer to the qualified secondary beneficiary coverage under a conversion health plan otherwise generally available to beneficiaries under the plan.

"(c) For purposes of this section, the term 'qualified secondary beneficiary' means, with respect to an insured employee under a group health plan, an individual (other than the insured employee) who, as of immediately before the occurrence of an applicable change in coverage status with respect to the individual—

"(1) is a beneficiary under the plan as the spouse of the insured employee and has been married to the insured employee for at least the immediately preceding 30-day period, or

"(2) is a beneficiary under the plan as a covered dependent child with respect to the insured employee.

"(d)(1) For purposes of this section, an 'applicable change in coverage status' under a group health plan, with respect to an individual described in paragraph (1) or (2) of subsection (c), consists of an event described in paragraph (2) if the coverage of the individual under the plan would, but for continuation coverage provided in compliance with this section, be affected by the occurrence of such event.

"(2) An event described in this paragraph is any of the following:

"(A) the insured employee dies,

"(B) the insured employee and his or her spouse become separated or divorced, or

"(C) the insured employee becomes entitled to benefits under title XVIII of the Social Security Act.

"(e) An election period under a group health plan meets the requirements of this subsection if, under the plan, the period begins with the date on which the applicable change in coverage status with respect to the qualified secondary beneficiary occurs and ends not earlier than 90 days after the qualified secondary beneficiary is notified of such applicable change in coverage status in accordance with subsection (g)(3).

"(f)(1) The total premium charged by a group health plan with respect to any qualified secondary beneficiary for continuation coverage under the plan shall not exceed the sum of employer premiums and employee premiums generally charged with respect to coverage under the plan of similarly situated beneficiaries with respect to whom an applicable change in coverage status has not occurred. The plan may provide for payment of the total premium by the qualified secondary beneficiary receiving such coverage, or for payment of all or part of such premium by the employer and payment of the remainder of such premium by such beneficiary. The plan shall provide for payment of any premium by the qualified secondary beneficiary in monthly installments if so elected by such beneficiary. The total of all premiums charged by the plan in any plan year may be based upon reasonably anticipated community costs for such plan year of the entire pool of insured employees and other beneficiaries under the plan, including qualified secondary beneficiaries receiving continuation coverage under the plan pursuant to this section.

"(g) A group health plan shall be treated as not meeting the requirements of subsection (b) unless the plan meets the following requirements:

"(1) The plan shall provide that, upon the commencement of coverage of each insured employee under a group health plan, the insurer shall, by first class mail, notify each beneficiary under the plan of the continuation option provided under the plan pursuant to this paragraph. The plan shall provide that such notification shall include the following statement:

" 'Notification of Continued Access to Group Health Plan

" 'The spouse and dependent child or children of an insured employee may be entitled to five years of continuation coverage under this group health plan if (1) the insured employee dies, (2) the insured employee and his or her spouse become separated or divorced, or (3) the insured employee becomes entitled to Medicare.

" 'This coverage is available only if it is elected by or on behalf of the spouse or child to be covered. If any of these changes takes place, a beneficiary wishing to make such an election based on the change has ninety days after being notified by the plan of the change in which to make the election.

" 'This continuation coverage elected under the plan is not conditional upon any evidence of insurability and consists of coverage identical to coverage otherwise provided under the plan to similarly situated beneficiaries.

" 'Both the insured employee and the employee's spouse must sign the attached form, indicating that they have read and understand the provisions of this group health plan governing the continuation coverage option, and return the form to the insurer.'

The plan shall require submission to the insurer of the form referred to in the statement within a reasonable time after receipt of the notification.

"(2) The plan shall provide—

"(A) that the employer of an insured employee must notify the plan of the occurrence of any applicable change in coverage status described in subparagraph (A) of subsection (d)(2) with respect to any individual who is a qualified secondary beneficiary under the plan with respect to such insured employee, and

"(B) that the insured employee must notify the plan of the occurrence of any applicable change in coverage status described in subparagraph (B) or (C) of subsection (d)(2) with respect to any individual who is a qualified secondary beneficiary under the plan with respect to such insured employee.

The plan shall provide that such notification must be made, by first class mail, within 30 days after the date of the occurrence of the applicable change in coverage status.

"(3) The plan shall provide that, within 14 days after determining the occurrence of an applicable change in coverage status with respect to a qualified secondary beneficiary under the plan, the insurer shall, by first class mail, notify such beneficiary of the occurrence of the change and of the continuation option provided under the plan pursuant to this section, and that such notification shall include the following statement:

" 'Notification of Continued Access to Group Health Plan

" 'The spouse and dependent child or children of an insured employee may be entitled

to five years of continuation coverage under this group health plan if (1) the insured employee dies, (2) the insured employee and his or her spouse become separated or divorced, or (3) the insured employee becomes entitled to Medicare.

" 'This coverage is available only if it is elected by or on behalf of the spouse or child to be covered. If any of these changes takes place, a beneficiary wishing to make such an election based on the change has ninety days after being notified by the plan of the change in which to make the election.

" 'This continuation coverage elected under the plan is not conditional upon any evidence of insurability and consists of coverage identical to coverage otherwise provided under the plan to similarly situated beneficiaries.'

"(h) For purposes of this section, the term 'covered dependent child' means, with respect to an insured employee, an individual who meets the generally applicable requirements of the plan for treatment as a dependent child covered under the plan by reason of the coverage of the insured employee under the plan.

"(i) For purposes of this section, the term 'insurer' means, in connection with a group health plan, any person who, under such plan, provides to others medical care (as defined in section 213(d) of the Internal Revenue Code of 1954). For purposes of this paragraph, the term 'person' includes one or more individuals, Governments or agencies of the United States or any State or political subdivision thereof, labor unions, partnerships, associations, corporations, legal representatives, mutual companies, joint ventures, joint stock companies, societies, trusts, unincorporated organizations, trustees, trustees in bankruptcy, receivers, and fiduciaries."

(b) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Paragraph (1) of section 201 of such Act is amended by inserting after "plan" the following: ", except to the extent that section 211 applies to a group health plan (as defined in section 211(a))".

(2) Section 212 of such Act (as redesignated by this section) is further amended by adding at the end thereof the following new subsection:

"(f) For the effective date and special rules relating to application of section 211, see section 323 of the Continued Access to Group Health Insurance Act of 1985.".

(3) The heading for part 2 of subtitle B of title I of such Act is amended to read as follows:

"PART 2—PARTICIPATION, VESTING, AND FORM AND PAYMENT OF BENEFITS".

(4) The table of contents in section 1 of such Act is amended—

(A) by striking out the item relating to part 2 of subtitle B of title I and inserting in lieu thereof the following new item:

"PART 2—PARTICIPATION, VESTING, AND FORM AND PAYMENT OF BENEFITS;

and

(B) by striking out the item relating to section 211 and inserting in lieu thereof the following new items:

"Sec. 211. Continuation coverage under group health plans.
"Sec. 212. Effective dates."

SEC. 323. EFFECTIVE DATE AND SPECIAL RULES.

(a) EFFECTIVE DATE.—

(1) GENERAL RULE.—The amendments made by this part shall apply to plan years beginning on or after January 1, 1986.

(2) SPECIAL RULE FOR COLLECTIVE BARGAINING AGREEMENTS.—In the case of a group health plan maintained pursuant to 1 or more collective bargaining agreements between employee representatives and 1 or more employers ratified before the date of the enactment of this Act, the amendments made by this part shall not apply to plan years beginning before the earlier of—

(A) the date on which the last of the collective bargaining agreements relating to the plan terminates (determined without regard to any extension thereof agreed to after the date of the enactment of this Act), or

(B) January 1, 1987.

For purposes of subparagraph (A), any plan amendment made pursuant to a collective bargaining agreement relating to the plan which amends the plan solely to conform to any requirement added by this part shall not be treated as a termination of such collective bargaining agreement.

(b) INITIAL NOTIFICATION.—Each group health plan shall notify by first class mail all beneficiaries under the plan, including all qualified secondary beneficiaries, of the terms of the continuation coverage provided by the plan pursuant to the amendments made by this part. Such notification shall be made not later than January 1, 1986, and shall include the statement set forth in section 211(g)(1) of the Employee Retirement Income Security Act of 1974 (as amended by this Act). Such notification may be made by mailing such notification to the last known address of each beneficiary. This subsection shall be treated as a provision of title I of the Employee Retirement Income Security Act of 1974 for purposes of enforcement under section 502 of such Act.

TITLE IV—EMPLOYMENT

PART A—PAY EQUITY IN THE FEDERAL CIVIL SERVICE

SEC. 401. DEFINITIONS.

For purposes of this part—

(1) the term "position" means employee positions that are subject to classification under chapter 51 of such title or the job-grading system under subchapter IV of chapter 53 of such title;

(2) the term "Commission" means the Commission on Compensation Equity established by section 402;

(3) the term "Director" means the Director of the Office of Personnel Management;

(4) the term "employee" means an individual to whom chapter 51 and subchapter IV of chapter 53 of such title applies; and

(5) the term "labor organization" shall have the meaning given such term by section 7103(a)(4) of such title.

SEC. 402. ESTABLISHMENT OF COMMISSION ON COMPENSATION EQUITY.

There is established a commission to be known as the "Commission on Compensation Equity".

SEC. 403. STUDY AND REPORTING REQUIREMENTS.

(a) STUDY.—(1) In order to determine whether Federal jobs are appropriately classified, graded, and paid and whether the wage-setting practices in executive agencies of the United States Government are in compliance with applicable laws and regulations prohibiting sex-based wage discrimination in Federal employment policies and practices, the Commission shall provide, by contract with the consultant selected pursuant to section 407, for—

(A) the conduct of a study of representative executive agencies' wage-setting practices and wage differentials within and between the position-classification system under chapter 51 of title 5, United States Code, and the job grading system under subchapter IV of chapter 53 of such title, including both standard objective job-evaluation techniques, and an economic analysis to determine whether there are occupations where the rates of pay payable for positions held predominantly by female employees are lower than the rates of pay payable for positions held predominantly by male employees although the work performed in each instance involves skills, effort, responsibilities, qualifications, and working conditions which, although not identical, are equivalent in totality; and

(B) the preparation and submission of a report containing the findings of such study, including a list of any such positions and the extent of the differences in the rates of pay in such cases.

(2) For the purposes of this subsection, the term "executive agency" shall have the meaning given such term by section 105 of title 5, United States Code.

(b) REPORT.—(1)(A) Not later than eighteen months after the effective date of this part, the Commission shall transmit to the appropriate committees of the Congress the report required by subsection (a) and shall provide a copy of this report to the Director.

(B) The report shall include—

(i) the Commission's findings resulting from the study; and

(ii) the Commission's recommendations (other than any recommendation which would result in a reduction in the rate of pay payable for any position) for such administrative or legislative actions, or both, as it considers appropriate (including any recommendations for amendment of section 406).

(2) Not later than ninety days after the Commission submits its report to the appropriate committees of the Congress pursuant to paragraph (1), the Director shall submit to such committees and the Commission a report commenting on the Commission's report and specifying the Director's plan (including a timetable) to carry out each of the Commission's recommendations or, in the event that the Director does not specify a plan to carry out one or more of such recommendations, the Director's reasons for not specifying such plan.

(3) Not later than sixty days after the Director submits the report to the appropriate committees of the Congress pursuant to paragraph (2), the Commission shall submit to such Committees any additional comments that the Commission considers appropriate in response to the Director's report.

SEC. 404. APPOINTMENT OF COMMISSION.

(a) IN GENERAL.—(1)(A) The Commission shall be composed of nine members as follows:

(i) Two appointed by the President.

(ii) One appointed by the majority leader of the Senate.

(iii) One appointed by the minority leader of the Senate.

(iv) One appointed by the Speaker of the House of Representatives.

(v) One appointed by the minority leader of the House of Representatives.

(vi) Three jointly appointed by a five-member panel composed of one officer of and designated by each of five labor organizations selected by the Director from among labor organizations representing substantial numbers of women who occupy positions

that are subject to chapter 51 or subchapter IV of chapter 53, of title 5, United States Code (including each of the three such labor organizations representing the greatest number of Federal Government employees).

(B) Members of the Commission shall not be members of Congress and shall, to the maximum extent practicable, be chosen from among persons who have extensive knowledge and technical expertise in the major areas of the Commission's consideration and study.

(2) All appointments under paragraph (1) shall be made not later than sixty days after the effective date of this Act.

(b) CHAIRMAN AND VICE CHAIRMAN OF THE COMMISSION.—The President shall designate a Chairman of the Commission from among the Commission members. The Commission shall elect a Vice Chairman from among its members. The Vice Chairman shall act as Chairman in the event of the absence or incapacity of the Chairman.

(c) VACANCIES.—Any vacancy in the Commission shall not affect its powers except with respect to satisfaction of the quorum requirements in section 405(b). Such vacancy shall be filled in the manner in which the original appointment was made.

SEC. 405. ADMINISTRATIVE PROVISIONS.

(a) PROCEDURES.—The Commission shall adopt such rules and regulations as it considers necessary to establish its procedures and to govern the manner of its operations, its organization, and its personnel.

(b) QUORUM.—Five members of the Commission shall constitute a quorum.

(c) MEMBER'S PAY.—Each member of the Commission who is not an officer or employee of the United States Government shall be paid compensation at a rate equal to the daily equivalent of the rate of basic pay in effect for level IV of the Executive Schedule for each day the member is engaged in the performance of the duties of the Commission.

(d) COMMISSION STAFF.—(1) The Commission may appoint, terminate, and, subject to paragraph (2), fix the compensation of such personnel as it considers advisable to employ to assist in the performance of its duties, without regard to the civil service laws, the provisions of title 5, United States Code, or any other law relating to the number, classification, or compensation of employees. The Commission may also procure temporary and intermittent services in carrying out its responsibilities. The Chairman shall appoint an executive director of the Commission with the approval of a majority of the Commission members.

(2) An employee of the Commission may not receive compensation at a rate exceeding the rate of pay payable for grade GS-18 under section 5332 of title 5, United States Code.

(3) Service of an individual as a member of the Commission or as an employee of the Commission shall not be considered service in an appointive or elective position in the United States Government for the purposes of section 8344 of title 5, United States Code.

(e) TRAVEL AND TRANSPORTATION EXPENSES.—All members and employees of the Commission and all individuals performing temporary or intermittent services for the Commission shall, while performing the duties of the Commission, be paid per diem, travel, and transportation expenses in the same manner as provided for under subchapter I of chapter 57 of title 5, United States Code.

(f) SPECIFIC POWERS.—(1) The Commission or any member authorized by the Commission may, for the purposes of carrying out this part, hold such hearings and sit and act at such times and places, take such testimony, have such printing and binding done, enter into such contracts and other arrangements, with or without consideration or bond, and take such other actions as the Commission considers advisable, to the extent that amounts provided pursuant to section 409 are available. Any member of the Commission may administer oaths or affirmations to witnesses appearing before the Commission or before such member.

(2) The Commission is authorized to obtain directly from any officer, department, agency, establishment, or instrumentality of the United States Government such information, suggestions, estimates, and statistics as the Commission considers necessary to carry out this section. Each such officer, department, agency, establishment, or instrumentality shall furnish, to the extent permitted by law, such information, suggestions, estimates, and statistics directly to the Commission, upon request made on behalf of the Commission.

(3) The Commission may use the United States mails and receive administrative support from the Administrator of General Services in the same manner and under the same conditions as departments and agencies of the United States Government.

(4) No officer or agency of the United States Government shall require the Commission to submit any report, recommendation, or other matter to any such officer or agency for approval, comment, or review before submitting such report, recommendation, or other matter to Congress or Committees of Congress or to the President.

(g) MEETING TIMES.—The Commission shall meet from time to time, as its members consider appropriate.

SEC. 406. TERMINATION.

The Commission shall terminate ninety days after the date the Commission submits its comments pursuant to section 403(b)(3).

SEC. 407. CONSULTANT.

(a) IN GENERAL.—The Commission shall select one consultant to conduct the study required by section 403(a) from among the list of consultants transmitted by the Comptroller General of the United States pursuant to subsection (b).

(b) LIST OF CONSULTANTS.—The Comptroller General of the United States shall prepare and submit to the Commission a list of at least five consultants which, on the basis of their objectivity, extensive knowledge, and technical expertise in the matters to be studied pursuant to this part, the Comptroller General considers appropriate to conduct the study.

SEC. 408. CONSTRUCTION.

Nothing in this part shall be construed to limit any of the rights or remedies provided under the Civil Rights Act of 1964, section 6(d) of the Fair Labor Standards Act of 1938, or any other provision of law relating to discrimination on the basis of race, color, religion, sex, national origin, handicap, or age.

SEC. 409. FUNDING.

Of the sums appropriated to the Office of Personnel Management for general operating expenses for fiscal year 1986 and 1987, such amount as is estimated by the Comptroller General of the United States as necessary to carry out this part shall be made available to pay the expenses of the Commission and shall remain available for such purpose until September 30, 1988.

SEC. 410. EFFECTIVE DATE.

This part shall take effect on October 1, 1985.

PART B—SERVICE PROGRAMS FOR PREGNANT TEENAGERS AND TEENAGE MOTHERS

SEC. 411. GRANTS TO STATES FOR PROGRAMS TO ASSIST PREGNANT TEENAGERS AND TEENAGE MOTHERS WHO MIGHT OTHERWISE BECOME LONG-TERM RECIPIENTS OF AFDC.

Part A of title IV of the Social Security Act is amended by adding at the end thereof the following new section:

"GRANTS FOR SERVICE PROGRAMS FOR PREGNANT TEENAGERS AND TEENAGE MOTHERS

"SEC. 416. (a) In addition to amounts payable to States under section 403, the Secretary shall make grants to States in accordance with this section, subject to the amounts appropriated pursuant to subsection (d). The purpose of such grants shall be to assist States in carrying out programs which—

"(1) prevent long-term dependency upon aid to families with dependent children;

"(2) permit pregnant teenagers and teenage mothers to remain in school;

"(3) provide job counseling, employment readiness, job placement, and academic and vocational education services to pregnant teenagers and teenage mothers; and

"(4) integrate and coordinate services otherwise available to pregnant teenagers and teenage mothers.

"(b)(1) In order to receive a grant under this section a State must provide assurances to the Secretary that such grant shall be used to carry out a program which—

"(A) provides child day care, job training, job placement, and academic and vocational education services for pregnant teenagers and teenage mothers, and requires that each pregnant teenager or mother participate in a program leading to a high school diploma (or the equivalent) or in a job training program;

"(B) establishes a coordinated service network consisting of the services described in subparagraph (A) and other services available for pregnant teenagers and teenage mothers under title XX, part B of this title, the State program under title V, and the Job Training Partnership Act;

"(C) provides such services in an area or areas within the State which have a large number of low-income teenage mothers;

"(D) provides for maximum utilization of existing services, including those offered by private, nonprofit service providers;

"(E)(i) provides without charge any child day care services and transportation which may be necessary to allow the pregnant teenager or teenage mother to participate in the program, and

"(ii) provides child day care services, at a charge which is related to income, for a period of six months after completion of the high school diploma (or equivalent) or job training program, as may be necessary to allow the pregnant teenager or teenage mother to be employed; and

"(F) is administered by the same agency which administers the State plan under section 402, the same agency which administers the State plan approved under part B of this title, or the same agency which administers the block grant under title XX.

"(2) For purposes of this section—

"(A) 'pregnant teenagers' and 'teenage mothers' means only pregnant women or mothers who are age 19 or under, or who are secondary school students; and

"(B) 'academic and vocational education services' includes instruction in family management, parenting, budgeting, health, nutrition, and other life skills.

"(c)(1) Any State receiving a grant under this section for a fiscal year shall provide a report to the Secretary at the close of such fiscal year which shall include the number and characteristics of individuals served by the State program, the services provided, and the results achieved. Such report shall also include data on the number of cases and the amounts of the aid to families with dependent children provided under this part for the fiscal year, broken down by the age of the parent or caretaker relative receiving such aid, by race, and by location within the State. The State shall also require each entity providing services under the State program to report to the State with respect to the number and characteristics of the individuals served by such entity, the services provided, and the results achieved.

"(2) The Secretary shall establish a systematic reporting system capable of yielding comprehensive data on which service figures and program evaluations shall be based. On or before each January 1 the Secretary shall submit to the Congress a report describing the activities supported under this section during the fiscal year ending on the preceding September 30, including, at a minimum, the number and characteristics of persons served, the services provided, the results achieved, and the Secretary's plans and recommendations for the future.

"(d) For purposes of making grants to States under this section there are authorized to be appropriated $75,000,000 for fiscal year 1986 and for each fiscal year thereafter.".

PART C—WOMEN IN BUSINESS

Subpart 1—National Commission on Women's Business Ownership

SEC. 420. SHORT TITLE.

This subpart may be cited as the "Women's Business Ownership Act of 1985".

SEC. 421. ESTABLISHMENT.

There is established a commission to be known as the "National Commission on Women's Business Ownership" (hereinafter in this subpart referred to as the "Commission").

SEC. 422. DUTIES OF THE COMMISSION.

(a) IN GENERAL.—The Commission shall review—

(1) the status of women-owned small business nationwide and the progress made since the 1980 White House Conference on Small Business for such businesses to be represented equitably in the mainstream of the American economy;

(2) the role of the Federal Government in aid to, and the promotion of, women-owned small business;

(3) data collection procedures and the availability of data relating to (A) women-owned business; (B) women-owned small business, and (C) small business owned and controlled by socially and economically disadvantaged women; and

(4) such other Federal initiatives as may exist relating to women-owned small business including, but not limited to, those relating to Federal procurements.

(b) EMPHASIS ON SPECIAL IMPEDIMENTS.—In the course of performing those duties described in subsection (a), the Commission shall pay particular regard to the special impediments suffered by small business concerns owned and controlled by socially and economically disadvantaged women.

(c) RECOMMENDATIONS.—Based upon its review, the Commission shall recommend, in the manner prescribed by section 426—

(1) new private-sector initiatives which would provide management and technical assistance to women-owned small business;

(2) ways to promote greater access to financing and procurement opportunities for such businesses; and

(3) such other measures as may have particular applicability for small business concerns owned and controlled by socially and economically disadvantaged women.

(d) DEFINITIONS.—For the purpose of this subpart—

(1) the term "women-owned small business" means a small business as defined pursuant to section 3 of the Small Business Act (15 U.S.C. 632) and relevant regulations promulgated pursuant thereto—

(A) which is at least 51 per centum owned by one or more women, or, in the case of any publicly owned business, at least 51 per centum of the stock of which is owned by one or more women, and

(B) whose management and daily business operations are controlled by one or more of such women; and

(2) the term "small business owned and controlled by socially and economically disadvantaged women" means a business concern which is described in paragraph (1) and, in addition, whose owners also qualify as socially and economically disadvantaged pursuant to section 8(d)(3) of the Small Business Act (15 U.S.C. 637(d)(3)).

SEC. 423. MEMBERSHIP.

(a) IN GENERAL.—The Commission shall be composed of nine members to be appointed as follows:

(1) Three members shall be appointed by the President.

(2) Three members shall be appointed by the majority leader of the Senate from a list of fifteen individuals nominated for such appointment by the chairman of the Committee on Small Business of the Senate.

(3) Three members shall be appointed by the Speaker of the House of Representatives from a list of fifteen individuals nominated for such appointment by the chairman of the Committee on Small Business of the House of Representatives.

(b) QUALIFICATIONS.—(1) Appointments under subsection (a) shall be made from individuals who are specially qualified to serve on the Commission by virtue of their education, training, or experience, and who are not officers or employees of the Federal Government nor of the Congress.

(2)(A) Of the individuals to be appointed under subsection (a)—

(i) no more than two members to be appointed under each paragraph of such subsection shall be of the same political party;

(ii) at least two members appointed shall be socially disadvantaged as defined pursuant to section 8(a)(5) of the Small Business Act (15 U.S.C. 637(a)(5)), and at least two members appointed under each paragraph of such subsection shall be women; and

(iii) at least one member to be appointed under each paragraph of such subsection shall be the owner of a small business concern as defined pursuant to section 3 of the Small Business Act (15 U.S.C. 632) and relevant regulations promulgated pursuant thereto.

(B) Appointments made pursuant to subsection (a) shall be made in the following sequence:

(i) appointments under subsection (a)(1) shall be made within ninety days of the effective date of this subpart;

(ii) appointments under subsection (a)(2) shall be made within one hundred and twenty days of the effective date of this subpart; and

(iii) appointments under subsection (a)(3) shall be made within one hundred and fifty days of the effective date of this subpart.

(3) In making appointments under subsection (a), the appointing authorities shall give due consideration to achieving balanced geographical representation.

(c) TERM.—Members shall be appointed for the life of the Commission, except if any member of the Commission becomes an officer or employee of the Federal Government or of the Congress, such individual may continue as a member of the Commission for not longer than the thirty-day period beginning on the date such individual becomes such an officer or employee.

(d) VACANCIES.—A vacancy in the Commission shall be filled in the manner in which the original appointment was made, except that a vacancy to be filled pursuant to paragraph (2) or (3) of subsection (a) shall be made from the submission of a revised list of nominees to be submitted to the appropriate appointing authority.

(e) COMPENSATION; EXPENSES.—Members of the Commission shall serve without pay, except members of the Commission shall be entitled to reimbursement for travel, subsistence, and other necessary expenses incurred by them in carrying out the functions of the Commission, in the same manner as persons employed intermittently in the Federal Government are allowed expenses under section 5703 of title 5, United States Code.

(f) QUORUM.—(1) Two members of the Commission shall constitute a quorum for the receipt of testimony and other evidence pursuant to section 425(a).

(2) A majority of the Commission shall constitute a quorum for the approval of any report to be transmitted pursuant to section 426.

(g) CHAIRPERSON AND VICE CHAIRPERSON.—The Chairperson and Vice Chairperson of the Commission shall be designated by the President. The term of office of the Chairperson and Vice Chairperson shall be the life of the Commission.

(h) MEETINGS.—The Commission shall meet not less than four times a year. Meetings shall be at the call of the Chairperson.

SEC. 424. DIRECTOR AND STAFF OF THE COMMISSION.

(a) DIRECTOR AND STAFF.—(1) The Commission shall have a Director who shall be appointed by the Chairperson. Upon recommendation by the Director, the Chairperson may appoint and fix the pay of four additional personnel.

(2) The Director and staff of the Commission may be appointed without regard to section 5311(b) of title 5, United States Code, and without regard to the provisions of such title governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that no individual so appointed may receive pay in excess of the annual rate of basic pay payable for GS-18 of the General Schedule.

(b) TEMPORARY SERVICES.—The Commission may procure temporary and intermittent services under section 3109(b) of title 5 of the United States Code, but at rates for individuals not to exceed the daily equivalent of the maximum annual rate of basic

pay payable for GS-18 of the General Schedule.

(c) DETAIL OF OTHER FEDERAL PERSONNEL.—Upon request of the Commission, the head of any Federal department or agency may detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out its duties under this subpart, without regard to section 3341 of title 5 of the United States Code.

SEC. 425. POWERS OF THE COMMISSION.

(a) IN GENERAL.—The Commission may, for the purpose of carrying out this subpart, sit and act at such times and places, hold such hearings, take such testimony, receive such evidence, and consider such information, as the Commission considers appropriate. The Commission may administer oaths or affirmations for the receipt of such testimony.

(b) DELEGATION.—Any member or person within the employ of the Commission may, if so authorized by the Commission, take any action which the Commission is authorized to take by this section.

(c) SECURING INFORMATION.—Except as otherwise prohibited by law, the Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out this subpart. Upon the request of the Chairperson of the Commission, the head of such department or agency shall promptly furnish such information to the Commission.

(d) USE OF MAILS.—The Commission may use the United States mails in the same manner and under the same conditions as departments and agencies of the United States.

(e) SUPPORT SERVICES.—The Administrator of the General Services Administration shall provide to the Commission, on a reimbursable basis, such administrative support services as the Commission may request. In addition, the Administrator shall, as appropriate, provide to the Commission, upon its request, access to and use of such Federal facilities as may be necessary for the conduct of its business.

SEC. 426. REPORTS.

The Commission shall transmit to the President and to each House of the Congress an interim report no less than once in every six-month period and shall transmit a final report to the President and to each House of Congress not later than twenty-six months after the date of the Commission's first meeting. The final report shall contain a detailed statement of the findings and conclusions of the Commission, together with its recommendations for such legislation and administrative actions as it considers appropriate.

SEC. 427. TERMINATION.

The Commission shall cease to exist on the date that it transmits its final report to the President and to each House of the Congress.

SEC. 428. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as may be necessary to carry out this subpart, and they may remain available until expended. New spending authority or authority to enter contracts as provided in this subpart shall be effective only to such extent and in such amounts as are provided in advance in appropriation Acts.

SEC. 429. EFFECTIVE DATE.

This subpart shall take effect October 1, 1985.

Subpart 2—Equal Credit

SEC. 431. AMENDMENT TO EQUAL CREDIT OPPORTUNITY ACT.

Subsection (a) of section 703 of the Equal Credit Opportunity Act (15 U.S.C. 1691b) is amended to read as follows:

"(a)(1) Subject to the provisions of paragraph (2) the Board shall prescibe regulations to carry out the purposes of this title. These regulations may contain such classifications, differentiation, or other provision, and may provide for such adjustments and exceptions for any class of transactions, as in the judgment of the Board are necessary or proper to effectuate the purposes of this title, to prevent circumstances or evasion thereof, or to facilitate or substantiate compliance therewith.

"(2) A regulation promulgated pursuant to paragraph (1) of this subsection may not exempt from the provisions of this title any class of transactions that are primarily for—

"(A) personal, family, or household purposes; or

"(B) business or commercial purposes, except that a particular type or class of business or commercial transaction may be exempted if the Board determines, after a hearing conducted on the record pursuant to chapter 5 of title 5, United States Code, that the application of this title or of any provision of this title to such transaction would not contribute substantially to effecting the purposes of this title.

"(3) An exemption granted pursuant to paragraph (2)(B) shall be for no longer than five years and may be extended beyond five years only if the Board makes a subsequent determination, in the manner prescribed by such paragraph, that such exemption remains appropriate. An extension of an exemption granted pursuant to (2)(B) shall be for no longer than five years and may be renewed only if the Board reaches a subsequent determination, in the manner prescribed by paragraph (2)(B), that such exemption remains appropriate.".

TITLE V—TAX REFORM

SECTION 501. ZERO BRACKET AMOUNT FOR HEADS OF HOUSEHOLDS.

(a) IN GENERAL.—Section 1 of the Internal Revenue Code of 1954 (relating to tax imposed on individuals) is amended by adding at the end thereof the following new subsection:

"(g) INCREASE IN ZERO BRACKET AMOUNT FOR HEADS OF HOUSEHOLDS FOR TAXABLE YEARS BEGINNING AFTER 1985.—In carrying out subsection (f) with respect to taxable years beginning after 1985, the Secretary shall treat the following table as if it were the table contained in paragraph (3) of subsection (b):

"If taxable income is:	The tax is:
Over $3,400	No tax.
Over $3,400 but not over $5,500.	11% of the excess over $3,400.
Over $5,500 but not over $7,600.	$231, plus 12% of the excess over $5,500.
Over $7,600 but not over $9,800.	$483, plus 14% of the excess over $7,600.
Over $9,800 but not over $12,900.	$791, plus 17% of the excess over $9,800.
Over $12,900 but not over $16,100.	$1,318, plus 18% of the excess over $12,900.
Over $16,100 but not over $19,300.	$1,894, plus 20% of the excess over $16,100.
Over $19,300 but not over $24,600.	$2,534, plus 24% of the excess over $19,300.
Over $24,600 but not over $29,900.	$3,806, plus 28% of the excess over $24,600.
Over $29,900 but not over $35,200.	$5,290, plus 32% of the excess over $29,900.
Over $35,200 but not over $45,800.	$6,986, plus 35% of the excess over $35,200.
Over $45,800 but not over $61,700.	$10,696, plus 42% of the excess over $45,800.
Over $61,700 but not over $82,900.	$17,374, plus 45% of the excess over $61,700.
Over $82,900 but not over $109,400.	$26,914, plus 48% of the excess over $82,900.
Over $109,400	$39,634, plus 50% of the excess over $109,400."

(b) CONFORMING AMENDMENTS.—

(1) Clause (i) of section 6012(a)(1)(A) of such Code (relating to persons required to make returns of income) is amended by inserting "is not a head of a household (as defined in section 2(b))," after "section 2(a)),".

(2) Clause (ii) of such section is amended by inserting "or who is a head of a household (as so defined)" after "who is a surviving spouse (as so defined)".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1985.

SEC. 502. INCREASE IN EARNED INCOME CREDIT; TREATMENT OF CERTAIN PAYMENTS.

(a) INCREASE IN CREDIT.—Subsection (a) of section 32 of the Internal Revenue Code of 1954 (relating to earned income credit) is amended by striking out "11 percent" and inserting in lieu thereof "16 percent".

(b) PHASEOUT BETWEEN $11,000 AND $16,000.—Subsection (b) of section 32 of such Code (relating to limitation) is amended to read as follows:

"(b) LIMITATION.—The amount allowable as a credit under subsection (a) to any taxpayer for any taxable year shall be reduced by an amount equal to 16 percent of so much of the adjusted gross income (or, if greater, the earned income) of the taxpayer for the taxable year as exceeds $11,000."

(c) GOVERNMENTAL PAYMENTS TO BE DISREGARDED FOR PURPOSES OF SUPPORT AND MAINTENANCE OF HOUSEHOLD TESTS.—Section 2 of such Code (relating to definitions and special rules) is amended by redesignating subsection (e) as subsection (f) and by inserting after subsection (d) the following new subsection:

"(e) GOVERNMENTAL PAYMENTS DISREGARDED IN DETERMINING SUPPORT AND MAINTENANCE OF HOUSEHOLD.—

"(1) IN GENERAL.—For purposes of this title, whenever it is necessary—

"(A) to determine the extent to which the support of an individual is provided by such individual, by a taxpayer who has the same principal place of abode as the individual (including determinations under sections 152 and 1303(c)), or by the parents of the individual for purposes of section 152(e), or

"(B) to determine whether a taxpayer furnishes over half of the cost of maintaining a household during any period (including determinations under subsections (a) and (b) of this section and under sections 21 and 143(b)),

any needs-based governmental benefit used for the support of the individual or for maintenance of the household shall not be taken into account.

"(2) NEEDS-BASED GOVERNMENTAL BENEFIT.—For purposes of paragraph (1), the term 'needs-based governmental benefit' means any benefit which—

"(A) is not includible in gross income,

"(B) is provided under any Federal, State, or local governmental assistance program, and

"(C) is based on need."

(d) DISREGARD OF CREDIT.—

(1) IN GENERAL.—Notwithstanding any other provision of law, any refund of Federal income taxes made to an individual by reason of section 32 of the Internal Revenue

Code of 1954, and any payment made by an employer under section 3507 of such Code, shall not be taken into account as income or receipts for purposes of determining the eligibility of such individual (or any other individual) for benefits or assistance, or the amount or extent of benefits or assistance, under any Federal program or under any State or local program financed in whole or in part with Federal funds.

(2) REPEAL OF SECTION 402(d) OF THE SOCIAL SECURITY ACT.—Subsection (d) of section 402 of the Social Security Act is hereby repealed.

(e) COST-OF-LIVING ADJUSTMENTS.—

(1) IN GENERAL.—Section 32 of such Code is amended by adding at the end thereof the following new subsection:

"(h) COST-OF-LIVING ADJUSTMENTS.—

"(1) IN GENERAL.—In the case of any taxable year beginning in a calendar year after 1986, this section shall be applied by increasing each dollar amount contained in subsections (a), (b), and (f) by the cost-of-living adjustment for such calendar year.

"(2) COST-OF-LIVING ADJUSTMENT.—For purposes of paragraph (1), the cost-of-living adjustment for any calendar year is the percentage (if any) by which—

"(A) the CPI for the preceding calendar year (as defined in section 1(f)(4)), exceeds

"(B) the CPI for calendar year 1985 (as so defined).

"(3) ROUNDING.—Any increase determined under paragraph (1) shall be rounded to the nearest multiple of $10 (or if such increase is a multiple of $5, such increase shall be increased to the next highest multiple of $10)."

(2) EARNED INCOME ADVANCE AMOUNT.—Subsection (c) of section 3507 of such Code is amended by adding at the end thereof the following new paragraph:

"(3) COST-OF-LIVING ADJUSTMENTS.—In the case of any calendar year after 1986, paragraph (2) shall be applied by increasing each dollar amount contained therein by the cost-of-living adjustment for such calendar year (as determined under section 32(h)(2)). Any such increase shall be rounded to the nearest multiple of $10 (or if such increase is a multiple of $5, such increase shall be increased to the next highest multiple of $10)."

(f) TECHNICAL AMENDMENTS.—

(1) Paragraph (2) of section 32(f) of such Code is amended—

(A) by striking out "$11,000" each place it appears and inserting in lieu thereof "$16,000", and

(B) by striking out "$6,500" and inserting in lieu thereof "$11,000".

(2) Paragraph (2) of section 3507(c) of such Code (relating to earned income advance payment amount) is amended—

(A) by striking out "11 percent" each place it appears and inserting in lieu thereof "16 percent",

(B) by striking out "$6,500 and $11,000" and inserting in lieu thereof "$11,000 and $16,000", and

(C) by striking out "$3,250 and $5,500" and inserting in lieu thereof "$5,500 and $8,000".

(g) EFFECTIVE DATES.—

(1) Except as provided in paragraph (2), the amendments made by this section shall apply to taxable years beginning after December 31, 1985.

(2) The amendments made by subsections (d) and (e)(2) shall take effect on January 1, 1986.

SEC. 503. CREDIT FOR DEPENDENT CARE SERVICES.

(a) IN GENERAL.—Subpart C of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to refundable credits) is amended by redesignating section 35 as section 36 and by inserting after section 34 the following new section:

"SEC. 35. DEPENDENT CARE SERVICES.

"(a) ALLOWANCE OF CREDIT.—

"(1) IN GENERAL.—In the case of an individual who maintains a household which includes as a member 1 or more qualifying individuals, there shall be allowed as a credit against the tax imposed by this subtitle for the taxable year an amount equal to the applicable percentage of the sum of—

"(A) the employment-related expenses paid by such individual during the taxable year, plus

"(B) the respite care expenses paid by such individual during the taxable year.

"(2) APPLICABLE PERCENTAGE DEFINED.—

"(A) IN GENERAL.—For purposes of paragraph (1), the term 'applicable percentage' means 50 percent reduced (but not below 20 percent) by 1 percentage point for each full $2,000 amount by which the taxpayer's adjusted gross income for the taxable year exceeds $11,000.

"(B) COST-OF-LIVING ADJUSTMENT.—

"(i) IN GENERAL.—In the case of a taxable year beginning in a calendar year after 1985, subparagraph (A) shall be applied by increasing the $11,000 amount contained therein by the cost-of-living adjustment (as defined in section 1(f)(3)) for such calendar year.

"(ii) ROUNDING.—If any increase determined under clause (i) is not a multiple of $10, such increase shall be rounded to the nearest multiple of $10 (or if such increase is a multiple of $15, such increase shall be increased to the next highest multiple of $10).

"(b) EMPLOYMENT-RELATED EXPENSES.—For purposes of this section—

"(1) DETERMINATION OF ELIGIBLE EXPENSES.—

"(A) IN GENERAL.—The term 'employment-related expenses' means amounts paid for the following expenses, but only if such expenses are incurred to enable the taxpayer to be gainfully employed for any period for which there are 1 or more qualifying individuals with respect to the taxpayer:

"(i) expenses for household services, and

"(ii) expenses for the care of a qualifying individual.

Such term shall not include any respite care expense taken into account under subsection (a).

"(B) EXCEPTION.—Employment-related expenses described in subparagraph (A) which are incurred for services outside the taxpayer's household shall be taken into account only if incurred for the care of—

"(i) a qualifying individual described in subsection (d)(1), or

"(ii) a qualifying individual (not described in subsection (d)(1)) who regularly spends at least 8 hours each day in the taxpayer's household.

"(C) DEPENDENT CARE CENTERS.—Employment-related expenses described in subparagraph (A) which are incurred for services provided outside the taxpayer's household by a dependent care center (as defined in subparagraph (D)) shall be taken into account only if—

"(i) such center complies with all applicable laws and regulations of a State or unit of local government, and

"(ii) the requirements of subparagraph (B) are met.

"(D) DEPENDENT CARE CENTER DEFINED.—For purposes of this paragraph, the term 'dependent care center' means any facility which—

"(i) provides care for more than 6 individuals (other than individuals who reside at the facility), and

"(ii) receives a fee, payment, or grant for providing services for any of the individuals (regardless of whether such facility is operated for profit).

"(2) DOLLAR LIMIT ON AMOUNT CREDITABLE.—

"(A) IN GENERAL.—The amount of the employment-related expenses incurred during any taxable year which may be taken into account under subsection (a) shall not exceed—

"(i) $2,400 if there is 1 qualifying individual with respect to the taxpayer for such taxable year, or

"(ii) $4,800 if there are 2 or more qualifying individuals with respect to the taxpayer for such taxable year.

"(B) REDUCTION IN LIMIT FOR AMOUNT OF RESPITE CARE EXPENSES.—The limitation of subparagraph (A) shall be reduced by the amount of the respite care expenses taken into account by the taxpayer under subsection (a) for the taxable year.

"(3) EARNED INCOME LIMITATION.—

"(A) IN GENERAL.—Except as otherwise provided in this paragraph, the amount of the employment-related expenses incurred during any taxable year which may be taken into account under subsection (a) shall not exceed—

"(i) in the case of an individual who is not married at the close of such year, such individual's earned income for such year, or

"(ii) in the case of an individual who is married at the close of such year, the lesser of such individual's earned income or the earned income of his spouse for such year.

"(B) SPECIAL RULE FOR SPOUSE WHO IS A STUDENT OR INCAPABLE OF CARING FOR HIMSELF.—In the case of a spouse who is a student or a qualified individual described in subsection (d)(3), for purposes of subparagraph (A), such spouse shall be deemed for each month during which such spouse is a full-time student at an educational institution, or is such a qualifying individual, to be gainfully employed and to have earned income of not less than—

"(i) $200 if paragraph (2)(A)(i) applies for the taxable year, or

"(ii) $400 if paragraph (2)(A)(ii) applies for the taxable year.

In the case of any husband and wife, this subparagraph shall apply with respect to only one spouse for any one month.

"(c) RESPITE CARE EXPENSES.—For purposes of this section—

"(1) IN GENERAL.—The term 'respite care expenses' means expenses paid (whether or not to enable the taxpayer to be gainfully employed) for—

"(A) the care of a qualifying individual—

"(i) who has attained the age of 15, or

"(ii) who is under the age of 15 but has a physical or mental impairment which results in the individual being incapable of caring for himself,

during any period when such individual regularly spends at least 8 hours each day in the taxpayer's household, or

"(B) care (for not more than 14 days during the calendar year) of a qualifying individual described in subparagraph (A) during any period during which the individual does not regularly spend at least 8 hours each day in the taxpayer's household.

"(2) DOLLAR LIMIT.—The amount of the respite care expenses incurred during any taxable year which may be taken into ac-

count under subsection (a) shall not exceed—

"(A) $1,200 if such expenses are incurred with respect to only 1 qualifying individual for the taxable year, or

"(B) $2,400 if such expenses are incurred for 2 or more qualifying individuals for such taxable year.

"(d) QUALIFYING INDIVIDUAL.—For purposes of this section, the term 'qualifying individual' means—

"(1) a dependent of the taxpayer who is under the age of 15 and with respect to whom the taxpayer is entitled to a deduction under section 151(e),

"(2) a dependent of the taxpayer who is physically or mentally incapable of caring for himself, or

"(3) the spouse of the taxpayer, if he is physically or mentally incapable of caring for himself.

"(e) SPECIAL RULES.—For purposes of this section—

"(1) MAINTAINING HOUSEHOLD.—An individual shall be treated as maintaining a household for any period only if over half the cost of maintaining the household for such period is furnished by such individual (or, if such individual is married during such period, is furnished by such individual and his spouse).

"(2) MARRIED COUPLES MUST FILE JOINT RETURN.—If the taxpayer is married at the close of the taxable year, the credit shall be allowed under subsection (a) only if the taxpayer and his spouse file a joint return for the taxable year.

"(3) MARITAL STATUS.—An individual legally separated from his spouse under a decree of divorce or of separate maintenance shall not be considered as married.

"(4) CERTAIN MARRIED INDIVIDUALS LIVING APART.—If—

"(A) an individual who is married and who files a separate return—

"(i) maintains as his home a household which constitutes for more than one-half of the taxable year the principal place of abode of a qualifying individual, and

"(ii) furnishes over half the cost of maintaining such household during the taxable year, and

"(B) during the last 6 months of such taxable year such individual's spouse is not a member of such household,

such individual shall not be considered as married.

"(5) SPECIAL DEPENDENCY TEST IN CASE OF DIVORCED PARENTS, ETC.—If—

"(A) paragraph (2) or (4) of section 152(e) applies to any child with respect to any calendar year, and

"(B) such child is under the age of 15 or is physically or mentally incapable of caring for himself,

in the case of any taxable year beginning in such calendar year, such child shall be treated as a qualifying individual with respect to the custodial parent (within the meaning of section 152(e)(1)), and shall not be treated as a qualifying individual with respect to the noncustodial parent.

"(6) PAYMENTS TO RELATED INDIVIDUALS.—No credit shall be allowed under subsection (a) for any amount paid by the taxpayer to an individual—

"(A) with respect to whom, for the taxable year, a deduction under section 151(e) (relating to deduction for personal exemptions for dependents) is allowable either to the taxpayer or his spouse, or

"(B) who is a child of the taxpayer (within the meaning of section 151(e)(3)) who has not attained the age of 19 at the close of the taxable year.

For purposes of this paragraph, the term 'taxable year' means the taxable year of the taxpayer in which the service is performed.

"(7) STUDENT.—The term 'student' means an individual who during each of 5 calendar months during the taxable year is a full-time student at an educational organization.

"(8) EDUCATIONAL ORGANIZATION.—The term 'educational organization' means an educational organization described in section 170(b)(1)(A)(ii).

"(f) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary to carry out the purposes of this section."

(b) TECHNICAL AMENDMENTS.—

(1) Section 21 of such Code is hereby repealed.

(2) Paragraph (2) of section 129(b) of such Code is amended by striking out "section 21(d)(2)" and inserting in lieu thereof "section 35(b)(3)(B)".

(3) Subsection (e) of section 213 of such Code is amended by striking out "section 21" and inserting in lieu thereof "section 35".

(c) CLERICAL AMENDMENTS.—

(1) The table of sections for subpart C of part IV of subchapter A of chapter 1 of such Code is amended by striking out the item relating to section 35 and inserting in lieu thereof the following:

"Sec. 35. Dependent care services.

"Sec. 36. Overpayments of tax."

(2) The table of sections for subpart A of such part IV is amended by striking out the item relating to section 21.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1985.

SEC. 504. RETIREMENT SAVINGS OF INDIVIDUALS.

(a) INCREASE IN AMOUNTS INDIVIDUALS MAY CONTRIBUTE ON BEHALF OF THEIR SPOUSE.—Subsection (c) of section 219 of the Internal Revenue Code of 1954 (relating to special rules for certain married individuals) is amended to read as follows:

"(c) SPECIAL RULES FOR CERTAIN MARRIED INDIVIDUALS.—

"(1) IN GENERAL.—In the case of any individual—

"(A) with respect to whom a deduction is otherwise allowable under subsection (a) for any taxable year, and

"(B) who files a joint return for such taxable year,

there shall be allowed as a deduction any amount paid in cash for the taxable year by or on behalf of the individual to an individual retirement plan established for the benefit of the individual's spouse.

"(2) LIMITATION ON AMOUNT OF DEDUCTION.—The amount allowable as a deduction under paragraph (1) shall not exceed the excess of—

"(A) the lesser of—

"(i) the applicable amount, or

"(ii) an amount equal to the sum of the compensation includible in the individual's and the spouse's gross income for the taxable year, over

"(B) the sum of the amounts allowed as a deduction for such individual and such spouse under subsection (a) for the taxable year.

In no event shall the amount allowable for a deduction under paragraph (1) exceed $2,000.

"(3) APPLICABLE AMOUNT.—For the purposes of this subsection, the applicable amount shall be determined in accordance with the following table:

"In the case of a taxable year beginning in:	The applicable amount is:
1986 and 1987	$2,750
1988 and 1989	$3,250
1990 and 1991	$3,750
1991 and thereafter	$4,000.".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1985.

SEC. 505. DEDUCTION FOR CERTAIN EXPENSES FOR FOOD, BEVERAGES, LODGING, AND ENTERTAINMENT DISALLOWED IF INCURRED IN CONNECTION WITH A FACILITY TO WHICH ACCESS IS LIMITED ON THE BASIS OF RACE, COLOR, SEX, RELIGION, OR NATIONAL ORIGIN.

(a) IN GENERAL.—Section 274 of the Internal Revenue Code of 1954 (relating to disallowance of certain entertainment, etc., expenses) is amended by redesignating subsection (i) as subsection (j) and by inserting after subsection (h) the following new subsection:

"(i) EXPENSES FOR FOOD, BEVERAGES, LODGING, AND ENTERTAINMENT, ETC., ACTIVITY INCURRED IN CONNECTION WITH CERTAIN FACILITIES WHICH DISCRIMINATE.—

"(1) IN GENERAL.—No deduction otherwise allowable under section 162 or section 212 shall be allowed for any expense paid or incurred by the taxpayer with respect to—

"(A) any food, beverages, or lodging furnished to the taxpayer or any other person in a discriminating facility, and

"(B) any entertainment, etc., activity carried on in a discriminating facility.

"(2) DEFINITIONS AND SPECIAL RULES.—For purposes of this subsection—

"(A) DISCRIMINATING FACILITY DEFINED.—The term 'discriminating facility' means any facility—

"(i) access to which, by any person, is limited in any manner, or

"(ii) in which any person is denied full and free enjoyment of any goods, services, privileges, advantages, or accommodations provided within such facility,

on the basis of race, color, religion, sex, or national origin.

"(B) ENTERTAINMENT, ETC., ACTIVITY DEFINED.—The term 'entertainment, etc., activity' means any activity which is of a type generally considered to constitute entertainment, amusement, or recreation.

"(C) OPERATOR DEFINED.—The term 'operator' means any person or organization which operates or manages any facility, sets policy with respect to the operation or management of such facility, or controls directly or indirectly access to or the use of such facility.

"(D) EXCEPTION FOR DISCRIMINATION ON THE BASIS OF RELIGION IN CERTAIN CASES.—Paragraph (1), to the extent it relates to discrimination on the basis of religion, shall not apply to any facility—

"(i) the operator of which is an organization exempt from taxation under section 501(a) (and is not subject to tax under section 511 with respect to such facility),

"(ii) in which entertainment, etc., activities are carried on, and

"(iii) access to which is limited in good faith by such organization to members of a particular religion for the sole purpose of excluding individuals of all other religions.

"(E) EXCEPTION FOR OPERATING EXPENSES.—In the case of a taxpayer who is the operator of a discriminating facility, paragraph (1) shall not apply to ordinary and necessary expenses paid or incurred by the taxpayer in connection with the operation of such facility.

"(F) SPECIAL RULE FOR DUES AND FEES.—To the extent the amount of any dues or fees paid to any person or organization is attributable to the privilege of gaining access to or using any discriminating facility (including the right to receive any food, beverages, or lodging in such facility or to participate in any entertainment, etc., activity carried on in such facility), such amount shall be treated as an expense for which a deduction is disallowed under paragraph (1).

"(G) SECRETARY TO PROVIDE FOR COORDINATION IN CASE OF MORE THAN 1 OPERATOR OF A FACILITY.—With respect to any facility which has 2 or more operators, the Secretary shall prescribe by regulations procedures whereby the operators of such facility may enter into an agreement to allow 1 such operator to act for the other operators for purposes of any action required or permitted of an operator under this subsection.

"(3) DETERMINATION BY SECRETARY AND NOTICE TO TAXPAYER REQUIRED BEFORE ANY DEDUCTION FOR EXPENSE INCURRED IN PRIVATE FACILITY MAY BE ALLOWED.—

"(A) PRESUMPTION ESTABLISHED THAT PRIVATE FACILITY IS DISCRIMINATING FACILITY.—Any facility—

"(i) in which any food, beverage, or lodging is furnished or within which any entertainment, etc., activity is carried on, and

"(ii) which is not open to the public or in which the public is not served,

shall be treated as a discriminating facility for purposes of paragraph (1) for any day on which the requirements of subparagraph (B) are not met.

"(B) APPROVAL OF STATEMENT BY SECRETARY AND POSTING OF PUBLIC NOTICE.—The requirements of this subparagraph with respect to any facility have been met for any day if—

"(i) a statement has been filed within the 1-year period ending on such day by the operator of such facility stating that such facility is not a discriminating facility together with information sufficient to demonstrate to the Secretary's satisfaction that no provision of any charter, bylaws, or other governing instrument or written policy statement of the operator of such facility provides for the practice of discrimination against any person with respect to access to and the use of such facility on the basis of race, color, religion, sex, or national origin,

"(ii) the Secretary has accepted the statement described in clause (i), and

"(iii) a public notice (of such size and design and such size print as the Secretary shall prescribe by regulation) is posted in a prominent place within the facility stating that the Secretary has accepted the statement of the operator of such facility that such operator does not practice discrimination with respect to access to or the use of such facility on the basis of race, color, religion, sex, or national origin.

"(4) REVOCATION OF ACCEPTANCE OF STATEMENT BY SECRETARY IN ANY CASE IN WHICH DISCRIMINATION IS PROVED.—

"(A) IN GENERAL.—If a determination is made that any facility which otherwise meets the requirements of paragraph (3)(B) is a discriminating facility, the Secretary shall revoke the acceptance described in paragraph (3)(B)(ii) with respect to such facility.

"(B) DETERMINATION THAT FACILITY IS A DISCRIMINATING FACILITY.—A determination that a facility is a discriminating facility has been made for purposes of subparagraph (A) if—

"(i) the Secretary or the head of any other department or agency of the United States determines on a record after opportunity for agency hearing that the operator of such facility currently maintains a practice,

"(ii) any court of the United States or any State renders a judgment that the operator of such facility currently maintains a practice, or

"(iii) the operator of such facility admits that it currently maintains a practice,

the effect of which is to make such facility a discriminating facility.

"(C) TERMINATION OF REVOCATION.—

"(i) IN GENERAL.—Any operator of a facility with respect to which a determination described in subparagraph (B) has been made may, under regulations prescribed by the Secretary, file a statement that—

"(I) the practice which gave rise to the determination has been corrected or abandoned, and

"(II) the facility is no longer a discriminating facility.

"(ii) ACCEPTANCE BY SECRETARY.—If the Secretary is satisfied that the practice referred to in clause (i) has been corrected or abandoned and the facility is not a discriminating facility, the Secretary may accept such statement of the operator for purposes of paragraph (3)(B).

"(5) COMPLIANCE PROVISION.—No deduction shall be allowed for any amount paid or incurred by the taxpayer in any taxable year for food, beverages, lodging, or entertainment, etc., activity unless such taxpayer reports to the Secretary (in a space provided by the Secretary on the return of income filed by such taxpayer for such taxable year) the sum of all amounts paid or incurred for food, beverages, lodging, or entertainment, etc., activity (including any dues or fees taken into account with respect to such amounts under paragraph (2)(F)) during such taxable year in any facility which is not open to the public or does not serve the public."

(b) TECHNICAL AMENDMENT.—Subsection (d) of such section 274 of such Code (relating to the requirement of substantiation of certain expenses) is amended by striking out "gift, (C)" and inserting in lieu thereof "gift (including information sufficient to substantiate that no such item or expense is an item or expense for which a deduction is disallowed under subsection (i)), (C)".

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall apply to any amount paid or incurred after the end of the 60-day period beginning on the date of the enactment of this Act in taxable years ending after the end of such 60-day period.

COMPARABLE WORTH: LOONEY TUNES OR LONG OVERDUE?

(By Ruth Hammond)

A high-placed Reagan appointee calls it "the looniest idea since Looney Tunes." Advocates call it a solution to inequities dating back to Biblical times. The state of Minnesota has embraced it as public policy.

"It" is comparable worth: payment of equal salaries for jobs somehow measured to have comparable skills, effort, responsibility, and working conditions. In Minnesota there are two comparable worth laws. One requires that all state employees be paid on the basis of comparable worth; the other that all political subdivisions of the state comparable worth studies by October 1 and begin to implement their findings by 1987.

Compared to other states, where comparable worth has fostered bitter public debate and costly court struggles, Minnesota has had an easy time of implementation—so far. Both unions and legislators backed the comparable worth law for state workers, which passed without much notice in 1982. But the landmark legislation passed last year, extending comparable worth to all the state's city and county governments and school districts, promises to be more controversial.

Figures from the U.S. Department of Labor Statistics show that the median wage of female, full-time workers was only 65 percent that of men in 1984. Comparable worth supporters argue that this disparity stems from an attitude that undervalues women's work—and puts college-educated women on the same pay scale as men who didn't finish high school. They further claim that comparable worth will take long strides toward resolving one of this country's major social problems: poverty among women and children.

Opponents argue that government should not tamper with wages set by the free market system. They question the objectivity of the various evaluation methods used to compare jobs, and claim that comparable worth may improve the economic situation of some women at the expense of limiting the total number of jobs available to everyone.

In 1978, Eleanor Homes Norton, then head of the Equal Employment Opportunity Commission (EEOC), predicted that comparable worth would become "the women's issue of the 1980s." It has. Along the way it has gained some of its strongest support from employees unions and feminist groups like the National Organization for Women. The latter advocates its adoption in the public and private sectors.

The U.S. House of Representatives passed a bill last year to study the implementation of comparable worth in the federal government, but the measure never got out of conference in the Senate. Predictably, the Reagan administration is dead set against the idea. Two of comparable worth's most outspoken critics—Linda Chavez, staff director of the U.S. Commission on Civil Rights, and commission chairman Clarence M. Pendleton Jr. (the man who likened comparable worth to "Looney Tunes")—are Reagan appointees.

Most action on comparable worth is taking place on state and local levels. While implementation here has, by most accounts, gone "smoothly," another comparable worth trendsetter, the state of Washington, is wrestling with a court decision requiring it to spend $400 million right away to make up wage discrepancies it had planned to iron out over a 10-year period. In Wisconsin, comparable worth has pitted Governor Anthony Earl against a multitude of business groups strongly opposed to its implementation for state employees. And in Illinois, where comparable worth was discussed but not implemented, the American Nurses Association is suing the state for discrimination—basing its complaint on the findings of a pilot study on comparable worth. In a twist that emphasizes the complexity of the issue, 20 female state employees who moved from traditionally female jobs to male-dominated jobs have joined the suit on the side of the state.

In Minnesota, the courts have scarcely been involved. Comparable worth legislation was introduced to remedy a situation described in a 1982 report of the Council on the Economic Status of Women's Task Force on Pay Equity. Among the findings published in the report:

Two-thirds of state-employed women were either clerical or service workers; less than 1 percent were managers.

The gap between the average earnings of state-employed men and women grew from $4,190 in 1976 to $4,929 in 1981, in spite of some improvement in the number of women in professional and managerial jobs during the same period. (Because of pay increases for both sexes, the average women's pay in this period actually improved from 69 cents on the man's dollar to 74 cents, figures not mentioned in the report.)

Where jobs were rated on a point evaluation system by Hay Associates management consultants, every female-dominated job (defined as at least 70 percent female) had considerably lower wages than the male-dominated job (at least 90 percent male) with an equal number of points.

Hay consultants did not find fault with these wage differences because they corresponded with marketplace rates, but the figures roused women's rights advocates. The state's first comparable worth law passed that same year with surprisingly little fuss. "We didn't have any testimony in opposition to the law," says Bonnie Watkins, Pay Equity Coordination in the State Department of Employee Relations. "People see it as a basic fairness issue. No hysterical stuff got started."

AN ACT OF IMPATIENCE

The comparable worth law might be interpreted as an act of impatience. Two federal laws passed 20 years ago—the Equal Pay Act of 1963 and Title VII of the Civil Rights Act of 1964—were supposed to improve the economic status of women, the first by requiring equal pay to men and women holding equal jobs, the second by prohibiting discrimination in employment. But at the state level in Minnesota, "job integration wasn't taking care of the problem" of wage differences, Watkins says. If the low economic status of women was going to change in this generation of workers, the pay scale in fields crowded by females would have to be raised. Or so argue backers of comparable worth.

The 1982 law requires that wages in female-dominated classes be adjusted gradually to equal wages for male-dominated classes with the same number of points, with full equity reached by 1987. The state's clerical workers and half of its health care workers won the greatest increases under the new law. The State Department of Employee Relations—and not Hay Associates—devised a way of adjusting pay to eliminate sex-based inequities.

By 1987, delivery van drivers (all male in 1981) must be paid about the same as clerk typist 2s (98.8 percent female) because both jobs measure 117 in Hay Point ranking. Licensed practical nurses (more than 90 percent female, 183 points) will be paid nearly the same as painters (all male, 185 points), closing a wage gap in 1981 of almost $400 a month.

The Legislature allocated $21.8 million in the 1983-84 biennium to boost the salaries of 9,000 employees deemed to be underpaid. It is expected to close the remaining $9 million gap over the next two years. The actual total wage difference for comparable worth will add up to $23.8 million because $7 million of the 1984 allocation was provided to maintain the 1983 increase. The $23.8 million will be a continuing annual cost in the state budget.

"It costs so much less than people think," Watkins says. "It only costs 4 percent of the state's payroll budget, or 1 percent a year for four years."

Others look at the same figures and find them considerable. Twenty-three million "is a lot of millions," Clarence Pendleton says. Francis Fitzgerald, of the Minnesota Association of Commerce and Industry says comparable worth is "very expensive for taxpayers," and the compounded figure is "twice as much as farmers got in relief from the state."

It should be noted that wage disparities were all credited to the underpayment of women and not the overpayment of men. No wages were decreased to reach equity, a move that would have been unpopular among employees. Another noteworthy point: Female dominated categories were awarded adjustments, even though the Hay evaluator showed some workers in male-dominated and sex-balanced classes to be making less than workers with lower rankings. So, if 1981, a Minnesota state forester, ranked at 245 points, made $1,538 a month; but a correctional counselor 3, ranked at only 195 points, made $1,961 a month.

Watkins says the comparable worth law didn't address these apparent inequities because they were not based on sex discrimination.

WHISTLING IN THE DARK

At the state level, comparable worth hasn't ruffled many feathers. The same is not likely to be the case in local units of government. There are several reasons for pessimism. For one thing, local jurisdictions resent the idea of conforming to the law when they've received no money to conduct evaluation studies or raise salaries if necessary. As a result, some county board members are dragging their feet, perhaps hoping the law will be repealed before they get in too deep. And under these circumstances, "too deep" means before a job evaluation study that might uncover job discrimination against women employees—and open the door to lawsuits. But such hopes are likely to be dashed.

"People who think the law is going to be repealed are whistling in the dark," says Rick Scott, political action director for the American Federation of State, County and Municipal Employees (AFSCME) in Minnesota. AFSCME, a powerful proponent of comparable worth, has filed with the EEOC most of the 260-plus standing charges alleging sex-based wage discrimination.

Disagreement over what type of job evaluation system to use poses another hurdle to local implementation of comparable worth—one that has already provoked a legal battle.

Earlier this year, two unions went to Hennepin County Court seeking an injunction against the Minnesota School Board Association (MSBA), the Stillwater and Minnetonka school districts, and Arthur Young and Company, the consulting firm hired by the MSBA. The unions wanted to halt the use of the particular method of job rating chosen for the schools.

MINNESOTA PAY EQUITY PLAN APPLIED TO FEMALE AND MALE JOBS

Job title	Rating	1983 pay hourly	1985 pay hourly [1]	Comparable worth raise [2]
Starting clerk (f)	97	$6.23	$7.57	$.80
Mail handler (m)	93	7.13	7.75	0
Office supervisor (f)	208	9.12	10.45	.63
Printing supervisor (m)	209	11.13	12.10	0
Health physicist (f)	608	17.32	20.20	1.38
Senior veterinarian (m)	609	18.59	20.20	0

[1] All workers received general raises; female jobs received general raises plus comparable worth raises.

[2] Two years of raises were required to make female wages equal to male wages. Most female jobs are due for two additional raises in 1986 and 1987.

Source: State of Minnesota.

The Minnesota School Employees Association (MSEA) represents teacher's aides in Stillwater and Minnetonka. The International Union of Operating Engineers Local 70 represents custodians in Stillwater. The first group is mostly female, the second primarily male, but both believe the "decision band" method will rate their jobs unfairly.

Michael Pirsch, MSEA executive director, claims that the decision band method used by Arthur Young fails on a number of critical points. Among other things, he claims the method does not meet state legal requirements that "skill, effort, responsibility, and working conditions" be considered in the evaluation. "If I were an opponent of eliminating sex-based wage discrimination, this is the system I would use," Pirsch says.

Pirsch thinks the MSBA made a mistake in recommending the system—a mistake that will be compounded more than 400 times if it is used in school districts around the state. He says he prefers a factor comparison method like the one used by the city of Minneapolis. He also believes that a union representative should have been involved in selecting an evaluation method.

But the decision band method has its defenders, too. Willard Baker, executive director of the MSBA, recalls that a 25-member advisory committee comprised of superintendents, school board members, and personnel directors reviewed proposals from various consultants and chose the decision band method offered by Arthur Young over others. "We think it's the best method for school districts. It's fair and equitable and not subject to manipulation," Baker says. "The basis concept is that higher-level decision-making in an organization requires greater skill, effort, and responsibility."

On March 6, Judge Charles Porter dismissed the unit. In his decision he cited a portion of the comparable worth law prohibiting the state Human Rights Department and state courts from using the results of any job evaluation system in discrimination proceedings prior to August 1, 1987. Pirsch counters that this wasn't a discrimination suit. He says the unions will appeal the decision to the State Supreme Court, where he hopes the case will be considered on its merit rather than its timing.

Meanwhile, Arthur Young has filed a counterclaim against the unions, alleging trade libel and slander. "We will continue to pursue the counterclaim," James C. Fox, Arthur Young's director of Human Resource Consulting, said two days after Porter's dismissal of union charges. Fox said he feels the unions, in discussing their case with the press, "have damaged the decision band method and the reputation of our firm."

The city of Saint Paul has run into more subdued opposition to the preliminary results of its classification and compensation study where employee teams rated 850 job titles according to the Quantitative Evaluation System. That system is also used by the federal government, but not for comparable worth.

Overseeing the mammoth study was a Joint Labor-Management Committee, which swelled from 20 to 40 members during the two-year evaluation process, Jeanette Sobania, a city personnel assistant who managed the St. Paul study, said that trades jobs "didn't come out all that well" in the ratings, and the trade unions are worried about how that will affect them in future

negotiations. This spring saw a re-working of the study.

Representatives of trades unions were quick to say that they're not opposed to comparable worth, but disagree with the classifications arrived at for trades jobs. "Women have been discriminated against historically because they're women, and that needs to be addressed," says John Galles, who represented electricians on the Labor-Management Committee. Electricians feel the study undervalues their jobs, but do not advocate that the study be redone.

Phillip Penn, another committee member and director of personnel for the St. Paul schools, predicted that the city of St. Paul and the St. Paul School System would not follow the lead of the state. Instead it would adjust pay scales to reflect the values of all jobs, whether female-dominated, male-dominated, or sex-balanced.

PERSONAL EVALUATIONS

Small towns face a special challenge. Everybody knows one another, and the debate over job evaluations can get personal.

At the urging of then Mayor Faith Zwemke, the city of Princeton, Minnesota, instituted comparable worth on January 1, 1984, before any law required it. The year before, Zwemke and another councilor reviewed the city's new point system for employees and found that female employees had been put in the wrong pay grade.

Princeton, with a population 3,146, has 33 city employees, five of them female. A whirl of controversy surrounded the bookkeeper, Bonnie Nelson-Gerth. According to the evaluation, she should have been in Pay Grade 6, the same as workers on the street maintenance crew. But, Zwemke said, "the council arbitrarily put her back in Grade 4, the comment being that no bookkeeper makes that much." That decision was later reversed.

Ultimately, Nelsen-Gerth's pay went up 38 percent, from $7.05 to $9.78 an hour—or 18 cents an hour more than maintenance workers earn. But she has paid a price for her higher remuneration, in the form, as she says, of "a lot of hatred from the men, the police department and the maintenance department." Some people, she says, "just don't feel a woman should make as much as a man."

Some of the resentment has even been generated by women, like the wife of a maintenance worker who announced to Nelsen-Gerth that "the next time it snows, we're going to bring plows down to city hall, and the bookkeeper can plow the streets." (Ironically enough, there is a female city employee, a secretary, who operates a plow on an as-needed basis.)

By now though, Nelsen-Gerth believes that her fellow male employees have had a slight change of heart. "They've accepted it in that it's done now or they understand it better," she says.

Local governments are free to act alone in job evaluations, but others are teaming together. Bill Joynes, city manager of Golden Valley, is also chairman of the Metropolitan Area Management Association's Labor Relations Committee. The association of 65 suburban city managers and administrators decided to choose one job evaluation system in order to get consistent results. Joining the association were 30 outstate cities, 20 municipal utilities, six regional libraries, the Metropolitan Airport Commission, and the Redwood Falls Hospital, all of which must comply with the law.

The association looked at 10 consultants and concluded that Control Data Business Advisors Inc., had "the best proposal by far," Joynes said. Originally the association thought it could only afford to evaluate 20 benchmark jobs and would have to slot the others in between, but Control Data Business Advisors, with its "state-of-the-art" computer capabilities, could evaluate thousands of jobs. Another compelling reason to choose Control Data provides a telling comment on the issue of comparable worth. Control Data, Joynes says, "offered support in case we ever get sued, which is likely."

Each governmental unit will pay a base of $3,000 plus $35 for each employee, with costs ranging from $3,350 for Waconia to $17,500 for Bloomington. Joynes expects the cost of correcting sex-based wage inequities to be higher than the 4 percent or less of the city budgets predicted by advocates of comparable worth. "Only about 20 percent of the state budget is for personnel, but 70 to 80 percent of our city budgets are for personnel. We're more nervous," he says.

Besides AFSCME, which has a large female membership, the cities must negotiate with five male-dominated unions which Joynes says feel "threatened" by the comparable worth law. The unions represent firefighters, operating engineers, teamsters, hotel and retail workers, liquor store operators, and law enforcement officers. "If we get litigation, it will not come from the women who get the raises, it will come from these male unions," Joynes predicts.

VALUE JUDGMENTS

Besides practical matters of dollars and cents, comparable worth raises a host of moral and ethical questions that may go beyond the power of courts and legislatures to address.

Whose value system, for example, should be used to establish job evaluation rates? Are traditionally male qualities to be valued more than traditionally female qualities—for example, why are there points available for heavy lifting but none for compassion? Or to the contrary, as some opponents of comparable worth charge, are the evaluation systems designed to rate the qualities of women's jobs higher and thus show evidence of sex-based wage discrimination where there might actually be none?

Does one evaluation system reflect hierarchical thinking patterns unfit for use in a democratic society, as two school unions are arguing in court? Who is to say that the stress of supervising should be compensated more greatly than the stress of being supervised? Who is to say that those who use a variety of skills in a job should be more highly paid than those who must cope with endless monotony?

Do various evaluation systems reflect a white-collar ignorance of blue-collar job stresses by giving working conditions relatively low weight in their point systems? The Willis system employed by the state of Washington, for instance, gives working conditions only a potential 20 points out of a total point system of 600. People working with hazardous chemicals, or in perilous mines, or exposed to the elements on a blustery January day, might argue that their working conditions should be of greater significance. Under the factor evaluation system used by the St. Louis County Civil Service Department, a worker rates 60 points in "unavoidable hazards" if the work requires *"frequent* exposure to physical and working conditions when *critical* illness and *loss of life* occasionally are encountered despite provision of safety measures and health precautions."

An equal number of points is awarded in the evaluation factor "worker characteristics" for the "ability to read simple sentences with common vocabularly" and "to add, subtract, multiply and divide whole numbers." Are risk to life and the strain of doing simple arithmetic of equal value?

Should upper body strength, a predominantly male quality, be ranked of greater value to an employer than fine motor coordination, a predominantly female quality? Should employees in physically demanding jobs be compensated more for their effort, or less because they are spared the need to jog after work? Does it matter that the scales of measurement were set up mostly by men and are applied mostly by men?

However those questions are answered—if they *can* be answered—there's no question that comparable worth would have a sweeping, even tumultuous effect on society if it were to spill beyond the confines of government and into the private sector. Some idea of what might happen can be seen in the experience of Washington state. There, attempts to implement a comprehensive comparable worth program—one embracing both men *and* women—has pried open a Pandora's Box of legal and financial woes.

Since 1960, Washington has pegged its workers' wages to the prevailing market rate. After complaints about sex discrimination from AFSCME union officials, the governor ordered a special study in 1974. It showed that predominantly female jobs were paid about 20 percent less than male-dominated jobs of comparable worth.

When funds to correct this disparity were not forthcoming, AFSCME sued. In December 1983, U.S. District Judge Jack E. Tanner found the state guilty of discrimination under Title VII of the Civil Rights Act of 1964. He ordered that salaries of everyone in job categories that were at least 70 percent female be brought up to their comparable worth immediately, and ordered back pay to September 1979, two years prior to the date that the union filed its complaint with the EEOC. Details of how the back pay is to be calculated are still before a special master of the district court. The cost of compliance on the back pay issue alone has been estimated at $400 million.

The state is now appealing two of Judge Tanner's decisions: the finding that it is liable for discrimination, and the order that it change its pay system for female-dominated classes. Meanwhile, the state Legislature has passed a law requiring that comparable worth be fully implemented by 1993. It took a small first step by allocating $1.5 million last July to increase 15,000 employees' salaries by $100 this year. A Joint Select Committee on Comparable Worth has recommended that the Legislature allocate half the money needed to make the comparable worth adjustment in the coming year. If comparable worth were instituted for the 10,500 workers in female-dominated classes in one year, the cost would be about $65 million—this in a state financially weakened by hardships in the forest industry.

But Washington, unlike Minnesota, is aiming for comparable worth for the entire work force; that is, for men as well as women, which would cost twice as much—about $130 million—and affect the pay of 21,000 workers if the correction were made in one year.

Some believe that if Tanner's orders are followed, chaos will result. Because Tanner's decision calls for pay adjustments only in female-dominated classes, an employee could end up making more than her supervi-

sor if the supervisor, male or female, was in either a balanced or male-dominated job class.

Workers who feel positive about comparable worth might change their minds if the Legislature eliminates the usual marketplace rate salary adjustments for a few in order to pay for comparable worth, says Leonard Nord, Washington's director of personnel. "The Legislature has been good in following the results of our salary survey," he says. "Any bias that was found is reflective of bias in the state of Washington's private sector. That's why I don't feel guilty in that suit. We pay what we have to pay to get and retain people."

No law requires private business to institute comparable worth—at least not yet—but business should feel its effect just the same. Some Minnesota companies are quietly taking steps toward comparable worth as they do job evaluation studies, either because they believe in it or because they are worried about becoming vulnerable to lawsuits. Higher pay for female-dominated jobs might "trickle down" to some businesses when they realize they can't compete with state, county, and city government wages for the best clerical and health care workers.

In Wisconsin, where comparable worth is under study, industry is outspoken in its opposition to the law. In Minnesota, where what's been done has been done, the mood is not vitriolic but cool, calm, collected, and alert.

"Comparable worth is a fairly new topic in the private sector," says John Cairns, attorney for the Minnesota Business Partnership. "We better watch it in case it spills over."

COMPARABLE WORTH: PRO AND CONS

For such a thorny and complex issue, comparable worth has generated little by way of productive public dialogue. Those posed on either side of the question tend to attack each other's motives rather than arguments. The reason for this, speculates a partner with Hay Associates, may be a form of intellectual intimidation. "It's very easy," says Robert Muschewske, "for anyone discussing the negative aspects of comparable worth to be branded as anti-women." Here are some conflicting opinions from observers around the country:

What is the difference between comparable worth and pay equity?

Some insist there is no difference and use the terms interchangeably. The term "pay equity" implies a concept that is unquestionably fair and is therefore becoming more popular among proponents; the National Organization for Women, for instance, recommends that members call comparable worth "pay equity."

Opponents do not think the two terms should be confused. "Comparable worth masquerades as pay equity," says Clarence M. Pendelton Jr., chairman of the U.S. Commission on Civil Rights. "Pay equity means equal pay for equal work, which is already required by law. Comparable worth is trying to take skills, effort, responsibility and working conditions and make some absolute zero."

Why is there still such a strong wage disparity between men and women?

Pamela Toutant, congressional liaison for the Equal Employment Opportunity Commission, wrote her master's thesis on comparable worth. She thinks employers have gotten accustomed to hiring women cheaply, and will continue to try to do so, exploiting many women's desperation for a job. "A lot of female occupations—like nursing, teaching, and social work—evolved out of volunteer work," another reason for their low pay now, Toutant says.

"A Closer Look at Comparable Worth," published by the National Foundation for the Study of Equal Payment Policy, cites other reasons besides discrimination for the earnings gap. Among them: the number of inexperienced women who have joined the work force; the tendency of women to cluster in just a few occupations and in low-paying industries; women's failure to seek more job training at the beginning of their careers; and more frequent interruption of careers by women so they can raise children.

Meanwhile, U.S. Department of Labor Statistics surveys show the earnings gap between young women and young men to be much narrower than the gap between older female and male worker.●

● Mr. HATFIELD. Mr. President, it is a pleasure to join once again in the introduction of the Economic Equity Act [EEA]. This package was first introduced by the distinguished sponsor, Senator DURENBERGER, and myself in the 97th Congress to provide a focus on economic issues relating to women.

Previous EEA's have made great strides in addressing the economic concerns of women in society. During the 97th Congress provisions relating to pensions for former spouses of military personnel, estate taxes and Tax Code changes concerning child care were enacted. The 98th Congress included passage of strengthening legislation for the collection of child support and improving womens' access to accumulating retirement benefits under private pension plans.

This year's EEA includes sections relating to retirement security, dependent care, insurance reform, employment, and tax reform. It is a big package, not without controversial provisions, but is a fair representation of the issues that are key to the economic concerns faced by women in today's society.

The focus on deficit reduction in this Congress has stirred concern over dependent care provisions included in this package which call for increased authorization levels. However, with one parent families now comprising over one quarter of all families with children under the age of 18—9 out of 10 of these families headed by women—the importance of these programs cannot be discounted. Of these female headed single parent families, 40 percent of those headed by white women live below the poverty line. The figure is 60 percent for single parent families headed by black women. These numbers are particularly disturbing in light of the fact that the national poverty rate is 15.2 percent. It is simply sound economic policy to attempt to aid these women in extricating themselves from dire economic circumstances. The Census Bureau estimates that 26 percent of mothers of children under 6 who are not now working would seek employment if affordable child care were available and affordable.

Additionally, as the graying of America continues, more and more older women will face the problems of economic survival during retirement years. Women on the average have a 50 percent greater chance of being poor than men; during old age that risk is 70 percent greater.

Although we have made great strides, the foregoing indicates there remain many challenges ahead of us. This package addresses the needs of older women and younger women, wage-earners and homemakers, single heads of households and business women. In the final analysis it may be too simplistic to identify these issues as exclusively women's issues, for in a broader sense there are issues involving basic human rights.

This package will be referred to the Senate Finance Committee and look forward to the thoughtful consideration of the issues presented under the skillful leadership of my colleague from the State of Oregon and chairman of the Senate Finance Committee, Senator PACKWOOD.●

● Mr. HART. Mr. President, I am proud to join my colleagues in introducing the Economic Equity Act. Economic equity is a vital issue not only for women, but for their families—men and children as well.

Without economic equity there can be no justice. Passage of the Economic Equity Act will move us further along the path to achieving equal treatment for women. The Economic Equity Act will rectify many outmoded and discriminatory policies. Yet, this bill is not important to women alone. For the progress of women is not theirs alone but creates a better society for their husbands, children, and parents. At a time when most women work and most single parent households are headed by women, passage of the bills included in the Economic Equity Act strengthens the family by encouraging equal treatment for women in ways that benefit the whole family. For example, fair wages for women are crucial to their whole families' financial well-being and good, safe, readily available day care provides support to hard working parents.

Mr. President, the principles of fairness and justice laid down by our Founding Fathers must apply to all our people. Men, women, and children in our society must live in an environment where fairness and justice for all exist.

We have taken many steps to resolve inequities toward women, but many still need to be taken. We must pass the ERA to assure that discrimination against women can in no way be justified ever again. At the same time we

must continue to pass the bills included in the Economic Equity Act to eliminate discrimination against women step by step. Without the ERA, it is impossible to counter all the inequities women face in one bill. But, this year's Economic Equity Act makes significant progress toward that goal.

The Economic Equity Act recognizes that many women need access to affordable child care so they can participate in the job market on an equal basis with men. The Economic Equity Act addresses this problem by providing funding to the child care block grant. Funding for child care is also provided to aid low-income women in college and in public housing in this portion of the bill.

The Economic Equity Act addresses the needs of older women by correcting inequities in the retirement benefits system. Several social security reforms are included in the act. For example, the act recognizes that marriage is an economic partnership and that earnings records for Social Security of both spouses should be added together and divided equally to determine Social Security benefits.

Other sections of the Economic Equity Act address insurance reform. One bill prohibits discrimination in insurance. Another provides incentives for insurers to continue coverage for widows and widowers, divorced persons, and their families.

Legislation pertaining to employment is also included in the Economic Equity Act. Job training for low-income mothers, equal credit for business women, and pay equity are dealt with in this portion.

A variety of tax reform provisions is also included in the Economic Equity Act.

Mr. President, Senator DURENBERGER and the other original sponsors of this bill have worked hard to produce a far ranging piece of legislation. I pledge to strive with them for its enactment.●

(Mr. BYRD submitted the following statement for Mr. CRANSTON:)

● Mr. CRANSTON. Mr. President, I am pleased to join as an original cosponsor of the 1985 Economic Equity Act [EEA] which is being introduced today.

In past Congresses, the proposed EEA legislation has provided a blueprint and an agenda for congressional action to eliminate many of the economic inequities facing millions and millions of American women.

Over the past several years, many of the important initiatives contained in the prior two EEA bills—ranging from reform of child support enforcement laws to civil service retirement equity legislation—have become law.

Before the end of this decade, many more of the provisions of the EEA will have also been enacted.

Before the turn of this century, I am convinced we will have put behind us the arbitrary and discriminatory practices that today deny women economic equity. The EEA has played, and will continue to play, a critical role in breaking down these artificial barriers of economic discrimination.

Mr. President, this year's bill addresses a broad range of issues and problems affecting the economic status and well-being of women. It encompasses five principal areas including retirement security, dependent care, insurance, employment, and taxes. It also takes into account the differing needs of older women and younger women, wage-earners and homemakers, and single heads-of-household as well as women who run their own businesses. It balances proposals for long-range, fundamental reforms with more immediate, incremental reforms. This diversity and universal applicability of the EEA to women in all walks of life is one of its greatest strengths.

SPECIAL NEW ISSUES

Mr. President, as the EEA has been introduced in each new Congress, new issues have been incorporated into this omnibus legislation. I am delighted that the 1985 version will include for the first time two legislative initiatives in which I have been deeply involved—pay equity and Social Security earnings-sharing. It also includes the substantive provisions of legislation I introduced relating to the quality and provision of child-care services for working parents, another area of special concern to me. Success in each of these areas is vitally important to making sure that economic equity does become a reality for women in this Nation.

As in the past, each of the separate items contained in the omnibus bill will be or has already been introduced as an individual bill. I am especially proud that the 1985 EEA includes the provisions of S. 3, which I introduced in the Senate relating to earnings sharing for Social Security, S. 810 which I introduced relating to improving the quality of child care standards, and S. 519, which I coauthored with the distinguished Senator from Washington [Mr. EVANS] relating to a pay-equity study of the Federal work force. My introductory statements for these three bills are found at S. 578 (January 24, 1985), S. 3678 (March 28, 1985), and S. 2259 (February 7, 1985) of the CONGRESSIONAL RECORD, respectively.

I look forward to working closely with the House sponsors of these provisions and the other cosponsors of the EEA in moving forward in each of these areas.

SUMMARY OF OTHER PROVISIONS

Mr. President, I want to describe briefly some of the other important provisions of the 1985 EEA. As I indicated earlier, the bill is divided into five principal parts.

RETIREMENT SECURITY

For the first time, the EEA addresses the inequities facing women under the current Social Security benefit structure. It includes both the earnings-sharing legislation which I and Representative MARY ROSE OAKAR have proposed as well as several more immediate reforms in Social Security, including a revision in the stringent disability definition now applied only to surviving spouses, a special limited transition benefit for certain dependent spouses over age 50, and reforms dealing with treatment of disabled spouses.

Older women are among the most economically depressed and vulnerable groups in our society and there is little doubt that the inadequacy of the benefits they receive under the Social Security System contribute substantially to the vast number of older women—more than 2.6 million in 1983—living below the poverty line.

In addition to Social Security reforms, the EEA includes provisions relating to private pension reforms. These provisions call for shortening of vesting periods, modification of provisions relating to integrating pension benefits with Social Security, portability of pensions as employees change jobs, and coverage of certain groups. There is little doubt that some changes along these lines are long overdue. The principal sponsors of these provisions in both the House and Senate are continuing to work on refining these proposals and developing a consensus on precisely how reforms will be made. I look forward to working with them to refine these legislative proposals to achieve these goals in a manner which is equitable to all concerned.

Finally, Mr. President, the retirement security title of the EEA contains further reforms in the military spouse pension program. In 1982, in the 97th Congress, several important aspects of the EEA dealing with this program were enacted. Obviously, there is a need to assess the impact of the 1982 amendments, as well as the potential impact of further changes on military recruitment and retention, as these provisions move through the legislative process. But the laudable goal of bringing about greater pension equity and adequacy to military pension programs, as well as other public and private pension programs, should continue to be pursued.

DEPENDENT CARE

As I mentioned at the outset, the 1985 EEA contains major initiatives in the area of child care, a paramount issue for millions of working parents throughout our country. The bill would authorize major new funding for title XX, which is the principal source of Federal financial assistance for child-care services for low-income

families, and two child-care grant programs focused upon special groups—higher education students and public housing residents—and contains the legislation I have introduced in the Senate, S. 810, aimed at helping to improve the quality of child-care standards and services throughout the country.

Mr. President, I don't believe it requires much elaboration to explain the importance of adequate and affordable child-care services to the attainment of economic equity for women. The facts are that a majority of mothers in this country are in the work force and they are there for one principal reason—economic necessity. Two-thirds of these working mothers are either sole providers or married to men who earn less than $15,000. Their income is esssential to the economic survival of their families.

Yet, the lack of available child care services is widespead in virtually every community in the land.

INSURANCE

As in the last Congress, the EEA contains the nondiscrimination in insurance provisions. This section would prohibit discrimination in insurance on the basis of race, color, religion, national origin, or sex.

Additionally, for the first time, the EEA will contain provisions which would provide protection to spouses who lose their health-care coverage under employee group plans because of death or divorce from the employee-spouse. The dependent spouse would be entitled to continuation of such group health coverage, subject to the individual's payment of the insurance premiums. This provision would help deal with one of the adverse side-effects of suddenly becoming a displaced homemaker.

EMPLOYMENT

The 1985 EEA will also address one of the most pervasive and devastating economic problems facing American women: sex-based wage discrimination. Wage inequities have massive consequences for millions of women in the work force and their families. The wage gap between male and female workers remains substantial, despite some progress toward reducing that gap in the past several years. A major factor contributing to this gap is the failure of many employers to pay women workers comparable pay for comparable work. The Senate version of the EEA contains the provisions of S 519, a bipartisan measure which Senator EVANS and I introduced on February 27. S. 519 would provide the mechanism for carrying out a pay-equity analysis of the Federal Government's own wage-setting practices—something that hasn't been done since the Federal wage classification system was created over 50 years ago. The provisions of S. 519 incorporated in the EEA contain one change based upon recommendations made by the General Accounting Office in its March 1, 1985, report to the Congress on the various options for conducting a pay equity analysis of the Federal work force. That recommendation was to include both an economic analysis and job content analysis in the study of the Federal work force. That change has been made.

The Senate version of the EEA also contains provisions of S. 19, legislation introduced by the Senator from New York [Mr. MOYNIHAN] relating to an education and training program for pregnant teenagers and teen mothers, as well as provisions to establish a bipartisan commission to review and evaluate the status of women-owned businesses and to amend the Equal Credit Opportunity Act to include business and commercial loans. This latter provision would prohibit lenders from discriminating on the basis of sex in making business or commercial loans, as they are now prohibited from doing with respect to personal loans.

TAX REFORM

The EEA this year, as in past Congresses, contains significant Tax Code reforms including raising the standard deduction for single heads-of-household, increasing the earned income tax credit for low-income families, expanding and making refundable the dependent child-care tax credit, and gradually increasing the allowable IRA contribution for a nonworking spouse. For the first time, the EEA includes provisions which would disallow deductions for business-related entertainment and lodging which occur in private clubs that discriminate.

Obviously, each of these provisions relating to the Tax Code will be reconsidered carefully if Congress moves toward a major Tax Code reform. The tax simplification proposals currently being discussed would modify or expand these existing Tax Code provisions in one way or another, often along the lines proposed in the EEA. It is clear that within the tax reform effort, major attention must and will be given to the impact of these changes upon women and their families. The separate tax section in the EEA underscores the importance of those tax decisions upon the economic well-being of women.

NEW SPENDING PROVISIONS

Mr. President, many of the provisions of the 1985 EEA have no, or minimal, Federal spending implications. There are several provisions—for example, the restoration of funds to title XX—that would, however, entail new Federal spending. Given our current deficit situation, in my view, it will be necessary to find offsetting reductions in other areas in order to move ahead with these proposals, however meritorious and justified they may be.

CONCLUSION

Mr. President, in 1985 EEA establishes, as it has in prior years, the legislative agenda in the 99th Congress on economic equity for women. As I called for 2 years ago, I am truly pleased that a broad bipartisan consensus has emerged to include in this year's legislation some of the most pivotal issues affecting economic equity, including pay equity, child care, and Social Security equity.

However, Mr. President, we must not forget that legislative initiatives are not an adequate substitute for ratification of the Equal Rights Amendment. I continue to believe that until we have achieved a constitutional guarantee of equality of rights, economic equity for women will rest upon a legislative quicksand. Whatever advancements we may achieve can be eroded or curtailed as the commitments of Members of Congress and the executive branch ebb and flow, or as the economy turns upward or downward.

Mr. President, we must not lose sight of the fact that ratification of the equal rights amendment is long-overdue.●

● Mr. KENNEDY. Mr. President, I am pleased to join this bipartisan effort to enact legislation which will provide economic independence for women in the 1980's.

For too long the majority of Americans who are women have been forced to accept second-class status and second-rate economic opportunities in our society. These inequities exist for women whether they are young or old, single, married, or divorced, and whether they are employed in the work force or work at home.

The Economic Equity Act is a comprehensive effort to ensure that women are treated fairly and justly by our legal system. It is a major advance in our efforts to eliminate discrimination against women in every aspect of economic life.

Women who work continue to be disproportionately represented in low-paying, dead-end jobs which offer little job security and little opportunity for mobility or advancement.

Women who choose to spend their working lives at home raising and caring for a family often find their labor unrewarded because the law does not provide the measure of protection they deserve.

The high cost of child care places an intolerable strain on many families and often prevents women from entering the work force. I am particularly concerned with the lack of affordable, quality child care in this country and I have already introduced several bills on this issue. In fact, the dependent care in higher education provision included in the Economic Equity Act is similar to the College-Based Child

Care for Students Act which I introduced in March.

The insurance system discriminates against women by denying them fair rates for basic protection from financial loss.

The private pension system makes it too difficult for working women to qualify for pension benefits, and in many instances unfairly denies nonworking spouses the benefits which their husbands have earned. I plan to introduce a separate bill which embodies those provisions next week. I have also been working with a bipartisan group of Senators to develop a broader bill that we hope to introduce in the near future.

The bill we are introducing today addresses each of these problems. It represents a truly comprehensive effort to provide millions of women with an equitable measure of economic security, regardless of age, marital, or employment status. And it affirms our belief that as we carry on the struggle to make the equal rights amendment a part of the Constitution, we must also make a comprehensive effort to amend the statute books to establish the full economic rights of women.●

● Mr. MOYNIHAN. Mr. President, I rise today to join my colleagues in introducing the Economic Equity Act in the 99th Congress.

This measure—a series of reforms to address and redress the economic discrimination faced by many women—is an important step to ensure all Americans full and equal economic opportunity. The Economic Equity Act is an agenda for action, to remove barriers impeding the progress and the full participation of women in economic life.

The measure addresses five specific matters: Retirement security; dependent care; insurance; employment; and tax reform. These titles contain legislative proposals for pension reform, greater Federal support of child care, expanded assistance for teenage parents, and provisions to reduce the tax burden on poor families.

I am grateful to see that the EEA contains the provision of S. 19, legislation I introduced on the first day of the 99th Congress to provide assistance to teenage parents, so they might avoid long-term welfare dependency. By providing resources for employment training, academic, and vocational counseling and child care services for young mothers, we can help them gain the skills they need for economic self-sufficiency. The need for such support is growing. In 1982, more than half of all births to women under age 20 were out of wedlock—a 60-percent increase since 1970, when 31.5 percent of all births to teenagers were out of wedlock. Adolescent parents are more likely not only to need welfare, but also to need such for a long term. This long-term welfare dependency is dimming the future of thousands of young Americans.

Several other provisions of the EEA also address some of the hardships facing poor families, especially poor families headed by women. Three proposals in title II would expand the child care services so essential for working mothers and their children. One of these would increase the authorization for the social services block grant, from $2.7 billion to $3.42 billion. This 27-percent increase would be designated for training programs for child care workers, implementation of day care standards by the States, and expansion of child care services. Title II also includes proposals to support the development of child care programs and universities and public housing projects.

The need for child care services is increasing, and will continue to do so throughout the next decade. Over the past 20 years, the number of women in the paid work force has increased from 23 million in 1960 to 43 million in 1980; that figure will rise to more than 60 million by 1990. By the end of the next decade—which is to say, by the close of the century—one-quarter of all American families will be headed by a single parent. Between 1980 and 2000 the the numbers of female-headed families will increase at more than five times the rate of husband-wife families. These trends indicate a growing need for adequate child care and social services.

Title V of the EEA contains several proposals that would substantially improve the tax treatment of poor families. One such would raise the zero bracket amount for a single head of a household from $2,400 to $3,540, the current level for married couples filing jointly. Title V also would increase the current earned income tax credit [EITC], a most worthy proposal. The EITC, a cash income supplement for working parents with low earnings, would be increased from 11 to 16 percent of the first $5,000 of earned income, and indexed from that point.

There is one provision of the EEA that I cannot support: the proposal to implement a system of earnings sharing for Social Security. Under this proposal, the combined earnings of a husband and wife would be divided equally during the period of their marriage, for the purposes of determining Social Security benefits. Such would require a complicated restructuring of the Social Security system, and could reduce benefits for some. I do support further examination of earnings sharing proposals, but, I do not believe we are ready to implement one at this time.

That matter apart, I enthusiastically support the EEA. It is an agenda for the 99th Congress legislation on a matter of great importance. I am pleased to cosponsor the EEA for the third consecutive Congress, and I hope my colleagues will join me in pressing for its prompt consideration.●

By Mr. McCLURE (for himself, Mr. WILSON, Mr. CRANSTON, Mr. DECONCINI, and Mr. ABDNOR):

S. 1171. A bill to amend the Small Reclamation Projects Act of 1956, as amended; to the Committee on Energy and Natural Resources.

SMALL RECLAMATION PROJECTS ACT AMENDMENTS

● Mr. McCLURE. Mr. President, last Congress I sponsored legislation to raise the ceiling for appropriations under the Small Reclamation Projects Act of 1956. The bill, S. 1981, was the subject of hearings before the Subcommittee on Water and Power of the Committee on Energy and Natural Resources on September 20, 1984, but unfortunately did not receive final consideration by the Senate prior to adjournment. The hearing record has been printed and is available to the Members as Senate Hearing 98-224, part 4.

A House companion measure, H.R. 4444, was reported by the House Committee on Interior and Insular Affairs but it was not considered prior to adjournment.

Today I am reintroducing my bill to raise the appropriations ceiling for the program and I am hopeful that the Senate may consider this legislation in the near future. As my colleagues will recall, we are fast approaching the appropriations ceiling contained in the original act and it is my understanding that an increase in the ceiling is absolutely necessary if the program is to be continued during fiscal year 1987 and beyond.

For the benefit of the new Members who may be unfamiliar with the Small Reclamation Projects Act, I would like to take just a moment to describe the history of the program and the need for this legislation.

The Small Reclamation Projects Act of 1956 established a program under which non-Federal organizations in the 17 reclamation States and Hawaii can obtain loans and grants for the construction of new, or the rehabilitation of existing single-purpose irrigation drainage, or multipurpose water resources projects similar to those which might be constructed by the Bureau of Reclamation.

Loans have constituted approximately 97 percent of the program, although the act provides for grants for those portions of projects which are nonreimbursements as a matter of national policy, such as flood control and fish and wildlife enhancement.

The costs allocated to municipal and industrial water, hydroelectric power, and the loan portion of the costs allocated to fish and wildlife and recrea-

tion, amounting to about 50 percent of such costs, are interest bearing. The interest rate is 10⅞ percent of fiscal year 1984. Costs allocated to irrigation, except as to lands which are in excess of the acreage limitations of the reclamation laws, are noninterest bearing.

Each loan application provides front-end financing. From 1957 to 1970 the non-Federal financing averaged about 11 percent. From 1974 to date, the average non-Federal contribution has been approximately 20 percent. However, presently, typical single purpose irrigation projects—the most common under the program—are requiring more local financing; 35 to 40 percent.

The maximum allowable loan and/or grant cannot exceed two-thirds of the total project cost. The total project cost ceiling is established at $15 million, January 1971 prices, and is indexed for inflation. The ceiling is $41 million for calendar year 1985 and the maximum loan and/or grant is $27 million.

Loans are to be repaid in the shortest practicable time, but in no event longer than 40 years from the date when the principal benefits of the project become available. The most recent loans have repayment periods of from 25 to 30 years.

A large number of the projects which have received loans, and those with pending applications, are requesting loan funds for the rehabilitation of old systems. Rehabilitation of such systems results in the conservation of both water and energy.

The Bureau of Reclamation is responsible for general review of the design and engineering plans developed by the loan recipient and inspects the quality control of construction in order to protect the Federal investment.

There have been no defaults on any loans made under the program.

The present authorization ceiling is $600 million. The value of approved loans and those expected to be approved in 1985 will reach this ceiling.

The additional authorization contained in the bill I am introducing today will provide about 5 years of additional program activity at the present rate of incoming applications.

Mr. President, I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1171

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Public Law 84-984 is amended as follows:

In Section 10, in the first sentence after "600,000,000" insert "and, effective October 1, 1986, not to exceed an additional $600,000,000".●

By Mr. HELMS (for himself, Mr. EAST, Mr. DOLE, Mr. STENNIS, Mr. LONG, Mr. LAXALT, Mr. DOMENICI, Mr. HATCH, Mr. MCCLURE, Mr. HUMPHREY, and Mr. WARNER):

S. 1172. A bill to provide financial assistance for the Sam J. Ervin, Jr., Program in Public Affairs at the North Carolina State University; to the Committee on Labor and Human Resources.

FINANCIAL ASSISTANCE FOR THE SAM J. ERVIN, JR., PROGRAM IN PUBLIC AFFAIRS

Mr. HELMS. Mr. President, I am today introducing legislation to provide funding for the Sam J. Ervin, Jr., Program in Public Affairs at the North Carolina State University in Raleigh.

No more fitting tribute could be paid this great American than to help an educational program established in his name and dedicated to the high standards of constructive public service he set during his lifetime.

Almost a month has passed since Senator Ervin passed away, and I yet find it difficult to accept the fact that I will no longer be able to confide in him, to learn and profit from his counsel—and, yes, chuckle at his inimitable wit. Sam Ervin will be remembered in many ways, and perhaps, most of all, he will be remembered as the ideal public servant. He served the people of North Carolina in many capacities—as attorney, State supreme court justice, State representative, Member of Congress and, of course, as U.S. Senator.

North Carolina State University has established in Senator Ervin's name and in his honor an endowment for a fellowship program, public service research laboratory, and distinguished speaker series. The fellowship program will enable outstanding young Americans to study public affairs and prepare for careers in public service. Fellowships will be available to graduate students who will be designated Ervin Fellows. Scholarships will also be available to outstanding undergraduate students. Distinguished lectures in public service research will be conducted in a manner that will exemplify the interests, concerns, and integrity of Senator Ervin during his public career.

Mr. President, North Carolina State University is attempting to raise funds for the Sam J. Ervin, Jr., Program in Public Affairs through private contributions. These contributions, however, will not be sufficient to endow the program in the manner it deserves. My bill would provide $500,000 for this worthwhile purpose.

I should emphasize at this point, Mr. President, that this is by no means a new concept. In the past, the Senate has supported the Hubert Humphrey Institute of Public Affairs at the University of Minnesota, the Carl Albert Congressional Studies Center at the University of Oklahoma, and, most recently, the Maureen and Mike Mansfield Foundation at the University of Montana.

The Sam J. Ervin, Jr., Program in Public Affairs will be a living tribute to Senator Ervin. It will recognize a great American's contribution to Government and public service in a manner comparable to the recognition that other States have given their outstanding public leaders, and certainly in a manner befitting Senator Ervin's distinguished service to his Nation.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1172

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) in recognization of the distinguished public service of Senator Sam J. Ervin, Jr., of North Carolina, the Secretary of Education is authorized, in accordance with the provisions of this Act, to provide financial assistance to North Carolina State University located in Raleigh, North Carolina, for the endowment of the Sam J. Ervin, Jr., Program in Public Affairs.

(b) No financial assistance may be made under this Act unless an application is made at such time, in such manner and containing or accompanied by such information as the Secretary of Education may reasonably require.

(c) There is authorized to be appropriated $500,000 to carry out the provisions of this Act. Funds appropriated pursuant to this section shall remain available until expended.

By Mr. SPECTER (for himself and Mr. HEINZ):

S. 1173. A bill to forgive certain loan repayments by the Southern Pennsylvania Transportation Authority to the Secretary of Transportation, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

CHESTER COUNTY TRANSIT LOAN

Mr. SPECTER. Mr. President, today I am reintroducing legislation to forgive certain loan repayments by the Southeastern Pennsylvania Transportation Authority [SEPTA] to the Secretary of Transportation, and for other purposes. The original amount of the loan to SEPTA was $370,804 and was entered into with the Secretary of Transportation under the Urban Mass Transportation Act of 1964 for the acquisition of right-of-way. If this loan is allowed to mature until April 1986, a total of $309,790 in interest will accrue, thereby making the total payback $680,594.

An amount equaling 80 percent of the balance of the principal and interest on the loan would be forgiven outright by this provision. The remaining 20 percent would have to be repaid,

unless the Secretary of Transportation chose to convert it into a grant.

The loan was originally taken out with the hope and intention of providing rail passenger service to Chester County. Under the provisions of the loan, it was to be forgiven and converted into a grant if passenger service were provided by April 1, 1986. This goal seems untenable at this point since economic conditions do not favor such a development.

However, in Chester County, the line has been restored and today provides freight service through a private operator to industries in the U.S. Route 1 corridor. During 1984, service was provided on demand to 21 customers, which amounted to 320 carloads. The continuation of this service is critical to the economic vitality of southern Chester County.

The rail line currently serves a variety of commercial traffic. Several different types of freight are being hauled, including compost materials for the mushroom industry, fertilizer for the agricultural industry, perishables, and related food grade products. Southern Chester County, the mushroom center of the country, produces 25 to 30 percent of all mushrooms consumed in the United States. Furthermore, NVF, Inc., an electronics component manufacturer, which has recently developed a new use for recycled materials, uses the rail line for bulk shipment of these materials. Usage of the rail line for commercial purposes will continue to serve as a development tool to bring industry into the area.

If assistance is not provided, there is every likelihood that the rail line would be abandoned. Neither the Southeastern Pennsylvania Transportation Authority nor the County of Chester can afford to pay back the loan in order to retain control of the rail line. Because of its light density, the railroad would not generate the interest of a large rail company if it were to be sold, and Octoraro Railroad, the current operator, cannot afford to buy it. Providing assistance to preserve the rail line for commercial traffic will assure that the line will continue to be available for possible conversion to passenger service should the community expand enough to accommodate passenger service.

The southern part of Chester County, through which the railroad passes, has been an expanding community. The population of the 18 municipalities in this area increased 19.4 percent between 1970 and 1980, while per capita income increased 149 percent. Identified employment in the area remained stable during this period while the civilian labor force, residents 16 years or older, more than doubled. The recent relocation of the national headquarters of Clarks' Shoes to Kennett Square, which is also on the rail line, is expected to attract additional residents to the area.

The above statistics point out that the potential for growth exists. Preservation of the rail line will enable Chester County to fully develop this potential for passenger service.

Precedent for this type of assistance has already been established. Section 312 of the Surface Transportation Assistance Act of 1982 excused the Massachusetts Bay Transportation Authority from repaying 80 percent of the principal and interest owed on two loans entered into with the Secretary of Transportation under the Urban Mass Transportation Act of 1964 for the acquisition of rights-of-way. Under the provisions of these loans, they would have been forgiven and converted into grants if 20 percent of the purchase price had been put into improvements. However, a weak economy prevented such improvements. The terms of the bill I am introducing today are identical to those of section 312, excusing the loans of the Massachusetts Bay Transportation Authority.

Mr. President, I ask unanimous consent that the full text of the bill be printed in the RECORD as if read.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1173

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Southeastern Pennsylvania Transportation Authority shall have no obligation to repay the United States 80 per centum of the principal and the interest owed on the following loans entered into with the Secretary of Transportation under the Urban Mass Transportation Act of 1964 for the acquisition of rights of way: the loan numbered PA03 9002 entered into on April 29, 1976, and the loan numbered PA03 9003 entered into on April 29, 1976.

(b)(1) The Secretary of Transportation may convert the remaining 20 per centum of the principal and interest owed on the loans described in subsection (a) to grants under the conditions set forth in paragraph (2).

(2) In lieu of the local matching share otherwise required, the grant agreement may provide that State or local funds shall be committed to public transportation projects in the urbanized area, on a schedule acceptable to the Secretary of Transportation, in an amount equal to the local share that would have been required had the amount of principal and interest forgiven under subsection (a) been the Federal share of a capital grant made when the original loan was made. The State or local funds contributed under the terms of the preceding sentence shall be made available for capital projects eligible for funding under section 3(a) of the Urban Mass Transportation Act of 1964 and may not be used to satisfy the local matching requirements for any other grant project.

ADDITIONAL COSPONSORS

S. 37

At the request of Mr. HATCH, the name of the Senator from Nevada [Mr. LAXALT] was added as a cosponsor of S. 37, a bill to provide for civil rights in public schools.

S. 194

At the request of Mr. MOYNIHAN, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 194, a bill to identify, commemorate, and preserve the legacy of historic landscapes of Frederick Law Olmsted, and for other purposes.

S. 235

At the request of Mr. THURMOND, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of S. 235, a bill to amend title 5, United States Code, to prohibit employment in civil service positions in the executive branch of any individual required to register under the Military Selective Service Act who has not yet registered.

S. 585

At the request of Mr. TRIBLE, the name of the Senator from Virginia [Mr. WARNER] was added as a cosponsor of S. 585, a bill to establish the Eastern Shore of Virginia National Wildlife Refuge and National Fish and Wildlife Service Training Center at Cape Charles in Northampton County, VA.

S. 625

At the request of Mrs. HAWKINS, the name of the Senator from Iowa [Mr. GRASSLEY] was added as a cosponsor of S. 625, a bill to include the offenses relating to sexual exploitation of children under the provisions of RICO and authorize civil suits on behalf of victims of child pornography and prostitution.

S. 664

At the request of Mr. NICKLES, the name of the Senator from Wyoming [Mr. WALLOP] was added as a cosponsor of S. 664, a bill to facilitate the competitiveness of exports of United States agricultural commodities.

S. 670

At the request of Mr. PELL, the name of the Senator from Vermont [Mr. STAFFORD] was added as a cosponsor of S. 670, a bill to amend the National Labor Relations Act to give employers and performers in the performing arts rights given by section 8(e) of such act to employers and employees in similarly situated industries, and to give to employers and performers in the performing arts the same rights given by section 8(f) of such act to employers and employees in the construction industry, and for other purposes.

S. 930

At the request of Mr. NICKLES, the name of the Senator from Wyoming [Mr. WALLOP] was added as a cosponsor of S. 930, a bill to amend the Commodity Credit Corporation Charter to exempt all agricultural exports from cargo preference requirements.

S. 983

At the request of Mr. MCCLURE, the names of the Senator from Vermont [Mr. LEAHY], the Senator from Vermont [Mr. STAFFORD], and the Senator from West Virginia [Mr. ROCKEFELLER] were added as cosponsors of S. 983, a bill to provide for limited extension of alternative means of providing assistance under the School Lunch Program and to provide for national commodity processing programs.

S. 987

At the request of Mr. EXON, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 987, a bill to recognize the organization known as the Daughters of Union Veterans of the Civil War 1861-65.

S. 1026

At the request of Mr. PRESSLER, the names of the Senator from Minnesota [Mr. DURENBERGER], and the Senator from Hawaii [Mr. MATSUNAGA] were added as cosponsors of of S. 1026, a bill to direct the cooperation of certain Federal entities in the implementation of the Continental Scientific Drilling Program.

S. 1133

At the request of Mr. RIEGLE, the names of the Senator from Tennessee [Mr. GORE], and the Senator from Ohio [Mr. METZENBAUM] were added as cosponsors of S. 1133, a bill to amend section 119(d) of the Housing and Community Development Act of 1974.

S. 1138

At the request of Mr. GRASSLEY, the name of the Senator from Alabama [Mr. DENTON] was added as cosponsor of S. 1138, a bill to reenact and amend former section 504 of title 5, United States Code, and former section 2412(d) of title 28, United States Code, with respect to awards of expenses of certain agency and court proceedings, and for other purposes.

S. 1154

At the request of Mr. MATSUNAGA, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 1154, a bill to amend title XVIII of the Social Security Act to provide direct medicare reimbursement for services performed by registered nurse anesthetists.

SENATE JOINT RESOLUTION 73

At the request of Mr. GRASSLEY, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of Senate Joint Resolution 73, a joint resolution to designate the week of September 15, 1985, through September 21, 1985, as "National Independent Free Papers Week."

SENATE JOINT RESOLUTION 98

At the request of Mr. D'AMATO, the name of the Senator from Nebraska [Mr. ZORINSKY] was added as a cosponsor of Senate Joint Resolution 98, a joint resolution condemning the passage of Resolution 3379, in the U.N. General Assembly on November 10, 1975, and urging the U.S. Ambassador and U.S. delegation to take all appropriate actions necessary to erase this shameful resolution from the record of the United Nations.

SENATE JOINT RESOLUTION 124

At the request of Mr. KENNEDY, the name of the Senator from Kansas [Mrs. KASSEBAUM] was added as a cosponsor of Senate Joint Resolution 124, joint resolution to designate "National Day of Peace."

SENATE CONCURRENT RESOLUTION 25

At the request of Mr. BUMPERS, the names of the Senator from Maryland [Mr. MATHIAS], the Senator from Missouri [Mr. DANFORTH], the Senator from Hawaii [Mr. INOUYE], the Senator from Wisconsin [Mr. PROXMIRE], the Senator from Michigan [Mr. RIEGLE], the Senator from Maryland [Mr. SARBANES], the Senator from Kentucky [Mr. FORD], the Senator from Oklahoma [Mr. BOREN], the Senator from Massachusetts [Mr. KERRY], the Senator from Iowa [Mr. HARKIN], the Senator from Illinois [Mr. SIMON], and the Senator from Washington [Mr. GORTON], were added as cosponsors of Senate Concurrent Resolution 25, concurrent resolution expressing support for the President's nouncercut policy concerning existing strategic offensive arms agreements.

SENATE RESOLUTION 65

At the request of Mr. BUMPERS, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of Senate Resolution 65, resolution commending the Soil Conservation Service.

SENATE RESOLUTION 171—AUTHORIZING REPRESENTATION BY THE SENATE LEGAL COUNSEL

Mr. SIMPSON for Mr. DOLE (for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to.

S. RES. 171

Whereas, the case of *Donald M. Zahn* v. *National Right to Work Committee*, Civil Action No. 84-1223-A, is pending in the United States District Court for the Eastern District of Virginia;

Whereas, Paul C. Summitt, a former member of the staff of the Committee on the Judiciary, has been served with a subpoena to appear and testify as a witness in that case;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, pursuant to sections 703(a) and 704(a)(2) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(a) and 288c(a)(2) (1982), the Senate may direct the Senate Legal Counsel to defend a former employee of the Senate in any proceeding with respect to any subpoena or order directed to him in his former official capacity; Now, therefore be it

Resolved, That the Senate Legal Counsel is directed to defend Paul C. Summitt with respect to the subpoena served on him in the case of *Donald M. Zahn* v. *National Right to Work Committee*, Civil Action No. 84-1223-A, in the Eastern District of Virginia.

AMENDMENTS SUBMITTED

DEPARTMENT OF DEFENSE AUTHORIZATION ACT, FISCAL YEAR 1986

LEVIN (AND RIEGLE) AMENDMENT NO. 148

Mr. LEVIN (for himself and Mr. RIEGLE) proposed an amendment to amendment No. 147 proposed by Mr. GOLDWATER, on behalf of the Committee on Armed Services to the bill (S. 1160) to authorize appropriations for the military functions of the Department of Defense and to prescribe personnel levels for the Department of Defense for fiscal year 1986, to authorize certain construction at military installations for such fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for other purposes; as follows:

In committee amendment number 147:

On page 14, line 21 strike the words "personally and substantially".

On page 18, line 9 strike the words "personally and substantially".

On page 18, line 12 after the word "awarded" insert ", or an agent of such contractor,".

On page 19, line 23 strike "two-year period beginning on the date of the contract" and insert in place thereof "ten year period beginning with the date of separation from government service.".

NUNN (AND OTHERS) AMENDMENT NO. 149

Mr. NUNN (for himself, Mr. MATTINGLY, Mr. THURMOND, Mr. CHILES, and Mr. GOLDWATER) proposed an amendment to the bill S. 1160, supra; as follows:

At the end of title IX of division A of the bill, insert the following new section:

ARMED SERVICES NATIONAL SCIENCE CENTER FOR COMMUNICATIONS AND ELECTRONICS

SEC. 916. (a) The Congress hereby finds—

(1) that scientific and technological developments in communications and electronics are of particular importance to the United States in meeting its national security, industrial, and other needs;

(2) that enhanced training in the technical communications, electronics, and computer disciplines is necessary for a more efficient and effective military force;

(3) that the Secretary of the Army, through the Training and Doctrine Command, is responsible for providing training to members of the Army;

(4) that the Ninety-Seventh Congress, in Senate Concurrent Resolution 130 of that

Congress, encouraged the establishment within the United States of a national center dedicated to communications and electronics;

(5) that the Secretary of the Army entered into a Memorandum of Understanding with the National Science Center for Communications and Electronics Foundation Incorporated, a nonprofit corporation of the State of Georgia, in which the Army and such foundation agreed to develop a science center for (A) the promotion of engineering principles and practices, (B) the advancement of scientific education for careers in communications and electronics, and (C) the portrayal of the communications, electronics, and computer arts.

(b) It is the purpose of this section to recognize the relationship between the Army and the National Science Center for Communications and Electronics Foundation Incorporated (hereinafter in this section referred to as the "Foundation") for the development, construction, and operation of a national science center and to authorize the Secretary of the Army (hereinafter in this section referred to as the "Secretary") to make available a suitable site for the construction of such a center, to accept title to the center facilities when constructed, and to provide for the management, operation, and maintenance of such a center after the transfer of title of the center to the Secretary.

(c)(1) Subject to paragraph (2), the Secretary may provide a suitable parcel of land at or near Fort Gordon, Georgia, for the construction of an Armed Services national science center by the Foundation to meet the objectives expressed in subsection (a). Upon completion of the construction of the center the Secretary may accept title to the center and may provide for the management, operation, and maintenance of such center out of funds appropriated to the Army for such purpose.

(2) As a condition to making a parcel of land available to the Foundation for the construction of a national science center, the Secretary shall have the right to approve the design of the center, including all plans, specifications, contracts, sites, and materials to be used in the construction of such center and all rights-of-way, easements, and rights of ingress and egress for the center. The Secretary's approval of the design and plans shall be based on good business practices and accepted engineering principles taking into consideration safety and other appropriate factors.

(d) The Secretary may accept conditional or unconditional gifts made for the benefit of, or in connection with the center.

(e) The Secretary may appoint an advisory board to advise the Secretary regarding the operation of the center in pursuit of the goals of the center described in subsection (a). The Secretary may appoint to the advisory board such members of the board of directors of the Foundation as he considers appropriate. The Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to the advisory board appointed under this subsection.

(f) Consistent with the mission of the armed services and the efficient operation of the center, the Secretary may make facilities at the center available to the Foundation for its corporate activities and for such endeavors in the area of communications and electronics as the Secretary may consider appropriate.

(g)(1) The Secretary may make the center available to the public and to other departments and agencies of the Government for research and study and for public exhibitions. The Secretary may charge for such uses as he considers necessary and appropriate.

(2) Any money collected for the use of the facilities of the center shall be deposited to a special fund maintained by the Secretary for the maintenance and operation of the center. The Secretary shall require the Auditor General of the Army to audit the records of such fund at least once every two years and to report the results of the audits to the Secretary.

QUAYLE AMENDMENT NOS. 150 AND 151

Mr. QUAYLE proposed two amendments to the bill S. 1160, supra; as follows:

AMENDMENT No. 150

At the end of title IX of division A of the bill, insert the following new section:

STUDY OF IMPACT OF FOREIGN EXPORT SUBSIDIES ON THE DEFENSE INDUSTRIAL BASE OF THE UNITED STATES

SEC. . The Secretary of Defense shall conduct a study regarding the effects that foreign export subsidies have had on the defense industrial base of the United States. The Secretary shall submit a report containing the results of the study to the Congress not later than April 1, 1986, and shall include in such report—

(1) a compilation of the number and type of contracts awarded by the Department of Defense in fiscal year 1984, fiscal year 1985, and the first six months of fiscal year 1986 on which United States firms bid but which were awarded by the Department of Defense to foreign firms;

(2) whether, in the case of each such contract, a subsidy (as defined in section 1677(5) of the Tariff Act of 1930) was provided in connection with the commodity purchased under the contract and, if so, a description of the subsidy, including the type and amount of the subsidy;

(3) identification of those segments of United States industry adversely affected by the loss of the contracts referred to in clause (1) and the consequences that the loss of such contracts has had on the defense industrial base of the United States; and

(4) such recommendations for legislative and administrative action as the Secretary considers necessary or appropriate to correct any detrimental impact that subsidized exports have on the defense industrial base of the United States, to include an evaluation of the impact of such recommendations on other U.S. foreign policy objectives such as the goal of improving cooperative weapons development and standardization in NATO.

AMENDMENT No. 151

On page 51, line 2:

At the end of part A of title V of division A of the bill, insert the following new section:

ALLOWANCES FOR TRANSPORTATION OF BAGGAGE AND HOUSEHOLD EFFECTS

SEC. 510g. (a) Section 406(k) of title 37, United States Code, is amended—

(1) by inserting "(1)" after "(k)";

(2) in the first sentence, by inserting "or in which a member provides all or a part of the labor in connection with the transportation of the baggage and household effects of the member (including packing, crating, and loading)" after "rental vehicle"; and

(3) by adding at the end thereof a new paragraph as follows:

"(2) The Secretary concerned may prescribe in any regulations authorizing the payment of a monetary allowance to a member who participates in a program in which the member provides all or a part of the labor in connection with the transportation of the baggage and household effects of the member—

"(A) the extent to which payment to the member will be made for such labor, and

"(B) the manner in which liability will be allocated among the member, the United States, and the common carriers involved in the event of loss of or damage to any baggage or household effects packed, crated, or loaded by the member.".

(b) No allowance may be paid to any member of a uniformed service by virtue of the amendment made by subsection (a) in connection with the transportation of the baggage and household effects provided the member before the date of the enactment of this Act.

(c) The Secretary of Defense shall submit a report to the Congress not later than three years after the date of the enactment of this Act regarding the operation of any program carried out by the military departments under which payment of a monetary allowance is made to a member who provides all or a part of the labor in connection with the transportation of the baggage and household effects of the member and shall include in such report such recommendations for legislative action the Secretary considers appropriate.

QUAYLE (AND OTHERS) AMENDMENT NO. 152

Mr. QUAYLE (for himself, Mr. STAFFORD, and Mr. NUNN) proposed an amendment to the bill S. 1160, supra; as follows:

Strike out section 910 of the bill and insert in lieu thereof the following:

CONTINUED OPERATION BY THE SECRETARY OF DEFENSE OF THE DEFENSE DEPENDENTS' EDUCATION SYSTEM

SEC. 912. (a)(1) Subsection (e) of section 202, sections 208 and 302, and subsection (f) of section 401 of the Department of Education Organization Act (20 U.S.C. 3412(e), 3418, 3442, and 3461(f)) are repealed.

(2) Section 419(a) of such Act (20 U.S.C. 3479(a)) is amended—

(A) by striking out "(1)" after the subsection designation "(a)"; and

(B) by striking out paragraph (2).

(3) Section 503(a) of such Act (20 U.S.C. 3503(a)) is amended—

(A) by striking out "(1)" after the subsection designation "(a)"; and

(B) by striking out paragraph (2).

(4) the table of contents at the beginning of such Act is amended by striking out the items relating to sections 208 and 302.

(5) Section 414(b) of such Act (20 U.S.C. 3474(b)) is amended by striking out "322,".

(b)(1) Section 1402 of the Defense Dependents' Education Act of 1978 (20 U.S.C. 921) is amended by adding at the end thereof the following new subsection:

"(c) The Secretary of Defense shall consult with the Secretary of Education on the educational programs and practices of the defense dependents' education system,".

(2)(A) Paragraph (1) of section 1410(a) of such Act (20 U.S.C. 928(a)(1)) is amended by adding at the end thereof the following new sentences: "The membership of each such advisory committee shall also include one person to represent the interests of the organization recognized as the exclusive bargaining representative of the employees of the school. Such person shall be designated by the appropriate organization and shall be a nonvoting member of the committee.".

(B) Subsection (B) of section 1410 of such Act is amended by striking out "Members" and inserting in lieu thereof "Except in the case of a nonvoting member provided for under subsection (a)(1), members".

(3) The second sentence of section 1410(B) of the Defense Dependents' Education Act of 1978 (20 U.S.C. 928(b)) is amended by striking out "The Secretary of Education, in consultation with the Secretary of Defense," and inserting in lieu thereof "The Secretary of Defense".

(4)(A) Subsection (a) of section 1411 of such Act (20 U.S.C. 929) is amended to read as follows:

"(a)(1) There is established in the Department of Defense an Advisory Council on Dependents' Education (hereinafter in this section referred to as the 'Council'). The Council shall be composed of—

"(A) the Secretary of Defense and the Secretary of Education, or their respective designees;

"(B) twelve individuals appointed jointly by the Secretary of Defense and the Secretary of Education who shall be individuals who have demonstrated an interest in the field of primary or secondary education and who shall include representatives of professional employee organizations, school administrators, and parents of students enrolled in the defense dependents' education system, and one student enrolled in such system; and

"(C) a representative of the Secretary of Defense and of the Secretary of Education.

"(2) Individuals appointed to the Council from professional employee organizations shall be individuals designated by such organizations.

"(3) The Secretary of Defense, or his designee, and the Secretary of Education, or his designee, shall serve as cochairman of the Council.

"(4) The Director shall be the Executive Secretary of the Council.".

(5) Subsection (b)(1) of such section is amended by inserting "the Secretary of Defense and" before "the Secretary of Education".

(6) Subsection (c) of such section is amended—

(A) by striking out "at least four times each year" and inserting in lieu thereof "at least two times each year";

(B) by striking out clause (2);

(C) by redesignating clauses (3), (4), and (5) as clauses (2), (3), and (4), respectively; and

(D) by striking out "Secretary of Education" in clause (4) (as redesignated in clause (3) of this subsection) and inserting in lieu thereof "Secretary of Defense".

(d) Section 5316 of title 5, United States Code, is amended by striking out "Administrator of Education for Overseas Dependents, Department of Education.".

QUAYLE AMENDMENT NO. 153

Mr. QUAYLE proposed an amendment to the bill S. 1160, supra; as follows:

At the end of title IX of division A of the bill, insert the following new section:

AUTHORITY OF THE SECRETARY OF DEFENSE TO ENROLL CERTAIN PERSONS IN OVERSEAS SCHOOLS OF THE DEFENSE DEPENDENTS' EDUCATION SYSTEM

SEC. 917. (a) The Secretary of Defense may, under such regulations as he shall prescribe, permit to be enrolled in schools of the defense dependents' education system, in addition to children authorized to be enrolled in such system under the Defense Dependents' Education Act (20 U.S.C. 921 et seq.), children of employees of the Federal Government stationed outside the United States, children of employees of contractors employed in carrying out work for the Federal Government outside the United States, children of employees of nonappropriated fund activities of the Department of Defense, and, if the Secretary determines such action to be in the national interest, children of other citizens or nationals of the United States or of foreign nationals.

(b) Any child permitted to enroll in a school of the defense dependents' education system under this section shall be required to pay tuition at a rate determined by the Secretary of Defense, which shall not be less than the rate necessary to defray the average cost of the enrollment of children in the system under the Defense Dependents' Education Act of 1978 (20 U.S.C. 921 et seq.).

PRYOR (AND OTHERS) AMENDMENT NO. 154

Mr. PRYOR (for himself, Mr. GRASSLEY, Mr. PROXMIRE, Mr. DECONCINI, and Mr. BUMPERS) proposed an amendment to amendment No. 147 proposed by Mr. GOLDWATER, on behalf of the Committee on Armed Services, to the bill S. 1160, supra; as follows:

In the Committee amendment after the words "Title VI—Procurement Policy Reform and Other Procurement Matters,

SHORT TITLE

SEC. 601. This title may be cited as the "Competition and Ethics Enforcement Act of 1985." Strike all that follows in the amendment and insert in lieu thereof the following:

DEFINITIONS

SEC. 602. In this title:

(1) "Full scale development", when used with respect to a weapon system or other defense equipment, means all detail design of a weapon system or other defense equipment necessary for the production of that system or equipment to begin.

(2) "Major defense acquisition program" has the same meaning as provided in section 139(a)(1) of title 10, United States Code.

(3) "Acquisition plan" means the type of plan referred to in section 7.104 of the Federal Acquisition Regulation as in effect on April 1, 1985.

(4) "Competitive procedures" means, in connection with the award of a contract, procedures which provide for full and open competition as provided in section 2304(a) of title 10, United States Code.

(5) "Acquisition", when used with respect to a weapon system or other defense equipment, means the complete process associated with the development and procurement of the weapon system and other defense equipment, including identification of military requirements, research and testing.

(6) "System integration" means the development and administration, normally by a prime contractor, of the process of manufacturing a completed weapons system or other defense equipment for delivery to the United States, including the installation of all subsystems and components.

(7) "source contract" means any contract for the procurement of a weapon system or other defense equipment awarded through procedures other than competitive procedures.

DUAL SOURCE COMPETITION AND SOLE SOURCE CONTRACTING FOR MAJOR DEFENSE ACQUISITION PROGRAMS

SEC. 603. Chapter 137 of Title 10, United States Code, is amended by adding at the end thereof the following new Section: "Dual Source Competition and Sole Source Requirements for Weapons Programs."

"(a)(1) Before initiation of the full scale development of a weapons system or other defense equipment under a major defense acquisition plan for such program.

"(2) The acquisition plan shall provide for the use of competitive procedures when required by Title 10, United States Code Section 2304, except as provided for in subsection (c) of this section.

"(3) The acquisition plan shall also provide for the establishment and maintenance throughout the duration of the program of two or more development sources of such program and of two or more production sources for system integration and for the production of major subsystems to be purchased by the United States under major defense acquisition programs so that each production contract, and any contract renewal for production, will result in a majority or plurality of the production under the contract being awarded to the bidder with the proposal most advantageous to the United States, considering only price and other factors, included in the solicitation, and a minority of the production being awarded to the next such most advantageous bidder or bidders under the contract. The percentage of the contract for production awarded to the next most advantageous bidder or bidders under the contract shall be a percentage determined by the Secretary of Defense to be sufficient to allow each such bidder to compete effectively for a majority of the production when the contract is renewed: provided that the contract proposal of the next most advantageous bidder or bidders is competitive with the contract proposal of the most advantageous bidder.

"(b)(1) The Secretary of Defense may waive the requirements of subsection (a)(3) in the case of any contract if he determines and certifies in writing to the Congress that such requirement will materially increase total cost of the program or delay completion of the total program. Any waiver of the dual sourcing development requirement of subsection (a)(3) shall not be considered a wavier or such subsection's dual sourcing production requirement.

"(2) Except as provided in subsection (c), a contract described in subsection (c) with respect to which the Secretary has waived the requirements of subsection (a)(3) may only be awarded through the use of competitive procedures. If a contract described in subsection (c) with respect to which the Secretary has waived the requirements of subsection (a)(3) is renewed, the new contract must be awarded under competitive procedures or as provided in subsection (c).

"(c)(1) If the Secretary of Defense finds in the case of a prime contract to be awarded for a major defense acquisition program that the requirements of subsections (a)(3) and (b)(2) cannot be complied with and that procurement procedures other than competitive procedures are permitted under section 2304(c) of title 10, United States Code, in the award of such prime contract, the Secretary shall submit a report to the Congress containing his findings together with a request for specific statutory authorization to enter into a sole source prime contract for such program. The Secretary shall include in such report for each contract—

(A) The total program cost information, total program unit cost information, and delivery schedule information under a competitive procedures contract and under a sole source contract used by the Secretary in his decision to select a sole source contract for such program;

(B) the existing unit cost of a commercially available product that performs a function similar to the function to be performed by the product to be obtained under the contract to be awarded, if such a product is commercially available, or the existing unit cost of foreign produced product that performs a function similar to that of the product to be obtained under the contract to be awarded, if such a product is commercially available in a foreign country, or, if such a product is not available from either such source, an independent cost estimate of the total program unit cost of the product to be obtained under the contract to be awarded;

(C) The identity of any senior official of the Department of Defense at the equivalent level of GS-14 or above who recommended or caused to be initiated a recommendation that the contract be a sole source contract;

(D) such other information as the Secretary considers appropriate.

"(2) The report required by paragraph (1) shall be submitted to the Congress not later than the date on which the initial budget request for full scale development or production, whichever the case may be, of the major defense acquisition program is made to the Congress.

"(3) A sole source prime contract may not be awarded or renewed for any major defense acquisition program unless the Congress has specifically authorized such specific contract to be awarded in an annual Department of Defense authorization Act or in other appropriate legislation enacted into law. Such specific statutory authorization shall include the identity of such contract and its cost.

"(4) Whenever the Secretary requests authorization, pursuant to subsection (c)(1), for the awarding of a sole source prime contract, he shall also cause to be published in the Federal Register a notice of the request and shall include in the notice the noncompetitive nature of the contract to be awarded, the estimated cost of the contract, the name of the contractor to whom the contract is to be awarded, and the identity of any Department of Defense officials at the equivalent level of GS-14 or above, who recommended or caused to be initiated a recommendation that the contract be awarded as a sole source contract.

"(5) Nothing in this subsection shall be deemed to require the public release of classified information.

"(d) Each sole source contract for a major defense acquisition program awarded by the Department of Defense shall—

"(1) contain a provision that prohibits the contractor from employing for a period of 6 years after the expiration of the contract the services of any employee or former employee of the Department of Defense at the equivalent level of GS-14 or above who recommended or caused to be initiated a recommendation that the contract be awarded as a sole source contract;

"(2) provide for a comprehensive audit by the Comptroller General of the United States, including access by the Comptroller General to all accounting records of the contractor and subcontractors, including any classified records;

"(3) deny payment of any overhead costs under the contract until the appropriate representative of the contractor has certified to the Secretary in writing that the payment of the overhead costs will reimburse the contractor only for costs that benefit, directly or indirectly, the Department of Defense and that such costs are demonstrably related to or necessary for the performance of the contract for which the payment is requested; and

"(4) require the appropriate representative of the contractor to certify to the Secretary in writing that any claim or request for payment under the contract does not include any claim or request for general and administrative costs that are unallowable under regulation prescribed by the Secretary of Defense.

"(e) A claim or request for payment by a contractor for any overhead cost prohibited under subsection (d)(3) or for any unallowable general and administrative cost shall be subject to section 287 of title 18, United States Code, and shall be punishable as provided by law for offenses under that section.

"(f) The Comptroller General of the United States shall conduct a comprehensive audit of each prime sole source contract awarded by the Department of Defense for a major defense acquisition program and shall report the results of such audit to the Congress together with his opinion whether a new contract for the program provided for in the audited contract can reasonably be awarded under competitive or dual sourcing procedures upon the expiration of the existing sole source contract."

"(g) The provisions of this section shall not require the suspension or termination of funding or approval for any defense program or defense contract during the fiscal year 1986.

TRAINING AND REQUIREMENTS FOR QUALITY CONTROL ENFORCEMENT

SEC. 604. Part II of subtitle A of title 10, United States Code, is amended by adding the following section 1621:

"(a) The Secretary of Defense shall develop and carry out an introductory training program which shall be mandatory for all personnel responsible for assuring qua'ity standards for weapon systems or other defense equipment. Such program shall be not less than four weeks in duration. A person assigned to duties involving quality assurance shall be required to attend such training program within the first six months of the person's assignment to such duties.

"(b)(1) In any case in which it is determined that a weapon system, other defense equipment, or service provided to the Department of Defense fails to meet the quality standards provided for in the contract for such weapon system, other equipment, or service, whether such determination is made before or after delivery of the equipment or service, the cost of repair or replacement, including all labor costs, shall be borne by the contractor.

"(c) In any case in which a contractor fails to disclose to the appropriate officials of the Department of Defense any instance in which the contractor knows defense equipment or service provided to the Department of Defense by the contractor does not meet the quality standards prescribed in the contract for such equipment or service and submits a claim for the payment of such equipment or service, such claim shall be subject to section 287 of title 18, United States Code, and shall be punishable as provided by law for offenses under that section.

"(d) The provisions of this section shall apply in any case only to the extent that the provisions of section 2403 of title 10, United States Code, do not apply.

BURDEN OF PROOF IN GOVERNMENT CONTRACT DISPUTES

SEC. 605(a). In any proceeding before the Armed Services Board of Contract Appeals, the United States Claims Court, or any other Federal court in which the reasonableness of any contract costs for which a contactor seeks reimbursement from the Department of Defense are in issue, the burden of proof shall be upon such contractor to establish that such costs are reasonable.

(b) "Reasonable" means a cost that does not exceed that which would be incurred by a prudent person in the conduct of competitive business.

LIMITATION ON EMPLOYMENT OF CERTAIN DEPARTMENT OF DEFENSE PERSONNEL BY DEFENSE CONTRACTORS

SEC. 606. (a)(1)(A) Chapter 141 of title 10, United States Code, is amended by inserting after section 2397 the following new section:

"§ 2397a. Limitation on employment of certain Department of Defense personnel by defense contractors

"(a) As used in this section:

"(1) 'Compensation' includes any payment, gift, benefit, reward, favor, gratuity, or employment valued in excess of $102 at prevailing market price, provided directly, indirectly, or through a third party.

"(2) 'Contractor' means any person, partnership, corporation, or agency thereof (other than the Federal Government, the independent agencies of the Federal Government, or the District of Columbia) that offers, negotiates, agrees, or otherwise contracts to furnish to the Federal Government property, services, or supplies, and any parent organization, subsidiary organization, or affiliated organization of any such person, partnership, corporation, or agency thereof.

"(3) 'Covered defense official' means an officer or employee of the Department of Defense or a member of the armed forces on active duty who is paid for service as an officer or employee of the Department or member of the armed forces at a rate of basic pay equal to or greater than the minimum rate of basic pay payable for grade GS-11 under the General Schedule.

"(4) 'Procurement function' means any acquisition activity relating to a contract awarded by the Department of Defense, including—

"(A) negotiating, awarding, or administrating the contract;

"(B) approving contract changes;

"(C) approving payment under the contract;

"(D) selecting a contractor;

"(E) performing cost analysis, quality assurance, operation and developmental test-

ing, budgeting, or auditing functions relating to the contract;

"(F) providing technical advice or recommendations relating to the contract; or

"(G) managing a procurement program which includes the contract.

"(b)(1) A former officer or employee of the Department of Defense and a member or former member of the armed forces may not accept compensation from any contractor for the 3-year period beginning on the date the former officer or employee separates from Government service in the Department or the member or former member is discharged or released from active duty if, within 3 years before such date, the former officer or employee or the member or former member was a covered defense official who had significant responsibilities in the performance of a procurement function with respect to that contractor.

"(2) Whoever violates paragraph (1) shall be fined not more than $10,000 or imprisoned for not more than 2 years, or both.

"(3) Whoever furnishes any compensation to a person who is prohibited by paragraph (1) from accepting the compensation shall be fined not more than $10,000 or imprisoned for not more than 2 years, or both.

"(c)(1) Each contract for the procurement of property or services awarded by the Department of Defense shall include a provision prohibiting the contractor from furnishing compensation to any person if the acceptance of such compensation by such person would be a violation of subsection (b)(1).

"(2) A contractor which violates a contract provision required by paragraph (1), as determined by the Secretary of Defense, shall be liable to the United States for the greater of $250,000 or the amount equal to five times the annual rate of compensation paid by the contractor in violation of such contract provision. The United States may collect the amount of such liability by withholding, as a forfeiture, any money payable by the United States to the contractor.

"(d)(1) Not later than March 1 of each year, each contractor which is subject to a contract provision required by subsection (c)(1) shall transmit to the Inspector General of the Department of Defense a report on persons to whom the contractor furnished compensation during the preceding year and who are covered by such contract provision. The report shall include—

"(A) the name of each person (together with other information adequate to identify the person) who, as a covered defense official, performed a Government procurement function within 3 years before the first day of the year covered by the report and who was compensated by that contractor during the year covered by the report;

"(B) the agency or agencies of the Federal Government which employed the person or the armed force in which the person served on active duty, as the case may be, during the 3 years referred to in clause (A);

"(C) the person's job titles during the 3 years referred to in clause (A);

"(D) a full and complete description of the duties of the person during the 3 years referred to in clause (A);

"(E) a full and complete description of any official responsibilities such person exercised with respect to any contract in which the contractor has or had an interest; and

"(F) a description of any duties that the person has performed on behalf of the contractor during the year covered by the report.

"(2) Not later than April 1 of the year in which the Inspector General of the Department of Defense receives a report under paragraph (1), the Inspector General shall transmit a copy of the report to the Congress.

"(3) The Inspector General of the Department of Defense shall assess the accuracy and completeness of each report received under paragraph (1) and shall identify any conduct punishable under subsection (b), any violation of a contract provision required by subsection (c)(1), and any failure of the report to meet the requirements of paragraph (1). The Inspector General shall report any such conduct, violations, and failures to the Attorney General of the United States for prosecution or other appropriate action without regard to whether the Secretary of Defense has taken or has declined to take action under subsection (c)(2).

"(4) A contractor who fails to transmit to the Inspector General of the Department of Defense a report required by paragraph (1) shall be liable to the Federal Government for an administrative penalty in the amount of $10,000. The Secretary of Defense shall assess the penalty required by the first sentence.

"(5) The Director of the Office of Government Ethics shall have access to the annual reports filed under paragraph (1) and shall review the reports for conduct punishable under subsection (b), any violation of a contract provision required by subsection (c)(1), and any failure of the report to meet the requirements of paragraph (1). The Director shall submit an annual report to the Congress on his actions under this paragraph and shall include in the report his findings relating to his review of the reports filed under paragraph (1).

"(e) Subsections (b), (c), and (d) do not apply with respect to a contract for an amount less than $25,000.

"(f)(1) The Director of the Office of Government Ethics shall coordinate and review the implementation and administration of this section. In consultation with the Secretary of Defense, the Secretaries of the military departments, the Attorney General, and the Administrator of the Office of Federal Procurement Policy, the Director of the Office of Government Ethics may issue regulations to implement and administer this section and may review agency regulations issued to implement and administer this section.

"(2) For purposes of implementing and administering this section, the Secretary of Defense, the Secretaries of the military departments, the Attorney General of the United States, and the Administrator of the Office of Federal Procurement Policy shall cooperate with the Director of the Office of Government Ethics and shall furnish the Director such information, appropriate personnel (with or without reimbursement by the Director), and financial and other assistance as may be agreed upon between the Director of the Office of Government Ethics and such official.

"(g)(1) Any person who is offered compensation that, if accepted, might place the person in violation of subsection (b)(1) may, before accepting such compensation, request from the Office of Government Ethics advice on the applicability of this section to such compensation. The request shall be made jointly by the person and the contractor who offered such compensation to the person.

"(2) A request made under paragraph (1) by any person who has been offered compensation referred to in such paragraph shall include—

"(A) a full and complete description of the person's duties during the last 3 years the person was employed by the Department of Defense or served on active duty in the armed forces, as the case may be;

"(B) any official responsibilities the person exercised during those 3 years with respect to any procurement contract in which the contractor has or had an interest; and

"(C) the contractor's description of any services that the person will perform on behalf of the contractor.

"(3) Promptly upon receipt of any request made under paragraph (1), the Director of the Office of Government Ethics shall publish a notice of the request in the Federal Register. The notice shall include—

"(A) the name of the person making the request;

"(B) the contractor offering compensation to the person; and

"(C) the information included in the request under clauses (A), (B), and (C) of paragraph (2).

"(h)(1) Upon receiving a request for advice under subsection (g), the Director of the Office of Government Ethics shall determine whether the acceptance and payment of compensation referred to in the request is conduct punishable under subsection (b) or would be a violation of a contract provision required by subsection (c)(1).

"(2) Not later than 30 days after the date the Office of Government Ethics receives a request for advice under subsection (g), the Director of the Office shall issue an interim advisory opinion stating his determination under paragraph (1) based on an initial review of the request.

"(3) Not later than 60 days after the date the Office of Government Ethics receives a request under subsection (g), the Director of the Office shall issue a final advisory opinion stating his final determination under paragraph (1).

"(4)(A) Except as provided in subparagraph (B), if the Director of the Office of Government Ethics states in an interim advisory opinion issued under paragraph (2) that, based on the initial review, the Director concludes that the acceptance and payment of such compensation is not conduct punishable under subsection (b) and does not violate a contract provision required by subsection (c)(1), acceptance and payment of such compensation shall not be punishable under subsection (b) and shall not be considered a violation of such contract provision.

"(B) Subparagraph (A) shall not apply to an acceptance or payment of compensation which occurs after the date the Director of the Office of Government Ethics issues a final advisory opinion under paragraph (3) if the Director states in the final advisory opinion that acceptance and payment of the compensation is conduct punishable under subsection (b) or violates a contract provision required by subsection (c)(1).".

(B) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 2397 the following new item:

"2397a. Limitation on employment of certain Department of Defense personnel by defense contractors.".

(2) Not later than 180 days after the effective date of the amendments made by paragraph (1), the Secretary of Defense shall issue regulations specifying the procure-

ment functions covered by the description of functions set out in section 2397a(a)(4) of title 10, United States Code (as added by paragraph (1)).

(b)(1) The amendments made by subsection (a)(1) shall take effect January 1, 1986.

(2) The amendments made by subsection (a)(1)—

(A) do not prohibit—

(i) the continuation of employment which commenced before the effective date of the amendments; or

(ii) the receipt of compensation for such employment; and

(B) do not apply with respect to any procurement function performed before such effective date by a former officer or employee of the Department of Defense whose employment by the Federal Government terminated before such effective date or by a member or former member of the Armed Forces who was discharged or released from active duty in the Armed Forces before such effective date.

IMPROVED REQUIREMENTS AND PENALTIES RELATING TO DISCLOSURES OF EMPLOYMENT OF FORMER PERSONNEL OF DEFENSE CONTRACTORS BY THE DEPARTMENT OF DEFENSE

SEC. 607. (a) Section 2397 of title 10, United States Code, is amended—

(1) by striking out subsection (b);

(2) by redesignating subsections (c), (d), (e), and (f) as subsections (b), (c), (d), and (e), respectively;

(3) in subsection (b)(1) (as redesignated by clause (2))—

(A) by striking out "minimum rate for GS-13" and inserting in lieu thereof "minimum rate of basic pay payable for grade GS-11 under the General Schedule";

(B) by striking out "of at least $15,000" and inserting in lieu thereof "equal to or greater than the minimum rate of basic pay payable for grade GS-11 under the General Schedule"; and

(C) by striking out "contracts by the Department during the fiscal year that total at least $10,000,000" and inserting in lieu thereof "any contract during the fiscal year in an amount equal to or greater than $25,000"; and

(4) in subsection (d) (as redesignated by clause (2)), by striking out "$1,000, or imprisoned not more than 6 months, or both" and inserting in lieu thereof "$10,000".

(b) The amendments made by subsection (a) shall take effect January 1, 1986.

SEC. 608. There are authorized to be appropriated $3,000,000 for each of the fiscal years 1986 and 1987 to be available for the purpose of carrying out the provisions of Title 15 United States Code Section 644(K).

EFFECTIVE DATE

SEC. 609. This title shall become effective on October 1, 1985 except as may be provided in section 606 and 607.

BINGAMAN AMENDMENT NO. 155

Mr. BINGAMAN proposed an amendment to the bill S. 1160, supra; as follows:

On page 100, between lines 2 and 3, insert the following new section:

ANNUAL SELECTED ACQUISITION REPORTS

SEC. . (a) Subsection (c) of section 139a of title 10, United States Code, is amended to read as follows:

"(c)(1) Each Selected Acquisition Report for the first quarter for a fiscal year shall include—

"(A) the same information, in detailed and summarized form, as is provided in reports submitted under section 139 of this title;

"(3) the current program acquisition unit cost for each major defense acquisition program included in the report and the history of that cost from the date the program was first included in a Selected Acquisition Report to the end of the quarter for which the currrent report is submitted; and

"(C) such other information as the Secretary of Defense considers appropriate.

"(2) Each Selected Acquisition Report for the first quarter of a fiscal year shall be prepared and submitted in the same format and with the same content as was used for the Selected Acquisition Report for the first quarter of fiscal year 1984.

"(3) In addition to the material required by paragraphs (1) and (2), each Selected Acquisition Report for the first quarter of a fiscal year shall include—

"(A) a full life-cycle cost analysis for each major defense acquisition program included in the report which is in or has completed full-scale engineering development and which was first included in a Selected Acquisition Report for a quarter after the first quarter of fiscal year 1985;

"(B) if the system that is included in a major defense acquisition program described in clause (A) has an antecedent system, a full life-cycle cost analysis for that antecedent system; and

"(C) production information, including but not limited to—

"(i) a baseline annual production rate planned for the system through the projected termination of the procurement;

"(ii) cost and schedule variances caused by departure from the annual baseline production if the annual budget submission varies from the baseline;

"(iii) the annual production capacity provided with the facilities and tooling programmed for procurement in the program or otherwise provided by Government funds;

"(iv) the annual production rates assumed in the cost-effectiveness analysis presented at the time the Secretary of Defense authorized the military service component to proceed with full-scale development of the program; and

"(v) the cost savings projected to be available if the program submitted in the annual budget submission was procured at the annual production rate identified at the time the Secretary of Defense authorized the military service component to proceed with full-scale development of the program.

"(4) Selected Acquisition Reports for the first quarter of a fiscal year shall be known as comprehensive annual Selected Acquisition Reports.".

"(b)(1) The Secretary of Defense shall resubmit to Congress the Selected Acquisition Reports required by section 139a of title 10, United States Code, for the first quarter of fiscal year 1985. The reports as resubmitted shall be in the format and with the content required by paragraph (2) of section 139a(c) of such title, as added by subsection (a).

"(2) Such reports shall be submitted not later than 30 days after the date of the enactment of this Act.

BYRD AMENDMENTS NOS. 156 AND 157

Mr. BYRD proposed two amendments to the bill S. 1160, supra; as follows:

AMENDMENT NO. 156

At the end of title IX of division A of the bill, insert the following new section:

PROHIBITION AGAINST USING FUNDS APPROPRIATED FOR THE ADVANCED TECHNOLOGY BOMBER AND THE ADVANCED CRUISE MISSILE PROGRAMS FOR ANY OTHER PURPOSE

SEC. 917. (a) It is the sense of Congress that—

(1) the capabilities inherent in the technologies associated with the Advanced Technology Bomber program and the Advanced Cruise Missile program are a critical national security asset for maintaining an adequate and credible deterrent posture;

(2) such technologies and programs should be developed as rapidly as feasible in order to produce and deploy advanced systems which will complicate the military planning of the Soviet Union and as a consequence enhance the deterrence posture of the United States;

(3) such technologies and programs should be funded at the levels authorized in this Act; and

(4) all the funds appropriated for such programs should be fully used for such programs.

(b) None of the funds appropriated pursuant to an authorization of appropriations in this Act to carry out the Advanced Technology Bomber program or the Advanced Cruise Missile program may be used for any other purpose.

(c) It is the sense of the Congress that, consistent with the stated policy of the Department of Defense, the B-1B bomber aircraft procurement program should be terminated after acquisition under such program of 100 aircraft.

AMENDMENT NO. 157

In section 915 of the bill, beginning with "unless" strike out all down through "that purpose.", and insert a period.

HART AMENDMENT NO. 158

Mr. HART proposed an amendment to the bill S. 1160, supra; as follows:

On page 90, after line 24, insert the following new section:

PROHIBITION ON USE OF FUNDS FOR PROCUREMENT OF MX MISSILES OR FOR CONSTRUCTION OF MX MISSILE RELATED FACILITIES

SEC. 916. (a) Notwithstanding section 103, the total amount authorized to be appropriated for fiscal year 1986 for the procurement of missiles for the Air Force, as specified in such section, is reduced by $2,081,600,000.

(b) Funds appropriated pursuant to an authorization contained in this or any other Act for fiscal year 1986 may not be obligated or expended for the procurement or deployment of any MX missile or for the construction, conversion, or renovation of any facility for the deployment of the MX missile.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON THE JUDICIARY

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Monday, May 20, in order to conduct oversight hearings on Civil RICO Suits Brought Under 18 U.S.C. 1964 (c)."

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE MILITARY RETIREMENT SYSTEM

● Mr. GOLDWATER. Mr. President, the Association of the U.S. Army has written a short, but right to the point, article on the dangers of legislatively attempting to correct inequities in the military retirement system without the legislative members knowing a lot more about it.

This article should be read by my colleagues. I ask that it be printed in the RECORD.

The article follows:

COMPARING RETIREMENT PROGRAMS—THE DUTY MAKES THE DIFFERENCE

A frequently voiced criticism of military retirement is that it is much more generous than civilian pension plans. Direct comparisons with private sector wage and benefit plans are sometimes useful mechanisms for gauging the general adequacy of military pay, but efforts to model service compensation after civilian systems have never been successful. In reality, the armed forces retirement system *is* unlike any other. That is as it should be, since duty in the uniformed services is totally incomparable with civilian employment.

Nowhere in the private sector are young men and women who first join an organization required to sign an unlimited liability contract such as that entered upon by service members. Without recourse, armed forces personnel can be legally required to fight anywhere in the world and may be severely punished if they disobey orders to do so. They may be used when and as long as the national authorities believe appropriate, with no regard for their personal preferences or their occupational specialties.

As a matter of course, service members forfeit a considerable degree of personal freedom and undergo frequent family disruptions and inconveniences while being subject to high risk. Long hours of grueling labor without overtime pay are regular features of military duty as are duties at undesirable or remote locations, living in housing which does not meet basic American standards and being on call all the time for an entire career.

National authorities retain complete and one-way control over the military force with the freedom to use it in any way necessary in the national interest. That includes the right to individually "fire" members, despite fully satisfactory performance, in mid-career, for any momentary convenience to the government. Service members may be forced to retire without regard to personal preferences or family circumstances, can be recalled whenever the need arises, and are subject to the Uniform Code of Military Justice in perpetuity.

Congress needs to carefully consider these rigid conditions of service before attempting to reform the retirement part of military compensation. It must compare duties before comparing pay.●

OIL HEAT CENTENNIAL YEAR

● Mr. CHAFEE. Mr. President, I am pleased to join Senator LEAHY as a cosponsor of Senate Joint Resolution 115, commemorating the Oil Heat Centennial Year.

On August 11, 1885, the U.S. Patent Office issued a patent to David H. Burrell for a furnace that could burn liquid and gaseous fuels. This furnace was the first practical oil burner in the United States.

The oil burner has had a profound effect on the technological development of our country. In World War I, the oil burner became the primary source of propulsion for large warships, helping to establish the United States as a world power. After the war, oil burner technology was extended to heat businesses and homes.

Oil burners continue to be a major heating source. In New England, more than 2 million commercial and residential buildings are heated by oil. In my own home State of Rhode Island, more than 170,000 buildings utilize oil heat, translating into 225 million gallons of heating oil per year. Over 800,000 Rhode Island residents depend on oil to heat their homes.

In order to commemorate the 100th anniversary of the oil burner, the Independent Oil Marketers in New England are planning a major celebration in June. I commend their efforts and ask that we, in Congress, also recognize the contribution of the oil burner to the technological revolution of the 20th century.

I urge my colleagues to support this effort.●

BUDGET STATUS REPORT

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate a status report on the budget for fiscal year 1985 pursuant to section 311 of the Congressional Budget Act.

Since my last report, the Congress has cleared the automobile record-keeping repeal bill, H.R. 1869, for the President's signature.

The report follows:

[Report No. 85-6]

REPORT TO THE PRESIDENT OF THE U.S. SENATE FROM THE COMMITTEE ON THE BUDGET

STATUS OF THE FISCAL YEAR 1985 CONGRESSIONAL BUDGET ADOPTED IN H. CON. RES. 280 REFLECTING COMPLETED ACTION AS OF MAY 16, 1985

[In millions of dollars]

	Budget authority	Outlays	Revenues
Budget resolution level	1,021,350	932,050	750,900
Current level	1,015,973	933,364	750,589
Amount remaining	5,377	0	0

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and which exceeds $5,377 million for fiscal year 1985, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 280 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding $10 million for fiscal year 1985, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 280 to be exceeded.

REVENUES

Any measure that would result in revenue loss exceeding $0 million for fiscal year 1985, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 280.●

THE ACEQUIA SYSTEMS OF NEW MEXICO

● Mr. DOMENICI. Mr. President, the New York Times recently carried a most interesting article on the acequias systems that we have in New Mexico.

These irrigation systems, many of which date to the 18th century, are vital to the survival of many smaller communities as well as the family farms we have in northern New Mexico.

To help my colleagues understand more fully this important facet of our New Mexico history, I ask that a copy of the article be printed at this point in the RECORD.

The article follows:

ANCIENT TASK REAFFIRMS RICH NEW MEXICAN PAST

(By Robert Reinhold)

LYDEN, N.M., April 13.—A warming spring sun crept over the snowcapped Sangre de Cristo mountains as old Alex Garcia prepared his men to perform an ancient ritual that has almost religious overtones in this remote part of northern New Mexico. It was the annual cleaning of the acequias, or irrigation ditches, along the Rio Grande.

The seemingly mundane task has been essential to survival here since the Spanish conquistadors pushed into this harsh but starkly beautiful land more than three centuries ago.

Mr. Garcia, the 66-year-old mayordomo, or manager, of the Lyden acequia district, takes the job very seriously. On his orders this morning, two dozen young and old men with shovels jumped into the ditch and began to shovel out the winter's collected debris of willow branches, rocks and beaver dams so that precious water could flow into the apple and plum orchards and corn fields that line the mile-and-a-half-long acequia.

First, the oldest man, Adonais Romero, walked down the littered ditch with a measuring rod, called a vara, marking off sections to be cleaned by each man. Then Mr. Garcia, in his straw hat, marched up and down, sternly ordering remedial work where the job was not done quite right.

RITUAL OF IDENTITY

It was a quintessentially New Mexican event, and one that has been performed faithfully every year for more than 300 years in this and about 1,000 other acequias. It is an event, moreover, that is closely bound up with the identity of this unusual region of the United States, where Spanish is spoken more than English, where the locals consider themselves descendants not of Mexicans but of the Spanish conquistadors, and where resentment over the en-

croachment of rich "Anglos" with their boutiques and art galleries into Santa Fe and Taos is deep.

There was a time when the ditches were the center of life in hundreds of tiny communities along the Rio Grande and other rivers, villages that did not even have electricity until after World War II. They not only carried water for the crops, but also served as wash basins for laundry and watering holes for livestock in an arid land where water has turned out to be more precious than the gold the Spanish conquerors sought in vain.

The annual cleaning, therefore, took on enormous significance and the ditches were the glue that held communities together. "I can remember as a kid the women would come and bring food for the men, posoles, frijoles, tortillas, biscochitos," said Wilfred Gutierrez, 50. "We were poor but we had plenty to eat."

Time has eroded the acequias and their importance. Young people, here as elsewhere, have been drifting away, into service jobs in the cities and in government. Also, the urbanization of Albuquerque, 75 miles south, is pressing relentlessly into the remote North. In many places ditches have decayed, along with the social cohesion they enforced.

Mr. Gutierrez has become a leader in a growing movement to rebuild the acequias as a means of preserving New Mexican heritage. He said the Lyden acequia, like others, serves mostly small farmers with only a few dozen acres who would be unable to compete with big agribusiness operations without this water.

"These things held the community together," Mr. Gutierrez said. "The acequias were something we all had in common. I fear that industry and the cities will take over the whole Southwest. We are getting more and more people from the East. And people demand water to live. Cities are growing. They want gold courses and parks, and it all becomes competitive for water. This is what bothers me. We have to keep our land profitable. This land has produced and fed families for generations."

But increasingly, families do not depend on the land anymore. Even Mr. Gutierrez is only a part-time farmer in nearly Belarde, earning his main income as a technician at Los Alamos National Laboratory.

FEDERAL HELP FOR DITCHES

Still, he has made his voice heard in Washington. He is president of Las Nueve Acequias Steering Committee, a group of nine acequia districts. The districts have quasi-governmental powers under New Mexico law, and are run by commissioners elected locally by the water users, or parciantes. The users are required to pay an annual fee to the associations, and the mayor-domos allocate water as it is needed.

The committee enlisted the aid of Senator Pete V. Domenici, and the New Mexico Republican persuaded his colleagues in Congress to appropriate $15 million to rehabilitate the nine acequias near here and the dams that feed them as a demonstration project.

Already, the fruits of the project are visible. The Bureau of Reclamation, an arm of the Interior Department, has replaced two decaying stone diversion dams on the Rio Grande with two sleek new concrete dams. Ultimately, seven new dams will be built along the valley from Espanola to Velarde, serving the ditches in such historic places as Alcalde, Lyden and El Guique.

It was only a few miles from here, at San Juan, where the Rio Grande joins the Rio Chama, that Don Jan de Oñate founded the first Spanish capital of New Mexico. There is archeological evidence that the Pueblo Indians, subdued by the Spanish, had long been diverting the powerful river into crops.

RETURNING TO THE LAND

Mr. Domenici's aide in Santa Fe, Ernesto Vigil, said it was difficult to persuade other legislators that the project was worthwhile. As Mr. Gutierrez put it, "They didn't even know what an acequia was in Washington."

But all the apple, peach, plum and chili planters here know. And they all dutifully send their men every April for the cleaning, for otherwise there is no crop. For the older people, particularly, the pull of the ditches is strong. After years of teaching linguistics at universities around the country, Dr. Robert Vilapando came home to New Mexico to retire in his native Alcalde. For the last decade, the 78-year-old scholar has been an elected commissioner of the Alcalde Acequia, several miles from the Lyden ditch.

Today, standing with a shovel under an ancient cottonwood, he spoke with pride of the ditch, which irrigates 132 small farms, his included, 800 acres in all.

"This is a very nice community ditch," he said. "It's community work. It's an old tradition. The Indians came in with the Spaniards and built this ditch. The people are proud of that. The cleaning has been done every year."

Few people are following in Dr. Vilapando's footsteps, but to Mr. Gutierrez, a commissioner of two ditch associations, the survival of the acequias means nothing less than preserving a unique form of American democracy.

"The beauty of this was that our way of electing commissioners and distributing water was one of the most equitable—it was democracy at work," he said. "When we depended on farming for subsistence, we had rules that gardens had first priority, then orchards and alfalfa. It was a very equitable way of getting along."●

CONGRESSIONAL CALL TO CONSCIENCE

● Mr. BOSCHWITZ. I once again rise to draw attention to the problem of Jews and others living in the shadow of oppression in the Soviet Union.

This congressional call to conscience is an important effort to assure those who live in oppression that theirs is not a battle they must fight alone. Their struggle is a worldwide battle that must continuously be fought. As chairman of this vigil, I am very involved in drawing the world's attention to those whose basic freedoms have been stripped away. There is a member of my family, living in Israel, Hassia Bosschwitz, who is also very active in behalf of Soviet Jewry. I ask to place in the RECORD an article she sent to me from the Jerusalem Post about Dan Shapira's struggle to settle in Israel. My cousin had the pleasure of meeting with Dan who so yearns to be with his people in their homeland.

Our worldwide effort must not cease or abate. Thousands of individuals like Dan Shapira, have been denied the right to practice their religion freely and the right to emigrate. The congressional call to conscience involving scores of Senators reaffirms our intent of changing these practices by the U.S.S.R. and convincing them that progress in all relations between our countries will be tied to matters of human rights.

The article follows:

MEETING WITH A YOUNG MAN OF SORROWS

(By Judy Siegel)

He is tall and thin, with a low-pitched voice and hunched shoulders, as if he carried the sorrows of the world on his back.

Dan Shapira marks his 24th birthday this week but he behaves in such a sober manner that he seems to be at least a decade older. Dan—a member of the new generation of Soviet Jewish aliya activists—faces a possible three years imprisonment, having been arrrested a few weeks ago for "anti-Soviet propaganda."

Two Israelis who met Shapira last summer returned from the USSR with the unforgettable memory of the young Jew etched in their minds, determined to help him in his struggle to settle in Israel.

Hassia Bosschwitz, a biochemist at the Hebrew University in Jerusalem, met Shapira, the only son of a Communist, during a trip to Moscow as one of 90 Israeli scientists attending a professional conference.

Etka Liebowitz, a librarian living at Kibbutz Ma'ale Gilboa, was in Russia on an American passport. She taped a five-minute message from Shapira, delivered in flawless Hebrew and an incredible, self-taught Israeli accent that falters only when he hesitates between words.

"We want to be reunited with our people, our land, our state." he says, "Because some of us don't have families in Israel." He adds, with a somewhat bitter note: "We are very worried, we sometimes get the feeling that Israel doesn't want us. We're not sure that Israel is so interested in aliya."

But Shapira is determined nevertheless to come to his homeland.

"The time has come to demand a mass return to the homeland, rather than piecemeal aliya by individuals being reunited with their families." Shapira says, ending simply with the word "Shalom."

The biochemist says that she had not been active in the Soviet Jewry movement before going to Russia, but she did have sympathy for it. While preparing her paper for delivery at the conference, former Russian immigrants who heard about her plans came to send regards to relatives still in the USSR. After meeting with many refuseniks in Moscow and elsewhere, Bosschwitz couldn't return home apathetic. "They're our brothers. It's hard to watch them suffer," she says.

Both Bosschwitz and Etkin, who is vice president of the Association for the Dissemination of the Hebrew Language in the USSR and a member of the executive board of the Soviet Jewry Education and Information Centre (both based in Jerusalem), were very impressed by Shapira.

Despite his age, he has a broad awareness of the world and speaks seven languages, including Arabic and Aramaic. His specialty is in German language, and he was accepted as a member of the Israel Association for Applied Linguistics.

Coming from a secular, atheistic family, he is now traditional, but not religious.

His interest in Judaism and Zionism seems to have been sparked by experience with

anti-Semitism. He noticed some graffiti on the wall of a lavatory in the German Language Academy where he studied: "As long as a single *zhid* remains in Russia, he must suffer from genocide." As soon as Shapira applied for an exit visa to Israel, he dropped out of his studies.

During their meeting in Moscow, Shapira asked Bosschwitz for a copy of James Joyce's *Ulysses* in Hebrew. "It's such a difficult book and Dan wanted to read it in Hebrew!" Bosschwitz recalls in admiration. "But it hasn't yet been published in Hebrew," she adds.

He also requested a copy of *Israel Without Zionism* by Uri Avneri, explaining that *Pravda* quotes from the left-wing author's book and he wanted to read the original. A third book Shapira wanted was a "dictionary in rhyme," something that his guest has never heard of and believes may have been written during the Middle Ages by Rabbi Sa'adia Gaon.

When Etka spoke to Dan by phone a few days before his arrest, his last request was to receive a certificate testifying to the fact that he is an Israeli citizen by the Law of Return.

Shapira is one of the young generation of Jews in Russia who grew up after the terror of the Stalin era and who is young enough to risk his future for the right to live in Israel.

During the biochemist's visit, former Israeli president Prof. Ephraim Katzir, an internationally eminent scientist, was called in for questioning by the Soviet authorities. He had told them earlier that he planned to visit with Jewish activists, and was arrested on his way to his first visit. Bosschwitz says the KGB knew exactly who Prof. Katzir was and arrested him to scare Russian Jews.

The Israeli delegates to the 6,000-participant conference traveled everywhere with badges in Russian and Latin letters declaring they were from Israel. Most people were afraid to talk to them. All attended synagogue services in Moscow on Shabbat.

Bosschwitz says she turned down an opportunity of a lifetime—the chance to attend a free performance organized for the delegates of the Bolshoi Ballet. She went to see *refuseniks* instead, and she says she doesn't regret it.

Shapira's 24th birthday is on March 1. Congratulations can be cabled to his father, Jan Shapira, Moscow 123481. Planernaya 12-3-64. USSR.●

JOHN HOPE FRANKLIN ON APARTHEID

● Mr. KENNEDY. Mr. President, the issue of U.S. policy toward South Africa has been the subject of several hearings in two major Senate committees. Consideration of this very important issue will be before the full Senate in the near future.

Dr. John Hope Franklin, speaking for the commencement exercises of Brandeis University, May 19, 1985, addressed the question of South Africa in his remarks. Dr. Franklin is a leading historian and the author of "From Slavery to Freedom," the landmark text on the history of black Americans and United States racial policy, law and practice.

He is the James B. Duke professor of history at Duke University.

Dr. Franklin is an expert on the history of public policy and race in the United States. As such his assessment of apartheid in South Africa should be given great weight by this body.

I ask that the following text of Dr. Franklin's speech as reported in the Boston Globe be printed in the RECORD.

The speech follows:

APARTHEID IS TARGETED IN BRANDEIS TALK

Not since the Nazi terror was ended in Europe with the close of World War II has a system of government been as inhumane as that in South Africa today, a leading black historian said at the Brandeis University commencement in Waltham yesterday.

He also said the United States will forfeit its claim to world leadership if it fails to adopt policies that force change.

"South Africa" is imperialistic and terroristic," said John Hope Franklin, the James B. Duke professor of history at Duke University in North Carolina.

"It is as close to being uncivilized as one can imagine a country to be," he said.

Franklin, who received an honorary degree from Brandeis, said that in South Africa, "the color bar is more extensive and more rigidly enforced than anything known in this country, even in its most racist phase.

"Since 1945, there has been nothing to approach the depth of inhumanity that has become commonplace in South Africa today."

Franklin said that nation has disfranchised most of its population. South Africa "is the clearest example we have of the utter and complete rejection of the elementary democratic principles that this country has espoused for more than two centuries." Franklin said.

"It is my view that if we as a nation and a people cannot stand up against South Africa in the United Nations, on Wall Street, in the banking community and in our personal convictions and policies, we have forfeited any claim to leadership in the community of civilized nations," he said.

Franklin said the South African government actually is encouraged by the politics and practices of the United States government.

"Think for a moment of the stark fact that this government, so activist and so interventionist in political situations around the world, has so little to say about the government that denies virtually all of the tenets in which our Administration theoretically places so much stock," he said.

"What about the powerlessness of the people. 28 of whom the police killed a few weeks ago at Ultenhage, which moved the President of the United States merely to comment that perhaps it was the fault of the victims themselves.

Franklin described South Africa as "the worst of all nations on the face of the earth today," prospering as "an outlaw nation" that terrorizes its neighbors and defies all international authorities.

Franklin and nine other guests received honorary degrees at the ceremony, in which about 850 graduate and undergraduate degrees were awarded.●

PROPOSED ARMS SALES

● Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under the act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is immediately available to the full Senate, I ask to have printed in the RECORD at this point the notification which has been received. The classified annex referred to in the covering letter is available to Senators in the office of the Foreign Relations Committee, room SD-423.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, May 20, 1985.

[In reply refer to: I-02275/85ct]

Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 85-34 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Korea for defense articles and services estimated to cost $29 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

PHILIP C. GAST,
Director.

[Transmittal No. 85-34]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Korea.

(ii) Total Estimated Value:

	Million
Major Defense Equipment [1]	$27
Other	2
Total	29

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: A quantity of 1,432 Area Denial Artillery Munition (ADAM) and a quantity of 7,008 Remote Anti-Armor Mine System (RAAMS) 155mm projectiles.

(iv) Military Department: Army (XTG).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Case not included in Section 28 report.

(viii) Date Report Delivered to Congress: May 20, 1985.

POLICY JUSTIFICATION

Korea—155mm Projectiles: The Government of Korea has requested the purchase

of 1,432 Area Denial Artillery Munition (ADAM) and 7,008 Remote Anti-Armor Mine System (RAAMS) 155mm projectiles. The estimated cost is $29 million.

This sale will contribute to the foreign policy objectives of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for political stability and economic progress in Eastern Asia.

The Republic of Korea needs these 155mm projectiles to enhance deterrence and contribute to the preservation of peace and stability on the Korean peninsula.

The sale of this equipment and support will not affect the basic military balance in the region.

The production sources will be the Louisiana Army Ammunition Plant of Shreveport, Louisiana and the Iowa Army Ammunition Plant of Middletown, Iowa.

Implementation of this sale will not require the assignment of any additional U.S. Government personnel or contractor representatives to Korea.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

SECURITIES SAFETY AND SOUNDNESS ACT OF 1985

● Mr. DOMENICI. Mr. President, I have received numerous letters about my proposed moratorium on junk bonds, S. 975. The overwhelming majority of these letters—from New Mexico and from around the country—support the bill. The letters are from concerned taxpayers, employees of takeover candidates, Wall Street professionals, and shareholders. I think that the direct words of these people exemplify public opinion in general on the junk bond issue. Here are some direct quotes from their letters:

Who are they (managers of target firms) to be replaced with? Financial manipulators who have no management experience or knowledge of the industry or firm? . . . for every firm whose management is improved by a raider, there are surely ten firms that are weakened and shrunk. The raiders and present stockholders are always the gainers. The losers are the subsequent stockholders as well as present employees, suppliers, customers and communities. The final loser is the nation as a whole. The Japanese are successful because they invest in their firms for the long haul, not because they de-industrialize their country for a fast buck.—Albert Sanders, New York.

The so-called "shareholder revolution" is mis-titled: It is just a plain ordinary "promoter's scam."

As more and more companies are restructured, and the number of employed persons decreases, the pension contributions will become less and less, eventually the institutions will run out of pension fund money. . . We want our pension fund managers to invest solely in companies with excellent fundamental values and expectations of growth.—C. R. Palmer, Texas.

The Unocal attempted take-over concerns me for Colorado as well as for this country. In Mesa and Garfield counties alone, Unocal employs over 550 people with a payroll in excess of $23 million. This company has been a good neighbor in our area many years.

The prospects of Unocal being taken over, perhaps even its assets liquidated, is frightening to me. It would be a real blow to this area, a blow to this United States if some 20,000 employees were out of work.—Joseph C. Prinster, Chairman, Mesa County Economic Development Council, Colorado.

Unfortunately most of their (takeover speculators) targets are well managed companies. The take-over artists are not fools; they know that junk bonds can't be based on junk operations.

The take-over speculator doesn't care about long term values. . . . The long term investor sells out because at least he gets cash-less-tax for acceptance of the takeover offer whereas if he waits until the take-over is completed all he will get for his equity is a junk bond in a debt ridden company.

. . . In Great Britain the financial policy was to pay out all earnings and to rely on borrowed money or new equity for new investments. The result: bankrupt businesses with worn out facilities and, consequently, no credit for the required new investments.—George Gibson, New Jersey.

A large portion of my company's funds were recently devoted to preventing a hostile attempt to force our stock to be sold publicly, and thereby remove one of our strengths—employee ownership. . . . It is essential for Congress to investigate their motivation, understand their implications, and determine if legislation is needed to ensure that proper business practices are followed.—John N. Brothers, New Mexico.

Hundreds, if not thousands, of peoples' lives have been affected, often traumatically by these unwanted speculations.

Liquidation of a large integrated oil company, especially to small oil producers, will mean the end to the advancement of technology in every aspect.

A suitable analogy of the situation is to say that a spouse, because of the insurance payments, is worth more dead than he or she is alive.

As the late Winston Churchill said, "The price of strength is to be responsible."—N. Phillman Ho, California.

All of my adult working life has been spent on Wall Street. In no case in my more than two decades of experience from the viewpoint of any of my previous positions can I summon a memory of more frequent abuse.

Unlike loans to less developed countries, this financial activity does not ever carry the least element of social good such as elevating the lives of the economically less fortunate. Quite the contrary, a small rapacious group of "financiers" clustered about the firm of Drexel Burnham Lambert is destroying some of the best managements of America's finest companies—William E. Morfeld, New York.

Why should these senseless "fast buck muggers" be allowed to devastate good companies and people who have saved a lifetime to enjoy their later years, without Federal help.

Based on present circumstances it was necessary to change my investment plans and accept much less, while Pickens and Icahn enjoy millions of dollars at taxpayers expense. I recommend prompt enactment of a moratorium.—Philip R. Sweeney, Texas.

These letters are just a sample of the mail I have received in support of the Securities Safety and Soundness Act. We should be listening to these voices from the public and not the smooth talking voices of a sophisticated few who have a vested interest in making quick money.●

RADIO MARTI

● Mrs. HAWKINS. Mr. President, today freedom-loving Cubans everywhere commemorate a day of frustrated hope, and of hope newborn; 83 years ago today the United States ended its 3 year administration of Cuba following the Spanish-American War, and the people of Cuba regained full control over their destinies. Since 1959, that sovereignty, that freedom has been casually sold to promote the ego and prestige of Fidel Castro. Castro has auctioned off the pride and destiny of the Cuban people in exchange for massive amounts of Soviet aid. With Soviet aid amounting to 25 percent of the Cuban economy, or $4 billion annually, there can be little doubt that the withdrawal of such aid would result in a drastic decline in the standard of living of the Cuban people and possibly even the collapse of the Cuban economy.

There is no such thing as a free lunch. The Soviets do not hand out aid like this for nothing—you can be sure that there is a price, and that price has been the freedom, dignity and sovereignty of the Cuban people—all so that Fidel Castro can strut around the United Nations or the capitals of the Soviet bloc countries acting like he is important—a truly pathetic sight. We can plainly see why today, Cuban Independence Day, would be a day of frustrated hope for freedom-loving Cubans everywhere. But today is also a day for hope, new born, because today marks the beginning of broadcast by Radio Marti.

We have waited almost 1½ years since the President signed the bill into law permitting the beginning of broadcasts to Cuba. Now, at long last, that day has arrived. How fitting it is for a station whose mission is to promote the cause of freedom in Cuba to begin on this day of all days. Perhaps now the people of Cuba will have a basis by which they can regain control over their own destinies.

For too long the people of Cuba have been denied access to accurate and objective broadcasts relevant to their daily lives. Until today, the Cubans have been dependent on the propaganda machine of the Castro government for their so-called news. While they did have access to the Voice of America with its broadcasts to all of Latin America about life in the United States, they had no alternative to Castro's lies and deception regarding news about Cuba. Radio Marti now gives them that alternative.

Radio Marti marks a new hope for the people of Cuba. This is a peaceful initiative that could mark the beginning of unshackling the minds of the Cuban people that for too long have been chained by Castro's lies, propaganda, misinformation and deception. I welcome this new beginning.●

NATIONAL CRIME PREVENTION COUNCIL

● Mrs. HAWKINS. Mr. President, thanks to the National Crime Prevention Council, I am happy to say that McGruff has just about become a household word. Through pamphlets, flyers, radio, and TV coverage, calendars, posters, stamps and many other means, "Take a bite out of crime" has become a popular statement.

The National Crime Prevention Council uses the character "McGruff" to teach children about safety at home, school, and in all other aspects of life. One focus of the Council is on child abuse which uses the dog, McGruff, to explain the wrong kinds of touching and the importance of telling someone if a child feels wrong about something. They use a variety of ways to reach these children. One such technique they use is the Crime Prevention Activity Book which is filled with games and puzzles. They also have an elementary school program which is the answer to law enforcement's dilemma concerning how to get the message of safety and crime prevention to the children of America. They are doing all that is possible to positively mold the character and influence the minds of our Nation's children, by putting McGruff in schools from kindergarten to sixth grade.

I commend the National Crime Prevention Council for its extremely successful efforts in all crime prevention, and especially in the area of child safety. They contribute to the decline of crime overall which dropped from 29 percent in 1982 to 27 percent in 1983, the sharpest drop in 9 years of national crime surveys.

I ask that safety tips published by the National Crime Prevention Council on the subjects of missing children, sexually abused children and latchkey children be printed in the RECORD.

The material follows:

SEXUALLY ABUSED CHILDREN

Each year in the U.S., an estimated 100,000 children suffer some form of sexual abuse. Most of them are girls, but boys can also be victims. Teaching "stranger rules" is smart, but not enough—in the majority of cases, the child sexual molester is known to the child and the child's family. That's why only a minority of cases is reported. The abuser is often a parent, "good old Uncle Bill," a babysitter, or a close family friend.

Children may given in to adults' sexual advances because they fear losing their love, or fear their punishment, so they're *especially* vulnerable to abuse by someone they know. Children are trusting and defenseless, and they'll often feel guilty, as if they caused an assault.

Children may not recognize sexual abuse when it happens or even know it's wrong, although they often instinctively know what "proper distance" should be kept between them and other persons. They must learn what appropriate "touching" is, and, if they're ever uncertain about someone's intentions, they should know it's O.K. to respond in a way that makes them feel safer and more comfortable. While it is always difficult to talk about sexual abuse, the *only* way to do something about the problem is to have the child *tell someone.*

Adults should remember that, while children often make up stories, they rarely lie about being the victims of sexual abuse. If a child tells you about being touched or assaulted, take it seriously. Your response is very important. It will greatly influence how the child reacts to and recovers from the abuse.

Sometimes, a child may be too frightened or confused to talk directly abut abuse. Be alert for any change in behavior that might indicate that the child has suffered a disturbing experience:

Is the child suddenly more withdrawn than usual, refusing to go to school or afraid to be alone?

Is the child having trouble sleeping, waking up with nightmares, or wetting the bed?

Is the child complaining of irritation of the genital area?

Are there signs of increased anxiety or immature behavior?

Has the child's attitude changed toward a relative, neighbor or babysitter? Make sure you check carefully the references of babysitters, recreation leaders, and day care centers.

Abusers will continue until they're stopped. Abused children can be abusive—to themselves or others—when they become adults., It's a vicious circle that *can* be broken.

LATCHKEY CHILDREN: YOUNG CHILDREN AT HOME ALONE

An estimated 5 to 12 million children between the ages of 5 and 13 are regularly left alone at home for some part of the day. Leaving children alone always causes some anxiety, but knowing they are prepared to cope with situations that may arise will lessen the worry.

As a parent:

Be sure your children know how to use the telephone (both pushbutton and dial models) to make local, long distance and emergency calls and to dial the operator.

Post emergency numbers near all the phones in your home.

Make sure your children lock the door after they arrive home and then check in with you or a trusted neighbor.

Teach them to work the door and window locks in your home.

Tell your children what to do in case of fire.

Tell your children that they are never to go anywhere with another adult, even one who says he or she was sent by you. Adopt a family "code word" to be used if a third party is ever to pick up your children.

Teach your children, if they ever feel they're being followed, not to run home but to a store, public place, back to school, or to the nearest "Safe House."

Teach your children never to get near or into a stranger's car, or to take a walk with a stranger who says he needs the children to "show" him something.

Impress on your children that you always want to be told if anything happens to them while they're away from you that makes them feel uneasy or uncomfortable. Children will sometimes phrase this as feeling "funny."

Tell your children not to go into anyone's house or apartment without your permission and make sure you know the people who live in any home your child wants to visit.

Get together with other parents and approach your school or a community group about starting an extended-day program. Look into starting a "McGruff "Safe House" program in which neighborhood parents, grandparents, or other adults are recruited to volunteer their homes to serve as temporary shelters for frightened or lost children. A special sign posted in the window of these homes tells children this is a place to go when they are confronted with a serious problem. Local law enforcement can help in setting up a sound and enforcement program.

PREVENTING MISSING CHILDREN

Between 1.3 and 1.8 million children are reported missing in the United States every year. Some run away, others are abducted by strangers or by parents. Each year between 20,000 and 50,000 cases of missing children remain unsolved by the police.

Parents can take positive actions to protect their children. They can teach them:

That no adult has authority over them simply by virtue of size—that the children can say no.

To know their home address, including the city and state, and phone number *with* area code.

To use both pushbutton and dial phones for local and long distance calls.

To memorize emergency phone numbers.

To run to the nearest public place, store or police station, if they feel unsafe.

To watch for enticements from strangers—like candy, gifts, money, or request to help find a lost dog or cat.

Not to get close to a car if a stranger calls out for directions or anything else. It is easy for a stranger to pull a child into a car.

Not to open the door to strangers.

Not to tell callers that mom or dad isn't home.

Say they can't come to the phone and will call back.

Not to walk alone if they can help it.

To walk near the curb, on lighted streets at night, and against the traffic, and to travel known routes.

To run away, scream and make lots of noise if they are followed or grabbed by a stranger. The last thing a dangerous stranger wants is a lot of attention.

To go to the checkout counter and wait to be called on the loudspeaker if they are separated from you in a store.

Never to go out to a parking lot alone.

To tell parents immediately if anyone or any incident has made them feel uncomfortable.

Finally, parents should keep recent, clear photographs of their children in at least two different poses.

BEER AND WINE ADVERTISING

● Mrs. HAWKINS. Mr. President, alcoholism and alcohol abuse are serious problems, costing the Nations some $44.3 billion per year in lost wages, damages, and medical fees. Highway deaths involving drunken drivers have averaged 25,000 each year for the past 10 years. Some 200,000 Americans are injured each year in car accidents attributed to drunken drivers. We all know many other personal tragedies due to abuse of alcoholic beverages.

On February 7, 1985, my Subcommittee on Alcoholism and Drug Abuse

held an information hearing to question the relationship, if any, between alcohol product advertising and alcoholism, alcohol abuse, drunk driving, and underage consumption. Testimony was received from the Federal Trade Commission, representatives of the beer, wine, broadcast, and advertising industries, the Freedom of Expression Foundation, the Center for Science in the Public Interest, Florida Informed Parents, National Council on Alcoholism, Telecommunications Research and Action Center, and the National PTA.

Chairman Miller of the FTC testified that the Agency's role in deciding whether advertising is lawful is restricted to deception or unfairness. The FTC sees no reason now to mount an assault on alcohol beverage advertising.

Members of the beer, wine, broadcast and advertising industries testified that their advertising must already meet industry guidelines, network codes and Federal, State, and local laws and regulations before being aired and that potential problem advertising is disposed of in this manner. Of significant importance was testimony that beer sales have been level to declining since 1981, while advertising expenditures have reached an all-time high. Industry witnesses testified they compete for market share. A 1-percent change in market share is worth approximately $380 million per year. In addition, U.S. per capita alcohol consumption today is about half what it was 10 years ago. Modern advertising cannot be blamed for increasing consumption.

The alcohol, broadcast, and advertising industries, in addition to Government agencies and many others, sponsor education and research programs to address alcohol-related problems. At issue is the abuse of alcohol, not responsible consumption. A ban on broadcast advertising would not affect alcohol abusers, but would treat moderate drinkers as irresponsible. Testimony was also presented that scientific research in this country, Canada, and abroad documents no consumption or abuse improvements when alcohol advertising is banned. The broadcast and advertising industries also testified that mandating counter advertising would set a dangerous precedent for any advertised products with the potential for misuse.

Eliminating beer and wine sponsorship of amateur and professional sports would drive much sports programming to pay TV or simply result in its not being covered by the electronic media, broadcasters said.

Testimony was received calling for a careful examination of case law since 1975 on the issue of commercial free speech. A 1980 Supreme Court decision said that commercial speech could only be limited if found to be misleading, false or related to illegal activity.

Proponents testified that an advertising ban would not be a panacea to drunk driving and other alcohol abuse problems, but would be one facet of a comprehensive program to redefine alcohol in American society. They also stated that beer and wine advertising in sports and prime time hours has to have an effect on those watching, including young people, or the advertisers would not purchase the time.

Mr. President, the purpose is to increase market share, build brand loyalty, and introduce new products. The subcommittee could not find evidence to conclude advertising influences nondrinkers to begin drinking or to increase consumption. Scientific evidence as reported in respected scientific journals shows broadcast advertising has a minimal effect on drinking behavior. According to these journals, drinking behavior is influenced by parental example and peer pressure. Our subcommittee record contains no facts which would justify legislation to ban. censor advertising of beer and wine products, or require counter advertising.

Mr. President, in the past I have used this forum to compliment the broadcasters, brewers, and vintners for the many programs they have instituted to help combat the serious problem of alcohol misuse. I continue to believe that these industries can be an important part of the solution to the problem of alcohol misuse.

My colleagues may be assured that the subcommittee will continue to monitor the problem of alcohol and drug abuse in our society and do whatever we can to discourage its misuse.●

ORDER VITIATING ACTION ON S. RES. 159

Mr. SIMPSON. Mr. President, after conferring with the minority leader, I ask unanimous consent that the Senate action taken Friday, May 17, 1985, on Senate Resolution 159 to establish a select committee to study the 2-year budget process be vitiated and that Senate Resolution 159 be placed back on the Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNIZING THE CENTENNIAL ANNIVERSARY OF THE HOLSTEIN-FRIESIAN ASSOCIATION OF AMERICA

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate proceed to Senate Resolution 169, recognizing the centennial anniversary of the Holstein-Friesian Association of America, which is being held at the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 169) recognizing the centennial anniversary of the Holstein-Friesian Association of America.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wyoming?

There being no objection, the Senate proceeded to consider the resolution.

Mr. DOLE. Mr. President, it is my pleasure today to introduce a sense of the Senate resolution recognizing the centennial anniversary of the Holstein-Friesian Association of America and to be joined as original cosponsors by my distinguished colleagues, Senators ANDREWS, BOSCHWITZ, BURDICK, COCHRAN, COHEN, D'AMATO, EAGLETON, HEFLIN, HELMS, HOLLINGS, HUMPHREY, JOHNSTON, KASSEBAUM, KASTEN, KENNEDY, LEAHY, LUGAR, MCCLURE, MOYNIHAN, NUNN, PRYOR, STAFFORD, STENNIS, WILSON, and ZORINSKY.

ASSOCIATION PURPOSE

Mr. President, the Holstein-Friesian Association of America has grown from a beginning membership of 284 at the time of its incorporation in 1885 to over 44,000 breeders of purebred, registered holstein dairy cattle making it one of the premier dairy cattle breed organizations in the world.

As expressed in its original charter, the purpose of the association was to "improve the breed of holstein-friesian cattle; ascertaining, preserving and disseminating all useful information and facts as to their pedigrees and desirable qualities, and the distinguishing characteristics of the best specimens, and preparing, publishing and supplying all necessary volumes of the Holstein-Friesian Herd Book; and, generally, for promoting and securing the best interests of the importers, breeders and owners of holstein cattle, and thereby the public generally."

Mr. President this has been a worthy and admirable aim of the Holstein-Friesian Association of America. The association can be proud of its role in developing the quality of the holstein dairy cattle breed throughout the United States and the world. U.S. holsteins account for upward of 90 percent of the Nation's milk supply as well as being a primary source of genetic material used for development and improvement of dairy cattle throughout the world.

Mr. President, it is indeed appropriate to recognize the 100th anniversary of the Holstein-Friesian Association of America and compliment them for their efforts in developing the holstein dairy breed with its important role in providing a nutritious, wholesome and abundant supply of dairy products to our Nation's consumers.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the resolution.

The resolution (S. Res. 169) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 169

Whereas the Holstein-Friesian Association of America is a premier dairy cattle breed organization in the world;

Whereas the Holstein-Friesian Association of America, a non-profit membership organization of more than forty-four thousand breeders of purebred, registered Holstein dairy cattle, was organized on May 25, 1885, and this year celebrates its one hundredth anniversary;

Whereas the Holstein breed of dairy cattle produces more than 90 percent of the Nation's milk supply;

Whereas such Association maintains the only official, complete genetic data bank and lineage record for all purebred, registered Holstein dairy cattle in the United States;

Whereas such Association through its many programs and services to the dairy industry has provided and continues to provide an environment, incentives, and genetic data for the continued improvement of the Holstein breed;

Whereas United States Holsteins are recognized worldwide as the superior strain of Holstein breeding stock; and

Whereas the genetic pool of the Holstein breed in the United States has become the primary source of genetic material for the development and improvement of dairy cattle throughout the world: Now, therefore, be it

Resolved, That it is the sense of the Senate that on the occasion of the centennial anniversary of the Holstein-Friesian Association of America—

(1) recognition and commendation be extended the Holstein-Friesian Association of America for its most noteworthy contribution to the great American agricultural revolution;

(2) special commendation be extended for such Association's contribution to the genetic advancement and efficiency of the national dairy herd; and

(3) the Holstein-Friesian Association of America be complimented specifically on the advancement of the Holstein breed of dairy cattle in the United States and the contribution being made through its genetic pool of purebred, registered animals to the advancement of the Holstein breed worldwide.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REPRESENTATION BY SENATE LEGAL COUNSEL IN CIVIL ACTION

Mr. SIMPSON. Mr. President, I send a Senate Legal Counsel resolution to the desk on behalf of Senator DOLE and Senator BYRD and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 171) to authorize the representation by Senate Legal Counsel of a former Senate employee in the case of *Donald M. Zahn* v. *National Right to Work Committee.*

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wyoming?

There being no objection, the Senate proceeded to consider the resolution.

Mr. DOLE. Mr. President, this is a resolution relating to a subpoena to a former Senate staff member and representation by the Senate Legal Counsel.

Paul C. Summitt, a former staff member of the Committee on the Judiciary, has been subpoenaed by the plaintiff to testify in the case of *Donald M. Zahn* v. *National Right to Work Committee,* Civil Action No. 84-1223-A, an age discrimination action pending in the U.S. District Court for the Eastern District of Virginia. The plaintiff was a lobbyist for the defendant, and during 1981 and 1982 lobbied in support of a bill which was under consideration by the Judiciary Committee. The Senate Legal Counsel has been advised that plaintiff is seeking the testimony of Mr. Summitt, who had primary staff responsibility for such bill, in order to establish the plaintiff's competency as a lobbyist.

The speech or debate clause of the Constitution forecloses the judicial questioning of Members and staff about their consideration of legislation. The following resolution authorizes the Senate Legal Counsel to represent Mr. Summitt and to assert the privileges of the Senate.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 171) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 171

Whereas the case of *Donald M. Zahn* v. *National Right to Work Committee,* Civil Action No. 84-1223-A, is pending in the United States District Court for the Eastern District of Virginia;

Whereas Paul C. Sumimtt, a former member of the staff of the Committee on the Judiciary, has been served with a subpoena to appear and testify as a witness in that case;

Whereas by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas pursuant to sections 703(a) and 704(a)(2) of th Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(a) and 288c(a)(2) (1982), the Senate may direct the Senate Legal Counsel to defend a former employee of the Senate in any proceeding with respect to any subpoena or order directed to him in his former official capacity; Now, therefore be it

Resolved, That the Senate Legal Counsel is directed to defend Paul C. Summitt with respect to the subpoena served on him in the case of *Donald M. Zahn* v. *National Right to Work Committee,* Civil Action No. 84-1223-A, in the Eastern District of Virginia:

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE SESSION

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate go into executive session to consider Executive Calendar Order No. 185, D. Lowell Jensen, of Virginia, to be Deputy Attorney General.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF JUSTICE

The legislative clerk read the nomination of D. Lowell Jensen, of Virginia, to be Deputy Attorney General.

Mr. DOLE. Mr. President, I am pleased to rise in strong support of D. Lowell Jensen to be Deputy Attorney General of the United States.

Attorney General Meese could not have made a better choice for his second in command than Lowell Jensen. After 4 years with the Justice Department, Lowell has established himself as a skilled administrator, tough, yet fair, law enforcement official, as well as a responsible, honest individual who enjoys an excellent working relationship with Congress. During Lowell's tenure at the Justice Department, the effectiveness of DOJ's criminal law enforcement activities has improved demonstrably. Further, thanks in no small part to Lowell's contributions, last year we were able to pass one of the most comprehensive pieces of criminal reform legislation in recent history.

Lowell Jensen's confirmation as Deputy Attorney General marks one more step in his highly successful career in law enforcement. After receiving a law degree from the University of California and serving 2 years in the Army, Lowell became an assistant district attorney in Alameda County in 1954. In 1970, he became Alameda's district attorney and served in that capacity until 1981, when he joined the Reagan administration. The President first appointed him to be the assistant attorney general for the criminal division and then, to be associate attorney general. His outstanding work during this 4-year period won him another promotion to be the second highest law enforcement official in the Nation.

Mr. President, as a former member of the Senate Judiciary Committee, I have had the opportunity to work with Lowell on a number of occasions. I have always found him to be helpful, cooperative, and informed. Let me

51-059 O - 87 - 47 (Pt.9)

extend my warmest congratulations to him on his new job. I look forward to working with him during the second Reagan term.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR TUESDAY

ORDER FOR RECESS UNTIL 9 A.M.

Mr. SIMPSON. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 9 a.m. on Tuesday, May 21.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF CERTAIN SENATORS

Mr. SIMPSON. Mr. President, I ask unanimous consent that, following the recognition of the two leaders under the standing order on Tuesday, there be special orders in favor of the following Senators for not to exceed 15 minutes each: Senators PROXMIRE, McCONNELL, and PRESSLER.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. SIMPSON. Mr. President, following the special orders just identified, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond the hour of 10 a.m. with statements limited therein to 5 minutes each if time permits.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Then, Mr. President, following the routine morning business, the Senate will resume consideration of S. 1160, the Department of Defense authorization bill. Pending before the body will be the Hart amendment relating to MX procurement. There will be a rollcall vote anticipated on that amendment, possible before noon.

ORDER FOR RECESS BETWEEN 12 NOON AND 2 P.M.

Mr. President, I further ask unanimous consent that the Senate stand in recess between the hours of 12 noon and 2 p.m. on Tuesday, May 21.

The PRESIDING OFFICER. Is there objection,

Mr. BYRD. Mr. President, reserving the right to object, and I will not object, as I understand the distinguished assistant Republican leader, the unanimous-consent request pertains only to the standing in recess of the Senate on tomorrow afternoon between the hours of 12 noon and 2 p.m.

Mr. SIMPSON. Mr. President, that is correct. That does not in any way reflect upon the possibility of procedures with the Hart amendment.

Mr. BYRD. I thank the distinguished majority whip.

Mr. SIMPSON. Our leader has indicated that we will have late-night votes expected during Tuesday's session.

I inquire of the Democratic leader if he has further business.

Mr. BYRD. Mr. President, I thank the distinguished assistant majority leader.

RECESS UNTIL 9 A.M. TOMORROW

Mr. SIMPSON. Mr. President, I move, in accordance with the order just entered, that the Senate stand in recess until 9 a.m. tomorrow.

Thereupon, at 7:04 p.m., the Senate recessed until tomorrow, Tuesday, May 21, 1985, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate May 20, 1985:

DEPARTMENT OF STATE

Frampton, Charles Horton
Lake, Jack Frank

CONFIRMATION

Executive nomination confirmed by the Senate May 20, 1985:

DEPARTMENT OF JUSTICE

D. Lowell Jensen, of Virginia, to be Deputy Attorney General.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

CUOMO COMMENTS ON BISHOPS' LETTER ON ECONOMY

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. LaFALCE. Mr. Speaker, on April 16, 1985, the Honorable Mario M. Cuomo, Governor of New York, received an honorary degree from St. Peter's College, Jersey City, NJ. He addressed the students, faculty, and friends of the college on that occasion. His talk, "'In Praise of Folly' the Bishops' Draft Pastoral and Its Critics: Some Observations," has, in his words, "* * * jolted all of us out of some easy assumptions about our national economic life and forced us to look beyond our relative security and ease."

I call this to the attention of my colleagues, in the hope that the Governor's comments may be helpful, independent of political, or religious beliefs.

The text of his talk follows:

"IN PRAISE OF FOLLY" THE BISHOPS' DRAFT PASTORAL AND ITS CRITICS: SOME OBSERVATIONS

Thank you for the honor you've bestowed on me today.

It's always a privilege to be awarded an honorary degree but it's especially so when it comes from an institution like St. Peter's, an institution under that remarkable group of teachers and scholars, the Society of Jesus.

I was educated by another superb order, the Vincentians. But the Vincentians often spoke to us about the Jesuits.

I remember one old Vincentian in particular, Father Murphy, who told us about a cousin of his who'd been educated at St. John's and then went to study with the Jesuits and teach at Fordham.

Father Murphy used to shake his head mournfully when he talked about his cousin. "Yes," he'd say, "my cousin was educated at St. John's. But then he left the church * * * and joined the Jesuits."

Father Murphy notwithstanding, "I've always stood in awe of the learning and intelligence and dedication of Loyola's followers, especially their skills as orators and debaters.

As a matter of fact, when Father Glynn extended his invitation to me to be a part of this series here at St. Peter's, I mentioned it to a Jesuit friend of mine.

I asked this Jesuit for some tips on how to frame my remarks.

"Mario," he said, "just remember the secret of a typical Jesuit speech—make it tight, polished, eloquent, humorous, persuasive: Deliver it with pose and assurance and conviction * * * and be sure it's totally devoid of facts."

As well as being honored to be here at St. Peter's, I'm also delighted to be in Jersey City.

Ed Flynn, the onetime Democratic leader of the Bronx, once described Jersey City's fame this way: "Jersey City is to politics," Flynn said, "What Rome is to religion."

The fact is that the analogy Ed Flynn used in comparing Rome and Jersey City had its own germ of truth. The political machines of Jersey City and New York and Boston and Albany—of America's old industrial cities—had a lot in common with the church in those days.

They were both predominantly immigrant institutions.

Both the party ranks and what used to be called the church militant enlisted good soldiers—men and women of unquestioning loyalty to an organization—be it the party or the church—that was always there when they needed it. That protected them and made sure they always had a job and enough to eat, that baptized them and taught them and married them and ordained them and sent them to their eternal rest.

Their leaders possessed great power.

In the party, never wrong.

In the church, they were infallible.

A lot has changed. First in politics and then—especially in the time since Vatican II—in the church.

It's harder today, I think, to be a bishop or a politician. Both appear to have lost the old power to command blind obedience.

Nobody knows that better than archbishop Weakland and his fellow bishops after seeing the reaction of some of their flock to the first draft of their pastoral letter on the U.S. economy.

The public response to that draft reminds me of a story I heard some time ago from a priest in Queens. It concerns the namesake of this college, St. Peter, the leader of the Apostles and the first Pope.

It seems that on the morning of Easter, Mary Magdalene came running up to Peter, and flushed with excitement, she said, "Peter, I have tremendous news, only it comes in two parts—good news and bad news."

"Okay," Peter said, "First give me the good news."

"We've been to the Lord's tomb, Peter. He's not there. He's risen from the dead and appeared to us on the road."

"Hallelujah!" Peter said. "But what's the bad news?"

"The bad news is he wants to talk to you about Friday."

Well, there's good news and bad news about the bishops' pastoral on the American economy.

The good news is that the bishops' draft has not been ignored. It's being dissected and analyzed and discussed in journals and in forums like this one all over the country.

It has jolted all of us out of some easy assumptions about our national economic life and forced us to look beyond our own relative security and ease.

At a time when selfishness is being sanctified as a prerequisite for economic progress, when compassion is being derided as weakness and the doctrines of Malthus are far more popular than those of St. Francis, the bishops remind us of the special obligation to the poor that we take on when we describe ourselves as Catholics.

It's not good enough, they're telling us, to let the practice of our faith remain nothing more than ritual and romance. We have an obligation to bring what we believe to bear on the mundane activities of our day-to-day lives, a duty not just to put up with the world but to live in it, to love it, to re-create it.

The bishops have reminded us of the truth that the great Jesuit Teilhard de Chardin stressed so magnificently in his wonderful book "The Divine Milieu," which he dedicated to "Those who love the world."

They have called us to God's work in this bleeding, broken, imperfect world of ours, reminded us that our faith doesn't end at the communion rail, that it must extend into the mean streets of Jersey City and New York and Chicago—anywhere where our brothers and sisters go without work or enough to eat, some without even a roof over their heads.

If they did nothing else in their letter, this alone should earn our gratitude * * * that they reminded us of what it means to be a Christian.

That's the good news.

The bad news is that instead of the emerging consensus among Catholics the bishops had hoped for, there's been a chorus of castigation condemning some of what they have written.

Even before the bishop's draft was released, a group of Catholic lay men and women, who call themselves political conservatives, issued their own letter on the economy.

The lay letter was offered as a refutation of what the bishops wrote. And yet the two letters agreed on a number of major predicates.

They agreed on the moral dimension of our national economic life.

As I pointed out in an article I wrote for America, both documents agree that the state, the free market, trade—the ingredients of economic activity—exist to serve the people, not the other way around.

Both praise unions.

Both look on the profit motive as a central element in economic development.

Both insist on the Catholic principle of subsidiarity, on strengthening the family. On empowering the poor.

Both reject the "trickle-down" theory of economic development.

Despite this agreement, much of the criticism of the bishops' draft by individual members of the lay commission might lead a disinterested observer to believe that there is no agreement among Catholics about economics or about the economy's bearing on the social problems we all admit exist.

An article recently written by former Secretary of the Treasury William Simon, who was chairman of the group that issued the lay letter, is illustrative.

The article, entitled "The Bishops' Folly," appeared in National Review, a journal whose editor—William Buckley, Jr.—in a memorable act of dissent, once wrote that Pope John XXII's encyclical Mater et Magistra was—in his words—" "a venture in triviality."

William Simon continues the tradition.

Consider for a moment what he labels "The Bishops' Folly."

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Simon says the bishops make a "gigantic leap * * * from the time-honored social teaching of the church to the conclusion that our American economic system is in conflict with what the bishops believe to be morally acceptable."

I don't think there's any doubt that a broad condemnation of our entire traditional economic system as "morally unacceptable" would be widely rejected by Catholics, many of whom have benefited immensely from that economic system.

I'd be among them.

So would millions of other people like myself whose parents came to this country because it offered opportunity and hope, because it gave them the chance to work and by working to give their children opportunities they never had themselves—the chance to go to schools like St. Peter's or St. John's, to become doctors, and lawyers and professors, to take their place among the leaders of industry of Government or any field of endeavor they chose.

Millions of us think of our economic system as the key to our prosperity and are grateful * * * and supportive.

But the fact is Simon has created a straw-man—they're usually much easier opponents.

The bishops never anathematized our entire economic system as immoral.

Their language is strong. There's no question about that, but nowhere do they issue a wholesale condemnation of the free-enterprise economic system.

They point out forcefully, in a way unlikely to be ignored, that there are still many—millions in fact—who do not share the benefits our economy provides most of us. Nine million more poor people than there were just four years ago. More homeless than at any time since the Great Depression. More hungry. More children doomed from birth to a world of poverty and violence and social pathology.

The lay commission does not deny this.

Can any of us deny it?

Can we look around this city—or any city—and deny what we see? Can we ignore the reality that confronts us in newspapers and on T.V., in our hospitals and prisons and streets? Can we refuse to accept the fact that grinding poverty exists side-by-side with great affluence?

And if we don't deny it, can we excuse ourselves from trying to improve the system by dismissing such efforts as impractical * * * as folly?

Is it not a legitimate moral concern when, in the wealthiest country in the history of the universe, millions of people—mostly children and their mothers—subsist on the crumbs from our table?

Of course, it is. Of course, the bishops are right in pointing out the failures of the system. They are doing nothing more than applying and building upon the entire modern tradition of Catholic social teaching.

We should be accurate about that tradition. It makes clear what my philosophy teacher at St. John's used to call the desideratum—that is, the essential body of objectives that we as Catholics should be striving to reach. But it does not oblige us under the pain of sin to accept any particular recipe for economic reform as the only intelligent or moral solution.

On economics as on nuclear weapons and on other questions, Catholics are not bound to accept every detail of pastoral letters, or even encyclicals. Particularly when the bishops move beyond the dictates of moral law to the question or practical political policies, there is room for differences of opinion and honest debate.

In this draft, the bishops are careful to emphasize that point, repeatedly.

In one place they write this: "The effectiveness of our prudential judgments in this area will depend not only on the moral force of our principles but also on the empirical accuracy of our information and our assumptions."

For that reason, they also write: "We expect and welcome debate on these proposals and believe it will be beneficial if it is conducted with mutual respect."

Unfortunately, in much of the debate so far mutual respect has been a scarce commodity.

Again, look at the William Simon article.

In it, he questions not only the bishops' conclusions but their very capacity to speak at all, pointing out in a formidable display of snideness that the five bishops have graduate degrees, respectively, in canon law, modern languages, philosophy, divinity, and piano.

This is a little like saying that we shouldn't take the new testament too seriously because instead of being written by theologians, it was written by fishermen, a tax collector, a doctor and a tent maker.

By this logic, the bishops would presumably be prevented from speaking about abortion because they aren't women nor physicians; or about the nuclear arms race because they're neither physicists nor generals.

And they're not the only ones who'd be restricted. Earlier this month, myself and the legislative leaders in New York agreed on a 39 billion dollar budget. Not many of us have college degrees in economics.

The point, I think, is clear.

If we must leave the economy to the economists, then there aren't going to be many people in the debate.

There are other criticisms, many of them accusing the bishops of ignoring history and embracing the so-called "failed policies of the past," accusing them of believing that Government can help improve the condition of people's lives, that we don't have to leave the least among us to the mercies of a free market.

But if anyone is ignorant of the past, it's those critics who fail to acknowledge the reasons for the success of the American economy.

That success didn't just happen. It wasn't inevitable. It wasn't just the happy result of rugged individualism. It wasn't even produced solely by the concededly heroic efforts of the waves of immigrants who pushed back the wilderness, who bridged the rivers and raised the skyscrapers, who earned their success with their sweat—sometimes with their blood.

Government had a role. An important one. From the very beginning, Government acted to make life better for our people. It provided land for homesteaders, for railroads, for private colleges.

In my lifetime, and in Bill Simon's, Government helped bring our Nation out of a shattering depression. Eventually, it provided us with unemployment insurance, health care, Social Security, loans for colleges, for homes, for businesses. Government helped an entire generation—people like myself—lift themselves to comfort and even affluence.

And it did more. It broke down the walls of legal segregation that made us two nations, separate and unequal. It helped make our society freer, fairer, more just.

Nothing in Bill Simon's words—or in the Gospel of Orthodox supply siders—can obscure this simple historic truth.

And without suggesting that we must replicate exactly every program tried in the past, isn't it just commonsense to recognize the great contribution Government made—and can still make—to the future of this country?

The bishops do.

So far, I've mentioned only the criticism that says the bishops went too far, that they were too radical. But there's been criticism as well from the other side, criticism that they don't go far enough.

Father Andrew Greeley has taken the bishops to task on a half dozen of their concrete suggestions. He does not wish, he writes, to "be identified with the nervous neighings of such critics as neocapitalist Michael Novak," the vice chairman of the lay commission. But in calling the draft "little more than a rehash of the party-line liberal, conventional wisdom of five to fifteen years ago," Greeley seems to agree with Novak and with William Simon.

His most fundamental objection, however, is that the pastoral is not Catholic enough, not radical enough because it ignores what he calls "the centralization of monopoly power in American industry."

"A critic sensitized to the classic Catholic Social theory," Greeley says, "Would writhe in horror at the mergers, acquisitions and corporation buyouts that have become a commonplace of American business life and that are devoid of social utility. * * *"

In education and Government, too, Father Greeley sees gross violations of the principle of subsidiarity. The result is bureaucracies that are unable to respond to the root causes of unemployment and poverty.

Because the pastoral does not address this most fundamental problem of the American economy, it is, in Greeley's words, "an inept and inadequate document."

To be honest, I have my own reservations about parts of the draft pastoral.

While I agree with the bishops that national eligibility standards for welfare and a national minimum benefit level are desirable, I don't believe they are achievable—at least not while the Federal deficit is running at $200 billion a year.

Along with the bishops, I believe Government has a role in putting people to work. But the bishops focus almost exclusively on public-sector jobs. I think we have to concentrate on investments that train people to work in the private sector.

We simply can't build a growing economy on the public-sector payroll.

I also don't see what's wrong with requiring able-bodied people who are on welfare to work or to train for a job. Wherever possible, the object of our public assistance programs should be to equip people with the skills they need to stand on their own.

Despite these reservations, I cannot agree with William Simon when he says that the bishops' thrust is that "a free economic system cannot be compatible with Christian doctrine," nor with Father Greeley when he calls the draft "inept and inadequate."

This document might not contain the neo conservative economic orthodoxy that Simon would like, nor a sweeping, radical plan for the achievement of an "organic society," which Greeley sees as a proper goal of Catholic Social teaching. It might, in part, be impractical from the perspective of Governors like myself who have to build broad consensus before we get our budgets passed.

There are honest disagreements with particulars, and all the criticisms should be carefully examined and evaluated.

I believe they will be; the bishops never claimed to have received stone tablets from Mount Sinai.

But none of the considerable disagreement about what the bishops call their "policy applications" should draw attention away from the enormous contribution the document makes by advancing a single proposition that I believe is unarguably right and should remain the basis for any amendments.

The proposition is this: There is more poverty—more economic suffering—in this country than there has to be. We shouldn't resign ourselves, the bishops are telling us, to so-called "iron laws" of economics that would confirm a few in their riches and condemn millions of others to ghettos and unemployment offices and welfare lines.

Remove all the particulars and there's one central theme of the pastoral—the preferential option for the poor.

At bottom, that's the important contribution this document can make. It tells us that it's not possible to call yourself Catholic and ignore the poor, that a preferential option for the rich, no matter how respectable it might become in our society, is simply not reconcilable with Catholic tradition.

It's important to keep that idea in the forefront.

And if the bishops' practical "policy applications" distract people from that central thought, then perhaps it would be wise, as several commentators have suggested, to issue the final version as two separate documents, one containing biblical and theological foundations, the other offering policy applications.

In such a format, the document might eventually have greater pastoral impact.

It might convince more of us—students and politicians and economists and employers and the whole enormous and influential body of Catholic lay and clerical men and women—to recall the obligations our faith imposes on us.

We should be grateful to the bishops for reminding us of that obligation. We should understand how important it is for those of us fortunate enough to live in "a shining city on a hill" to remember that ours is really "a tale of two cities."

* * * * *

The bishops aren't asking that we seek perfection. They know the imperfection that is built into our human natures. They don't propose a collectivist society along Marxist lines or even along the lines described in the reading last Sunday from the Acts of the Apostles, where, we're told, "no one said that any of the things he possessed was his own, but they had everything in common."

The bishops aren't looking for the road to Utopia. They aren't asking us to write the beatitudes into our legislative agendas or our political platforms.

They know the poor we will have with us always. But they believe the poor don't have to be with us in quite the number they are now, with those numbers growing every year.

The bishops believe we can come closer—much closer—millions of lives closer—to the desideratum, as long as we continue to remember what the desideratum is.

They speak to all Americans but especially to those of us who call ourselves Catholics. They challenge us to help the country of which we are so proudly a part to find better ways to express the compassion that is at the heart of our heritage.

They ask us not to lower our aspirations. Not to accept as fate what we once believed it was in our power to change.

The pastoral calls us to God's work in this world. It testifies prophetically to the great good that we are capable of as a people, to our own part in the unfolding of the work of creation.

It is hopeful, uplifting, confident about our potential for doing good.

The vision it embodies is an ancient one.

The prophets saw it. And the apostles.

Generations of believers have struggled to bring it closer to our world, "to renew the face of the earth" through justice and mercy and love.

But perhaps no one has described that vision as magnificently as Teilhard. "The day will come," he wrote, "When after harnessing the ether, the winds, the tides, gravitation, we shall harness for God the energies of love. And on that day, for the second time in the history of the world, man will have discovered fire."

The bishops ask us to work toward that day.

Thank you.●

SIXTH ANNUAL SPRING PREMIERE AWARDS BANQUET HONORS OUTSTANDING JOHNSTOWN AREA CITIZENS

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. MURTHA. Mr. Speaker, it has been my pleasure to enter into the CONGRESSIONAL RECORD the annual list of organizations and individuals honored by the Black United Service Clubs of Johnstown.

The Sixth Annual Spring Premiere Awards Banquet will take place this year on May 26. This banquet has become an annual hallmark in recognizing citizens and organizations who have contributed to improving economic and social living conditions in the Johnstown area, promoting the human spirit, and adding to our national effort toward racial harmony.

The strength of America rests not with its Government, but with the spirit and dedication of its people, and with the American traditions that make us the greatest Nation in the world.

These are individuals who in their own way, with their own commitment and their personal efforts contribute to the great American tradition, and it is a pleasure to insert the following names to recognize the individuals being honored at this year's awards banquet.

LIST OF BLACK CHURCHES AND PASTORS

Pleasant Hill Baptist Church, Rev. Andrew W. Tilly, D.D.

Mt. Sinai Baptist Church, Rev. Joseph Harkless.

St. James Missionary Baptist Church, Rev. Dr. A.K. Surrett.

Jefferson Memorial F.B. Church, Rev. Joseph McGauley, M.G.

Pilgrim Church of God and Christ, Elder Crawford Spence.

Shiloh Baptist Church, Rev. Wylie Seals.

Cambria A.M.E. Zion Church, Rev. Edward Hill, M. Div.

Trinity Asbury United Methodist Church, Rev. Ronald Spence.

Bethel A.M.E. Church, Rev. Wallace J. Dickey.

Undenominational House of God, The Right Reverend Charlie March.

LIST OF BLACK ORGANIZATIONS

Conemaugh Valley Lodge No. 10, F.&A.M., P.H.A., Rev. Charlie March, Worshipful Master.

The Johnstown Branch NAACP, Thomas Smith, Jr., President.

Coke Plant Auxiliary, Mary Thomas, President.

First Cambria A.M.E. Zion Church, Modern Wives Club, Norma Sitton, President.

Flood City Lodge No. 71, I.B.P.O.E. of W., David Simms, Exhalted Ruler.

VFW, James Triplin, Commander.

Cambria Lodge No. 64 A.F.&A.M., Robert Goodman, Worshipful Master.

Greater Johnstown Affirmative Action Council, Allen P. Andrews, Executive Director.

Conemaugh Chapter No. 55, O.E.S., P.H.A., Pam Nash, Worthy Matron.

Conemaugh-Franklin Coke Plant Club, Edgar Thomas, President.

NAACP Women's Auxiliary, Dorothy Thomas, President.

Golden Star Chapter No. 79, O.E.S. A.F.&A.M., Helen Moore, Worthy Matron.

Mecca Temple No. 294, I.B.P.O.E. of W., Charlene Carr, Daughter Ruler.

Golden Leaf Club, Charles Simon, President.

NAACP Youth Council, Sandra Cashaw, Youth Advisor.●

THE TRACKLESS TANGLE OF INFLATION AT THE PENTAGON

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. ASPIN. Mr. Speaker, last week, I pointed out that the defense budget is not just a collection of defense issues—weapons, end strengths, operating tempos; it is also packed with economic issues—economic assumptions, economic policies, economic consequences.

Last week, I discussed how the Pentagon's spending rates had slowed. This week, I would like to explore another economic issue lurking in the defense budget. I would like to discuss today how the Defense Department has accommodated inflation—or, more accurately, how over 4 years we have appropriated some $18 billion, and perhaps as much as $50 billion, to accommodate inflation that never materialized.

HOW INFLATION IS CALCULATED

I must first explain how the Pentagon estimates the funds it seeks each year to offset inflation in the budget it submits to the Congress.

Every Government agency has to fold the administration's forecast of future inflation into its budget numbers, but the way the Pentagon does that is unique; it uses four different rates for four discrete segments of its budget.

First, for its military and civilian payrolls, which account for about one-third of the defense budget, the inflation estimate is simple. It's just the pay increase in that year's budget. Every pay raise is simply assumed to be the result of inflation.

Second, for major weapon systems, the planes, ships, tanks, and missiles that account for about one-quarter of the defense budget, the Pentagon since 1983 has multiplied the inflation rate estimated in the President's budget for the entire economy by 1.3. Thus, the administration provides for 30 percent more inflation in its major weapons than it expects in the economy as a whole.

Third, for most of the rest of the budget, such as operations and maintenance, research and development, and "other" procurement, accounting for about 40 percent of the total defense budget, the Pentagon uses the projected economywide inflation rate—with no multiplier.

Fourth, for purchases of fuel, the Pentagon uses a special index devised some years ago solely for fuel.

PROBLEMS WITH THE CALCULATION

There are two problems with these calculations. One is the projection of the economywide inflation rate, and the other is the unique multiplier used by the Defense Department for one-quarter of its budget.

Obviously, a key factor is what the administration assumes the economywide inflation rate will be. The budget is printed 8 months before the fiscal year begins and 20 months before the fiscal year ends—before we know what the inflation rate actually is. The lengthy and involved budget process is actually well under way more than 3 years before the fiscal year ends. If the projections are off by only a tenth or two of a point, it doesn't matter too much. But, unfortunately, that has not been the history of our inflation projections.

Most projections contain errors that tend to offset one another over time. The estimates may be too low in some years and too high in others, but these errors should cancel one another out in large measure. That has not been the history of these projections either, however.

As it turns out, the Reagan administration's projected inflation rates have been consistently higher than the actual rates in every year—and by a lot more than a tenth of a point or two.

FIGURE 1.—ECONOMY-WIDE INFLATION

[In percent]

	Fiscal year 1982	Fiscal year 1983	Fiscal year 1984	Fiscal year 1985
Forecast [1]	8.7	6.5	5.3	4.9
Actual	7.2	3.9	3.8	[2] 3.6
Error	+1.5	+2.6	+1.5	+1.3

[1] As shown in the President's budget submission for the indicated fiscal year.
[2] Latest projection for fiscal year 1985, which is now half-finished.

As figure 1 shows, the administration has consistently overestimated inflation by a substantial amount—averaging about 1.7 percentage points. That's not small potatoes; 1.7 percent of the Defense budget is now about $5 billion annually, and the errors compound with time.

But this is by no means the only source of error. The decision to apply a multiplier for major weapon programs beginning in 1983 may have been well-intentioned, but the 1.3 figure could be right only by sheer luck. It's not that it was plucked out of thin air or chosen simply as a sneaky way to pad the budget. The decision to use the 1.3 multiplier was based on recent history at that time. The actual inflation rate for weapon systems—as calculated by the Department of Commerce, not the Department of Defense—had run about 40 percent above the actual economywide inflation from 1979 through 1981.

Furthermore, since 1981, inflation in weapon systems has risen even higher than 1.3 times the economywide inflation rate—apparently confirming the decision to use some multiplier, if not 1.3.

What is the problem then?

The problem is painfully obvious if you look at figure 2, which shows the history of actual inflation in major weapons compared to actual inflation in the economy as a whole. The ratio hasn't just plugged along at 1.3; it's been all over the lot—from a high of plus 4.5 to a low of minus 1.8. And it's hard to demonstrate that plus 1.3 is even a reasonable average because it all depends on when you start counting. If you happen to start in 1965—or any year between 1971 and 1975—and end with 1984—our last actual data—you do indeed get the 1.3 figure. But if you start in some other year, you can get any figure you want between 1.1 and 2.1, except 1.8.

But even if there were some valid long-term average, using it to estimate how much to allow for inflation would inevitably—except by sheer accident—give you the wrong answer for any particular year because the actual ratio jumps around so much. Thus, it's virtually certain that we've allowed the wrong amount for inflation most years.

Looking at the actual numbers, it looks as if the 1.3 multiplier has been too low for the past 4 years. But because the projections of inflation in the economy as whole—as shown in figure 1—have been too high, the two errors have combined to put us roughly on target—by dumb luck.

Even that may not be right, however, because the actual inflation numbers for weapons are off. The calculation suffers from double-counting, which stems from the difficulty in distinguishing between the effects of inflation and the effects of production rates and learning curves. Let me explain.

FIGURE 2.—*Ratio of Major Weapons, Inflation to Economy-wide Inflation*

1946	1.04
1947	.28

1983	2.23
1984	1.87

Source: Department of Defense. (DOD provides more conservative inflation rates than did the Commerce Department's earlier study that is referred to in the text.)

Take production rates: If a company is to build half as many aircraft this year as the year before, the unit cost will rise as the same burden of overhead costs is piled on half as many aircraft. Of course, the opposite occurs when production accelerates.

As for the other factor, learning curves, when a company switches from building an old aircraft to building a new one, production workers who had gradually learned over the years how to build the old aircraft efficiently have to start the learning process all over again, and costs rise. On the other hand, of course, costs will fall in later years of production.

The analysts of defense inflation at the Department of Commerce ruled that costs resulting from production

cutbacks and from the starting end of the learning curve were inflation. The hooker is that when a production run is slowed down or a new production line opened, more money is routinely pumped into the budget to account for the higher per-unit costs. In other words, we are providing the money needed to cover higher unit costs twice—once through the 1.3 multiplier, and again through the Pentagon budget process. It's double-counting.

Of course, if there have been few new starts, there would be little double-counting. Conventional wisdom holds that the Reagan administration has introduced few new weapon systems and simply accelerated the production of weapons already in the Carter program. It is true that the Reagan program is essentially an acceleration of the Carter program. But the Carter program contained a horde of weapons in R&D that entered production in the early 1980's. In fact, in the Reagan years, more than one-third of all the money going into major weapons is going to produce the first 200 copies of those weapons. In other words, one-third of the money is going into programs on the low end of the learning curve—precisely where the double-counting problem is serious.

THE SCALE OF THE ERROR

The amount of money the 1.3 multiplier swings around can be staggering. For example, if the 30-percent add-on is all double-counting, then from fiscal year 1983 through fiscal year 1985, we have appropriated an unnecessary $30 billion for major weapons. Whether that immense figure is right or not, we cannot be sure. But we can be sure that with that much money at stake, we simply have to have a much better way of coping with inflation.

As for the nonpay and non-major-weapons account—the third item I referred to at the beginning—the amount of overfunding is much clearer. If we had projected inflation accurately for the period of fiscal year 1982 through fiscal year 1985, the appropriations for those accounts should have been $18.2 billion lower—5 percent of the total.

We're talking about needless appropriations totaling no less than $18 billion, and possibly on the order of $50 billion. That's astounding in two respects: It's astounding that we should be so uncertain about how we throw the taxpayers' money around, and its astounding how much money is involved.

These sums dwarf the $7.7 billion that the President says we could save by terminating 18 Federal programs, including Amtrak support, the Job Corps, the Small Business Administration, postal subsidies, rural electrification, Urban Development Action grants, among others.

They dwarf the $5.6 billion we could save by eliminating Social Security COLA's.

They dwarf the $8.2 billion we would save by eliminating all Federal COLA's.

To paraphrase the late Senator Everett Dirksen, this is real money we're talking about.

WHERE HAS THE DIVIDEND GONE?

All of this leaves one very large and very obvious question remaining to be answered: Where's all that money gone?

I can't give you all the answers. I can't give you a bank account number. I can't point to Caspar Weinberger's mattress. But in rummaging through the various Pentagon data banks, I have come up with some circumstantial evidence pointing to some possible rocks under which the inflation dividend may be hidden. Four rocks, to be precise.

The first rock is what the green-eyeshade types call "unexpended balances." That is the money Congress has appropriated for the Defense Department that the Defense Department has not actually spent. Since 1983, the Pentagon has consistently been unable to spend its appropriated funds as fast as it has said it would. The total backlog of "unobligated" balances—that is, appropriations the Pentagon has not only not spent, but not even put under contract—doubled from 1981 to 1984. The volume of expiring appropiations—that is, appropriations that die because the Pentagon has not put the funds under contract within the legally allowable period—quadrupled from 1981 to 1984.

The second rock is the defense industry. There are indications that defense contractors have benefited because more money than was needed to cover inflation was available for their programs. If a contractor is paid moneys for inflation that never occurs, those moneys should logically show up as higher profits. The profit records for major defense contractors listed in figure 3 indicated that the defense industry is now enjoying a bonanza of profits.

As the table shows, only 1 of the 10 has seen its profit margin fall since 1981, while 6 of the 10 recorded their highest profit margins in 15 years during 1984.

FIGURE 3.—RETURN ON SALES OF 10 LARGEST PUBLICLY OWNED DEFENSE CONTRACTORS (ACCOUNTING FOR 34 PERCENT OF 1984 CONTRACT AWARDS)

[In percent]

Contractors	1981	1984	Highest year 1970–83
McDonnell Douglas	2.4	3.4	3.9
Rockwell International	4.1	5.6	4.8
General Dynamics	2.5	4.9	4.1
Lockheed	3.0	4.2	4.0
Boeing	4.8	7.6	6.4

FIGURE 3.—RETURN ON SALES OF 10 LARGEST PUBLICLY OWNED DEFENSE CONTRACTORS (ACCOUNTING FOR 34 PERCENT OF 1984 CONTRACT AWARDS)—Continued

[In percent]

Contractors	1981	1984	Highest year 1970–83
General Electric	6.1	8.2	7.6
United Technologies	3.3	4.0	3.7
Raytheon	5.7	5.7	5.8
Litton Industries	6.3	6.0	6.9
Grumman	1.1	4.2	5.0
Average return	3.9	5.4	5.2

The third rock is reprogramming; that is, the transfers of money between Pentagon programs. If the services enjoy an excess of cash, it is reasonable that they would shift that money from the programs where it is excess to other programs—for example, to develop new concepts now in the research stage, or to fund more field operations. Over the last few years, about $2.3 billion has been transferred out of major weapon programs and into other programs, particularly research and development, and operations and maintenance.

The fourth rock is right here on Capitol Hill. Part of the money that the Pentagon included to cover inflation was later deleted in the authorization and appropriation processes. Each year we look for funds previously appropriated but no longer needed.

WHAT'S TO BE DONE ABOUT IT?

So far, I've talked about the problems of calculating inflation, estimated the general scale of the resulting errors in dollars terms, and looked over some of the evidence—admittedly circumstantial, not conclusive—as to where those vast and vanishing sums may have ended up. The remaining question is what we should do about this in the future.

One alternative is to abolish the use of any multipliers, and require the Defense Department to stick with the economywide inflation rate forecast in the President's budget. That makes some sense because, first, the multiplier counts some inflation already accounted for in the budget process, and second, in the long run, defense inflation averages out close to economywide inflation. I acknowledge, however, that from a Pentagon planner's standpoint, "the long run" does not help him cover the cost of buying 1,000 gizmos next year if the inflation rate on gizmos next year is substantially higher than the economywide rate.

From the standpoint of immediate policy, it looks as if the current defense buildup is leveling off and that, as history demonstrates in figure 2, the immediate future should see major weapons inflation running lower than the economywide rate. Therefore, it

would make sense, not only from the standpoint of congressional budget cutters, but also from the standpoint of defense budget planners, to eliminate the mutiliplier, and possibly even to use a negative multiplier—that is, to give the Defense Department only 60 percent or 70 percent or 80 percent of the projected economywide inflation.

The problem with these ideas is that they still rely on guesswork about future inflation. Instead of an endless, hopeless quest for the right multiplier, instead of the inevitable imperfections in predicting inflation in the economy as a whole, instead of the trackless tangle of searching for missing money, we could move to an entirely different system that doesn't rely on guesswork.

So another alternative could be abolition of all allowances for predicted inflation. Instead, each contract for a major weapon could incorporate an explicit formula for offseting whatever inflation actually occurred in the preceding year. That formula might be based on some market basket of raw materials, wage rates in relevant sectors of the economy, energy price indexes—the Consumer Price Index, or whatever. But it would be an explicit and unarguable calculation whose ground rules would be understood in advance. Indeed, some weapon contracts already incorporate such formulas.

Then we could set up a revolving fund from which those payments would be drawn to compensate contractors for actual, rather than predicted, inflation.

All this would result in two very important improvements:

First, the inevitable errors in predicting inflation would result only in bookkeeping adjustments, not multibillion-dollar errors in appropriations; and

Second, all the funds paid out to offset inflation could be accounted for down to the last penny; how much was paid, when, and to what contractors for what weapon. No more trackless tangle of vast and vanishing funds.

This is not a new idea. For example, several years ago, we set up a foreign currency revolving fund. In years when the German mark soared, the services had taken a beating because they lacked enough funds to buy their needs on the German market. Conversely, when the dollar soared, the services enjoyed an unplanned dividend and had cash to blow. We resolved that problem with the foreign currency fund.

Unfortunately, such a solution for the 40 percent of the budget comprising operations and maintenance, research and development, and "other" procurement seems more problematical. With major weapon system contracts, it's easy to build explicit formulas for calculating payments to offset inflation. But it doesn't look quite as easy with these other accounts.

If we could predict inflation correctly, the current system would be fine, but we can't, and it isn't—to the same tune of that $18 billion to $50 billion. The future remains unpredictable—fortunately, for the spice of life, if not for the efficiency of budgeting. Let me point out here that I do not think, and am not suggesting, that the Reagan administration has used politically tinged projections. An early goal of the Reagan administration was to achieve drastic reductions in inflation. If there was any pressure to finagle the inflation projections, in this administration the pressure was to err on the side of optimism and produce very low projections. It is a sign of the administration's unexpected success that it did a far better job of lowering inflation that it ever promised the public.

It seems to me that what we need here is some system for making ex post facto adjustments in the Pentagon's budget accounts. When our estimates of future inflation turn out to be wrong—and they will turn out to be wrong—we need some credible and verifiable way to correct those past errors. Finding such a system might be quite a challenge, but we'd better find one since the taxpayers of this country have had enough—and more than enough—of sloppy management.

CONCLUSION

I do not want to pretend that the information I have laid out here today is all there is to know about this subject. I don't have all the answers. But the point I want to make crystal-clear is that there is something wrong with the way we handle inflation in the defense budget today.

It is wrong when the Pentagon can enjoy a secret dividend, regardless of whether it is $5 billion or $50 billion. It is also wrong when projections of inflation are erroneously low and the services are forced to cut corners—grounding aircraft to save fuel, shuffling accounts desperately, wasting energy by devoting efforts not to programs but to making numbers look right on a page.

I am not suggesting there has been any wrongdoing on the part of the Pentagon. I am not launching any vendetta against Secretary Weinberger. In fact, I have written the Defense Secretary outlining the statistics and the concerns I have expressed here today, and asked him to help me and the Committee on Armed Services sort out the facts, to locate more precisely the rocks under which the dividend is hidden, and to work with me in developing a rational and, I hope, permanent system for coping with the reality of inflation that all of us—in the executive and the legislative branches—can live with.●

A PRAGMATIC WORKFARE REQUIREMENT

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. SHUMWAY. Mr. Speaker, I have always been a strong advocate of the "workfare" concept because of my belief that society is better off when able-bodied people are productive. In fact, the complaint espoused by some workfare detractors that exchanging services for welfare benefits punishes people for being poor is sheer nonsense. Nonetheless, I also recognize that mandatory work programs can be impractical to implement, expensive to operate, and morally wrong if they are not intelligently structured and enthusiastically administered. For this reason, I have introduced legislation that targets a mandatory AFDC workfare requirement to primary wage earners in two-parent families only.

This narrow remedy will reaffirm the work ethic in general, enhance individual client's self-esteem and/or improve job skills through training, bring about a corresponding reduction in long-term welfare dependency, provide useful services that State and local governments could not otherwise pay for, help to restore public confidence in the safety net, establish the parent as a working role model for children, and promote the original purpose of AFDC which was to strengthen families.

This proposal will not apply to families headed by single parents, usually young mothers, who should not be forced to choose between working and leaving children at home to care for themselves—or in expensive and sometimes inadequate child care facilities. After all, Congress should certainly not encourage policies that would probably create more "latch key" children, unsupervised kids who all too often become juvenile delinquents and truants. In addition, finding meaningful temporary jobs for single parents is no easy task.

Again, the measure I am introducing limits the workfare requirement to those States which provide AFDC-U coverage to families where both parents are present. The primary breadwinners in these families generally have prior work experience and are likely to detest reliance upon the public dole. This existing sense of dignity and attachment to the labor force, combined with the relative scarcity of two-parent AFDC-U families, will make this effort more manageable, and thus attractive, to those charged with workfare program supervision.

Failure of the head of household to participate in the program will not un-

fairly eliminate the family's AFDC grant, though compliance will be encouraged by excluding nonparticipants from the family's actual grant calculation. Furthermore, job placements must meet the protections presently contained in section 409(a) of the Social Security Act as well as applicable health and safety standards. Programs will not displace current workers. As provided by current law, States would retain their right to establish broader workfare requirements if they so desired.

I encourage my colleagues to support this narrowly crafted workfare initiative, a responsible approach that has proven its efficacy in various State demonstrations.

The text of the bill follows:

H.R. 2549

A bill to amend title IV of the Social Security Act to provide that States which provide aid to dependent children of unemployed parents must require the unemployed parent to participate in a community work experience program

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 407(b)(2) of the Social Security Act is amended—

(1) by striking out "and" at the end of subparagraph (C);

(2) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new subparagraph:

"(E) that the parent described in paragraph (1)(A) participate in a community work experience program in accordance with section 409.".

(b) Section 409(a)(1) of such Act is amended by inserting after the first sentence the following new sentence: "If a State provides aid to dependent children of unemployed parents in accordance with section 407, such State must establish a community work experience program in accordance with this section for, at a minimum, those unemployed parents described in section 407(b)(1)(A).".

SEC. 2. (a) Except as provided in subsection (b), the amendments made by the first section of this Act shall be effective with respect to payments under part A of title IV of the Social Security Act for calendar quarters beginning more than 180 days after the date of the enactment of this Act.

(b) In the case of a State plan approved under part A of title IV of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation in order for the plan to meet the additional requirements imposed by the amendments made by the first section of this Act, the State plan shall not be regarded as failing to comply with the requirements of such part solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act.●

MAKE ALTERNATIVE WORK SCHEDULES PERMANENT

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. MATSUI. Mr. Speaker, today I rise to voice my strong support for H.R. 1534, which would permanently reauthorize the Federal Employees Flexible and Compressed Work Schedules Act.

The use of both flexible and compressed work schedules have been a boon to the Federal worker, the Federal Government and the taxpayer. Employees, being better able to control their time and plan their personal lives, spend their workday bothered by fewer distractions. This encourages a better employee attitude and a better working environment. Families are able to spend more time together at home. Flexible and compressed work schedules prevent the tragedies that can befall latchkey children. Parents can coordinate their schedules to allow one to be at home before children leave for school and the other to be home at the end of the school day.

Personal errands, which often seem to conflict with job requirements or reduce an employee's annual leave, are much less cause for concern. Car repairs, banking, doctor's appointments and the like can be taken care of on a day off by workers on a compressed schedule, or before the beginning or at the end of the day by workers on a flexible schedule.

Some flexible schedules are designed to allow workers a grace period at the beginning of the day. The employee who is detained at home or caught in traffic is allowed to make up that time at the end of the day. The grace period serves to preserve leave time for the employee, decreases tardiness and assures the Government a full day of work from each worker.

AWS was initiated as an experimental program in 1978. While potential benefits seemed clear, Members overriding concern was whether the primary mission of the Government, providing service to the American public, would be compromised. The Office of Personnel Management has monitored these effects of the program. Three years later, their results indicated that properly managed AWS programs threaten neither management prerogatives nor the taxpayers' right to superior service.

By 1982, when the program was scheduled to expire, extensive inquiry showed that the AWS was a success. Over 325,000 workers in 1,500 organizations were using some form of flexible schedule; 30 to 35 percent of the organizations involved felt the use of AWS had increased productivity within their organizations; 50 to 60 percent felt there had been no change in productivity. This compares with only 10 percent which felt there had been a decrease in efficiency. In light of this overwhelmingly favorable evidence in support of AWS, the Congress in 1982 extended authority through 1985.

AWS has on occasion met with problems, but almost all of these problems have been remedied. For instance, when management lacked the authority to terminate inefficient schedules Congress granted management the additional authority to ensure that AWS could not negatively affect Government's ability to do the people's business. Now, if an agency feels that a particular schedule will have negative consequences on agency operations or expenditures, but reaches an impasse in negotiations with the exclusive representative, the issue will be decided by the Federal Service Impasses Panel. The burden is on the agency to prove their case. Should a situation arise where a schedule already in place is found to cause problems, the agency is given the limited right to reopen the agreement to terminate that one schedule. Again, if an impasse is reached, the final decision is made by the Panel.

According to information released by the GAO this compromise has proven effective.

The AWS Program is clearly beneficial to the workers using it, to their agencies, who have more productive workers, and in turn to the American taxpayers, who are getting better service for their tax dollars. I urge the House to give its approval to the permanent reauthorization of this important program.●

SUPPORT FOR THE NICARAGUAN TRADE EMBARGO

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. McEWEN. Mr. Speaker, I would like to bring to your attention, Resolution No. 85-470, passed by the city of Miami Commission expressing their strong support for the trade embargo against the Government of Nicaragua. Their support and implementation of this embargo is to be commended and I would, therefore, like to share this resolution with my colleagues.

The resolution follows:

RESOLUTION No. 85-470

A resolution expressing full support of the trade embargo against the Government of Nicaragua imposed by President Reagan; requesting that the Dade County Commission adopt strict measures in enforcing the trade embargo at the Miami International Airport and the Port of Miami; declaring as persona non grata all representatives arriving in the

city from the Sandinista government of Nicaragua and all representatives of commercial enterprises who contribute to the strengthening of said Sandinista government; further directing the city clerk to send a copy of this resolution to President Reagan, Vice President Bush, all Members of the United States Congress and all members of the Dade County Commission.

Be it resolved by the Commission of the City of Miami, Florida:

Section 1. The City Commission hereby expresses its full support of the trade embargo against the Government of Nicaragua imposed by President Reagan.

Section 2. The Dade County Commission is hereby requested to adopt strict measures in enforcing the Trade Embargo at the Miami International Airport and the Port of Miami.

Section 3. Representatives arriving in the City of Miami from the Sandinista Government of Nicaragua and all representatives of commercial enterprises who contribute to the strengthening of said Sandinista government are hereby declared persona non grata.

Section 4. The City Clerk is hereby directed to send a copy of this resolution to President Reagan, Vice President Bush, all Members of the United States Congress and all members of the Dade County Commission.

Passed and adopted this 9th day of May, 1985.

MAURICE A. FERRE,
Mayor.

Attest:

RALPH G. ONGIE,
City Clerk.

Prepared and approved by:

ROBERT F. CLARK,
Chief Deputy City Attorney.

Approved as to form and correctness:

LUCIA A. DOUGHERTY,
City Attorney.●

HONORING BRYAN CORLE

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. MURTHA. Mr. Speaker, on the evening of February 4, 1985, a young man in Johnstown, PA, Bryan Corle was returning home when he came across an elderly woman who had slipped on the icy ground and fallen between several parked cars.

Bryan's quick thinking, action, and willingness to assume responsibility led to quick medical attention for the woman and saving her from severe medical problems due to exposure.

Bryan's excellent leadership was honored recently when he was awarded the Medal of Merit by the National Court of Honor of the Boy Scouts of America. In addition, a group from Johnstown will join to honor Bryan on Tuesday, May 28, at the Geistown Fire Hall.

Bryan is a candidate for Eagle Scout from Troop 25. I knew that Bryan's individual effort would be of special interest to the hundreds of Members of Congress who participated in scouting themselves.

And I want to join in sending along my personal congratulations to Bryan for this outstanding effort.

UNIVERSITY OF PITTSBURGH AT JOHNSTOWN, CATHOLIC CAMPUS MINISTRY,
April 24, 1985.

Hon. JOHN P. MURTHA,
U.S. House of Representatives,
Washington, DC.

DEAR MR. MURTHA: I am writing to you to enlist your assistance and possible participation in the recognition of a young man from the Johnstown area. His name is Bryan Corle of 246 Beechwood Ave., Johnstown, PA 15904. Bryan is an Eagle Scout Candidate of Troop 25 sponsored by the Geistown Fire Hall. Recently, Bryan was awarded the Medal of Merit by the National Court of Honor of the Boy Scouts of America for rescuing an elderly lady and saving her from exposure and possible death. For your use, I have enclosed a photocopy of the citation from the National Court of Honor.

Mr. Murtha, we were hoping that in some way your office could recognize Bryan through some letter, momento, resolution or whatever you might deem appropriate. The award will be presented to Bryan on Tuesday May 28, 1985, at 7:30 p.m. at the Geistown Fire Hall. You are cordially invited to be present, either personally or through one of your staff.

It is the wish of the unit that this presentation be a surprise and Bryan knows nothing about at this time. We hope that you can participate and I sincerely thank you for your kind assistance.

With best wishes and regards, I remain

Sincerely yours,

Rev. DAVID J. DODSON,
Chairman, Penn's Woods Council Advancement Committee.

THE MEDAL OF MERIT

For outstanding service putting into practice scout skills and ideas is awarded by the Boy Scouts of America upon the recommendation of the national court of honor on March 13, 1985, to Bryan Corle on the evening of February 4, 1985, Eagle Scout applicant Bryan Corle was returning home after visiting a friend. While enroute, he discovered an elderly lady, Mrs. Catherine Fitzpatrick, who had slipped on the icy ground and had fallen between several automobiles. When discovered, she was dizzy and incoherent. Bryan alerted a neighbor who called the ambulance. Bryan carried Mrs. Fitzpatrick safely inside and stayed with her until after the ambulance crew had left and saw her safely home. His quick action saved her from exposure.●

RENEWAL OF THE BLACK/JEWISH ALLIANCE

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. RANGEL. Mr. Speaker, I am encouraged by the recent alliance formed by two prominent black and Jewish organizations in New York. The National Organization for the Advancement of Colored People and the Union of American Hebrew Congregations have launched a new partnership which will renew our common interests in the years ahead.

There is much to celebrate in the black-Jewish relationship. From the similar, historical experiences of survival through slavery and the Holocaust to sharing the frontlines of the civil rights movement have made blacks and Jews natural allies in the struggle for social justice. Recently, the African famine has, again, brought blacks and Jews together to confront moral injustices. The Israeli airlift was of special significance, not because it was the Jews of Israel helping the Jews of Ethiopia but because it was people helping people.

Demogagues will continue to emphasize the few differences among blacks and Jews, but the policies of the Reagan administration reduces these differences and makes this relationship stronger. The Bitburg visit is as callous as the retrenchment of civil rights enforcement. The common consitutent interests and goals further demonstrate the close relationship of blacks and Jews in this Congress of which I am proud to be a part.

The NAACP and the UAHC partnership is an exciting prospect—full of new hope and promise. I submit a Newsday op-ed by Mr. George Spitz, as a reflection of this important and significant relationship:

POLLS SHOW BLACK VOTERS SUPPORT JEWS

Mayor Koch's response ["The Mayor Responds to Criticism," Feb. 13] to Les Payne's critical column of Feb. 3 ["City's Deadly Atmosphere Is Edward Koch's Doing," Ideas] cites a 1978 Lou Harris poll that found "blacks tend to be more anti-Jewish than any other group" and "a higher degree of anti-Jewish prejudice among black leaders than among leaders of any other group." One wonders if Harris polled residents of the Bible Belt or Arab-Americans.

In fact, the mid-to-late 1970s provide many examples of Pro-Jewish action, or pro-Semitism, by blacks, most notably in politics, an arena familiar to Lou Harris and the mayor.

For example, Jewish candidates for the U.S. Senate, such as Ohio's Howard Metzenbaum in 1976 and Michigan's Carl Levin in 1978, are in large measure victorious over non-Jewish white candidates due to overwhelming support from black leaders and black voters. To no avail, pro-Arab advocates strongly urged black voters to reject Metzenbaum.

When a Jewish candidate, Alderman William Singer, challenged Chicago's powerful Mayor Richard Daley in the 1975 Democratic primary, he received strong backing from black leaders (reportedly even Jesse Jackson). Although a black state senator also ran, Singer's showings in black wards equaled or exceed that of Daley and the state senator and were substantially superior to his vote totals in non-Jewish white areas.

The New York State elections of 1978 furnished strong evidences of local black pro-Semitism. For example, questions were raised about then Bronx Borough President Robert Abrams' lack of courtroom experience during the Democratic attorney general primary by his non-Jewish white oppo-

nent, Judge Dolores Denman. But, early in that campaign year, the Harlem Lawyers Association offered Abrams a forum of respectability and black voters supported Abrams' run for state attorney general by a substantial majority, just as they had in 1974 (when he lost to Louis Lefkowitz in the general election) against another non-Jewish white Democratic attorney general primary opponent, Rockland County District Attorney Robert Connor.

Harrison J. Goldin had no primary opponent in his 1978 race for state comptroller, but in the November general election he faced a strong non-Jewish white candidate, Edward Regan. Although Goldin did not fare well among white non-Jewish voters, he carried black neighborhoods by substantial margins. He retained this strong black support in the 1981 Democratic primary for city comptroller when challenged by the non-Jewish white assemblyman, John Dearie.

Moreover, black pro-Semitism was an important factor in then Rep. Edward I. Koch's victories over Mario Cuomo in the 1977 run-off Democratic primary and general election. The Amsterdam News, New York City's leading black newspaper, twice endorsed Koch, who was backed by black leaders, such as Basil Paterson, Percy Sutton, Rep. Charles Rangel, David Dinkins, Carl McCall and even the mayor's current opponent, Assemb. Herman (Denny) Farrell.

This black pro-Semitism was vital, because Koch lost heavily to Cuomo in predominantly non-Jewish white, normally conservative neighborhoods in Queens, Bronx, Brooklyn and Staten Island. Astoundingly, although in the November general election Cuomo was considered more liberal than his three Jewish opponents (Koch, GOP State Sen. Roy Goodman and Conservative Barry Farber), non-Jewish white GOP-Conservatives, such as borough president candidates Thomas Galvin in Queens and Fran Biondolillo in Staten Island, openly deserted their Jewish heads of ticket to favor Cuomo, who also was the only candidate opposed to capital punishment.

The black pro-Semitism that prevails in elections around the country parallels the overwhelming support blacks in Congress, such as Rangel, have provided Israel. Indeed, blacks are the only ethnic group in Congress, including Jews themselves, to vote unanimously against shipping FS-15s and AWACS to Saudia Arabia.

According to the mayor, "anti-Semitism is a problem in the black community, just as racism is a problem in the white community." In my opinion a "problem in the black community" is its failure to obtain proper credit for a remarkable record of pro-Semitism. The mayor, once he realizes that the Harris poll does not have a sound base, might play a useful rule in dispelling once and for all the myth of black anti-Semitism by articulating the reality of black pro-Semitism.

GEORGE N. SPITZ.

Manhattan.●

VASHON HIGH SCHOOL BASKETBALL CHAMPIONS

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. CLAY. Mr. Speaker, the Vashon High School basketball team has once again become the Missouri Class 4A basketball champions. This is the second State title for Vashon in the last 3 years; no other school in the State can claim such an accomplishment. On behalf of the citizens of St. Louis, I would like to take this opportunity to congratulate each member of the Vashon High School basketball team:

Hollivan Billups, Anthony Walters, Kenneth Williams, Anthony Jones, Albury Doss, Gerald Jones, Anthony Bonner, Earl Catching, Chris McDonald, Will James, Dwayne Brown, Steve Hall, Malcolm Nash, Sean Tunstall, Kenneth Simpson, Demetrius Pate, manager; Alphonso Campbell, manager; Ricardo Riley, manager, and Nicole Perkins, statistician.

And, I commend Vashon's school principal, Michael K. Thomas, athletic director James M. Ford, head coach Floyd Irons, and assistant coaches Ron Newell and Ronald Simpson, for their efforts to support and guide the players to victory. The following article, "Vashon Nips Soldan for 4A Title" (St. Louis Post-Dispatch, Mar. 10, 1985) details Vashon's winning performance.

[From St. Louis Post-Dispatch, Mar. 10, 1985]

VASHON NIPS SOLDAN FOR 4A TITLE

MISSOURI 4A BOYS: QUICKNESS, SPEED WIN PHL CIVIL WAR

(By John Sonderegger)

COLUMBIA, MO.—The made-in-St. Louis championship game of the Missouri Class 4A high school basketball tournament was almost like a civil war.

When the last cannon had been fired and the last wound had been inflicted, the brothers of the Public High League shook hands. Their cheerleaders embraced on the Hearnes Center floor and cried like long lost friends meeting again.

When the smoke cleared, Vashon High's Wolverines were left standing Saturday with a 52-49 overtime triumph. The defeated Soldan Tigers walked slowly off the floor, glancing over at the winners, who offered thumbs-up signs to the retreating warriors of the PHL.

In the 59 years Missouri has held a high school tournament, this was the first time two PHL teams had met in the final.

And they didn't disappoint anybody.

"If you didn't get your money's worth tonight, then you're in the wrong sport," said Vashon Coach Floyd Irons.

"You should go watch the Blues' game or something."

Vashon and Soldan had roared into the final with lopsided victories in the sectionals, the quarterfinals and the semifinals.

Some called their overwhelming conquests boring.

But when they met for the title, it was anything but dull. It was a classic match of Soldan's size and power against Vashon's quickness and speed.

"You have to get up and down the court and slow them down," said Vashon guard Anthony Walters. "We're smaller, but we're quicker."

Soldan's size and strength on the forward line looked as if it would be too much to handle in the second quarter.

The Tigers were getting second and third shots, with Lance Simmons, 6-foot-5, and Kelby Stuckey, 6-6, dominating. They opened a 22-11 lead.

Irons couldn't wait for halftime. He told his troops not to attempt to get it all back at once. He wanted to get the deficit within 10 points.

But once the Vashon fire starts, it spreads quickly.

With 1 minute 8 seconds left in the half, Vashon trailed by 11. With 24 seconds left, they trailed by one.

Stuckey was called for a technical foul for attempting to stuff a shot and hanging on the rim.

The floor shook from the thunder of Stuckey's attempt at a slam. "They had to call it," said Irons.

Walters made the free throw. Then Vashon did what it does best. It shook, rattled and rolled the Tigers.

Albry Doss stole an inbound pass and scored on a layup. Then Kenneth Williams made a steal and scored. Then Doss did it again, and again. Then Hollivan Billups got position on Patrick Price and forced a charge. Billups hit one of two shots, and the Wolverines had closed within one.

It was a 10-point burst in 54 seconds. And Soldan never got the ball past midcourt in the span.

"Defense is our best offense," said Walters.

Soldan Coach Marvin Neals said, "We fell apart. We had a 10-point lead and a chance to put them away and we just fell apart.

"Mental mistakes cost us the state championship."

Soldan carried a 25-21 lead to the locker room at halftime. The Tigers also carried the memory of the scratching and clawing Wolves who had inflicted as much mental damage as physical damage in the one-minute fire drill.

The game was close the rest of the way. Price canned a jumper to start the fourth quarter and gave Soldan a 37-33 lead. Stuckey later made a three-point play to give the Tigers a 40-36 lead. But Simmons, who had 12 points in the first half, fell silent.

"He's only human," said Irons. "I think he got tired out there. Our press might not steal the ball all the time, but it wears them down. We couldn't play half-court ball with Soldan. They were too big and too strong. We needed to make them run."

And Stuckey, who didn't get called for a foul in the first half, picked up three quick ones in the third quarter. He went to the bench.

Simmons scored his first basket of the second half with less than 4 minutes remaining, but then Doss hit a jumper and Vashon forced a 5-second violation. Walters gunned in a long jumper to tie the score at 42 with 1:35 left.

Simmons muscled in for two points, and Walters made two free throws to tie the game at 44, setting up the overtime.

Doss scored on a jumper to start the OT. Then Stuckey countered with an inside

move for Soldan. Kip Spears made two free throws and Soldan had a 48-46 lead with 1:03 left.

Vashon then lost the ball, and Spears roared in for a slam. He missed and was called for a technical for holding on the rim with 47 seconds left.

Doss hit the free throw, and Vashon trailed by one point. Then Anthony Jones hit two free throws, and the Wolverines had a 49-48 lead with 25 seconds remaining.

Spears forced an off-balance shot and the ball bounded out of bounds, with 12 seconds left. Price then fouled Walters, who made one of two free throws, giving the Wolverines a 50-48 lead.

Simmons came up court quickly, and lofted a low shot when he got past half-court. Walters fouled him, but Lance hit just one of two. Then, with 1 second left, Stuckey grabbed Doss. The slick 6-3 junior hit both shots, giving him a game-high 24 points and Vashon its second state championship in three years.

As Doss stood at the line, Irons was up off the bench, storming up and down giving his players the high five. He also was promising them dinner at Red Lobster.

Last year, Vashon lost to Springfield Hillcrest, 51-50, in the title game. Walters made a couple of costly turnovers in that one.

"If he was the goat then, he's the hero today," said Irons.

Said Walters, "Last year, I did mess up. I couldn't let that happen again. This (the first-place trophy) belonged to us last year. Now it's going where it rightfully belongs."

To be sure, Walters and the Wolverines could feel for the Tigers. "We play AAU ball with them in the summer at the Wohl (Center)," said Walters. "They're all our friends. Lance Simmons is one of my best friends on their team. We went to grade school together."

Nonetheless, the war had to be fought. "And there's nobody I'd rather beat than Soldan," said Walters.

Vashon lost in the final of the Normandy tournament on New Year's Eve to the Tigers, who finished with a 27-4 record. The Wolverines then beat Soldan in a PHL game.

"The best team won," said Irons about his 27-5 Wolves. "No doubt about it when it's two out of three."●

VETERANS HEALTH CARE BUDGET CANNOT BE REDUCED FURTHER

HON. G.V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. MONTGOMERY. Mr. Speaker, this week the House will make major decisions on the budget for fiscal year 1986, Many Federal programs will be affected. The decisions we must make will not be easy. We all have different priorities.

A very high priority of mine is veterans health care. I want my colleagues to duly understand the impact of any budget reductions in funds to operate the VA's health care system. Who is better able to relate the problems in the field than the people in the field?

According to the Chiefs of Staff at VA hospitals nationwide who responded to a recent survey, inadequate budgets are already taking their toll. More cuts in the budget will mean longer waiting lists, the turning away of certain non-service-connected veterans, and delays in many surgical procedures.

There follows a report from the Chief of Staff at the VA Medical Center in Chicago, IL.

VETERANS' ADMINISTRATION,
Chicago, IL, February 5, 1985.

HOWARD GREEN, M.D.,
Chief of Staff (11), VA Medical Center, White River Junction, VT.

DEAR HOWIE: I guess that this year we are one of the luckier ones, as at this time our projected dollar deficit is zero: Chicago West Side

a. 514 beds (no NHCU or intermediate beds)

b. Excellent affiliation with University of Illinois College of Medicine

c. None at this time

d. Impact

1. Personnel—none, but we need more nurses, technicians and ward and clinic clerks.

2. Supplies—none.

3. Equipment—like everyone else we never have enough funds to replace "big ticket" items or buy new equipment for Radiology, Laboratory, Nuclear Medicine, Surgery, Neurology and Medicine.

4. Surgery: Our demand is so great that almost all specialties have patients waiting to be admitted for elective surgery. Our limitations are problems in scheduling, emergencies, occasional breakdowns of equipment—(both urology tables need replacement, one is on order), and inadequate support personnel. Overall number of procedures per year is increasing.

e. There are no good solutions to the VA's many money problems. We have made a major effort to curtail and restrict beneficiary travel. Our COMISS computerized Pharmacy plus the use of a clinical pharmacist helped us greatly by reducing the number and cost of outpatient prescriptions, especially those patients going to multiple clinics and the number going to any of the other three VA facilities, as we are all tied together on the same computer, and a printout of a patient's medications reveals all he is getting from the VA in Chicagoland.

Our Fiscal Officer informed me that if we are not funded for the January 1985 3.5 percent pay raise, we will be one million dollars in the red. We could not cope with such a loss late in the year, and thus we are dependent on the success of the 1985 supplemental bill.

A major problem in all VA facilities is the increasing backlog of unpurchased equipment, large and small items. Prior to 3-4 years ago, the "end of the year drop-money" was sufficient to keep us fairly current. Now that source of funds has become too minimal to help much. More and more of our equipment is being used beyond the replacement date. More equipment has to be purchased on an emergency basis to replace essential items that are broken and can no longer be repaired (parts not available as the manufacturer has gone bankrupt or retired). We frequently have had to wait 2-3 years to buy state-of-the-art additional or replacement equipment.

Requests for Replacement Equipment and Additional Equipment in our Medical Center are approximately $400,000 each for a total of $800,000 this year. Our Unfunded Needs List of Equipment (over $40,000) is now $766,487 more. These needs do not include beds, typewriters and pagers, some of which we purchase at the end of each fiscal year from residuals.

A survey of all VA facilities to determine only the amount of funds needed to purchase all requested and needed additional and replacement equipment should be staggering. Also we have bought very few new beds in the past 10 years. At our last Equipment meeting Supply was instructed to review that situation and tentatively set aside $35,000 this year for new beds, if possible.

One logical way to save money, of course, would be vertical cuts, to close some of the satellite clinics, which care primarily for NSC veterans. (We do not have one.) Such a move would be politically unpopular (like closing some of the hundreds of unnecessary military bases), but more palatable than closing some of our small hospitals (six VA hospitals with 150 beds or less).

Continuing horizontal cuts in funding to all facilities means that we are gradually moving towards a more marginal quality of medical care. How many complications and deaths are now the result of only two nurses in an Intensive Care Unit or only one nurse caring for 40 patients or being unable to obtain a timely CT scan or a portable X-ray, etc., etc.??

I must hasten to mail this before the new 1986 Budget details hit us, plus the amount of the pay raise we will be forced to fund. The only way will. be to use our limited equipment funds and a lowering of our ceiling again, or will it be a "freeze" by Washington, D.C. to show they mean business. Another horror story!

Best wishes for your gallant fight, Howie!

Sincerely,

ROY J. KORN, M.D.,
Chief of Staff.●

THE IMPORTANCE OF THE PRESIDENT'S RECOGNITION OF "NEUROFIBROMATOSIS AWARENESS MONTH" IN MASSACHUSETTS

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. CONTE. Mr. Speaker, the Commonwealth of Massachusetts, by proclamation of the Governor, is recognizing May as "Neurofibromatosis Awareness Month." I am pleased to announce what a great success it has been.

I could base this solely on the extraordinary level to which community recognition and education of this disorder has climbed. In western Massachusetts alone, unanimous reiteration was given to the Governor's proclamation by the cities: Springfield, Pittsfield, Northampton, Holyoke, Chicopee, North Adams, and Westfield.

Perhaps, however, the most important recognization and reaffirmation of the need to heighten public awareness of NF came from President Reagan. "The public must be educat-

ed," the President wrote to the citizens of Massachusetts, "for with greater knowledge at both the level of medical practitioner and layman will come positive results for the cure and prevention of the disorder." I would like to submit for the Record, the President's letter in its entirety.

THE WHITE HOUSE,
Washington, April 25, 1985.

I am pleased to join the citizens of the Commonwealth of Massachusetts in recognizing "Neurofibromatosis Awareness Month in Massachusetts."

It is so essential that as much attention and recognition as possible be accorded to this devastating disease. The public must be educated, for with greater knowledge at both the level of medical practitioner and layman will come positive results for the cure and prevention of the disorder.

The National Neurofibromatosis Foundation and its affiliates in the Commonwealth have provided significant leadership, inspiration and support for the families of patients and for the public in general. Great work has been done thus far, but much remains to be done. Events like this give us the hope that more and more Americans will join the effort to combat and find the ultimate medical solution for neurofibromatosis. Because of you, I have every confidence that that hope will be fulfilled.

Nancy and I proudly join Congressman Silvio Conte, member of the Foundation and all those citizens of the Commonwealth of Massachusetts in proclaiming "Neurofibromatosis Awareness Month."

RONALD REAGAN.

Mr. Speaker, I am very proud of the fact that Massachusetts continues to be a leader in the efforts to eliminate this cruel and destructive disorder. I am also pleased to see that a growing number of my colleagues are becoming aware of such efforts and have signed on as cosponsors of Congressman WALGREN's bill to establish a national commission to help promote and coordinate all of the research that could someday defeat NF.

Thank you Mr. Speaker.●

A REASONED, FAIR ANALYSIS ON TELEVISION NETWORKS

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. VANDER JAGT. Mr. Speaker, in recent weeks and months new attention has been focused on presentations by the television networks. I stress new attention only because this is not a new subject. I believe we have all questioned, from time to time, fairness and balance in television presentations whether they be special documentaries or just the regular national or local newscast.

I believe John Corry, the veteran and extremely capable writer for the New York Times, has written one of the finest analyses of this most controversial and emotional issue of any that I have read in years. Mr. Corry's featured article under TV View appeared in the May 16, 1985, edition of the Times. His article was entitled, "Is TV Unpatriotic Or Simply Unmindful?" I strongly recommend that you read this excellent story which will follow at the conclusion of my comments.

I would particularly emphasize Mr. Corry's opening comments as he talks of developments and censure and then stresses, "In fact, the argument is too serious to be left to partisans of either side."

Mr. Speaker, John Corry has written one of the finest reasoned and fairest analyses on television networks that I have ever read. I urge once again that all my colleagues take a few minutes to read it over.

The article follows:

[From the New York Times, May 16, 1985]

IS TV UNPATRIOTIC OR SIMPLY UNMINDFUL?

(By John Corry)

This is the charge: that the television networks are left, liberal, unpatriotic, or a sebaceous mixture of all three. CBS is the usual target, although ample censure is left over for NBC and ABC. Didn't Ted Turner say that "the greatest enemies America has ever had, posing a greater threat to our way of life than Nazi Germany or Tojo's Japan, are the three television networks"? Didn't Senator Jesse Helms speak about network people who, "if they do not hate America first, certainly have a smug contempt for American ideals and principles"? Censure grows; fervor rises, while the networks, for the most part, stand on their injured dignity. In fact, the argument is too serious to be left to partisans of either side.

For one thing, we are a long way from the time when Walter Cronkite, say, or Chet Huntley narrated documentaries produced by the Pentagon. Television's old assumptions have fled. We once heard about the "Communist menace" routinely. Now television is above that sort of thing. It is no longer national; it is supranational. Last week it commemorated the 40th anniversary of VE-Day; the week before that it commemorated the 10th anniversary of the fall of Saigon. The first was an American victory, the second an American defeat. The networks march on evenhandedly. Hanoi today, the Bitburg cemetery tomorrow, and if it's Tuesday we must be in Johannesburg.

There is nothing intrinsically left, liberal or unpatriotic about this. Usually, there is no perspective at all. This is part of the problem. Events are without meaning, the way most of the recent television coverage from Vietnam was without meaning. Totalitarianism hid itself. The networks, entranced by their own technology, only knew they were there. The anniversary parade in Ho Chi Minh City, formerly Saigon, began at 7:52 A.M., the same time, 10 years before, that the last Marine was lifted from the roof of the American Embassy by helicopter. It was obvious whom the Vietnamese Government was celebrating a victory over; it was a victory over us. In an interview on "Nightline," Henry A. Kissinger said it was "demeaning" to have all three networks cover the parade. He should have called it mindless. Hanoi scored a public relations, if not a propaganda, coup.

On television, a totalitarian state doesn't look totalitarian; it only looks exotic. During the two weeks, give or take a few days, that Vietnam was recently seen on the news programs, it didn't even look militaristic. Vietnam has been the scene of one war or another for generations; it supposedly has the fourth largest army in the world. Some print journalism tried to put this into perspective. Television showed us mostly mud-splattered oxen and peaceful peasants. Why did the boat people flee? Why are so many Vietnamese trying to leave their country now? We had the impression Vietnam was poor, people probably wanted a higher standard of living. We didn't see much on television that suggested anyone fled oppression.

The most strident of the network critics insist that omissions like that are calculated, a sure sign that correspondents and producers are captives to the left. They may indeed be captives, although not the way the critics think. Dan Rather, for example, is most often singled out as the symbol of all that is anti-American on television. This is the same Dan Rather who, while anchoring the CBS coverage of Ronald Reagan's inauguration, choked up and got teary as he watched the flags and marching bands go by. It is unlikely that Mr. Rather, or very many of his colleagues, want to tear down the Great Republic.

Nonetheless, they do reflect a powerful element of the journalistic-literary-political culture. The left wins battles there by default. It is a matter of how it gets us to look at things. In the television coverage of the Democratic and Republican National Conventions last summer, for instance, Senator Jesse Helms and his associates frequently, even routinely, were characterized as right wing; Senator Edward M. Kennedy, say, or the Rev. Jesse Jackson were never characterized as left wing. This is more than a matter of semantics.

Moral opprobrium is attached to the right wing; it is racist, imperialistic and cruel. Meanwhile, the left wing is presumed not to exist, even though its ideas make up the moral and intellectual framework for a large part of the culture. The center does not generate ideas; it only absorbs them. The left becomes the only game in town this way, while the right, isolated by the moral stigma assigned to it, becomes the enemy of all good things.

Television news fails when it accepts this and allows such values to dictate the news agenda. The values mean only that one must oppose the right wing: Support the nuclear freeze and press for affirmative action; oppose apartheid and rally against missiles. The culture knows what it favors because it knows what its enemies are against. Issues become indivisible. Journalism is supposed to make clear they may be separated. It is possible, for example, to oppose apartheid, even to campaign against it, and still call for missiles.

Give the critics their due on this; journalism may seem suspect. The right wing, for example, opposes the Sandinistas. Therefore, the culture insists, the Sandinistas should be supported, or, at the very least, accommodated. A recent story in The New York Times, however, noted that the Sandinistas had uprooted some 30,000 people, mostly poor farmers, in northern Nicaragua. The 30,000 people, thought to be sympathetic to the contras, were resettled. If the relocation had been carried out in El Salvador, say, more attention might have been paid. Commentators would have declared that El Salvador was not winning the hearts and minds of people.

Television becomes an accomplice of the left when it allows the culture to influence its news judgment. The critics' fantasies are fulfilled. As it is, much of the coverage is restricted anyway. The networks are not allowed into Afghanistan to report on Soviet bombing. They are not allowed to accompany Cuban, North Korean or East German military advisers wherever they may be. On television, our picture of the world is skewed to begin with.

It is unlikely, however, that it is as skewed as the most extreme critics claim. Ideology does stain news programs, but not because there is a conscious conspiracy. Mr. Helms and, to a lesser degree, Mr. Turner may say that television does unspeakable things, but they are never generous in offering specifics. Few critics are. Reed Irvine of Accuracy in Media is better than the rest because he cites individual stories and then says the facts are wrong, but he loses his advantage by going on and assailing the motives of correspondents. Indeed, one striking thing about the argument is how little of it involves journalism. Both sides spend their time competing in goodness.

A recent ABC "Viewpoint," for example, matched six debaters—three pro, three con—who discussed, among other things, whether "newsmen have a mind-set that is basically unpatriotic." Some of the participants became genuinely angry. William Rusher, the publisher of National Review, choked on his own indignation. Sam Donaldson, the ABC White House correspondent, was beside himself. Did it matter that a survey of prominent journalists—print and television, the "media elite"—found that the overwhelming majority voted for liberal candidates? Mr. Donaldson's side said it did not. Mr. Rusher's side countered with an accusation: The phrase Stars Wars was a conscious liberal smear; the correct term was Strategic Defense Initiative or High Frontier. Neither side gave an inch.

As television, this was entertaining. As a search for truth it wasn't much. Meanwhile, new voices, many of them pietistic, are now being heard. They say the networks are moving to the right in a headlong retreat from liberal thinking. This argument holds up less well than anything even Mr. Helms has said. There is still the culture that shapes television.●

A RECOGNITION DINNER FOR DR. ARMEN SARAFIAN

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. MOORHEAD. Mr. Speaker, on May 31, 1985, at the Huntington Sheraton Hotel in Pasadena, CA, Dr. Armen Sarafian will be honored by his many friends and colleagues for 43 years of excellence in education.

Educated at La Verne College, Claremont Graduate University and the University of Southern California, Dr. Sarafian began his educational career as an elementary teacher in Riverside and Kern Counties. He spent 2 years as head of the English department at Banning Union High School. During the next 4 years, he taught U.S. history and political science at Pasadena Junior College. From 1951 to 1959, he was the coordinator of secondary and junior college education for the Pasadena City Schools. For the next 6 years, Dr. Sarafian was the administrative dean for instruction at Pasadena City College. He then served as president of the city college until 1976 when he become president of the University of La Verne, a position he holds today.

Dr. Sarafian is a member of 19 professional groups; he is active in 23 civic organizations; he has been the recipient of 25 honors and awards and has been the author of many books and articles.

To suggest that Dr. Sarafian is active, productive, appreciated, esteemed, and loved is to suggest the obvious. The institutions and people he has touched are richer for his association. His educational legacy in our area will be impossible to match.

Mr. Speaker, I am pleased to take part in this special evening of recognition and affection for Dr. Armen Sarafian.●

SACRAMENTO CHAPTER OF JAPANESE-AMERICAN CITIZENS LEAGUE HONORS SCHOLASTIC ACHIEVEMENT

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. MATSUI. Mr. Speaker, I am honored to call to the attention of the Congress the outstanding contributions made to the Sacramento community by the Japanese-American Citizens League, Sacramento Chapter.

This is a fine and important organization which has dedicated much time and many resources to the enrichment of thousands of lives in the Sacramento area. An excellent example of the invaluable contributions made by the league is the upcoming presentation of scholarship awards to deserving young college-bound students.

The deserving students will receive their scholarship awards at a dinner which takes place on May 29.

The Japanese-American Citizens League deserves our praise, our admiration, and our gratitude for helping to prepare our young people for the challenges of the future. The youngsters being honored with scholarships are:

Fletcher Ibser of Encina High School; Steven Y. Kishi of Del Campo High School; Elizabeth N. Aoki and Jeffrey M. Nishimura of Rio Americano High School; Lee Nagao, Alan Sakakihara, Marian Dote, and Alison Kishaba of Sacramento High School; Eiri Hayashigatani, Eileen Nakahira and Sharon Oto of Hiram Johnson High School; Wendy Hashibe of Bella Vista High School; Sharon M. Takeda and Clark Watanabe of John F. Kennedy High School; Arthur Okamoto, Christine Matsumoto, and Robert Nakagawa of C.K. McClatchy High School; Stanley R. Baishiki of Rancho Cordova High School; Michelle Miyao of Luther Burbank High School; and Calvin Nakamoto and Angela Yee of Sacramento City College.●

TRIBUTE TO THOMAS S. DUNMIRE

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the announced retirement later this month of a friend to many of us in this Chamber, Mr. Thomas Dunmire. As many in this body know, Tom has served ably and with dedication as minority consultant for territorial issues on the Committee on Interior and Insular Affairs.

Since joining the House Interior Committee 12 years ago—April 3, 1973—Tom has provided intelligent and sound counsel enabling Congress to formulate effective and successful policies in governing America's trust territories. Tom has played a critical role in the promotion of political, social, and economic development in the Pacific and the Caribbean. Tom has served as a continuous link between this body and the Departments of State, Defense, and Interior. Additionally, his diplomatic skills have been utilized as liaison between Congress and the governments of Puerto Rico, U.S. Virgin Islands, American Samoa, Guam, Northern Marianas, Palau, the Marshalls, and the Federated States of Micronesia. In this capacity, Tom has excelled in providing detailed analyses of diversified Federal and Territorial budgets, policies, and projects.

Tom Dunmire established a distinguished record of service to the Nation even before his tenure in the Congress. After graduation from the U.S. Military Academy at West Point in 1952, he rose to the rank of lieutenant colonel in the U.S. Army. During his military service, Tom attended the Army War College, the Naval Post-Graduate School, the Armed Forces Staff College, and the U.S. Army Language School. His intelligence, hard work, and loyalty are reflected in the awards he received: the Legion of Merit, the Bronze Star, and a Commendation Medal with Two Oak Leaf Clusters.

While serving in the military, Tom performed many important roles with great success. He served as a foreign liaison in Germany, utilizing his German language skills. Tom also

served as a legislative liaison, research and development project officer, and authored several official publications about military construction, management, and nuclear engineering.

In addition to his military education, Tom also obtained a master's degree in international affairs in 1966, and a master's degree in public administration in 1978, from George Washington University.

I know we will all greatly miss Tom, his hard work, sound advice, and friendly nature. Along with my colleagues on the House Interior and Insular Affairs Committee, I would like to take this opportunity to thank Tom for his assistance and hard work these many years. I wish him the best of luck in all future endeavors.●

PROTECT FAMILY PLANNING PROGRAMS—DEFEAT SMITH AMENDMENTS

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. PORTER. Mr. Speaker, our colleague, Jim Moody, has taken a very active role in the consideration of H.R. 1555, the fiscal year 1986 foreign assistance reauthorization. He recently sent out a "Dear Colleague" letter on the family planning provisions of H.R. 1555 which deserves careful review prior to the vote on the "Smith" amendments. I have asked that it be included in the RECORD for all to read.

The "Dear Colleague" follows:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, May 15, 1985.

Re Protect family planning programs—Defeat Smith amendments

DEAR COLLEAGUE:

The May 6th "Dear Colleague" letter from Representative Chris Smith and others about family planning issues in the FY 1986 Foreign Aid authorization, H.R. 1555, requires some rebuttal and correction.

UNFPA AND CHINA

The Smith letter devotes page after page to slamming China over abortion and infanticide. Most of the assertions on China are probably correct, although the State Department's annual Report on Human Rights indicates that coerced abortions and/or infanticide mostly result from local and regional practices that greatly exceed official policy. But the Smith letter goes on to suggest that the U.N. Fund for Population Activities (UNFPA) is helping to fund these abuses in China, and that U.S. AID dollars therefore indirectly contribute to abortion. To remedy this alleged connection the Smith amendment would withdraw all U.S. funding for all non-coercive, non-abortion-related UNFPA programs in all underdeveloped countries in order to leverage China into changing its policies.

Please consider these three key points:

(1) No U.S. AID money funds any abortion-related programs per the Helms prohibition, passed in 1973. This has been scrupulously monitored by AID, GAO and others, and fully complied with.

(2) No U.S. AID funds for UNFPA go, even indirectly, to any abortion-related programs in China. A full-scale AID study dated March 29 of this year concluded: (a) While regional abuses of China's official policy are numerous, none of UNFPA's assistance to China fund any abortions; and (b) UNFPA is careful to keep its programs separate from any abortion or coercion. Furthermore, U.S. AID funds to UNFPA are kept in separate accounts by country, and as of 1985 no U.S. AID funds are going to China through UNFPA.

(3) The amount contributed by UNFPA to China is much too small to be used as leverage. The Smith letter gives the impression that UNFPA support to China is significant. (The repeated use of 30 percent in Smith's letter refers to the U.S. share of UNFPA's budget, not UNFPA's share of China's population programs.) In actual fact, UNFPA provides about $13 million per year to China—only one tenth of one percent of China's overall program. This is far too little to leverage China into changing those population programs which UNFPA does not fund.

There are several other inaccuracies in the Smith letter, such as the claim that the U.S. representative on UNFPA's governing council won't be able to vote on UNFPA aid to China until 1989. That's not true. UNFPA's council may reconsider such policy decisions as soon as June.

PLANNED PARENTHOOD AND IPPF

There are 119 countries with Planned Parenthood organizations. Although they are affiliated through the International Planned Parenthood Federation (IPPF) in London, each organization is independent. Each sets its own policies, depending on the laws, cultures and customs of the country.

Of these 119 Planned Parenthood organizations, 112 provide no abortion-related services in their programs. (Planned Parenthood in the U.S. and several other industrialized countries do.)

The Smith letter claims that IPPF-London advocates abortion to those 112 countries, and cites a 1983 document as the "smoking gun" of this advocacy. In fact, the document cited was a working paper prepared by six individuals, only one of whom was associated with Planned Parenthood, and the paper was subsequently rejected by IPPF.

Again, note three crucial points:

(1) In accordance with the Helms rule, not one dollar of U.S. AID assistance for family planning is going, or has been going, to any abortion-related activity through IPPF. Even in those few countries where abortion is legal, no AID funds passing through IPPF go for any abortion-related activities.

(2) IPPF has kept carefully segregated accounts to ensure that no AID funds channeled through it are used anywhere for any abortion-related activities.

(3) To defund voluntary, non-abortion-related family planning programs in Kenya, Nigeria, etc. in order to punish or leverage IPPF-London for alleged advocacy positions would be totally counterproductive and would end up causing more—not less—abortions worldwide.

FUNGIBILITY

The argument made by Representative Smith that indeed bears real consideration is the generic claim that any financial support to another country—directly or through international agencies like UNFPA and IPPF—frees up other resources for purposes with which we may not agree.

But this applies to all foreign aid programs. How many of us agree with every single action taken by Turkey, Greece, Egypt, Israel, India or Pakistan? Even our grain sales to Russia can be said to free up resources they can use for purposes we oppose.

It is correct, and important, to insist that U.S. aid not be employed for purposes we reject. But we should not apply the fungibility argument selectively to international agencies helping to prevent over-populations, starvation and misery through voluntary, non-abortion-related family planning programs just because some countries or local program affiliates use their own money in ways we wouldn't choose.

The most effective way to really reduce abortions worldwide is to support—not defund—adequate family planning.

Don't let the Chris Smith amendment gut twelve years of bipartisan, carefully monitored support for responsible and voluntary family planning.

Sincerely,

JIM MOODY.●

VETERANS HEALTH CARE BUDGET CANNOT BE REDUCED FURTHER

HON. G.V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1935

● Mr. MONTGOMERY. Mr. Speaker, this week the House will make major decisions on the budget for fiscal year 1986. Many Federal programs will be affected. The decisions we must make will not be easy. We all have different priorities.

A very high priority of mine is veterans health care. I want my colleagues to fully understand the impact of any budget reductions in funds to operate the VA's health care system. Who is better able to relate the problems in the field than the people in the field?

According to the chiefs of staff at VA hospitals nationwide who responded to a recent survey, inadequate budgets are already taking their toll. More cuts in the budget will mean longer waiting lists, the turning away of certain non-service-connected veterans, and delays in many surgical procedures.

There follows a report from the chief of staff at the VA Medical Center in New York City:

VETERANS' ADMINISTRATION,
MEDICAL CENTER,
New York, NY, February 12, 1985.

Dr. HOWARD GREENE,
Chief of Staff, VA Medical Center, White River Junction, VT.

DEAR HOWARD: This letter is in response to your circular letter of January 2, 1985 prompted by Dr. Mark Wolcott's "universal problem."

a. Size of hospital: 851 beds, GMS.

b. Affiliated: New York University Medical School.

c. Projected dollar deficit as of January 1, 1985:

1. Personnel Services: $1,034,000.

2. All Other: $900,000.

d. Impact of dollar deficit:

1. Personnel.—We have been forced to reduce staff physicians by 13 FTEE. We have an employment lag of 40 positions in all other categories.

2. Supplies.—In essence we are "robbing Peter to pay Paul." We are meeting current needs by borrowing from other cost centers with little hope of replenishing the "borrowed" money. See comments.

3. Equipment.—Funds are grossly inadequate. $100,000 of assigned and budgeted money was removed by Region for use elsewhere.

4. Backlog of patient surgery.—None, see comments.

e. Solutions.—Reduction in 13.3 FTEE among staff physicians by elimination of temporary appointments and reduction of parttime appointments. This solution was imposed on us by Region: "Not one penny more." We have also severely curtailed overtime, approximately 75%. We have also created a lag in recruiting and consequently are approximately 53 positions under our ceiling.

f. Comments.—Although we have no backlog in surgery, the budget constraints are having a negative impact on patient care in many of the ways described by Dr. Wolcott. There are shortages in personnel in the administrative and clinical support areas. This results in delays in scheduling diagnostic radiological and nuclear medicine procedures which prolongs patients' workups and hospital stays. There are long lines at our pharmacy. Our hearing aid evaluations are being delayed as are our compensation and pension examinations. There are delays in ordering supplies and equipment and patient food is often cold because of slow deliveries of food trays.

We also feel we are not being properly compensated under the DRG System. This Medical Center has treated over 114 patients with AIDS, 15 or 20 of whom are in this Medical Center at any one time. The cost of their treatment is great, far beyond any DRG compensation.

Most of all the budget deficits have a marked and detrimental effect on staff morale. There is a general feeling that we are intentionally being put in a position where we cannot deliver optimal care. Unless we get some relief we see a continuing deterioration in the care we can give veterans.

JOHN H. AYVAZIAN, M.D.,
Chief of Staff.●

WILLIAM CASEY BEFORE THE WORLD BUSINESS COUNCIL: NICARAGUA

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. KEMP. Mr. Speaker, while we in the House of Representatives remain divided over what is to be done, the Communist regime in Nicaragua daily is growing stronger and more aggressive toward its neighbors. This past week has seen Nicaraguan troops crossing the border into Honduras, firing on democratic resistance forces and killing at least one Honduran soldier on his home soil. Our friends and allies in Central America have no illusions about the aggressive intentions and growing threat posed by the Soviet-controlled Sandinista regime; the freedom fighters in Nicaragua have no illusions about the abusive totalitarian objectives and practices of that regime.

Apparently the only people who still retain illusions are certain Members of Congress who found themselves embarrassed or surprised by Daniel Ortega's most recent trip to Moscow. On the very day that the House of Representatives voted to deny our help to the democratic resistance, a Soviet ship unloaded $14 million in military equipment at the port of Corinto, and Ortega prepared his petition for another $200 million in Soviet military aid.

But these events are not aberrations in Nicaragua; they are an intrinsic part of a pattern of behavior all too obvious in its threatening implications for free people.

This was summed up by the Director of Central Intelligence, William Casey:

The American intelligence community over recent months unanimously concurred in four national estimates on the military buildup, the consolidation and the objectives of the Soviets and the Cubans and the Sandinistas in Nicaragua. If I were to boil the key judgments of those estimates down to a single sentence it would be this: The Soviet Union and Cuba have established and are consolidating a beachhead on the American continent, are putting hundreds of millions of dollars worth of military equipment into it, and have begun to use it as a launching pad to carry their style of aggressive subversion into the rest of Central America and elsewhere in Latin America.

As we in Congress debate what our policy toward Nicaragua should be, let us at least begin with this common basis of understanding of the nature of the threat we face. I urge my colleagues to read the Director's statement in full, which I am inserting in the RECORD.

The statement follows:

[From the Washington Times, May 17, 1985]

SANDINISTAS HAVE "BLUEPRINT FOR SUBVERSIVE AGGRESSION"

(By William Casey, CIA Director)

Today, I would like to tell you about the subversive war which the Soviet Union and its partners have been waging against the United States and its interests around the world for a quarter of a century or more. This campaign of aggressive subversion has nibbled away at friendly governments and our vital interests until today our national security is impaired in our immediate neighborhood as well as in Europe, Asia, Africa and Latin America.

This is not an undeclared war. In 1961, [Nikita] Khrushchev, then leader of the Soviet Union, told us that communism would win not through nuclear war which could destroy the world or conventional war which could quickly lead to nuclear war, but through "wars of national liberation" in Africa, Asia, and Latin America. We were reluctant to believe him then. Just as in the 1930s we were reluctant to take Hitler seriously when he spelled out in "Mein Kampf" how he would take over Europe.

Over the last 10 years, Soviet power has been established:

In Vietnam, along China's border and astride the sea lanes which bring Persian Gulf oil to Japan.

In Afghanistan, 500 miles closer to the warm-water ports of the Indian Ocean and to the Straits of Hormuz. Through which comes the oil essential to Western Europe.

In the Horn of Africa, dominating the southern approaches to the Red Sea and the southern tip of the Arabian Peninsula.

In Southern Africa. The source of minerals which we and other industrial nations must have.

And in the Caribbean and Central America, on the very doorstep of the United States.

This is not a bloodless war. Marxist-Leninist policies and tactics have unleashed the four horses of the apocalypse—Famine, Pestilence, War and Death. Throughout the Third World we see famine in Africa, pestilence through chemical and biological agents in Afghanistan and Indochina, war on three continents, and death everywhere. Even as I speak, some 300,000 Soviet, Vietnamese, and Cuban troops are carrying out savage military operations directed at wiping out national resistance in Afghanistan, Kampuchea, Ethiopia, and several other countries.

In the occupied countries—Afghanistan, Cambodia, Ethiopia, Angola, Nicaragua—in which Marxist regimes have been either imposed or maintained by external forces, there has occurred a holocaust comparable to that which Nazi Germany inflicted in Europe some 40 years ago. Some four million Afghans, more than one-quarter of the population, have had to flee their country. The Helsinki Watch tells us that they have fled because "the crimes of indiscriminate warfare are combined with the worst excesses of unbridled state-sanctioned violence against civilians." It cites evidence of "civilians burned alive, dynamited, beheaded; crushed by Soviet tanks; grenades thrown into rooms where women and children have been told to wait."

In Cambodia, two to three million people, something like one-quarter of the pre-war population, have been killed in the most violent and brutal manner by both internal and external Marixist forces.

In Ethiopia, a Marxist military government, supported with extensive military support from Moscow and thousands of Cuban troops, by collectivizing agriculture and keeping food prices low in order to maintain urban support, has exacerbated a famine which threatens the lives of millions of its citizens. It has exploited the famine by using food as a weapon to forcibly relocate people fighting an oppressive government in the north hundreds of miles to the south where there is no preparation to receive them. In urban areas, food rations are distributed through party cells.

In Nicaragua, the Communist government killed outright a minimum of 1,000 former Somoza national guardsmen during the summer of 1979. In 1982, it forcibly relocated some 15,000 Miskito Indians to detention camps, forced many more to flee to refugee camps in Honduras, and burned some 40 Indian villages. Last month, the Sandinistas forcibly moved 60,000 campesinos from

areas close to the Honduran regions, burning their houses and killing their cattle.

What is the purpose of all this carnage, this creeping imperialism? In my view, there are two primary targets—the oil fields of the Middle East which are the lifeline of the Western Alliance, and the Isthmus between North and South America. Afghanistan, South Yemen, Ethiopia, as well as Cam Ranh Bay in Vietnam, and Mozambique and Angola in southern Africa, bring Soviet power astride the sea lanes which carry those resources to America, Europe and Japan.

Capabilities to threaten the Panama Canal in the short term and Mexico in a somewhat longer term are being developed in Nicaragua where the Sandinista revolution is the first successful Castroite seizure of power on the American mainland. They have worked quietly and steadily toward their objectives of building the power of the state security apparatus, building the strongest armed forces in Central America, and becoming a center for exporting subversion to Nicaragua's neighbors.

The American intelligence community over recent months unanimously concurred in four national estimates on the military buildup, the consolidation and the objectives of the Soviets and the Cubans and the Sandinistas in Nicaragua. If I were to boil the key judgments of those estimates down to a single sentence it would be this: The Soviet Union and Cuba have established and are consolidating a beachhead on the American continent, are putting hundreds of millions of dollars worth of military equipment into it, and have begun to use it as a launching pad to carry their style of aggressive subversion into the rest of Central America and elsewhere in Latin America.

Let me review quickly what has already happened in Nicaragua. The Sandinistas have developed the best equipped military in the region. They have an active strength of some 65,000 and a fully mobilized strength including militia and reserves of nearly 120,000. These forces are equipped with Soviet tanks, armored vehicles, state of the art helicopters, patrol boats and an increasingly comprehensive air defense system. This gives the Sandinistas a military capability far beyond that of any other Central American nation and indeed all Central American nations put together.

In addition to the considerable military hardware, there are now an estimated 6,000 to 7,500 Cuban advisers and several hundred other communists and radical personnel in Nicaragua assisting the regime in its military buildup and its consolidation of power.

The Communist government under Cuban direction and guidance has been essential in helping the regime establish control over the media, create propaganda mechanisms and neutralize the effectiveness of those who oppose the Sandinista totalitarianism.

Today, we see Nicaragua becoming to Central and Latin America what Beirut was to the Middle East for almost 15 years since 1970 when Lebanon became the focal point for international and regional terrorists. Managua's support for training of Central American subversives is well documented—they support Salvadoran communists, Guatemalan communists, radical leftists in Costa Rica, and are attempting to increase the number of radical leftist terrorists in Honduras. More recent evidence indicates Nicaraguan support for some South American terrorist groups and growing contracts with other international terrorist groups.

Yet, just last week the American congress refused to approve $14 million for people resisting communist domination of Nicaragua, on the very day that a Soviet ship unloaded more than $14 million worth of helicopters, East German trucks, and other military cargo at Corinto, the principal port in Nicaragua.

On the very next day, [Daniel] Ortega, the Nicaraguan communist dictator, traveled to Moscow to ask the Soviet Union to make $200 million available to him to consolidate a Leninist communist dictatorship across a stretch of land which separates South America from North America.

This development in our immediate neighborhood should not be viewed in isolation but as a part of a worldwide process which has already worked in Europe, Africa, Asia and Latin America.

Let me now give you an insight on how all this happens. In early 1981, I had a talk with Bob Ames, our CIA Middle East expert, who died at the hand of a terrorist attack in Beirut in 1983. Stationed in Aden, South Yemen, in 1967, he met and befriended the young revolutionary Abd'al Fatah Ismail, who became president of South Yemen and is now back in Aden after being exiled briefly to the USSR. Abd'al Fatah told Bob of his experience in the higher Komsomol school which the Soviets maintain for training young revolutionaries from non-communist countries. He explained that he had been taught in Moscow that he needed 20 years, a generation, to consolidate his revolution.

He would have to control the education of the youth and to uproot and undermine and ultimately change the traditional elements of society. This meant undermining the influence of religion and taking the young away from their parents for education by the state. He was taught that to control the people he would have to establish block committees as a powerful secret police. Finally, Abd'al Fatah spoke in impassioned terms of a need to export revolution to carry out his mission as a dedicated Marxist-Leninist and to ensure that attention was focused on neighboring countries thus diverting attention from his own country and allowing it to consolidate its revolution.

Bob Ames said that as he looked back, Abd'al Fatah—with Soviet Bloc help—had done as he said he would. He captured and subverted a legitimate war of liberation. He killed or drove into exile those members of the movement who believed in democracy and then went about the work of consolidating the communist regime and began armed subversion against Oman and North Yemen.

In Ethiopia, Angola, Afghanistan, and Grenada, dedicated Marxist-Leninist revolutionaries followed this Soviet blueprint with only slight modifications.

Our analysts have studied this blueprint for taking over a government and consolidating a totalitarian regime as it has been exemplified in seven totalitarian regimes; six Marxist-Leninist in Cuba, South Yemen, Ethiopia, Angola, Grenada, Nicaragua, and the Islamic revolutionary government of Iran. They have identified 46 indicators of the consolidation of power by a Marxist-Leninist regime. These indicators measure the movement toward one-party government, control of the military, of the security services, of the media, of education, of the economy, the forming or take-over of the labor or other mass organizations, exerting social and population control, curbing religious influence and alignment with the Soviet bloc.

Of the 46 indicators, Nicaragua in five and one-half years has accomplished 33. They have established control of the media, taken over radio and TV, censored the broadcasts of Sunday sermons of the Archbishop of Managua and subjected the only free newspaper, La Prensa, to a brutal daily censorship. They have taken control of the education system. Nicaraguan textbooks now teach Marxism. They attack the tenets of Western democracy. They attack traditional religious teachings and encourage children to maintain revolutionary vigilance by watching for signs of ideological impurities in their neighbors, friends and relatives. The Sandinistas have taken control of the military. They have taken control of the internal secret police and have established a Directorate of State Security. That directorate, according to our reports, has 100 Cubans, 70 Soviets, 40-50 East German and 20-25 Bulgarian advisers. There are Soviet advisers at every level of the secret police. In fact, it is safe to say that it is controlled by the Soviet Union and its surrogates. Block committees have been established to watch and control the people. The church has been persecuted.

Witness the campaign mounted by the Directorate of State Security to harass and embarrass Pope John Paul II during his 1983 visit to Nicaragua. They have used political mobs (similar to the Red Guards of Soviet and Chinese revolutionary history) to attack democratic politicians, union members and religious leaders. And finally, just as Abd'al Fatah told Bob Ames what he must do, and following Hitler and Khrushchev, the Sandinistas have told the world that they would spread the example of Nicaragua beyond El Salvador to Honduras, Guatemala, and the entire region.

An integral part of this blueprint for subversive aggression is deception and disinformation to manipulate and influence public opinion and policies in western countries. This takes many shapes and forms.

A worldwide propaganda campaign has been mounted and carried out on behalf of the Sandinista regime and Salvadoran guerrillas which would not have been possible without the capabilities, the contacts, and the communication channels provided by the Soviet bloc and Cuba. The Sandinistas themselves have shown remarkable ingenuity and skill in projecting disinformation into the United States itself. Perhaps the best example of this is the systematic campaign to deceive well-intentioned members of the western media and of western religious institutions.

There are many examples of Nicaraguan deception. The Sandinista press, radio and government ministry have put out claims that the United States used chemical weapons in Grenada, that the United States was supplying Nicaraguan freedom fighters with drugs, and that the United States might give the opposition bacteriological weapons.

The debate in the Congress disclosed few who think that what is happening in Central America is a desirable state of affairs or that it is compatible with avoiding a possibly permanent impairment of our national security and a serious deterioration in the American geopolitical position in the world.

There are some who will be content with an agreement that the Nicaraguans will now forego further aggression. Our experience in Korea and Indochina provides some lessons on the value of agreements with communist governments. Korea started to violate the Korean Armistice within days of the truce signing.

Under the 1973 Paris Accords, North Vietnam agreed to cease firing in South Viet-

nam, withdraw its forces from Cambodia and Laos, and refrain from introducing additional troops and war materiel into South Vietnam except on a one-for-one replacement basis, North Vietnam never observed the cease-fire and troop withdrawal requirements, and within little more than two months after it had signed the peace agreements it had already infiltrated some 30,000 additional troops and over 30,000 tons of military equipment into South Vietnam.

We believe the Sandinistas' main objectives in regional negotiations are to buy time to further consolidate the regime. History and the record and purposes of Marxist-Leninist regimes in general and the Sandinistas in particular lead us to believe that unless Nicaragua has implemented a genuine democracy as required by the Organization of American States such assurances could not be adequately verified and would not be complied with. Cuban officials have urged the Salvadoran communist guerrillas to slow down their attacks against the Duarte government in order to fortify and consolidate the Nicaraguan revolution. We believe that Cuba has assured the Salvadoran communists that it might take as long as five to 10 years, but as long as the Sandinista regime in Nicaragua remains, that country will serve as a base for communist expansion in the area and the Salvadoran insurgency will be renewed once the Sandinistas have been able to eliminate the armed resistance.

What does this mean for America's future? Should Central America fall under communist control, it could mean a tidal wave of refugees into the U.S.

Every country that has fallen under communist control since World War II has sent refugees streaming over the borders—first Eastern Europe, then Cuba, and more recently Vietnam and Afghanistan—and the potential influx from Central America is even higher than from any of these. Since 1980, some 200,000 Salvadorans fleeing the communist-initiated violence in their own country have entered the U.S. illegally. Illegal movement from Mexico has increased, with some one million Mexicans illegally entering this country in 1983 alone. In 1984, the Bipartisan Commission on Central America warned that a communist Central America would likely be followed by the destabilization of Mexico and that this could result in many millions of additional Mexicans fleeing into the United States.

Today, the Cuban and Nicaraguan military forces are together four times the size of those of Mexico and are equipped with vastly superior weapons. Today, with armed forces larger and better equipped than the rest of Central America put together, Nicaragua could walk through Costa Rica, which has no army, to Panama, and Cuba can threaten our vital sea lanes in the Caribbean.

The insurgency is a major obstacle to Sandinista consolidation in that it encourages the erosion of active support for the Sandinistas by creating uncertainties about the future of the regime; by challenging its claims of political legitimacy; and by giving hope to the leaders of the political opposition.

The largest anti-Sandinista insurgent group, the FDN, is still providing strong military resistance despite cutoff of United States aid almost a year ago. Popular sympathy for the insurgents appears to be increasing in the countryside, and the FDN continues to receive significant numbers of new recruits.

That opposition can increase the pressure until the Sandinista support has eroded sufficiently to leave them no option other than modification of their rejection of internal reconciliation. The objective is to allow for the same process of democratization that is taking place in the rest of Central America to occur in Nicaragua.●

CAN A TREATY ELIMINATE GENOCIDE?

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. HYDE. Mr. Speaker, tomorrow we will pass a resolution urging the other body to ratify the Genocide Treaty.

As we gird our loins for this massive paper assault on tyranny, Peter Wehner of the Ethics and Public Policy Center has put it all in perspective. I commend his views to those of my colleagues who are at all interested in the real world.

The article follows:

[From the Washington Times, May 20, 1985]

CAN A TREATY ELIMINATE GENOCIDE?

(By Peter Wehner)

Whether or not the United States votes to ratify the genocide treaty, we can be certain of one thing: the debate will generate far more heat than light.

The heat is sure to come from self-righteous senators who want to go on record as courageously "opposing genocide."

The light, we can hope, will come from serious individuals who will not permit the discussion of a nonbinding document to distract us from the real tragedies in our midst which we so often and easily ignore.

Wholly apart from the merits of the treaty itself (which are intrinsically limited), one thing is clear: the signature of the United States on a genocide treaty will not stop genocide. At best, it will be a positive moral statement. It may even be good. But it is mostly irrelevant. And should its passage act as a substitute for present responsibilities, then we will have committed a far greater sin than in rejecting it.

Most people cannot see how ratifying a treaty against genocide carries any moral ambiguity. The issue takes on new meaning, however, in light of recent American history, particularly where the conflict between rhetoric and reality, rationalism and pragmatism, was most evident: the U.S. involvement in Southeast Asia.

Throughout the 1960s and early '70s, antiwar protesters had seemingly monopolized the moral ground, constantly pitting moral responsibility against national security interests almost as if they were, by definition, mutually exclusive terms. They argued that a U.S. presence in Vietnam subordinated the former to the latter. And hence, our hands were stained with the blood of an unwanted war.

Peace, their reasoning went, would result from a U.S. disengagement. Disengagement was morally correct; U.S. involvement promoted terror and cost lives; and if we only would withdraw and let events take their natural course, all would be right with the world once more.

But these illusions have been shattered by the deaths of millions. America did leave. We left Southeast Asia to the "indigenous agrarian reformers" and "nationalist leaders" who supposedly were the driving force of the Vietnamese revolution.

And now the objective realities have turned out to be a tragedy we can scarcely comprehend: the extermination of between one-third and one-half of the Cambodian population, mass deportation, slave labor, "re-education" camps, and a terrorized people risking their lives to escape another Marxist paradise. It is now a region free of U.S. involvement, and it is a region at war with its people.

Where are the cries for justice now? Where is the anguish? What has happened to the advocates? But Americans, by and large, are no longer concerned. We have left Southeast Asia to live in splendid isolation. Come Home, America.

This romantic assessment of Asian communism was a myth eventually swept away by the rivers of blood that habitually follow the establishment of Stalinist regimes. The actions of the Viet Cong, the North Vietnamese army, and the Khmer Rouge reinforce what men like Alexander Solzhenitsyn have long understood: that there are certain qualities that will forever remain intrinsic to communist systems. "Rulers change," he wrote "but the Gulag Archipelago remains."

This issue cannot simply be cast aside, or turned into an intellectual debate between "liberals" and "conservatives." It is a profound moral issue involving human life and human worth, an issue of absolute morality—that uses human lives as a means of supporting a preordained political ideology.

Now we hear it said again—this time in Central America—that the United States is responsible for an escalation of tensions. The United States is charged with pursuing military confrontation instead of political dialogue and of running against the tides of history.

Of course, the terror will not stop if the United States leaves Central America, anymore than it did when we left Southeast Asia, even if our sense of moral responsibility will. How many times, one wonders, must this tragic drama unfold before we see the true nature of the struggle?

Whatever the answer, it should now be self-evident that real peace is not the product of moral rhetoric, or even noble human aspirations. And surely, no one can now argue that abdication can serve as a substitute for responsible policy. History has shown it, and millions of lives have been lost proving it.

Henry Kissinger once said that the difference between freedom and totalitarianism is not transient or incidental; it is a moral conflict, of fundamental historical proportions, which gives the modern age its special meaning and peril. The United States, therefore, is compelled to act: to act first, and after much thought and reflection, to define its principles and to translate those principles into effective action. That can only be achieved by selective involvement, not by unilateral disengagement.

Perhaps the United States will sign the genocide treaty. But to give the question much importance is to miss the heart of the matter. A piece of paper signed by 90 countries during the 1970s, as Cambodians were being systematically and brutally exterminated, will not stop genocide. Only a nation willing to engage in the battle can stop the march of evil.

"All that is necessary for evil to succeed," Edmund Burke wrote, "is that good men do nothing." Today, in a dark world, we condemn human rights abuses. We argue about "outlawing" genocide. We free our conscience by disengaging ourselves, and then we build memorials to the dead. And throughout, we continue to watch the people die.

"Never again"—and seemingly forever.●

REVEREND WEIR AND FIGHTING TERRORISM

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. STARK. Mr. Speaker, the primary reason we continue to see an increase in international terrorism is that certain states have concluded they can conduct a war against much more powerful countries by means of such acts. The Western nations have found no effective means of countering state-supported terrorism, although the administration has talked loudly of preemptive strikes against the perpetrators.

I don't think attacks on the perpetrators alone, although satisfying, will reduce or end state-supported terrorism. Those states involved in this form of warfare are unlikely to run out of committed fanatics prepared to drive car bombs into buildings simply because the United States has made it dangerous to be a terrorist.

The way to fight state-supported terrorism, like the kidnaping of innocent American citizens such as Rev. Benjamin Weir and the sheltering of those who murdered our AID officials in Teheran, is to make it painful for the states involved to engage in this form of warfare.

I have introduced a bill, H.R. 725, which would give the President clear legal authority to embargo products from any nation that provides training, logistical support, or de facto sanctuary to those committing terrorist attacks on U.S. citizens. Without my bill, we will continue to take such contradictory actions as train counterterrorists for preemptive attacks while importing over $700 million from Iran, as we did in 1984.●

BALANCE SHEET: MARTIN AND VALERIE FROST

HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. FROST. Mr. Speaker, I am inserting in the CONGRESSIONAL RECORD a balance sheet for my wife, Valerie, and me for the year 1984.

Because the required financial disclosure of the House does not go into much detail, I am voluntarily providing this additional information.

The financial statement follows:

BALANCE SHEET: MARTIN AND VALERIE FROST

As of 31 December 1984

	Amount
Assets:	
Checking account, First National Bank of De Soto	$1,173.11
Condominium, Dallas, TX	47,500.00
House and Lot, Arlington, VA	185,000.00
Home furnishings and other personal effects	35,000.00
Savings, Wright Patman Federal Credit Union	285.07
Checking account, Wright Patman Federal Credit Union	1,636.29
Retirement, U.S. Congress	30,131.04
IRA's, (Martin and Valerie)	4,900.00
Washington Fringe Benefit Investment Club (Valerie)	2,500.00
Subtotal	308,125.51
Automobiles:	
1979 Chevrolet Chevette	1,600.00
1971 AMC Gremlin	100.00
1984 Toyota Van	8,950.00
1984 Starcraft Pop-Up Trailer	5,000.00
Subtotal	15,650.00
Stocks and Bonds:	
200 Shares Anchor Hocking	$4,175.00
413 Shares Central and Southwest	9,240.88
362 Shares Exxon	16,018.50
100 Shares Federated Department Store	5,187.50
90 Shares General Motors	6,795.00
116 Shares Greyhound	2,885.00
179 Shares Houston Industries	3,960.38
66 Shares Eli Lilly	4,290.00
71 Shares Texaco	2,387.00
82 Shares Texas Eastern Corporation	2,378.00
52 Shares Texas Utilities	1,322.50
54 Shares Mobil	1,377.00
5 Shares Ohio Edison	66.25
16 Shares Southern Company	292.00
358 Shares Westinghouse	9,263.25
27 Shares Ensearch	546.75
34 Shares IBM	4,071.50
629 Shares Fundamental Investors	7,340.43
223 Shares Massachusetts Investors Trust	2,406.17
217 Shares Wellington Fund	2,630.04
139 Shares Eaton & Howard Balanced Fund	952.54
U.S. Savings Bonds	300.00
Subtotal	87,886.47
Total assets	411,661.98
Liabilities:	
Mortgage:	
Alpha Mortgage Corporation (Dallas Concominium)	37,500.00
Northern Virginia Savings & Loan (Arlington Residence)	135,00.00
Subtotal	172,500.00
Installments Loans:	
Open Charge Accounts (Balance)	1,000.00
Wright Patman Federal Credit Union (Automobile)	9,063.07
Subtotal	10,063.00
Total liabilities	182,563.07
Net Worth:	
Total assets	411,661.98
Total liabilities	182,563.07
Total net worth	229,098.91

A TRIBUTE TO EAGLE SCOUT JOSEPH LYZNIAK

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. LIPINSKI. Mr. Speaker, I rise today to recognize an outstanding young man from the Fifth Congressional District of Illinois, Joseph Lyzniak. I am pleased to bring Joe to the attention of my colleagues since he has been chosen for promotion to the rank of Eagle Scout at a ceremony on June 1, 1985, at Our Lady of Good Counsel Church in Chicago.

After advancing through Cub Scouts and obtaining the Arrow of Light, Cub Scouting's highest achievement, Joseph joined troop 414 at its inception in October 1980. In earning the rank of Eagle Scout, Joe has obtained 9 skill awards, 26 merit badges, and numerous other scouting honors, including election into the Order of the Arrow. For his Eagle service project, Joe organized and conducted a toy drive for the handicapped children at the Misericordia Home for the Children, and with his fellow Scouts held a Christmas party for them. During his tenure with troop 414, Joe has attended three summer camps at the Owasippe Scout Reservation; two high adventure trips at the Philmont Scout Ranch in Cimmaron, NM, and at the Florida Sea Base in Islamorada, FL; has attended numerous hikes, campouts, and other Scouting activities and this summer will participate in a high adventure canoe trip out of Ely, MN.

Joe is presently serving as the troop's librarian and has also served in various leadership positions including senior patrol leader, patrol leader, assistant senior patrol leader, and as a member of the troop's leadership corps. A fine and active student at Quigley South High School, Joe is considering entering college at the University of Illinois in Champaign-Urbana.

Mr. Speaker, I deem it a great honor to join with the residents of the Fifth Congressional District in congratulating Joseph Lyzniak on the occasion of his obtaining the rank of Eagle Scout. Joe has demonstrated that he is an outstanding Scout, community member, student, and American citizen. I ask my colleagues to please join with me in wishing him every success in the future.●

THE RETIREMENT OF WARREN KNOWLES

HON. JIM MOODY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. MOODY. Mr. Speaker, I would like to pay tribute to a constituent whose life and work has been one of exemplary service to his State and community. That person is Warren Knowles, former Governor of Wisconsin who is now retiring from a distinguished career in banking.

Warren Knowles served the people of Wisconsin as a public official for 31 years, beginning with his election to the State senate in 1940. His distinguished political career included 15 years in the State senate, 10 of which were as Republican majority leader. In 1954 he was elected Lieutenant Governor of Wisconsin, a post to which he was again elected in 1960. In 1964 he

was elected Governor, a position he served in distinction until his retirement from political office at the end of this third term in 1970. He then joined the Heritage Bank of Wisconsin, serving as a chairman of the board.

Warren Knowles' career of service to the public at large extends far beyond the elected offices he held. He served on the boards of many civic and professional organizations, including the Leukemia Society of Wisconsin, the Milwaukee Athletes for Childhood Cancer, and the Medical College of Wisconsin. He has been awarded honorary degrees from eight colleges and universities, and has received many special awards and honors. A State park and a forest have been named after him.

Although Mr. Knowles and I belong to different political parties, I have always admired him as a symbol of the kind of selfless public service that serves as a model to all of us who hold the public trust.

This month Warren Knowles is now retiring from his current position as chairman of the board of Heritage Wisconsin Corp. However, I am certain that his generous contributions to the good of the State of Wisconsin and its people will continue for many years to come. I join many other admirers in extending best wishes and congratulations.●

ALONZO GARCELON ELECTED PRESIDENT OF THE NATIONAL RIFLE ASSOCIATION

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Ms. SNOWE. Mr. Speaker, I would like to share with my colleagues two articles which appeared in recent editions of the Bangor Daily News and the Kennebec Journal concerning the achievements of Dr. Alonzo Garcelon of Augusta, ME.

A dentist by profession, Dr. Garcelon has dedicated limitless hours to promoting the rights of sportsmen in Maine and across the Nation. This summer the Augusta-Windsor Wildlife Area, a 3,000-acre area representing some of the finest upland and marsh habitat in that area of the State of Maine, will be dedicated in his name.

Dr. Garcelon received an honor of equal value recently when he was unanimously elected president of the National Rifle Association of America. Prior to this election, Dr. Garcelon had served on the association's board of directors for 21 years, and had most recently served as the NRA's first vice president.

I extend my sincere congratulations to Dr. Garcelon and I commend my colleagues the following newspaper articles about this fine Maine sportsman.

[From the Bangor Daily News, Apr. 30, 1985]

DR. GARCELON ELECTED NEW NRA PRESIDENT

SEATTLE.—An Augusta man was unanimously elected president of the National Rifle Association of America by its board of directors at the association's 114th annual meeting in Seattle.

A champion marksman and pro-gun activist, Dr. Alonzo H. Garcelon, DDS, accepted his position at the annual meeting which ended Sunday and said that he would work as a catalyst for promoting the goals of the association.

For the NRA, Garcelon said he would seek "fair coverage by the media, recruitment of millions of hunters as members, the raising of new generations of gun owners and hunters, and reaching the group which numbers more than 50 percent of all voters . . . the women of America."

A patron member of the NRA, Garcelon has served on its board of directors for 21 years. From 1981–83 he served as the NRA's second vice president and then as its first vice president until his election as president.

An active advocate of sportsmen's causes, in 1983 Garcelon led a successful fight against a proposed ban on moose hunting. The moose referendum was defeated by a margin of 60 to 39 percent.

Garcelon is also the co-founder and first president of the Sportsman's Alliance of Maine, and in 1978, three years after SAM was founded, he was named its honorary president for life. He is also an honorary president for life of the Maine Rifle and Pistol Association.

The state of Maine recently honored Garcelon for his accomplishments as a pro-hunter by deducating a state wild-life management area in his name.

Garcelon is an accomplished competitive marksman as he was the National Champion Bench Rest Shooter in 1965. Director of the Eastern Region for the National Bench Rest Shooter's Association from 1965–66, Garcelon was elected its president for a one-year term in 1967.

In 1970, Garcelon was elected first president of the International Bench Rest Shooter's Association and was named honorary president for life in 1972. The following year, he became a world record holder in bench rest shooting.

Other honors Garcelon has achieved and posts he has served include: executive committee member for the Secretary of the U.S. Army; director of Civilian Marksmanship; a member of the National Board for Promotion of Rifle Practice; chairman of the Advisory Council, Maine Department of Inland Fisheries and Game; co-founder and vice president of the National Resources Council of Maine, an affiliate of the National Wildlife Federation; and honorary president for life of the Pine Tree (Maine) Rifle and Pistol Association.

Garcelon is also a life member of numerous outdoor sporting clubs which include: the Hampden Rifle and Pistol Club; the New Hampshire State Rifle and Pistol Association; the Maine Bird Dog Club, and the Tri City Pistol Club, of which he is past president.

A public and private health dentist, Garcelon was a member of the Executive Committee, Maine Dental Association for 24 years and is past president of the Maine Dental Association and Board of Dental Examiners.

[From the Kennebec Journal, Augusta, ME, Apr. 17, 1985]

GARCELON HONORED FOR EFFORTS

(By Gene Letourneau)

Dr. Alonzo H. Garcelon of Augusta, whose efforts on the part of sportsmen for more than 30 years have been limitless, will be honored soon when the Augusta-Windsor Wildlife Management area is dedicated in his name.

The cause of sportsmen and the natural resources of Maine always have been foremost in any undertaking by Garcelon. As a vice president of the National Rifle Association, former chairman of the Advisory Council to the Fisheries-Wildlife Department Garcelon led the way to the preservation of sportsmen heritage rights. His efforts in both the right to bear arms afield and to preserve the sport of hunting are well known. He took an initiative role in the campaign which led to the defeat of the referendum aimed at preventing an open season on moose.

Commissioner Glenn H. Manuel personally informed Garcelon of the decision to name the area in his honor.

Manuel wrote: "Our association traces back a good number of years to when I was in the legislature and you were chairman of the department's advisory council. And, of course, we both have served the people of Maine, the state's sportsmen and the fisheries and wildlife resources in a number of other capacities, both before and since those times.

"As with any other two individuals with interests and responsibilities in fish and game matters, there have been times when we took opposite positions on specific issues but never have I doubted that we were always striving for the same basic goals, to make Maine a better place for sportsmen to live and to visit and to realize the optimum management of our wild resources within the means available to us.

"Very few, if any, individuals have maintained such a high level of commitment to these goals for as long as you have.

"At a ceremony this spring or summer we will dedicate the so-called Augusta-Windsor Wildlife Management area in your name. Situated partly in your home city, the two tracts that comprise this 3000-acre area represent some of the finest upland and marsh habitat in this part of the state.

"I feel this represents a fitting tribute bonus to make in recognition of your many contributions toward preserving Maine's rich sporting heritage—one that you will be able to enjoy personally within a drive of only a few miles from your home."

The last time we chatted with Garcelon was when we met him and longtime hunting friend, Dr. Dean Fisher, retired head of the Maine Human Services Department, on a remote, on-land road in the Blanchard area. They were hunting birds, had not seen very many, got none, but they were having a wonderful time, just being out in the open.

Garcelon bemoaned the death of a Blackfield Pointer he had kept for many years for Ed Muskie, former Maine governor, U.S. Senator, Secretary of State. While on different sides of the political fence, their views on Maine's outdoors always have been focused on one objective—to make it better.

Dedicating the Augusta wildlife management area to Garcelon is a tribute well deserved.●

PERSONAL EXPLANATION

HON. TOM LEWIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. LEWIS of Florida. Mr. Speaker, on Wednesday, May 15, due to official business, I was unavoidably absent during roll call No. 117. Had I been present, I would have voted "yea."●

BUDGET CUTS TO FURTHER DISABLE THE BLIND

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. RANGEL. Mr. Speaker, is there no end to the cruel and inhumane treatment that this administration wants to inflict on the poor, and handicapped poor of this country? The proposed budget by this administration would eliminate the free National Library Service for the Blind. A vital service that provides reading materials to 625,000 of the sightless. A vital service that provides reading materials which links the sightless to the rest of the world.

The budgets of all administrations, Democratic and Republican, liberal and conservatives have provided this service since 1899, through regional libraries. Braille literature is bulky, and postage is more expensive to mail than printed materials. Thirty-seven percent of these users have annual incomes under $5,000. For example, a copy of the National Geographic, at regular rates, would cost $1.82. Gone With The Wind would require $20 to mail; costs that their meager incomes would not permit.

For 72 years Mr. Reagan has had the gift of sight which has given him complete access to the universe. Has he and his budget cronies become so callous and insensitive to those who are less fortunate than they, that they would cut a program that cost $60.80 per year for each user?●

THE "JUSTICE" DEPARTMENT

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. HUBBARD. Mr. Speaker, the Los Angeles Times and the Washington Post last Friday reported that "top Justice Department officials" are "concerned that an indictment of Teamsters Union President Jackie Presser might damage the FBI's reliance on informants."

The Justice Department continues to delay any decision on the Cleveland, OH, Federal prosecutors 100-page recommendation that Mr. Presser be indicted in a union payroll-padding case, according to the newspapers' accounts.

"FBI concerns could derail the recommended indictment," according to the two newspapers.

Quoting two paragraphs from last Friday's Los Angeles and Washington newspapers:

> The sources, who spoke on condition they not be identified, said Cleveland strike force attorneys Steven R. Olah and Stephen H. Jigger have been told by their superiors at the Justice Department to learn how valuable Presser has been to the FBI as an informant and whether he is still cooperating with the bureau.
>
> The Presser investigation continues to present political problems for President Reagan's top appointees at the Department of Justice because Presser has been Reagan's chief supporter in organized labor.

Obviously, yes, the U.S. Justice Department is weighing carefully the political ramifications as to whether or not an indictment of Teamsters Union President Jackie Presser is soon pushed forward or delayed further or stopped.

Those Americans who are familiar with the U.S. Justice Department know it is the most politically conscious and politically active agency in the Federal Government.

The Justice Department's 3-year investigation of allegations that Mr. Presser fraudulently approved payment of more than $250,000 from the treasury of his hometown Cleveland local to associates who performed no work for the union is another reminder of just how our "Justice" Department operates.●

MINORITIES AND WOMEN GET HELP IN TELECOMMUNICATIONS

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. LELAND. Mr. Speaker, as a member of the House Subcommittee on Telecommunications, Consumer Protection and Finance, I long have been an advocate of measures designed to increase the representation of minorities and women in the telecommunications industries. Recently, at the National Association of Broadcasters Convention, I had the opportunity to view voluntary efforts by the broadcasting industry aimed at increasing opportunities for minorities in that industry.

Last year, the NAB introduced the Minority Television Programming Exhibition as a continuing component of its annual convention. The MTPE provides minority programmers an opportunity and a forum to demonstrate their wares to broadcast station owners, general managers, and others who purchase programming. More than 20 minority firms had the unique opportunity to market their product to decisionmakers, and to discuss program production with experts. The MTPE also provided representatives of the broadcast industry an opportunity to review programming from nontraditional sources.

For the past several years, the NAB also has sponsored a minority employment clearinghouse. The clearinghouse attempts to place minorities and women in broadcast jobs. According to the NAB, over the past 10 years, more than 300 minorities have obtained jobs through this service.

Some years ago, the NAB, in conjunction with minorities in the communications industry, created the Broadcast Capital Fund, Inc., or Broadcap. Broadcap is an industry sponsored fund that provides financial assistance for minorities seeking ownership of broadcast stations. To date, approximately 17 minority owned broadcast stations have received funding from Broadcap.

I commend the NAB for these efforts. This Nation has a long way to go before minorities or women reach full parity in the communications industries, but efforts such as the MTPE, Broadcap, and the minority employment clearinghouse are positive steps in the right direction. I challenge the broadcasting industry to continue and enhance its efforts, and I challenge other industries to initiate similar programs. Working together, the private and public sectors can provide greater opportunity for minorities in communications.●

MR. ROBERT DAIS HONORED

HON. GENE CHAPPIE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. CHAPPIE. Mr. Speaker, I would like to take this opportunity, on behalf of the people of Siskiyou County, CA, to pay our highest tributes to our good friend, Robert Dais.

For some 37 years, Robert Dais has dedicated himself to education in Siskiyou County. On June 1, 1985, he will retire after having served as county superintendent of schools since 1972.

Mr. Speaker, as an educator and administrator, Robert Dais has been the driving force behind an educational system of distinction in Siskiyou County. Under his leadership, the county has moved to the forefront of the California education system in terms of innovative programs, solid funding initiatives and quality teaching.

Born and raised in Siskiyou County, Robert Dais was educated in the local

school system and received his masters degree in school administration from California State University at Chico.

Robert began his career at the McCloud Union Elementary School in 1948. In 1954, he was brought into the Siskiyou County superintendent's office as an elementary consultant. Moving through the ranks, Robert was appointed county superintendent of schools in 1972 and has been successfully reelected for three terms.

During his tenure as superintendent, Robert served 7 years on the California State Council of Education and was State chairman of the Teachers Rights and Responsibilities Committee for 4 years.

Robert Dais has been largely responsible for preserving the continuance of timber receipts for school districts in California and also established the first vocational regional occupational program for junior and senior students in Siskiyou County high schools.

Mr. Speaker, we owe a great deal to this fine man. Robert Dais has dedicated his whole life to ensuring that our children receive only the finest education. Through his efforts, the education system in Siskiyou County has grown and flourished to a position of stature and excellence.

Mr. Speaker, we shall miss Robert Dais. We shall miss his wisdom and judgement, and his commitment to our children. However, on the occasion of his retirement we have only joy and gratitude for his caring efforts on our behalf. The people of Siskiyou County want to say thanks.●

GALA DEDICATION OF EL CAMINO CONVALESCENT HOSPITAL PHOTOGRAPH GALLERY

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. MATSUI. Mr. Speaker, I rise to call to the attention of my colleagues a marvelous and novel project undertaken by the El Camino Convalescent Hospital in Sacramento, CA. Guided by the leadership of the resident council, the hospital has recently unveiled a photograph collection known as the "Gallery of Fame." The gallery contains over 200 framed and autographed photographs of the resident's favorite personalities from the worlds of government, athletics, religion, motion pictures, and television.

This wonderful project would not have been made possible without the public-spirited support of the Sacramento community. Individuals and businesses assisted the residents of the convalescent hospital in acquiring and framing the photographs.

I commend the residents of the El Camino Convalescent Hospital for bringing a marvelous addition to our community; one which can be appreciated and enjoyed by all.●

THE 40TH ANNIVERSARY OF AIRLIFT INTERNATIONAL, INC.

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. LEHMAN of Florida. Mr. Speaker, on May 25, 1945, John Paul Riddle, a pilot and flight instructor, incorporated a small commercial airlines based in Coral, Gables, FL. On Saturday, May 25, 1985, the company Riddle founded, now called Airlift International, Inc., observes its 40th anniversary—and Mr. Riddle's 84th birthday—at a celebration to be held at its facilities at Miami International Airport.

This happy event has special significance for the dedicated employees of Airlift, the company's talented general manager, Al Oliver, and corporate rebuilder Bill Seidle, who have overcome seemingly impossible financial, economic, and regulatory problems to keep the company's fleet of passenger and cargo aircraft in the air. It also has special significance for me personally, because John Paul Riddle taught me everything I know about piloting and maintaining aircraft over 40 years ago.

The history of this company is colorful and varied. Over the years, Airlift has flown passengers all over the world; carried newspapers from New York to south Florida for same-day delivery; flew support for construction of the distant early warning [DEW] system in Canada and Alaska; participated in the freedom flights that brought Cuban refugees to the United States; and operated aircraft for the United Nations in the Belgian Congo during the civil war there in 1962. Airlift also carried zoo animals from the jungles of Africa and South America to American zoos; American seeds to anxious farmers in India, Pakistan, and Bangladesh; plasma to flood victims; and oil well drilling machinery to the Amazon. The company currently provides extensive charter and air cargo service.

I would like to include for the RECORD the final paragraphs of a company history that help explain the important contribution of small airlines like Airlift in this Nation's air transportation network:

With all of this naturally, we have a cadre of the best trained pilots in the world today. We have an average of over 100 years of pilot experience in every cockpit. In all of these years and who knows how many millions of passenger miles, in everything from a DC-3 to the Stretch-8, we have yet to scratch our first passenger. Our aircraft, pilots and employees are an integral part of the United States CRAF Program, the Civilian Reserve Air Fleet, and are ready to respond to the needs of our county in time of war or any national emergency.

In an era of uncertainty in the aviation industry when no one can look ahead with any certainty into what the future holds, we can draw pride and satisfaction from this look into our past. Most of our pilots have 20 or more years of service with our Company, and during these 20 to 30 odd years, we have responded each and every time when our customers or our government have called on us. This was our duty and our destiny, and so it was fulfilled. Little else can be asked of a Company or its men.●

NATIONAL SCIENCE WEEK

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. WALGREN. Mr. Speaker, I am pleased that Congress passed a joint resolution to commemorate the week of May 12-18 as National Science Week and to emphasize the importance of science and technology to each of us every day of our lives. The primary audience of National Science Week is young people, and this is appropriate because today's youth must be prepared to live and work comfortably in the rapidly advancing technological society of tomorrow. The National Science Foundation, with the private sector support provided by GE, IBM, Du Pont, and Eastman Kodak, has provided the framework for National Science Week to harness the imagination and talent of hundreds of individuals, groups, and organizations across the Nation into a week-long series of local activities to increase the public's awareness and understanding of the enjoyment and importance of science and technology.

The response to this national initiative by students, teachers, scientists from universities and industry, and the public was enthusiastic. The National Science Foundation received notice of over 500 activities which are taking place across the Nation in celebration of National Science Week. Schools took field trips, museums showed special exhibits, professional organizations sponsored lectures, and businesses highlighted corporate science. There were teacher workshops, short story contests, visiting scientists at schools, open houses at research facilities, and special radio and television programs. In addition, the Governors of the States of Texas, Alabama, Georgia, Hawaii, New York, Michigan, New Jersey, Kentucky, and Wyoming issued proclamations declaring May 12-18 as National Science Week.

Science and technology are timely national concerns, and National Science Week provided us all with a

forum for recognizing their importance to this country.●

OIL IMPORTS ARE STEADILY INCREASING—IT WOULD BE FOOLISH TO LOWER AUTO EFFICIENCY STANDARDS

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. STARK. Mr. Speaker, last year 29 percent of our demand for liquid petroleum was met by foreign imports. This figure is projected to jump to 43 percent over the next 15 years. To put these numbers into more realistic terms—domestic production isn't keeping pace with demand. I might add, the numbers I cite are low. They are based on current oil production which is expected to decrease as demand strengthens through the 1980's.

At this rate, U.S. import dependence will return to the level just prior to the energy shock of the Iranian revolution. Rather than continuing progress in cutting energy dependence the U.S. is moving toward a dangerous new dependency on foreign oil imports. A few weeks ago the Wall Street Journal ran an article pointing out that the United States is once again losing ground on several fronts:

Imports of oil rose last year for the first time since 1979, augmented by a new flood of imported refined products.

U.S. oil companies are cutting back sharply on exploration needed to assure future domestic supplies.

The Strategic Petroleum Reserve, the huge U.S. Government stockpile of crude oil stored for an emergency, stands far short of its planned goal.

In light of all this I find it absolutely absurd that the administration would even consider requests by Ford and General Motors to lower the fuel mileage efficiency standards on new car fleets from 27.5 miles per gallon to 26 miles per gallon. Maintaining the standard will save millions of barrels per year. We cannot afford to do otherwise.

Further conservation remains a matter of urgency as well as sound economics. I encourage Members to cosponsor my bill H.R. 1425 which removes the administration's authority to lower the standard, holding it at 27.5 miles per gallon—a figure Chrysler and others have achieved.●

CUBAN INDEPENDENCE DAY: THE SPIRIT OF JOSE MARTI LIVES ON

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 20, 1985

● Mr. FASCELL. Mr. Speaker, today is Cuban Independence Day, a day of great pride and hope for the Cuban people. Today is a very special day, indeed, for it also marks the initiation of Radio Marti, radio broadcasting of the voice of freedom and liberty to the people of Cuba.

Cuba has known the spirit of liberty—the spirit of the great Cuban patriot, Jose Marti. Freedom to think, freedom to speak, safe from reprisals by governments, political parties, or any who would impose their will. That is what Jose Marti fought for and that is the goal and meaning of Radio Marti. On this, the first day of Radio Marti broadcasts, the free people of the United States renew their commitment to the goals shared by freedom loving people everywhere, the common goals held by Washington, Jefferson, Bolivar, and Marti.

We in the United States look forward to that day when every station in Cuba reflects the heritage of Marti, a commitment to seek truth from the clash of ideals, freely expressed and unfettered by party ideology or state dogma. On this day of independence, we salute the Cuban people. We trust that the day will come again when we can stand together in the light of liberty which is our common heritage.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, May 21, 1985, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MAY 22

9:30 a.m.

Energy and Natural Resources

Business meeting, to resume consideration of S. 979, to extend the expiration date of titles I and II of the Energy Policy and Conservation Act, and other pending calendar business.

SD-366

Judiciary

Criminal Law Subcommittee

To hold hearings on S. 605, to clarify certain provisions of the National Stolen Property Act as applied to imported archeological and ethnological materials.

SD-226

10:00 a.m.

Agriculture, Nutrition, and Forestry

Business meeting, to mark up S. 501 and S. 616, bills to expand export markets for United States agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, and continue low-income food assistance programs, and related measures.

SR-328A

Appropriations

District of Columbia Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1986 for the District of Columbia government.

SD-138

Banking, Housing, and Urban Affairs

To resume hearings on recent changes in the financial services industry.

SD-538

Environment and Public Works

To hold hearings on the nomination of Francis S. Blake, of Maryland, to be Assistant Administrator (General Counsel) of the Environmental Protection Agency.

SD-406

Foreign Relations

To resume hearings on American policy toward South Africa.

SD-419

Governmental Affairs

Civil Service, Post Office, and General Services Subcommittee

To hold oversight hearings on a General Accounting Office report on Federal pay equity and classification system.

SD-342

Joint Economic

Agriculture and Transportation Subcommittee

To resume hearings to review economic problems in rural areas, focusing on rural community services, education, and health care.

SD-562

10:30 a.m.

Judiciary

Juvenile Justice Subcommittee

To hold oversight hearings to examine the scope of missing children.

SD-215

11:00 a.m.

Labor and Human Resources

To hold hearings on S. 797, the Youth Employment Opportunity Wage Act of 1985.

SD-430

2:00 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for Naval Petroleum Reserves, and fossil energy.
SD-138

Governmental Affairs
Intergovernmental Relations Subcommittee
To hold hearings on S. 765, to provide for coordinated management and rehabilitation of the Great Lakes.
SD-342

Judiciary
To hold hearings on pending nominations.
SD-226

Small Business
Small Business: Family Farm Subcommittee
To hold hearings on small issue industrial development bonds as a source of capital for small business expansion.
SD-428A

MAY 23

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on S. 586, to provide for the review of certain authority in awarding international airline route certificates issued under the Federal Aviation Act.
SR-253

Governmental Affairs
Oversight of Government Management Subcommittee
To hold hearings on S. 1134, to permit Federal agencies to impose monetary penalties on individuals or companies which submit false claims to the government.
SD-342

Labor and Human Resources
Handicapped Subcommittee
Business meeting, to mark up S. 415, to clarify the intent of Congress to protect the educational rights of handicapped children, and S. 974, to provide for protection and advocacy for mentally ill persons.
SR-428A

10:00 a.m.
Agriculture, Nutrition, and Forestry
Business meeting, to mark up S. 501 and S. 616, bills to expand export markets for United States agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, and continue low-income food assistance programs, and related measures.
SR-328A

Foreign Relations
To hold hearings on the nominations of Douglas W. McMinn, of Virginia, to be an Assistant Secretary of State, and Abraham D. Sofaer, of New York, to be Legal Advisor of the Department of State.
SD-419

Governmental Affairs

Civil Service, Post Office, and General Services Subcommittee
To continue oversight hearings on a General Accounting Office report on Federal pay equity and classification system.
SD-138

Judiciary
Business meeting, to consider pending calendar business.
SD-226

Labor and Human Resources
Children, Family, Drugs, and Alcoholism Subcommittee
To hold hearings on efforts to locate missing children.
SD-430

10:15 a.m.
Environment and Public Works
To hold hearings on proposed legislation to ban lead pipes and lead solder in drinking water systems.
SD-406

4:00 p.m.
Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

MAY 24

9:30 a.m.
Banking, Housing, and Urban Affairs
International Finance and Monetary Policy Subcommittee
To hold hearings on S. 635, to express opposition of the United States to the system of apartheid in South Africa by prohibiting new U.S. bank loans to the Government of South Africa, prohibiting investment by U.S. firms in South Africa, prohibiting the importation of South African gold coins into the United States, and forbidding the sale of computers to the Government of South Africa.
SD-538

JUNE 3

9:30 a.m.
Finance
Health Subcommittee
To hold hearings on proposed legislation to modify the Medicare direct medical education pass-through.
SD-215

JUNE 4

9:30 a.m.
Energy and Natural Resources
Energy Regulation and Conservation Subcommittee
To hold oversight hearings on the impact of imported petroleum products on the domestic petroleum industry.
SD-366

10:00 a.m.
Foreign Relations
Business meeting, to consider pending calendar business.
SD-419

2:00 p.m.
Labor and Human Resources
To hold hearings on the nomination of Gary L. Bauer, of Virginia, to be Under Secretary of Education.
SD-430

JUNE 5

9:30 a.m.
Finance
To hold hearings on S. 814, to make technical corrections to certain provisions of the Tax Reform Act of 1984, and proposed technical corrections to the Retirement Equity Act (P.L. 98-397).
SD-215

Labor and Human Resources
To hold hearings on drug export reform.
SD-430

JUNE 6

9:30 a.m.
Energy and Natural Resources
Natural Resources Development and Production Subcommittee
To hold oversight hearings on the impact of coal imports on the domestic coal industry.
SD-366

JUNE 10

2:00 p.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To resume oversight hearings on proposed budget requests for fiscal year 1986 for programs of the Department of Energy, focusing on fossil energy programs.
SD-366

JUNE 11

9:30 a.m.
Environment and Public Works
Nuclear Regulation Subcommittee
To hold joint hearings with the Committee on Labor and Human Resources on the implementation of the Orphan Drug Act (P.L. 97-414), focusing on section 7(b) relating to radiation-cancer liability.
SD-430

Labor and Human Resources
To hold joint hearings with the Committee on Environment and Public Works' Subcommittee on Nuclear Regulation on the implementation of the Orphan Drug Act (P.L. 97-414), focusing on section 7(b) relating to radiation-cancer liability.
SD-430

Labor and Human Resources
Handicapped Subcommittee
To hold oversight hearings on administrative activities of Gallaudet College and the National Technical Institute for the Deaf.
SR-428A

10:00 a.m.
Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 403, to revise requirements with respect to the issuance of licenses for existing hydroelectric facilities, and S. 426, to provide for more protection to electric consumers.
SD-366

JUNE 12

9:00 a.m.
Office of Technology Assessment
The Board, to hold a general business meeting.
EF-100, Capitol

9:30 a.m.
Environment and Public Works
Nuclear Regulation Subcommittee
To continue joint hearings with the Committee on Labor and Human Resources on the implementation of the Orphan Drug Act (P.L. 97-414), focusing on section 7(b) relating to radiation-cancer liability.
SD-430

Labor and Human Resources
To continue joint hearings with the Committee on Environment and Public Works' Subcommittee on Nuclear Regulation on the implementation of the Orphan Drug Act (P.L. 97-

414), focusing on section 7(b) relating to radiation-cancer liability.
SD-430

Rules and Administration
To hold hearings on the nomination of Ralph E. Kennickell, Jr., of Virginia, to be Public Printer.
SR-301

JUNE 13

9:30 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
SR-253

Labor and Human Resources
Labor Subcommittee
To hold hearings on S. 1105, to reform the Walsh-Healey Act to allow Federal contractors in the private sector to work flextime hours.
SD-628

JUNE 14

9:30 a.m.
Finance
Health Subcommittee
To hold hearings on health promotion and disease prevention strategies for Medicare beneficiaries.
SD-215

JUNE 17

9:30 a.m.
Labor and Human Resources
To hold hearings on home health care reform.
SD-430

JUNE 18

9:30 a.m.
Energy and Natural Resources
Energy Regulation and Conservation Subcommittee
To hold oversight hearings on the current status of and factors affecting the natural gas market.
SD-366

Labor and Human Resources
To continue hearings on home health care reform.
SD-430

10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
SD-406

JUNE 19

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To hold hearings on proposed legislation authorizing funds for fiscal year 1986 for the National Endowment of the Arts and the National Endowment for the Humanities.
SD-430

JUNE 20

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To continue hearings on proposed legislation authorizing funds for fiscal year 1986 for the National Endowment of the Arts and the National Endowment for the Humanities.
SD-485

Labor and Human Resources
Children, Family, Drugs, and Alcoholism Subcommittee
To hold hearings to examine the problem of drugs in the military.
SD-430

JUNE 25

9:30 a.m.
Labor and Human Resources
To hold oversight hearings to examine certain barriers to adoption.
SD-430

10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
SD-406

JULY 10

9:30 a.m.
Labor and Human Resources
To resume oversight hearings to examine certain barriers to adoption.
SD-430

JULY 15

2:00 p.m.
Environment and Public Works
Regional and Community Development Subcommittee
To hold hearings to review the programs and policies of the Tennessee Valley Authority.
SD-406

JULY 16

9:30 a.m.
Labor and Human Resources
To hold oversight hearings to examine U.S. relations with the International Labor Organization (I.L.O.).
SD-430

10:00 a.m.
Environment and Public Works
Regional and Community Development Subcommittee
To continue hearings to review the programs and policies of the Tennessee Valley Authority.
SD-406

JULY 17

9:00 a.m.
Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

JULY 22

2:00 p.m.
Environment and Public Works
Regional and Community Development Subcommittee
To resume hearings to review the programs and policies of the Tennessee Valley Authority.
SD-406

JULY 31

9:30 a.m.
Labor and Human Resources
To hold hearings to examine certain barriers to health care.
SD-430

OCTOBER 1

11:00 a.m.
Veterans' Affairs
To hold hearings to review the legislative priorities of the American Legion.
SD-106

CANCELLATIONS

MAY 22

9:30 a.m.
